# LOOKING FOR POWER SUPPLIES? SPECIFY ACOPIAN,

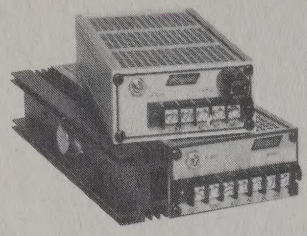
## 5V OR ±15V POWER FOR PCB'S

Mount these mini power modules, as small as 2.3" x 1.8" x 1.0", directly on printed circuit boards to save space and simplify wiring. Ratings at 5 volts from .250 to 2.5 amps; at ±15 volts from .025 to .5 amps. Short circuit protected. Prices start at $24. Guaranteed 3-day shipment.

Acopian

Corp., Easton, Pa. 18042 Tel: (215) 258-5441

## SUPPLIES THAT FIT IN THIN SPACES

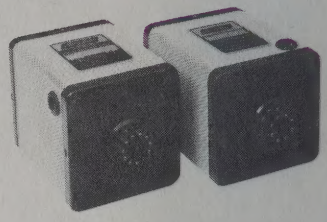


Measuring only 1.68" high, Acopian narrow profile power supplies fit where many others cannot. Available in a wide range of ratings from 1 to 150 volts, to 4 amps. Regulation to ±0.005%. Tracking dual output models for op amps also available. Guaranteed 3-day shipment.

Acopian

Corp., Easton, Pa. 18042 Tel: (215) 258-5441

## SINGLE, DUAL PLUG-IN POWER

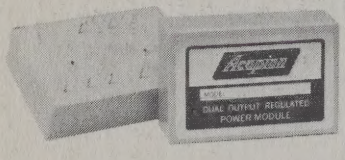


A plug-in power module can be installed in seconds. Simply plug it into a standard octal-type socket. Single output models from 1 to 200 volts. Duals combining two matched or dissimilar outputs in one case available in over 10,000 combinations. Warranty: 5 years. Shipment: 3 days.

Acopian

Corp., Easton, Pa. 18042 Tel: (215) 258-5441

## MULTIPLE VOLTAGES FOR PCB'S

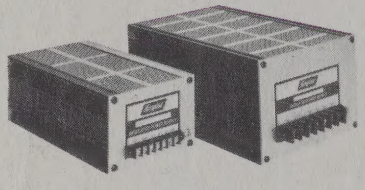


Simplify pc board layout with multiple output power mini's. Duals supply two isolated like or dissimilar outputs, 1 to 28 volts each. Op amp supplies provide ±12 or ±15 volts. Triples have two balanced, tracking outputs, a third for powering other circuits. Guaranteed 3-day shipment.

Acopian

Corp., Easton, Pa. 18042 Tel: (215) 258-5441

## GENERAL PURPOSE POWER

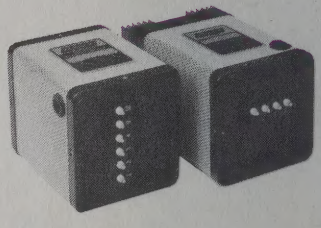


Series A offers premium performance, with regulation to ±0.005%, ripple of 0.25 mv maximum and electronic current limiting. Series B supplies provide a lower-cost approach, with regulation typically ±0.1%. Ratings to 200 volts, to 32 amps. Guaranteed 3-day shipment.

Acopian

Corp., Easton, Pa. 18042 Tel: (215) 258-5441

## SOLDER TERMINAL MODULES

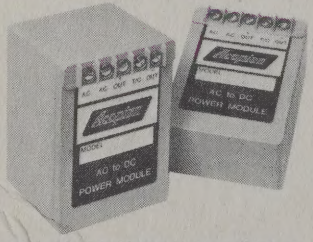


For applications where hard wiring is desired, Acopian offers modules with solder terminals. Included are single output models (regulated and unregulated) duals with two like or dissimilar voltages and high isolation supplies. Guaranteed 3-day shipment.

Acopian

Corp., Easton, Pa. 18042 Tel: (215) 258-5441

## POWER MINI'S FOR LOGIC OR OP AMPS

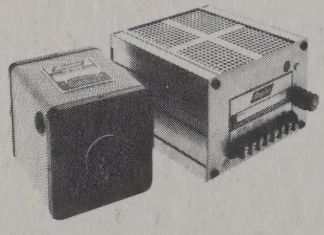


Terminal strip input/output connections on these miniature power modules eliminate the need for sockets or soldering. They mount in an area only 3.5" x 2.5". Ratings: 5 volt models to 2.5 amps, ±15 volts to .5 amps. Other models from 1 to 75 volts, all with 3-day shipment guaranteed.

Acopian

Corp., Easton, Pa. 18042 Tel: (215) 258-5441

## MATCHED OR DISSIMILAR DUAL OUTPUT

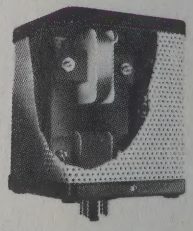


Select the combination of matched or dissimilar outputs that you require. Hundreds of ratings available, from 1.5 to 150 volts. Outputs are isolated, and may be used in the same or opposite polarities. Acopian's 3-day shipment promise applies for any combination.

Acopian

Corp., Easton, Pa. 18042 Tel: (215) 258-5441

## HIGHLY ISOLATED POWER



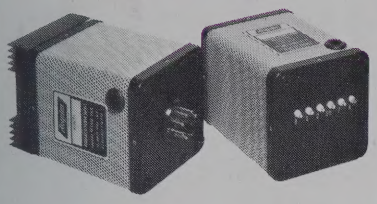
For applications requiring a power supply with unusually high isolation, such as for powering strain gage or other transducer circuits, Acopian offers models with ratings from 5 to 36 volts. Input-output isolation: 10,000 megohms minimum, 1 pF maximum. Guaranteed 3-day shipment.

Acopian

Corp., Easton, Pa. 18042 Tel: (215) 258-5441

# FAMOUS FOR 3-DAY SHIPMENTS . . . GUARANTEED

## MIL-TESTED PLUG-IN POWER



MIL-tested power supplies withstand unusually severe environmental conditions. These extended-temperature plug-in modules exceed MIL specs for humidity, altitude, vibration and shock. Hundreds of single output models, thousands of dual output combinations, all guaranteed for 3-day shipment.

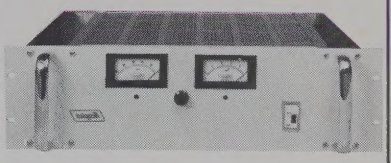
Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

## BENCHTOP POWER ...FROM $99

Reliable yet low-cost power supplies for circuit development and component evaluation. Single, dual and triple output models. Ratings from 0-7 to 0-50 volts. All have adjustable current limiting, coarse and fine voltage adjustments and two meters. They may be stacked to conserve bench space. Regulation, ±0.01% or 2 mv. Ripple, 0.25 mv rms.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

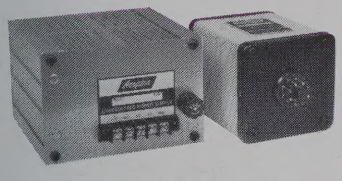
## RACK MOUNT POWER ...TO 60 AMPS



Designed for mounting in standard 19" RETMA cabinet racks, these power supplies are available in 76 different output ratings from 1 to 50 volts, and from 5 to 60 amps. Regulation, ±0.05% or better; ripple, 1 mv rms or better. Options include metering and overvoltage protection. Shipment, 9 days after receipt of your order.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

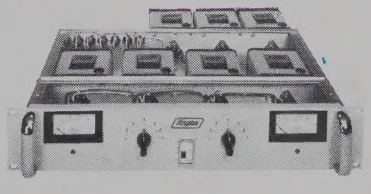
## POWER FOR RELAYS AND DISPLAYS



Drive relays, lamps, small motors and similar loads with low-cost Acopian unregulated power modules. Built-in fusing protects against overloads or shorts. Series U models use terminal strip connections. Plug-in modules mount in standard octal sockets; many have adjustable outputs. Guaranteed 3-day shipment.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

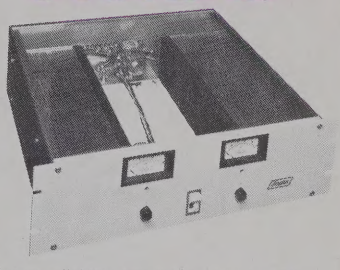
## NEED A POWER SYSTEM?



Order multiple output power systems without searching through a catalog, preparing mechanical layouts, item-by-item pricing and detailed purchase requisitions. Instead, call Acopian. We'll listen to your needs, quote a firm price, and then ship your built-to-order system, fully wired and tested, in just 9 days.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

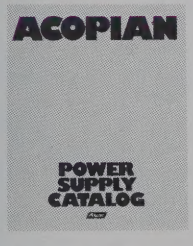
## REDUNDANT POWER SYSTEMS



Output reliability is maximized by including two power modules for each voltage. If either fails, the other will continue to provide an uninterrupted output. Ratings from 3.6 to 28 volts, to 32 amps. Shipment, 9 days after receipt of your order.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

## GUARANTEED 3 DAY SHIPMENT



Every power module listed in the Acopian catalog is shipped within 3 days of order. Guaranteed! Miniaturized supplies, narrow profile and plug-in modules, premium performance models, and a wide choice of other types are described in detail. Write for your copy or call toll free: (800) 523-9478.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

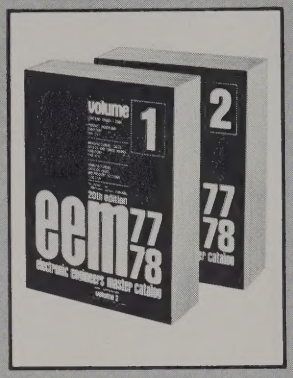
**See EEM pages 3165 to 3195, for detailed information about Acopian's broad line of power supplies and power systems.**

**Call Acopian toll free: (800) 523-9478**

# WE KNOW OUR STUFF

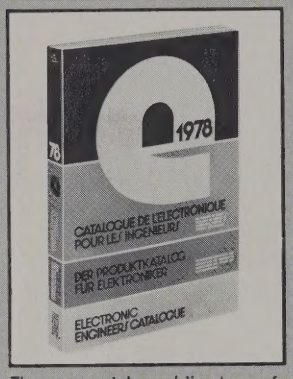
## 41 YEARS OF EXPERIENCE IN CATALOGING, 21 EDITIONS OF eem

### eem/ELECTRONIC ENGINEERS MASTER CATALOG —



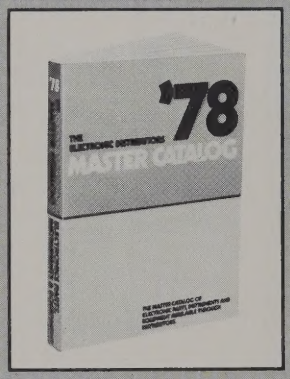
The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.

### ELECTRONIC ENGINEERS CATALOGUE



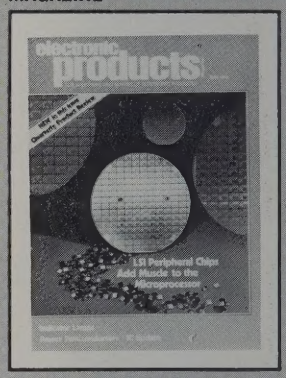
The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.

### ELECTRONIC DISTRIBUTORS MASTER CATALOG —



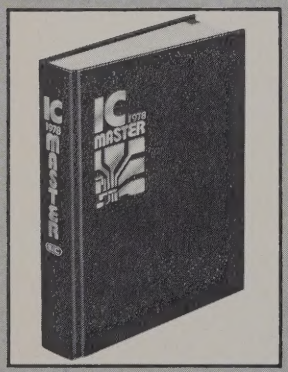
The only national catalog designed exclusively for distributors and their customers featuring electronic parts, instruments and equipment.

### ELECTRONIC PRODUCTS MAGAZINE —



The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

### IC MASTER AND THE UPDATES —



The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

### eem FILE SYSTEM —

The only filing system designed especially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

### UTP CUSTOM CATALOGS —

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

### UNITED COST AND PRICING SERVICES —

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

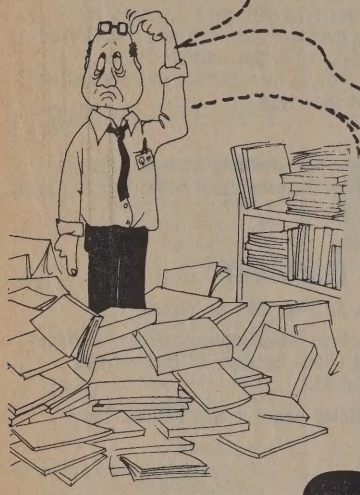
***What can I use to keep all the manufacturers' product data I receive in order?***

***What system makes filing or retrieving manufacturers' catalogs fast and easy?***



***Which file system have thousands of engineers purchased because they know it works?***

# eem FILE SYSTEM

## THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

**Here's how to order your eem FILE SYSTEM:**

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

## ALPHABETICAL INDEX OF DISTRIBUTOR ADVERTISEMENTS

Many of the manufacturers who catalog their products in this edition of eem/Electronic Engineers Master offer their products to you through electronic parts distributors. To aid you in locating supplies, the following progressive distributors have placed their advertisements in **eem.**

Distributors' line cards are shown in the white catalog section, pages 1001 through 4666. In addition, distributors emphasizing their ability to supply specific manufacturers' items in depth have placed advertisements near the manufacturers' own listing in the Manufacturers and Sales Offices Directory, pages 601 through 860.

For your convenience, many manufacturers have included listings of their electronic parts distributors immediately following their local sales offices in the Manufacturers' Directory..

**BARBEY ELECTRONICS** ..... 755, 783, 817, 4000
Reading, PA

**DIPLOMAT** ..... 1062, 1705, 2460, 2657,
Woodbury, NY 3441, 3696, 3884,
Farmington, MI 3922, 4018, 4553
Totowa, NJ
Elk Grove Village, IL
Chicopee Falls, MA
Minneapolis, MN
Mt. Laurel, NJ
Salt Lake City, UT
St. Louis, MO
Holliston, MA
Sunnyvale, CA
Clearwater, FL
Ft. Lauderdale, FL

**ELECTRIC SWITCHES, INC.** ..... 608, 621, 637,
Los Angeles, CA 643, 644, 679, 703, 729, 742, 756

**FAIRMONT ELECTRONIC SALES CORP.** ..... 1169
Plainview, NY

**FUSES UNLIMITED** ..... 639, 743
Chatsworth, CA

**GENESIS ELECTRONICS, INC.** .....1775
Subsidiary of Radio Distributing Co., Inc.
South Bend, IN
Dayton, OH
Cleveland, OH
Indianapolis, IN
Chicago, IL
St. Paul, MN

**LECTRONIX** ..... 745
St. Charles, MO

**MICROWAVE DISTRIBUTORS CO.** ..... 2875
Commack, NY

**PARTS MASTERS** ..... 1321
Wayne, NJ

**POCO SALES** ..... 709, 4258
Woodland Hills, CA

**ZACK ELECTRONICS** ..... 615, 619, 705,
San Francisco, CA 718, 748, 807
Palo Alto, CA

## THE ELECTRONIC DISTRIBUTORS PRICING BIBLE...

*NOW AVAILABLE TO YOU*

Electronic Parts Distributors must keep up-to-date on prices for the components they sell to you. Since 1949, they have depended on the United Pricing Reports to keep them constantly up-dated with accurate up-to-the-minute pricing information.

You can eliminate time-consuming searches, telephone calls and letters through a subscription to this same indispensable service.

Your Pricing Report will be complete and current. Over 400,000 electronic components are listed. Individual pages are there for each of more than 600 manufacturers selling through electronic parts distributors. His products are listed in alpha-numerical order to facilitate your immediate locating of pricing information.

Twice weekly you'll receive a 4-page industry newsletter including a summary of price changes. With this are replacement pages, clearly indicating price increases, decreases, new products and discontinued items.

Save time. Save bother. Save money. Turn to United Pricing Reports when you need today's accurate price information.

To subscribe, or for further information, contact:

Curt Glanville
United Pricing Reports

## MANUFACTURERS' INDEX TO CATALOG PAGES BY eem PRODUCT SECTION NUMBER

## THE FOLLOWING 43 eem PRODUCT SECTIONS MAKE UP UNITED TECHNICAL PUBLICATIONS' TIME-SAVING PRODUCT INFORMATION SYSTEM.

| Section | Description | Page No. |
|---|---|---|
| 1100 | Amplifier Assemblies | 1001 |
| 1300 | Audio Equipment & Accessories | 1010 |
| 1400 | Enclosures/Packaging Systems | 1022 |
| 1500 | Capacitors (All Types) | 1057 |
| 1600 | Chemicals/Cleaners/Coatings/Materials | 1290 |
| 1700 | Circuit Boards & Assemblies/Breadboarding Kits | 1295 |
| 1800 | Coils & Chokes/Assemblies/Forms | 1322 |
| 1900 | Communications/Telemetering Equipment | 1370 |
| 2000 | Computing, Data Handling Equipment & Accessories | 1381 |
| 2100 | Connectors, Terminals, Sockets, etc. | 1676 |
| 2200 | Control Systems & Components | 2256 |
| 2300 | Crystals/Oscillators/Crystal Filters | 2280 |
| 2350 | Delay Lines | 2379 |
| 2400 | Panel Components (excluding Lighting & Displays) | 2418 |
| 2450 | Displays & Readouts (including Lamps & Lights) | 2457 |
| 2500 | Mechanical Components (Bearings, Cores, Magnets, etc.) | 2552 |
| 2550 | Environmental Test Equipment | 2570 |
| 2600 | Fans/Blowers/Cooling Equipment | 2576 |
| 2700 | Filters (excluding Crystal) | 2610 |
| 2800 | Hardware (Non-Current Carrying) | 2660 |
| 2900 | Instruments, Measuring & Test | 2661 |
| 3000 | Instruments, Graphic Recording | 2838 |
| 3100 | Insulators/Insulation | 2847 |
| 3130 | Integrated Circuits & Hybrids | 2851 |
| 3400 | Microwave Systems & Subsystems | 2861 |
| 3450 | Microwave Components & Accessories | 2865 |
| 3500 | Motor & Drives | 3069 |
| 3700 | Electro-Optical Components & Accessories | 3132 |
| 4000 | DC Power Sources | 3150 |
| 4050 | AC Power Sources | 3354 |
| 4100 | Production Equipment/Manufacturing Services | 3408 |
| 4500 | Relays & Solenoids | 3411 |
| 4700 | Resistors, Fixed | 3626 |
| 4750 | Resistors, Variable | 3783 |
| 4800 | Semiconductors | 3919 |
| 4900 | Servomechanisms | 3974 |
| 5100 | Switches/Keyboards/Protective Components | 3978 |
| 5300 | Thermocouples, Elements & Accessories | 4270 |
| 5400 | Tools (Hand & Power)/Soldering Supplies | 4287 |
| 5500 | Transducers | 4298 |
| 5600 | Transformers | 4325 |
| 5700 | Tubes & Tube Parts | 4459 |
| 6000 | Wire/Cable/Harnesses & Accessories | 4464 |

## HERE ARE THE MANUFACTURERS WHOSE CATALOG PAGES APPEAR IN EACH OF THE eem PRODUCT SECTIONS. TO LOCATE SPECIFIC PRODUCTS REFER TO THE PRODUCT INDEX AND DIRECTORY.

### eem PRODUCT SECTION 1100

**Amplifier Assemblies ..... 1001-1009**

- Amplifier Research Corp.
- Dynamics Div. Waugh Controls Corp.
- ENI
- Hope Electronics
- Ithaco, Inc.
- Preston Scientific, Inc.

### eem PRODUCT SECTION 1300

**Audio Equipment & Accessories ..... 1010-1021**

- Crown Industrial
- International Electro Magnetics, Inc.
- Lipps, Inc.
- Mallory Capacitor Co.
- Quam-Nichols Co.
- Star Micronics, Inc.

### eem PRODUCT SECTION 1400

**Enclosures/ Packaging Systems .. 1022-1056**

- Airpax Electronics
- Amco Engineering Co.
- Bivar, Inc.
- Buckeye Stamping Co.
- Chassis-Trak Div. General Devices Co., Inc.
- Compac
- Environmental Container Systems, Inc.
- Equipto Electronics Corp.
- Formica Metal Products Co.
- Interlok
- La France
- Optima Scientific-Atlanta
- Premier Metal Products Co.
- Skydyne
- Stantron Div. Wyco Metal Products
- Techmar Corp.
- Unitrack Div. Calabro Plastics
- Vector Electronic Co.
- Vent-Rak Div. General Devices Co., Inc.

### eem PRODUCT SECTION 1500

**Capacitors (All Types) 1057-1289**

- American Components, Inc.
- American Technical Ceramics
- Arco Electronics
- AVX Ceramics
- Axel Electronics, Inc.
- Capar Components Corp.
- Corning Glass Works
- Centre Engineering
- Cornell-Dubilier Electric Corp.
- Component Research Corp.
- Custom Electronics, Inc.
- Elpac
- F-Dyne Electronics Co.
- Fujitsu America, Inc.
- High Energy Corp.
- Illinois Capacitor, Inc.
- Iskra ISL Products Ltd.
- International Components Corp.
- ITT Components
- ITT Jennings
- Jackson Bros. (London) Ltd.
- Johanson Dielectrics
- Johanson Mfg.
- E. F. Johnson Co.
- Mallory Capacitor Co.
- Microplex
- Midwec
- Nytronics Components Group, Inc.
- Panasonic Electronic Components Div.
- PFC
- Republic Electronics Corp.
- Sangano Weston
- Semtech Corp.
- Soshin Electric Co., Ltd.
- Southern Electronics Co.
- Sprague Goodman
- Sprague Capacitors
- TRW Capacitors
- Union Carbide
- Varadyne Industries, Inc.
- Wesco Electrical Co.

### eem PRODUCT SECTION 1600

**Chemicals/Cleaners/Coatings/ Materials ..... 1290-1294**

- GC Electronics
- Hardman, Inc.
- Humiseal Div. Columbia Chase Corp.

## eem PRODUCT SECTION 1700

**Circuit Boards & Assemblies/ Forms ..... 1295-1321**

Applied Circuits, Inc.
Continental Specialties Corp.
The Datak Corp.
E & L Instruments, Inc.
United Wiring & Mfg. Co.
Vector Electronic Co.
Vero Electronics, Inc.

## eem PRODUCT SECTION 1800

**Coils & Chokes/Assemblies/ Forms ..... 1322-1369**

Bell Industries J. W. Miller Div.
Bourns
Caddell-Burns
Cramer Coil Div.
Dale Electronics, Inc.
Delevan American Precision Div.
Endicott Coil Co., Inc.
Harbison Industrial Products, Inc.
North Hills
Nytronics Components Group, Inc.
Syntronic Instruments, Inc.
Torotel, Inc.

## eem PRODUCT SECTION 1900

**Communications/Telemetering Equipment ..... 1370-1380**

Colorado Video, Inc.
GRN Corp.
Re-el Circuits, Inc.

## eem PRODUCT SECTION 2000

**Computing, Data Handling Equipment & Accessories ..... 1381-1675**

American Electronic Laboratories, Inc.
AMP, Inc.
Baldwin Electronics, Inc.
Burr-Brown
Chrono-Log Corp.
Computer Conversions Corp.
Control Sciences, Inc.
Datametrics
Data Specialties, Inc.
Data Translation, Inc.
D-B Developments
Datel Systems, Inc.
Digital Equipment Corp.
Dynatech Microsystems
GNT Automatic, Inc.
Hickok Electrical Instrument Co.
ILC Data Device Corp.
Information Transfer Industrial, Inc.
C. Itoh Electronics, Inc.
Interface Engineering, Inc.
Kessler-Ellis Products
Litton Encoder Div.
Matrix Corp.
Itek Measurements Systems
Natel Engineering Co., Inc.
Neff Instrument Corp.
North Atlantic Industries, Inc.
Practical Automation, Inc.
Phoenix Data, Inc.
Preston Scientific, Inc.
Sealectro Corp.
Taurus Corp.
Trak Systems Div. Trak Microwave Corp.
Transmagnetics, Inc.
Vernitech Div. of Vernitron Corp.

## eem PRODUCT SECTION 2100

**Connectors, Terminals, Sockets, etc. ..... 1676-2255**

Airborn, Inc.
Alden Products Co.
Allied Systems Corp.
AMP Inc.
Amphenol
Appleton Electronics Div.
Aries Electronics, Inc.

# ALCOLITE

**Subminiature indicators with built-in LEDs. Contemporary styling. Ribbed body provides "anti-turn" mounting. Use table for limiting resistor.**

**BLF-2 flasher has built-in IC that produces a light pulse 3 times per second. Requires 5 VDC @ 20mA peak or may be controlled by TTL and CMOS circuits.**

**DISCOUNT SCHEDULE**

X-FACTOR
For quantities over 24

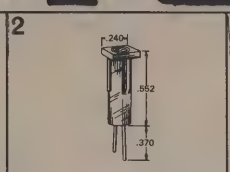
| | | |
|---|---|---|
| 25-99 | Multiply by | .80 |
| 100-499 | Multiply by | .72 |
| 500-Over | Multiply by | .64 |

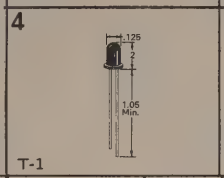
■ Select the indicator body style to fit your applicational needs. Each type is available in either Red or Green as listed below.

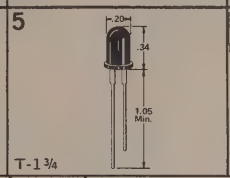
**LIMITING RESISTOR VALUES**

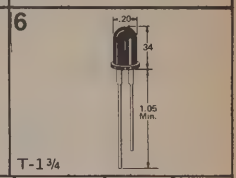
| SUPPLY VOLTAGE | Series Resistance Ω Red LEDs | Green LEDs |
|---|---|---|
| 2 VDC | 18 | None |
| 3 VDC | 68 | 22 |
| 5 VDC | 180 | 120 |
| 6 VDC | 220 | 180 |
| 12 VDC | 470 | 470 |
| Over 12V, add: | 50Ω/V | 50Ω/V |

NOTE: Cathode lead is short lead. 









| Model | ■ | Color | Maximum Dissipation | Max. $I_{FWD}$ | Max. $V_{FWD}$ @ 20mA | One-24 |
|---|---|---|---|---|---|---|
| BLD-62 | 1 | Red | 80mW @ 25°C | 40mA | 2VDC | $ .69 |
| BLD-65 | 1 | Green | 80mW @ 25°C | 30mA | 3VDC | .89 |
| BLD-72 | 2 | Red | 80mW @ 25°C | 40mA | 2VDC | .69 |
| BLD-75 | 2 | Green | 80mW @ 25°C | 30mA | 3VDC | .89 |
| BLD-82 | 3 | Red | 80mW @ 25°C | 40mA | 2VDC | .69 |
| BLD-85 | 3 | Green | 80mW @ 25°C | 30mA | 3VDC | .89 |
| BL-102 | 4 | Red | 80mW @ 25°C | 40mA | 2VDC | $ .37 |
| BL-105 | 4 | Green | 80mW @ 25°C | 30mA | 3VDC | .57 |
| BL-172 | 5 | Red | 200mW @ 25°C | 100mA | 2VDC | .42 |
| BL-175 | 5 | Green | 120mW @ 25°C | 30mA | 3VDC | .62 |
| BLF-2 | 6 | Red | 200mW @ 25°C | — | — | 1.47 |

**Aging and selection is essential in the manufacture of quality lamps. High reliability is assured by 100% aging for a minimum of 4 to 16 hours. Aging eliminates weak lamps and stabilizes their characteristics. After aging, lamps are tested at the design voltage and selected for current drain and light output. ALCOLITE lamps operate with 10% of specified ma.**

| 738* | General Purpose | .5″ (12.7mm) Digits; Colon and Decimal Points |

*Specifications included do not apply to this model series.

## Performance Specifications

| Parameters | | Minimum | Typical | Maximum | Units |
|---|---|---|---|---|---|
| Operating Voltage | | 2.7 | 3.0 | | Vrms |
| DC Drive Component Allowable | | | | 25 | mV |
| Operating Frequency Range (Note 1) | | 25 | | 100 | Hz |
| Dynamic Current (all segments ON) (Note 2) | | | 150 | 400 | nA |
| Capacitance (all segments ON) (Note 2) | | | 325 | 650 | pF |
| DC Resistance (all segments ON) | | 1000 | | | MΩ |
| Threshold 10% ON (Visual) | | 0.5 | | | Vrms |
| 90% of Saturation (Visual) | | | 2.25 | 2.7 | Vrms |
| Response Time (Note 3) | Segment ON ($T_A = +25°C$) | | 120 | 200 | msec. |
| | Segment OFF ($T_A = +25°C$) | | 185 | 300 | msec. |
| | Segment ON ($T_A = 0°C$) | | 600 | 1,000 | msec. |
| | Segment OFF ($T_A = 0°C$) | | 700 | 1,200 | msec. |
| | Colon (½ sec. ON; ½ sec. OFF, $T_A = 0°C$) | | visible blink | | — |
| Contrast Ratio | | 20:1 | | | — |
| Operating Temperature Range (Note 4) | | 0 | | +50 | °C |
| Storage Temperature Range (Note 4) | | −20 | | +65 | °C |

Unless otherwise specified, $T_A = +25°C$ and test voltages are 32 Hz square wave, 3.0 ±0.1Vrms.

**Notes:**

1. The limits shown avoid flicker below 25 Hz and increase power consumption above 100 Hz.
2. The values specified are for Model 708. Other Models will vary 50 to 100 nA in current and 100 to 150 pF in capacitance depending on digit areas.
3. Time is measured from initial change of state of drive voltage to 90% in visual state.
4. Extended storage at high temperatures listed will cause polarizer degradation.

Prices and specifications subject to change without notice.

| Character Height | 0.330 inch/8,38 mm | 0.550 inch/13,97 mm |
| Color | Orange (Neon Glow) | Orange (Neon Glow) |
| Brightness | 210 foot lamberts at typical current | 210 foot lamberts at typical current |
| Viewing Angle | 130 degrees | 130 degrees |
| Viewing Distance | 20 feet/6,10 meters | 40 feet/12,20 meters |
| Life Expectancy | >10 years | >10 years |

The SP-330 and SP-350 Series Displays are designed for interfacing with MOS/LSI and are recommended for use in all dc or multiplexed applications, with or without suppressed (blanked) zeros. The displays can be quickly, easily read even in direct sunlight. Continuous, "no gap" characters make the displays most attractive to users. A keep-alive cathode provides an internal ion source that reduces reionization time to less than 30 microseconds, allows zero suppression, and improves the operation of the display in dark environments and at low temperatures. Units are horizontally stackable in any combination with uniform centerline spacing.

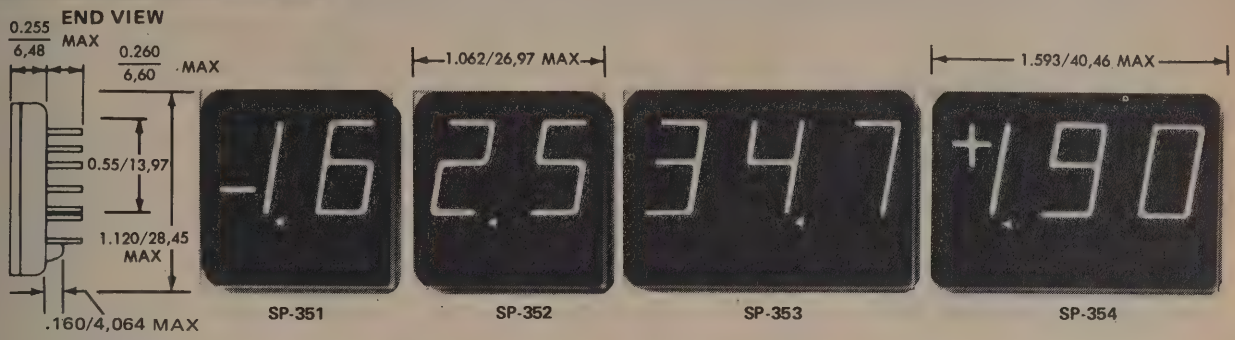
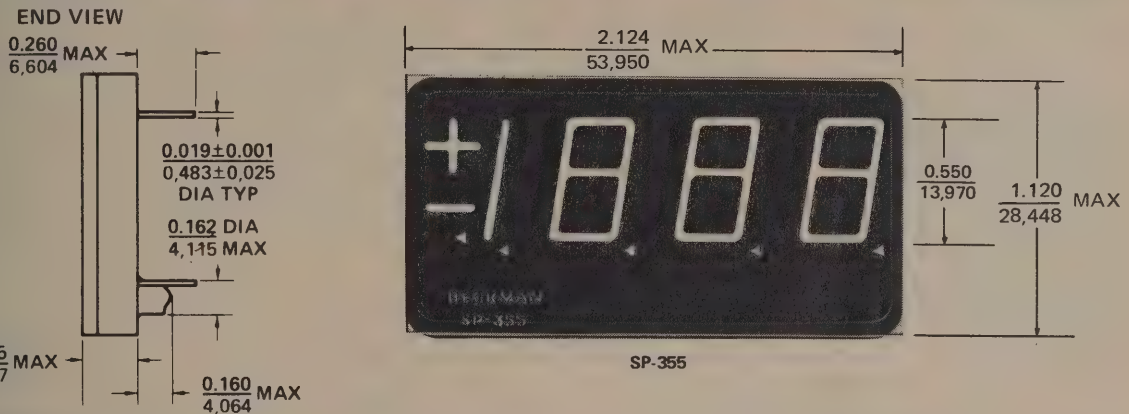
BECKMAN

# SP-300 & SP-252 Displays





**SP-350 displays not shown:**
SP-356 — 4 digit, general application  SP-357 — 3 ½ digit + colon, 12-hr. clock  SP-358 — 4 digit + colon, 24-hr. clock

| SPECIFICATIONS | SP-252 |
|---|---|
| **DC Characteristics** | **Typical** |
| Display Supply Voltage (1)(2) | 180 Vdc |
| Anode-to-Anode Differential Voltage | Note 10 |
| Anode-to-Cathode Voltage Drop (1 Segment b = 330 μA) | 135 Vdc |
| Cathode Current — Per Segment | 330 μA |
| Cathode Current — Decimal Pt. | 135 μA |
| Cathode Current — Keep Alive | 50 μA |
| Power Dissipation (With All Segments Lighted @ 330 μA Typ.) | 575 mW |
| Operating Temperature | 0 — 70°C |
| Storage Temperature | −55 — 125°C |

| SPECIFICATIONS | SP-252 |
|---|---|
| **Multiplex Characteristics** | **Typical** |
| Anode On Time | 200 μsec |
| Interdigit Blanking Time(12) (1 Segment = 850 μA @ 180V) | 55 μsec |
| Refresh Period(6) | <10 msec |
| Display Supply Voltage(2) | 180 Vdc |
| Anode Voltage Swing | 45 Vdc |
| Cathode Voltage Swing(8) | 50 Vdc |
| Cathode Bias Voltage(9) (On "Anode to Off" Cathode Voltage) | 110 Vdc |

| Features | SP-252 |
|---|---|
| Character Height | 0.55 inch/13,97mm |
| Color | Orange (Neon Glow) |
| Brightness | 210 ft.-Lamberts Nom. (720 cd/m²) |
| Viewing Angle | 130 degrees |
| Viewing Distance | 40 feet/12,20 meters |
| Life Expectancy | > 10 years |

Mix-and-match versatility. Space and cost savings. That's what the new SP-252 is all about. It can be matched up with standard displays. And shows a mix of numeric and alphanumeric characters.

Specifically, the SP-252 can accommodate a set of approximately 60 characters. It can include all the letters in the alphabet, the numbers 0 to 9, plus some special symbols.

The SP-252 features a 0.55" (14.09) character height and the same character style as the Beckman SP-350 Series of numeric displays. Consequently, you can stack the SP-252 within the same series, as well as with the numeric displays, forming any desired field.

The modularity of the new SP-252 suggests a wide spectrum of applications, such as point-of-sale and terminal displays, showing status, monitoring, text and diagnostic information.

| Cathode Current — Plus Sign (SP-102 only) | 650mA | 1300mA | 1900mA |
| Cathode Current — Minus Sign (SP-102 only) | 275mA | 550mA | 750mA |
| Power Dissipation (With All Segments Lighted @ 700 μa Typical)[4] | — | 725 mW | — |
| Operating Temperature | 0°C | — | 70°C |
| Storage Temperature | −55°C | — | 125°C |

**MULTIPLEX CHARACTERISTICS**

| | MIN | TYP | MAX |
|---|---|---|---|
| Anode On Time[11,7] | 80 μsec | 400 μsec | — |
| Refresh Period | — | — | Note 6 |
| Display Supply Voltage | 160 Vdc | 180 Vdc | Note 2 |
| Anode Voltage Swing | 30 Vdc | 45 Vdc | 90 Vdc |
| Cathode Voltage Swing | 30 Vdc[8] | 50 Vdc | 120 Vdc |
| Cathode Bias Voltage ("ON" Anode to "OFF" Cathode Voltage)[9] | 90 Vdc | 110 Vdc | 120 Vdc |

Notes:

(Apply to SP-300, SP-252, SP-101 and SP-102 Series Displays)

1. The minimum recommended supply voltage required to ionize the display is 160 volts DC. After the display has ionized, the voltage drop is approximately 135 volts at Typical cathode current.
2. Display supply voltage (including ripple) should not exceed 200 Vdc when display is used with DD-700 or decoder/driver. Higher display supply voltages are acceptable when the drive device breakdown exceeds 80 volts DC.
3. A segment currents are ratioed to b segment.
   a,d,f and g Current Ratio 1.00
   c Current Ratio 1.25
   e Current Ratio 1.20
4. The minimum current is required for even segment glow. Currents up to 1.5 times the typical current may be used; however, life expectancy may be reduced by operation at excessively higher currents. For multiplexed (time shared) operation segment, currents may be increased to four times typical current with 0.25 or smaller duty cycle.
5. To ensure uniform operation of the two colon cathodes, it is recomme nded that each cathode have its own current limiting device (resistor or current sink). The current listed is the current required for each colon segment.
6. Keep-alive is recommended in all multiplexed applications. Three (3) milliseconds is maximum refresh period without keep-alive. Ten (10) milliseconds is typical with keep-alive.
7. No anode or cathode blanking is required for the display to perform properly, however, some blanking may be advantageous to eliminate time overlap of signals due to circuit characters.
8. Under specific conditions, Cathode Voltage Swings of as low as 10 volts are acceptable.
9. The combination of Cathode Bias Voltage and Cathode Voltage Swing must be within recommended display supply voltage.
10. Lighted cathodes on all digits with independent current limiting. For bussed cathodes (multiplexed operation), 90 volts is permissible.
11. Anode On Time assumes typical keep-alive current and typical anode supply voltage.
12. Specified blanking time assumes 520 μA typical segment current for the SP-330 Series and 900 μA typical segment current for the SP-350 Series with 180 Vdc supply voltage. Blanking requirements are strongly dependent upon the mode of multiplex operation and upon the segment current used.
13. The colons must have same blanking as any other cathode, and are only enabled during their respective digit times.

The SP-101 and 102 are planar, neon gas discharge displays similar to the Beckman SP-300 Series alphanumeric product family. They are intended to fill the need for display readability at distances greater than 40 feet/12 meters.

Both are recommended for either dc or multiplexed applications, with or without suppressed zeros. The displays can be quickly and easily read even in direct sunlight. Continuous, "no gap" characters made the displays most attractive to users.

A keep-alive cathode provides an internal ion source that reduces reionization time to less than 30 micro-seconds. This enhances dynamic response and improves multiplex, low temperature, and dark ambient performance. The units may be evenly or randomly spaced to build any display field desired.

The SP-101 contains a colon, and a comma and/or decimal points as shown below. The SP-102 has a plus and minus sign, decimal point and over range numeric one.

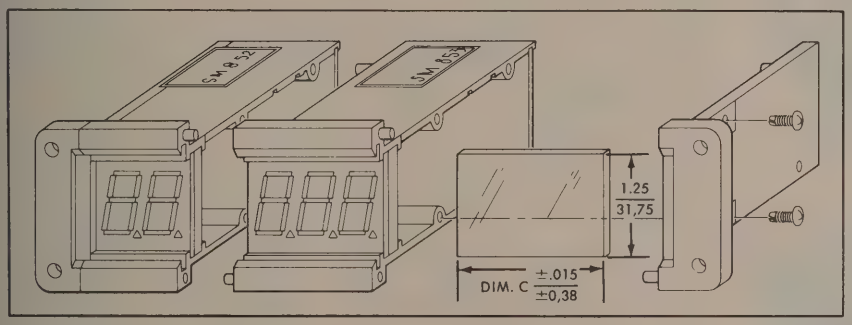
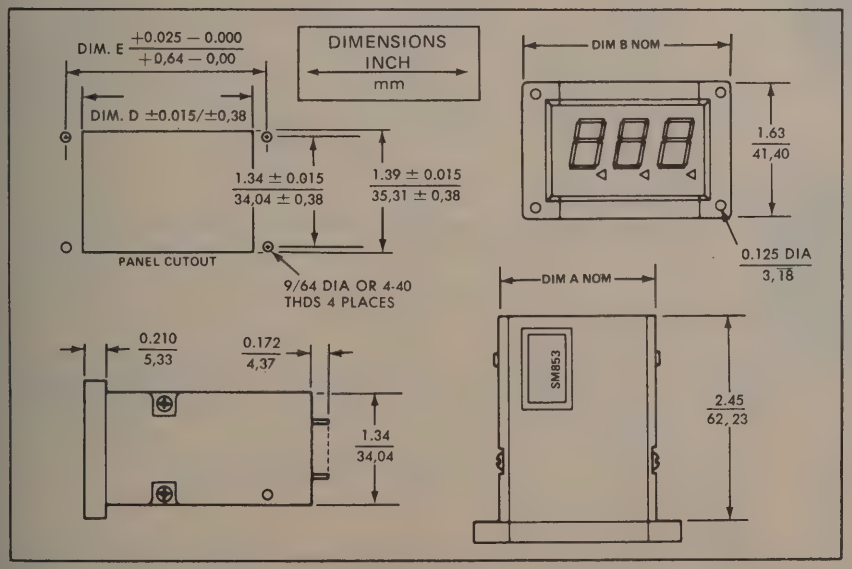
*Assumes two each three digit displays
**Assumes two each three digit displays and one each two digit displays





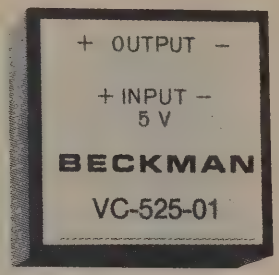
The SM-800 Series modules provide the user with a modularly expandable display, complete electronics, and ready-to-mount convenience. The series is available in 1-½-, 2-, 2-½-, and 3-digit configurations that can be mounted individually or as multi-digit displays. These expanded displays are achieved by horizontally stacking two or more modules together. The maximum number of digits thus attainable is theoretically unlimited since each module contains its own drive and decode electronics. The SM-855, SM-856, SM-857 and SM-858 modules are supplied with counters in addition to the decoder/drivers and the latch provided in the SM-851, SM-852, SM-853 and SM-854.

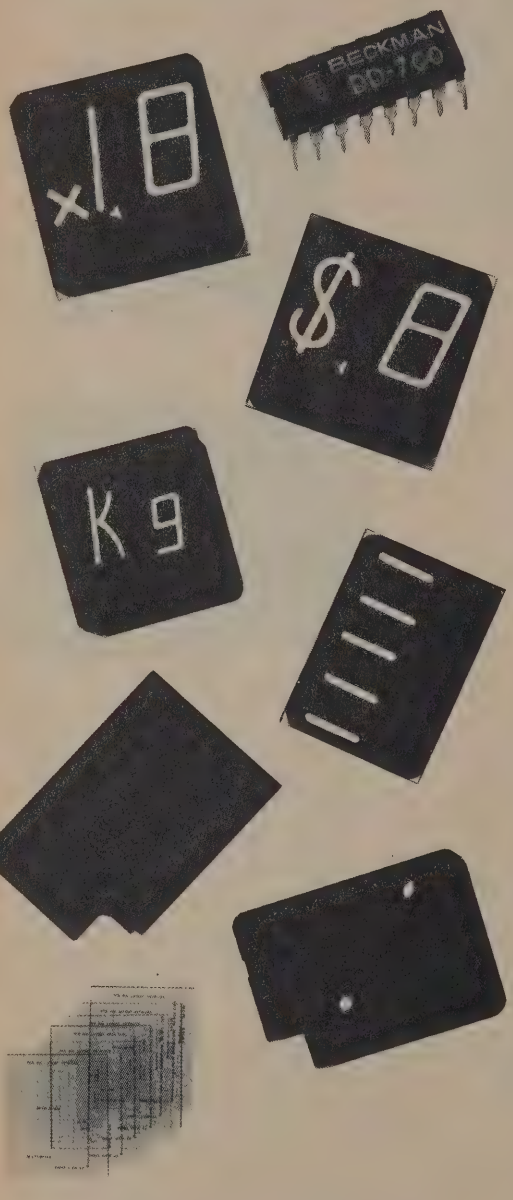
The physical design of the package allows for easy mounting of the module(s). The ease of assembly and expansion make Beckman's SM-800 Series an ideal unit for inclusion in low and medium volume display products. Character height is 0.55 inch (14,09) for all modules.

BECKMAN INSTRUMENTS, INC. INFORMATION DISPLAYS OPERATIONS 350 North Hayden Rd. P.O. Box 3579 Scottsdale, Arizona 85257 (602) 947-8371

BECKMAN

# Display Accessories





Beckman provides a full line of related accessories, providing the design engineer with convenience of application and ease of implementation. These accessories include:

**VC-525-01 Voltage Converters**

For the display user who prefers to buy rather than build a power supply, Beckman offers economically priced dc/dc voltage converters designed specifically to operate with the Beckman Displays. These reliable voltage converters are of compact modular construction that provides an adjustable output: 170 to 210 Volts dc. 180 Volts is recommended for most dc and multiplexed applications. Unit operates from 5 Volt dc TTL/DTL logic supply.

**Subassemblies**

Beckman SP-300 Series Information Displays are available mounted on circuit boards. These circuit boards can be supplied in Custom configurations.

Subassemblies are available with either a lead frame or with the edge board connector. Both of these standard packages allow the user to mount the displays conveniently to a panel cutout and connect them directly into the electronic circuitry by means of standard off-the-shelf connectors. The lead frame configuration can also be connnected to the electronic circuitry by flow soldering.

**Special Configurations**

Beckman has the capability to design and produce displays for unique applications. Alpha readouts such as OHMS, VOLTS, AMPS, MPH, GPM and others can be combined with NUMERIC digits for special displays. You are invited to discuss your custom requirements with the local Beckman sales office.

**CS-300 Connectors**

Designed for use with the SP-300 Series. Units help simplify assembly; they may be attached with screws or soldered directly to a circuit board.

**DD-700 Decoder/Driver with Current Regulated Outputs**

This monolithic integrated circuit accepts TTL/DTL 8-4-2-1 binary coded decimal (BCD) information to direct drive the seven segment Beckman Display. A blanking input feature on the DD-700 provides unconditional blanking of all outputs while a ripple blanking feature allows suppression of unwanted leading and trailing zeros. The DD-700 has seven regulated, current programmable outputs capable of between 0.18 to 1.5 mA each. Regulation ensures constant brightness display operation under a changing supply voltage situation.

**Pin Straighteners**

Inexpensive pin straighteners are available for each display series. They are useful in realigning pins misaligned through handling, assuring ease of assembly.

**Drafting Aids**

Pin location drafting guides, Drafting Aids, are available for each display model. These handy mylar, transparent overlays provide the designer with a 4X enlargement, template like drafting guide for pin and circuit layout drawings.

Prices and specifications subject to change without notice.

## T—1-3/4 (6mm) Subminiature Wedge Base Lamps

Chicago Miniature wedge base lamps are particularly suited for cost-sensitive applications. They can be designed for low-cost sockets. The fact that there is no metal base to these lamps also means lamps will not freeze in the sockets, corrosion is virtually eliminated.

# LED INDICATOR LIGHTS

## LED ASTROLITES

With Wire Leads
6039-004-304

With Wire Termin:
6039-005-304

Chicago Miniature/Drake's high brightness LED lamps may be operated directly from low-level logic circuitry which makes them ideal for computer, numerical control, medical instruments and other sophisticated applications. Available in green, red and amber. Long life expectancy (years). Bright light can be seen from across average room. Overall size—17/64" dia.; 6" leads; other lead lengths on special order.

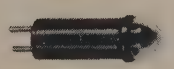
Mtg. hole dia. — .193"; max. panel thk. 3/16"; centers 11/32"; LED COLORS: green, red and yellow.

ELECTRICAL (25°C): Forward voltage: 2.1 VDC — Red. 2.6 VDC — Green & Yellow. Reverse voltage: 4.0 DC max. Forward current: (If) 15mA — Red. 40mA — Green & Amber. Power dissipation: 225 mw. max. Luminous intensity: Red @ 15mA=2.4 MCD. Green & Amber @ 40mA=4.5 MCD.

| CM/Drake No. | Lens Dia. | Bezel Dia. | Projection | |
|---|---|---|---|---|
| | | | Front | Rear |
| 6039-005-304 | 13/64" | 17/64" | 17/64" | 13/32" |
| 6039-004-304 | 13/64" | 17/64" | 17/64" | 13/32" |

## LED CARTRIDGE CM44 SERIES

CM44-11 style



CM44-21 style

Now available, two transparent cap-styled LED cartridges, interchangeable with MIL-L-3661 cartridges operating on DC. Internal fresnel ring pattern on round or short cylindrical caps provide optimum 180° visibility for these high brightness long life LEDs. Solid state reliability and IC compatibility are advanced operating features. Built-in resistor; polarized stainless steel pins — anode is marked "A"; cathode pin is "B". LED colors: red (GaAsP type), amber and green (GaP type). Blk. anodized alum. housing; nylon insulator same size as incandescent cartridges. Standard voltages range from 1.6V to 28V; other voltages available upon request.

| CM/Drake No. | DC Operating Characteristics | | | LED & LENS COLORS |
|---|---|---|---|---|
| | Rated Volts | Current mA | Operating Volts DC | |
| CM44-11-0021 | 5 | 20 | 2.5 — 7 | Red |
| CM44-11-0123 | 5 | 20 | 2.5 — 7 | Amber |
| CM44-21-0212 | 5 | 20 | 2.5 — 7 | Green |
| CM44-21-0101 | 28 | 20 | 10 — 30 | Red |

### "ULTRALITE"—.40" ROUND INDICATOR

**FEATURES**
- Unequaled brightness and spot size—up to 13 mcd with .40 in. diameter spot.
- Wide effective field of indication—up to 140°.
- Solid State—low power, long life, shock resistant, reliable.
- Push-in mounting.
- Current limiting resistors included.
- Available in red, amber and green.
- Choice of 6-inch leads or solder/faston terminals.
- Appealing chrome bezel.

**TYPICAL APPLICATIONS**
- Front panel indicator.
- Low power circuits.
- High shock and vibration environments.
- Extremely long life indication.

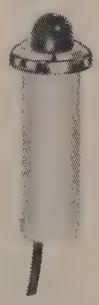
**OPTIONS**
- Other voltages and currents available.
- A.C. versions available.
- Legends hot stamped on face of lens.
- Clear lens.
- Speed nuts for added mounting security.

**MECHANICAL**
**Mounting:** Mounts in ½" dia. hole. Panel thickness 1" max. Mounting centers 5/8" min.
**Polarity:** White lead indicates cathode; (+) on base indicates anode.
**Materials:** Body Material: Nylon; Leads: 22 GA. topcoated.

**Same Voltage and Current and part number as on Data Sheet 7703 but the "4" changes to "3." Example:**
**Wire Term. Red**
**Ultralite .40 = 6340-302-505R**
**Ultralite .30 = 6330-302-505R**

### "ULTRALITES"—.20" ROUND INDICATORS

**FEATURES**
- Solid State—low power, long life, shock resistant, reliable.
- Push-in mounting.
- Current limiting resistors included.
- Available in standard red and hi-efficiency red, yellow, and green.
- Standard with 6-inch insulated leads.
- Appealing chrome bezel.
- Wide effective field of indication—up to 160°



**TYPICAL APPLICATIONS**
- Front panel indicator.
- Low power circuits.
- High shock and vibration environments.
- Extremely long life indication.

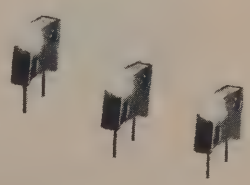
**OPTIONS**
- Other voltage and currents available.
- Other lead lengths available.
- Speed nuts for added mounting security.

**MECHANICAL**
**Mounting:** Mounts in .277" hole. Panel thickness ¾" max. Mounting centers 3/8" min.
**Polarity:** White lead indicates cathode.
**Materials:** Body Material Nylon; Leads tinned, 24 GA., stranded.

### STATUS/FAULT INDICATOR

**FEATURES**
- Solid State—low power, long life, shock resistant, reliable.
- Wide effective field of indication.
- Readily visible from **above** as well as **forward.**
- Current limiting resistor included.
- Pin Spacing—.300 inch—compatible with standard DIP pin spacing.
- Compatible with solid state driving circuits, DTL and TTL.

**TYPICAL APPLICATIONS**
- PC board status indication.
- Back panel status indication.
- Circuit fault indicator.
- DIP switch status indicator.



**OPTIONS**
- Other voltages and currents available.

**MECHANICAL**
**Leads:** Tinned copper base alloy.
**Body:** Polycarbonate.
**Mounting Centers:** .100"

**TO ORDER, SEE YOUR CHICAGO MINIATURE LAMP DISTRIBUTOR OR SALES REPRESENTATIVE**

**or contact us at 4433 N. Ravenswood Ave., Chicago, Il. 60640, Phone: (312) 784-1020. TWX 910-221-5445.**

| | |
|---|---|
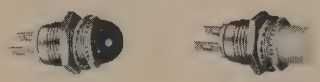
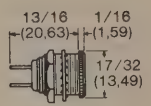
| 121A-604 | Red |
| 121A-604 | Yellow |
| 121A-604 | White |
| 121A-607 | Green |

## 5120—SERIES TINYLITES





TINYLITES Are Supplied with Choice of Three Low Voltage Incandescent Lamps Installed, 7 Volts, 14 Volts or 28 Volts. Applications Include Alarm Systems, Medical Equipment, Control and Instrument Panels.

Housing: Nickel Plated Brass
Hardware: Zinc Plated Steel
Insulation: Glass Filled Nylon
Current-carrying Parts Are All Nonferrous Metals
Terminals: Solder Dipped Brass
Mounting Hole: 7/16" Dia.; Max Panel Thickness: 1/4"

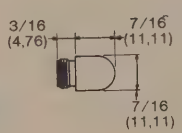
**HOW TO ORDER**

**51xx — 022 — xxx (Specify Color)**
- 26 for 7.0V, .065 Amp Lamp
- 27 for 14.0V, .065 Amp Lamp
- 28 for 28.0V .040 Amp Lamp

Use Last Three Digits from 121A Series Lens Caps

Example: 5127-022-607 Green is a Tinylite with a 14.0 Volt Lamp installed and having a Green Cylindrical Lens Cap.
To order body only (including Lamp) omit last three digits.

## 131A—SERIES LENS CAPS FOR 5131-038 MIDGET FLANGE INDICATORS



| Part No. | QPL Recog. as |
|---|---|
| **131A-304** Red | **LC12RT2** |

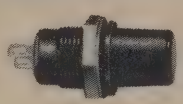
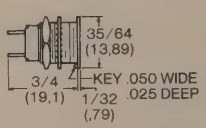
| **131A-604** Yellow | **LC29YT2** |

Built to conform to MIL-L-3661B
Lens: Butyrate
Lens Shank: Nickel Plated Brass

## 5131-038 MIDGET FLANGE INDICATOR

**QPL RECOGNIZED AS LH73/1**





**Accepts T-1¾ Midget Flange Lamps**

These Indicators Are for Military and Commercial Applications.
Built to Conform to MIL-L-3661B

Housing: Black Anodized Aluminum
Hardware: Cadmium Plus Cronak Over Steel
Insulation: Fiberglass Base Thermoplastic Liner
Current-carrying Parts: Nonferrous Metal Except Center Contact Spring Which Is Stainless Steel
Mounting Hole: 15/32"
Max. Panel Thickness: 9/32"

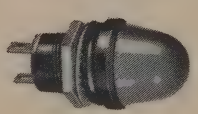
**HOW TO ORDER**

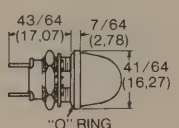
**5131-038-xxx (Specify Color)**
Last Three Digits from 131A-Series Lens Caps

Example: "5131-038-304 Yellow" is a midget flange indicator with a 131A-304 yellow dome style lens cap installed.
Body only 5131-038 less lens

## 5139-038 MILITARY WATERPROOF MIDGET FLANGE INDICATOR

**QPL RECOGNIZED AS LH89/1 AND LC35 - T2**





**Accepts T-1¾ Midget Flange Lamp**

Built to Conform to MIIL-L-3661B, These Indicators Have Neoprene "O" Rings for Waterproofing on Both Lens and Body.
Housing: Black Anodized Aluminum
Hardware: Cadmium Plus Cronak Over Steel
Insulation: Fiberglass Base, Thermoplastic Liner
Current-carrying Parts: Nonferrous Metal Except Center Contact Spring Which Is Stainless Steel
Lens: Butyrate
Lens Shank: Nickel Plated Brass
Mounting Hole: 15/32"
Max. Panel Thickness: 3/16"

**HOW TO ORDER**

| Body and Lens | Lens Only | Mil. No. of Lens |
|---|---|---|
| **5139-038-404** Red | **139A-404** Red | **LC35RT2** |
| **5139-038-404** Green | **139A-404** Green | **LC35GT2** |

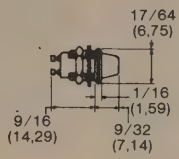
## 5160—SERIES GEMLITES



**Accepts T-1 Submidget Flange Lamp**

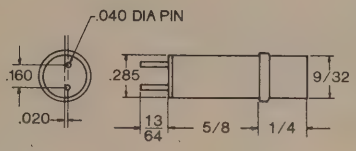
GEMLITES Are a High Quality, Reliable Indicator Used in Military and Commercial Applications Where Size and Ease of Lamp Replacement Are Prime Considerations.

Available in Red, Green, Amber and White
Housing: Black Nickel Plated Brass
Hex Nut: Brass
Lockwasher: Bronze
Terminations: Brass Turret Lugs Gold Plated Center Contact. Silver Plated Shell Contact
Lens: Translucent Butyrate, Red, Green, Amber and White
Mounting Hole: 5/16" diameter
Max. Panel Thickness: 7/32"

**HOW TO ORDER**

Part Number: 5160-458-604 (Specify Color)
Body Only Number: 5160-458
Lens Only Number: 160A-604 (Specify Color)

## CARTRIDGE INDICATOR LAMPS



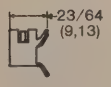
- Long life
- Built to meet MIL-L-3661
- High temperature polycarbonate lenses
- Three voltages: 6.3V; 14.0V; 28.0V
- Three colors: red, green and amber
- Hi Rel Look—Used on military and commercial instruments and in panels.

Housing: Clear Anodized Aluminum
Pins: Stainless Steel
Insulator: Nylon, Glass Filled
Lens: Translucent Polycarbonate

| Volts | Amps | MSCP (Approx.) | Life | Color | Part Number |
|---|---|---|---|---|---|
| 6.3V | .040 | .02 | 50,000 HR | Red | CML640271 |
| 6.3V | .040 | .02 | 50,000 HR | Green | CML640272 |
| 6.3V | .040 | .02 | 50,000 HR | Amber | CML640273 |
| 14.0V | .080 | .3 | 50,000 HR | Red | CML640281 |
| 14.0V | .080 | .3 | 50,000 HR | Green | CML640282 |
| 14.0V | .080 | .3 | 50,000 HR | Amber | CML640283 |
| 28.0V | .040 | .2 | 50,000 HR | Red | CML640401 |
| 28.0V | .040 | .2 | 50,000 HR | Green | CML640402 |
| 28.0V | .040 | .2 | 50,000 HR | Amber | CML640403 |

## CARTRIDGE HARDWARE

**CML 10204-1 CARTRIDGE HOLDER**
FOR CML SERIES CARTRIDGE LAMPS
Body, Facing Nut and Collar: Black Anodized Aluminum
Lockwasher and Hex Nut: Cadmium Plated Steel
Solder Lugs: Cadmium Plated Spring Brass
Insulation: Phenolic
Mounting Hole: 3/8" dia.
Max. Panel Thickness: 7/32"



**CM 21-3 CONNECTOR**
Low Cost Connector Mates with Cartridge Lamps.
Body: Phenolic
Solder Lugs: Cadmium Plated Spring Brass

**CML 10380 MOUNTING CLIP**
Low Cost Clip for Mounting Cartridge Lamps Directly into Panels. Squeez Tabs and Push Over Back of Cartridge.
Material: Spring Tempered Steel Black Rust Preventative Finish.

## 5201—SERIES DELUXE INDICATOR

**Accepts T-3¼" Miniature Bayonet Lamp.**

DELUXE INDICATOR: Chrome Bezel for Quality Appearance. U.L. and CSA Listed.
Use with 25 P-Series Lenses.
Mounting Bushing: Chrome Plated Brass
Housing: Molded Phenolic

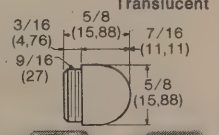
## 5100—SERIES STANDARD INDICATOR

**Accepts T-3¼ Miniature Bayonet Lamp**

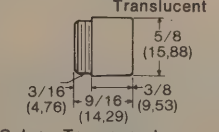
STANDARD INDICATOR: Attractive Nickel Plated Bezel. U.L. and CSA Listed.
Use with 25 P-Series Lenses.
Housing: Glass Filled Polyester
Bezel: Nickel Plated Steel
Terminals: Brass

## 25P LENSES FOR 5201 & 5100 SERIES

25P-326 Transparent
25P-306 Transparent
25P-307 Translucent

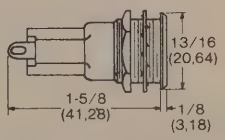


25P-626 Transparent
25P-606 Transparent
25P-607 Translucent



Colors: Transparent, Amber, or Clear.
Translucent is Red, Green, Yellow, or White.
Specify Color.

Terminals: Brass
Hardware: Zinc Plated Steel
Mounting Hole: 11/16"
Max. Panel Thickness: 13/32"

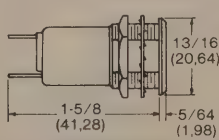


**HOW TO ORDER**

5201 — xxx — xxx (Specify Color)
222 for Incandescent Lamps
*232 for B2A Neon Lamp
*242 for B1A Neon Lamp
Use Last Three Digits from 25P-Series Lens Caps
*For 125V Operation

Example: "5201-232-326 Amber" is part number for Deluxe Indicator requiring B2A Lamp and with Amber Fluted Dome Lens.
Units requiring B2A Lamps have built-in 22K ohm resistor.
Units requiring B1A Lamps have built-in 100K ohm resistor.
When ordering body only, omit last three digits.

Hardware: Zinc Plated Steel
Mounting Hole: 11/16"
Max. Panel Thickness: 13/32"



**HOW TO ORDER**

5100 — xxx — xxx (Specify Color Here)
822 for Incandescent Lamps
*832 for B2A Neon Lamps
*842 for B1A Neon Lamps
Use Last Three Digits from 25P Series Lens Caps
*For 125V Operation

Example: 5100-822-607 red is part number for standard indicator requiring an incandescent lamp and having a 25P-607 Red Lens.
Units requiring B2A Lamps have built-in 22K ohm resistors.
Units requiring B1A Lamps have built-in 100K ohm resistors.
When ordering body only, omit last three digits.

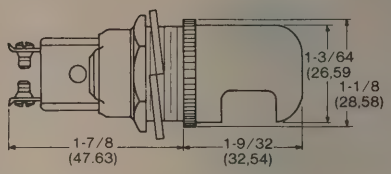
## 900—SERIES INSTRUMENT LITES

**THE 900-SERIES INSTRUMENT LITES PROVIDE LOCALIZED LIGHT FOR ILLUMINATION OF PANELS, SWITCHES, METERS AND LEGEND PLATES**

### 900-006

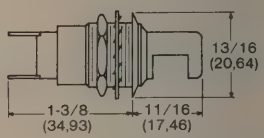
Hood and Face Nut: Chrome Plated Brass
Mounting Bushing: Nickel Plated Brass
Hardware: Cadmium and Cronak Plated Steel
Contacts, Terminals and Screws: Nonferrous Metal
Mounting Hole: 1″
Max. Panel Thickness: ½″
Max. Electrical Ratings: 250V, 1A, 75W
Insulation: Phenolic



**Accepts Both S-6 and C-7 Candelabra Screw Base Lamps**

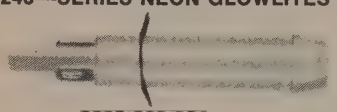
### 900-200

Screw-in Hood
Hood: Aluminum Black Outside, Clear Anodized Inside
Mounting Bushing: Black Anodized Aluminum
Current-carrying Parts: Nonferrous Metals
Hardware: Cadmium and Cronak Plated Over Steel
Insulation: Phenolic, Volcoid and Nylon
Mounting Hole: 11/16″
Max. Panel Thickness: 13/32″
Max. Electrical Ratings: 120V, 3W

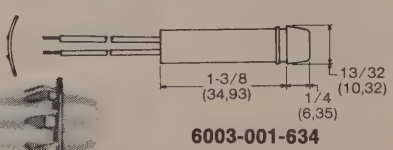


**Accepts T-3¼ Miniature Bayonet Lamps**

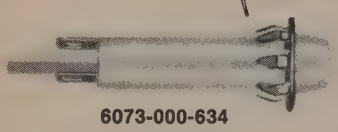
## 6063—SERIES, 6073—SERIES AND 6243—SERIES NEON GLOWLITES



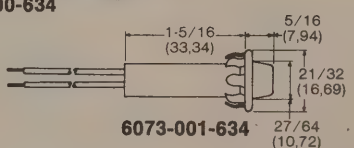
**6063-000-634**



**6003-001-634**



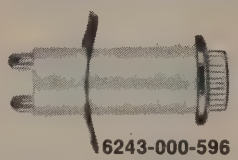
**6073-000-634**



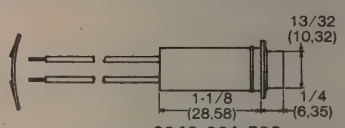
**6073-001-634**

U.L. and CSA Recognized. All GLOWLITES Have High Bright C2A Neon Lamps with Built-in 30K Resistor. Life Over 5000 Hours. Available with 10-inch Wire Leads or Quick Connect Terminals (accepts ¾ x .020 female terminal). Designed for 125V Operation
Insulation: Vulcoid
Quick Connect Terminals: Brass Solder Dipped
Wire Leads: Black #22 Bonded Wire with 105°C PVC Insulation .031 Thk.
Body and Lens: Nylon
Available in Red, Amber and White*
*6243-Series Available in Clear Instead of White

| Part No. | Mounting Hole Size | Max. Pnl. Thickness | Termination |
|---|---|---|---|
| **6063-000-634** (Specify Color) | ⅜″ | 1 5/16″ | Solder Lug |
| **6063-001-634** (Specify Color) | ⅜″ | 1 5/16″ | Wire Lead |
| **6073-000-634** (Specify Color) | ½″ | 5/64″ | Solder Lug |
| **6073-001-634** (Specify Color) | ½″ | 5/64″ | Wire Lead |
| **6243-000-596** (Specify Color) | ½″ | ¾″ | Solder Lug |
| **6243-001-596** (Specify Color) | ½″ | ¾″ | Wire Lead |

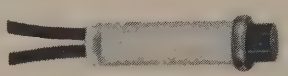


**6243-000-596**



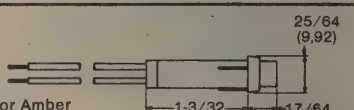
**6243-001-596**

## 6380—SERIES SLENDER GLOW INCANDESCENT INDICATORS



Available in 3 Voltages (6.3V, 14V, and 28V) and in Three Colors (Red, Green and Amber). 10-inch Black Leads, #22 GA. Bonded with .031″ of 105°C PC Insulation.

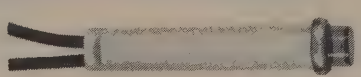
Housing: White Nylon
Bezel: Bright Stainless Steel
Lens: Translucent
Polycarbonate Red, Green or Amber
Mounting Hole: .312/.314″ Diameter



| Part Number | Voltage | Current | Life |
|---|---|---|---|
| **6386-001-607** (Specify Color) | 6.3V | .20A | 50,000 Hr. |
| **6387-001-607** (Specify Color) | 14.0V | .08A | 50,000 Hr. |
| **6388-001-607** (Specify Color) | 28.0V | .04A | 25,000 Hr. |

## 6483—SERIES SLENDER GLOW NEON INDICATORS

**6483-401-603** Red
**6483-401-603** Yellow
**6483-401-603** Clear



Units Are U.L. and CSA Recognized for 125V Operation. All Have High Bright C2A Neon Lamp with 33K-Series Resistor. 25,000 Hour Life. 10-inch Black Leads, #22 GA. Bonded with .031-inch 105°C PVC Insulation.

Housing: White Nylon
Bezel: Bright Stainless Steel
Leads: Black #22 Bonded Wire, .031″ of 105°C PVC Insulation
Lens: Transparent Polycarbonate
Mounting Hole: .312/.314″ Diameter

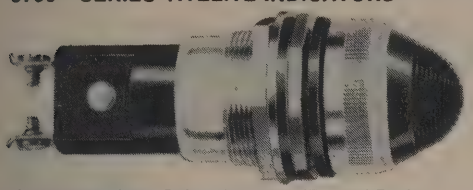
# INDICATORS & LAMPHOLDERS

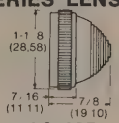
## 5796—SERIES TITELITE INDICATORS



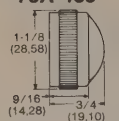
Transparent Lens Polycarbonate w/Frosted Back.
Lens Bezel Chrome Plated Brass.
**Accepts S-6 Screw or Double Contact Bayonet Lamps**

TITELITES Have Large 1" Diameter Lens for Distance and Off-Angle Visibility. Units Supplied with 2 Neoprene Gaskets to Seal Out Oil and Water. All Units Are U.L. and CSA Listed for Up to 75W Operation.

## 78A SERIES LENS CAPS

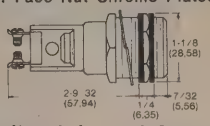


**78A-435**



**78A1-105**

Housing: Phenolic
Mounting Bushing: Nickel Plated Brass
Hardware: Cadmium and Cronak Plated Steel. Face Nut Chrome Plated Brass
Gaskets: Neoprene
Terminals: Brass with Brass Screws
Mounting Hole: 1"
Max. Panel Thickness: ⅜"



**HOW TO ORDER**

**5796 — xxx — xxx (Specify Color) — Red, Green, Yellow**

393 for Double Contact Bayonet Lamp
523 for Candelabra Screw Lamp

Use Last Three Digits from 78A-Series Lens Caps

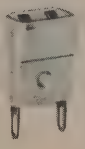
Example: 5796-393-435 Green is a Titelite that accepts S-6-type Double Contact Bayonet Lamps and has a 78A-435 Green Lens.

To order body only omit last three digits.

## LAMPHOLDERS

PHOTOS 3/4 ACTUAL SIZE

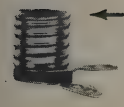
### 4772-001 LAMPHOLDER
For T-1-3/4 Wedge Base Lamps
Lugs: 2 Solder
Housing: Nylon
Spacing: 13/64"



### 4672-001 LAMPHOLDER
For T-3-1/4 Wedge Base Lamps
Lugs: 2 Solder
Housing: Nylon
Spacing: 3/8"

### 4060-014 LAMPHOLDER
For Miniature Screw Lamps
Lugs: 2 Solder
Shell: Brass
Mounting Bracket: Insulated from shell
Bracket: .033 Thick, 7/16" Wide.
1-7/32" Long after bend.
Slot 3/16" x 29/32"

### 4060-314 LAMPHOLDER
For Miniature Screw Lamps
Lugs: 2 Solder
Shell: Brass
Mounting Bracket: Insulated from shell
Bracket: .033" Thick. 7/16" Wide.
1-7/32" Long after bend.
Slot 3/16" x 29/32"



### 4070-054 LAMPHOLDER
For Miniature Screw Lamps
Lugs: 2 Solder
Shell: Brass

### 4099-017 LAMPHOLDER
For Miniature Bayonet Lamps
For Mounting in P.C. Boards
.062 Dia. Hole .400 Spacing

### 4151-014 LAMPHOLDER
For Miniature Bayonet Lamps

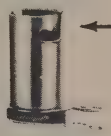
Bracket: .033 Thick. 7/16" Wide.
1-7/32" Long after bend.
Slot 3/16" x 29/32".

### 4151-314 LAMPHOLDER
For Miniature Bayonet Lamps
Mounting Bracket: Insulated from shell
Bracket: .033" Thick., 7/16" Wide.
1-7/32" Long after bend.
Slot 3/16" x 29/32".

### 4157-314 LAMPHOLDER
For Miniature Bayonet Lamps
Leads: 10" Blk., #22 105° PVC
Mounting Bracket: Insulated from shell
Housing: Nylon over plated steel shell
Bracket: .033 Thick. 7/16" Wide.
1-7/32" Long after bend.
Slot 3/16" x 23/32"



### 4160-051 LAMPHOLDER
For Miniature Bayonet Lamps
Lugs: 2 Solder
Shell: Steel

### 4311-052 LAMPHOLDER
For Candelabra Screw Lamps
Lugs: 2 Solder
Shell: Brass

### 4327-312 LAMPHOLDER
For Candelabra Screw Lamps
Leads: 10 inch Blk., #18, 105°C PVC
Mounting Bracket: Insulated from shell
Bracket: .033" Thick, 5/8" Wide
1" Long after bend
Hole .170" Dia.
Slot.170" x .420"

### 4345-312 LAMPHOLDER
For Single Contact Bayonet Lamps
Leads: 10" Blk., #18, 60°V PVC
Bracket: .033" Thick, 5/8" Wide,
7/8" Long after bend.
Hole .170" Dia.
Slot .170" x .420"

### 4365-312 LAMPHOLDER
For Double Contact Bayonet Lamps
Leads: 10" Blk., #18, 105°C PVC
Bracket: .033" Thick, 5/8" Wide
7/8" Long after bend
Hole .170" Dia.
Slot .170" x .420"

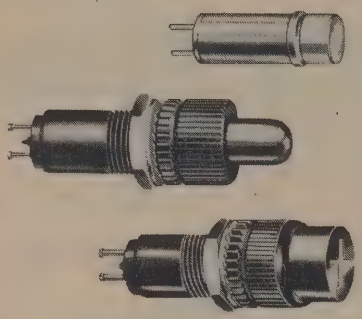
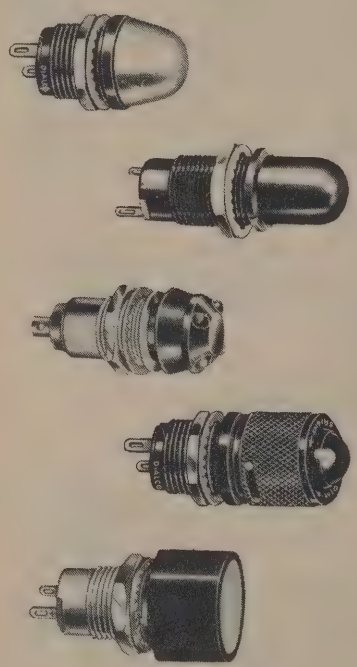
# 1,500,000 VISUAL INDICATORS

## INDICATOR LIGHTS, ILLUMINATED SWITCHES, READOUT DISPLAYS



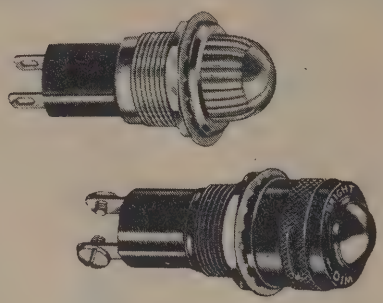
### ULTRA-MINIATURE INDICATORS

Meet requirements of MIL-L-3661B. Incandescent, neon and LED. Mount in 3/8" clearance hole.
**Ask for Catalog UM1200.**



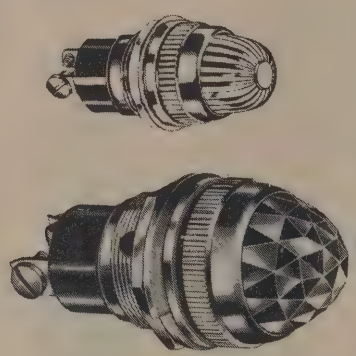
### SUB-MINIATURE INDICATORS

Incandescent and neon. Mount in 13/32" to 17/32" clearance holes. Meet or exceed environmental requirements of MIL-L-6723 and MIL-L-3661B.
**Ask for Catalogs L-157, L-158, L-178.**



### MINIATURE AND LARGE INDICATORS

Incandescent and neon. Miniature units mount in 9/16" or 11/16" clearance holes, large units in 1" or 1 3/16" hole. Wide choice of cap shapes and colors, also caps with mechanical dimming feature.
**Ask for Catalog L-161.**



### OIL-TIGHT INDICATORS

Incandescent and neon. Mount in 11/16", 1" or 1 3/16" clearance holes. For heavy duty.
**Ask for Catalog L-200.**

### LIGHTED SWITCHES AND MATCHING INDICATORS

Low-profile snap-in switches and standard mounting switches. Momentary non-snap, snap or alternate switch actions. Ratings up to 5 A. Cap sizes include 1/2" 5/8" and 3/4" round or square; 3/4" x 1" rectangle.
**Ask for Catalog L-210.**

### SINGLE-PLANE READOUTS

Incandescent and neon — 5 to 170 volts. 3/4" or 1" characters. Display 10 numbers and 10 letters. Compatible caption models.

Send for FREE Indicator Light Product Selector Guide Catalog SG730.

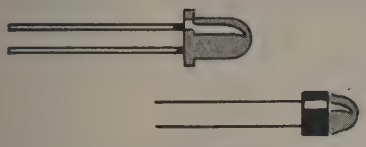
# TO CHOOSE FROM DIALCO®

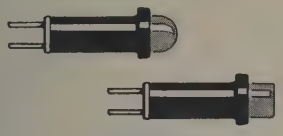
## . . . AND INDUSTRY'S BROADEST LINE OF LED DISPLAY DEVICES



**DIODE-LITE™ LIGHT SOURCES**

**RED • GREEN • YELLOW**

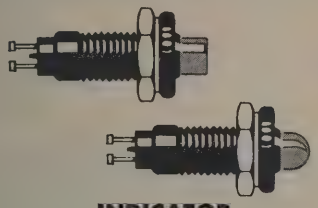
Diffusing particles in plastic encapsulant provide large, soft light source for panel light, status indicator and A/N display applications.



**INDICATOR LIGHT CARTRIDGES**

**RED • GREEN • YELLOW**

IC-compatible ultra-miniature cartridges with DIODE-LITE light source are interchangeable with incandescent types using DC power source.



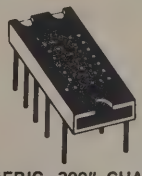
**INDICATOR LIGHT ASSEMBLIES**

**RED • GREEN • YELLOW**

Cartridge with DIODE-LITE in housing with mounting hardware ready for installation. Interchangeable with DIALCO ultra-miniature incandescent types.

.270″ CHARACTER

PLUS-MINUS ONE, .270″ CHARACTER



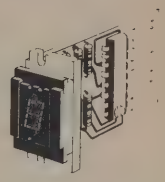
ALPHA-NUMERIC .300″ CHARACTER

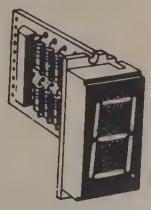
.270″ HEXADECIMAL

**READOUT MODULES**

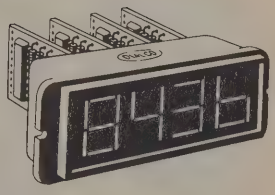
Character heights from .270″ to .625″. Dot, dot matrix and segmented formats for both numeric and full alpha-numeric displays. Wide angle (140°) viewing. IC compatible.

.270″ CHARACTER

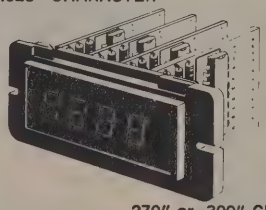




.625″ CHARACTER



.625″ CHARACTER



.270″ or .300″ CHARACTERS

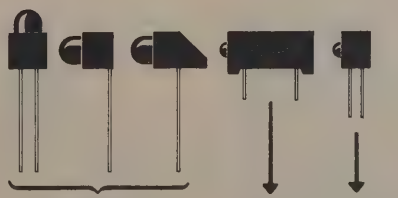
**READOUT PACKAGES AND ASSEMBLIES**

Single-digit packages in character heights from .270″ to .625″ include decoder/driver and resistors mounted on PC board. Bezel assemblies ready for panel mounting available with up to 10 display packages.

**ASK FOR LED PRODUCT SELECTOR GUIDE**

## LED LOGIC-STATE FAULT INDICATORS

**RED • GREEN • YELLOW**



Series 550 Series 547 Series 555

**550** series indicators, with/without built-in series resistors. For use as electronic circuit fault finders, as indicators or in binary data displays.

**547** series indicators, with built-in series resistor, permit dense packaging — 10 units to the inch. Pin spacing is compatible with DIP sockets.

**555** series indicators have built-in series resistor, are IC compatible, and can be p-c board mounted 10 units to the inch.

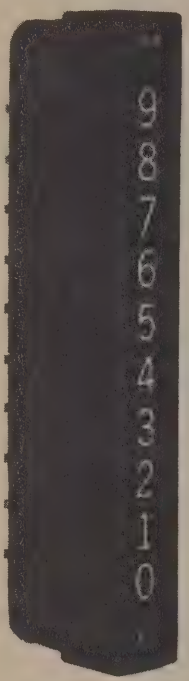
# d² display devices

## DIGISTRIP front relampable DIGITAL DISPLAYS

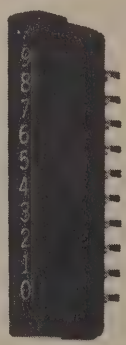
For a wide range of console and instrument display applications. Can be mounted horizontally or vertically, directly on p.c. boards, or ganged for high-density readout.

All Digistrip models are available with standard 0-9 legend, or with custom read-out information.



Digistrip II
3" legend area.

Digistrip I with high-gain transistor drivers on integral printed circuit board.



Digistrip I
1½" legend area.

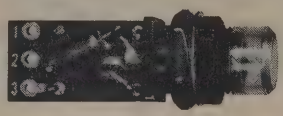
## MINIATURE T-1 INDICATOR LIGHTS

Designed to provide the brightest light in the least space. Available off-the-shelf, or designed to your application.

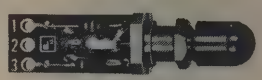
**QUICK-LENS**
Front-relampable miniature indicator light with built in light reflector for maximum brightness, even in high ambient light.

**MINI-LENS**
Front relampable, micro-miniature indicator light, featuring minimum panel spacing. Can be RFI shielded. Threaded body can mount directly to panel.

**FLUSH-LENS**
For panel mounting without protrusion. Available with RFI shield. Unit is relampable from rear of panel. No solder connections required.



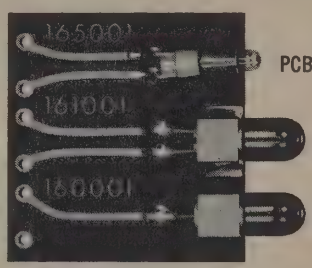
**TRANS-LENS**



**TDML**

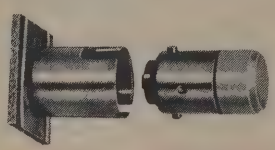
Each front relampable, with high-gain transistor driver on compact, integral p.c. board. Minimum depth behind panel. Both available in "bare board" configuration for customer to install own components. Trans-Lens is transistor-driven version of Quick-Lens; TDML is transistor-driven version of Mini-Lens.

## P.C. BOARD INDICATORS



PCB LIGHT

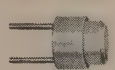
SINGLE-SIDED BOARDS
DOUBLE-SIDED BOARDS
TEST LENS



## ADAPTER LENS AND SOCKET

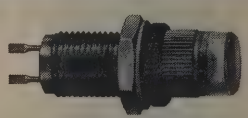
Midget T-1¾ flanged base lamp adaptor used with T-3¼ printed circuit mounted socket. Furnished with or without integral color filter.

T-1 UNBASED



T-1¾ BI-PIN

Basic sockets for custom designed lamp holders or p.c. board mounting used as lighting chassis for back lighted display. Also available in side mounting.



**TWIST-LENS**
Quick-change lens, available in clear or colors. Waterproof and RFI shielded units available. Uses T-1¾ Bi-Pin base lamp for high brightness.

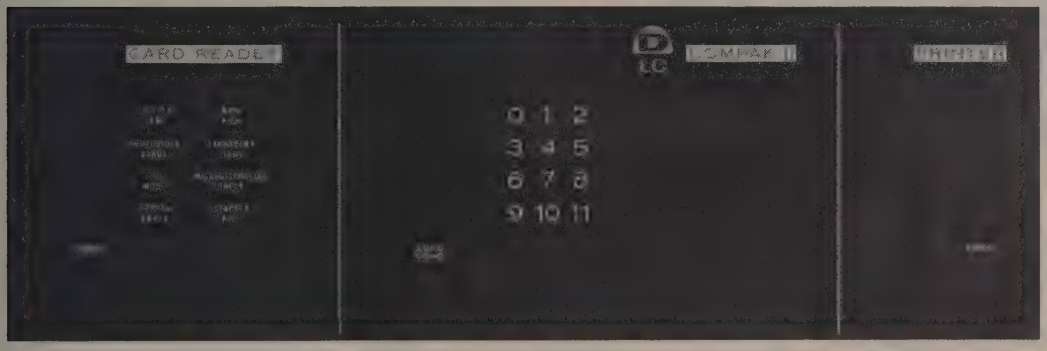
# panels and laminates

## BACK LIGHTED PANELS

Exploded view shows a typical backlighted panel application with printed circuit board lighting chassis containing lamps and sockets, light baffle (eggcrate) to divide message areas, and legend screen with front bezel. Application shown is relampable from front of panel. Rear relamping is also available.

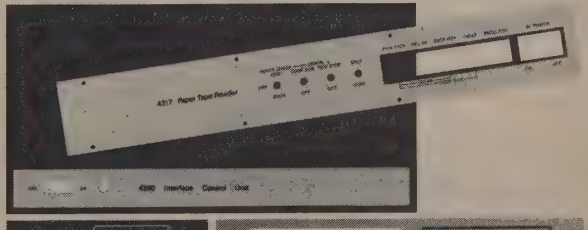


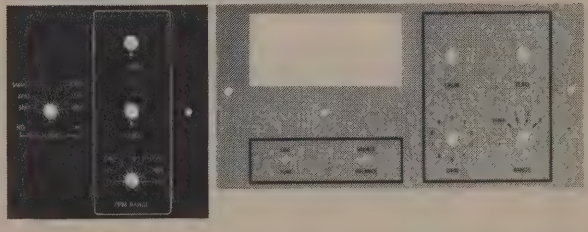
## POLYESTER DEAD FRONT LAMINATES

Used in conjunction with backlighted panels, or provided separately, are DF991 legend screen laminates. Except for permanently visible graphics that may be desired all nomenclature is invisible until backlighted. Standard background is black, but colored dead front laminates are also available. .010″ and double .010″ thickness are used.

## POLYCARBONATE AND ACRYLIC LAMINATES

Offered in dead front as noted above for polyester laminates. Thickness ranges from .020″ to .250″. Used for LED devices as well as incandescent lamps. All laminates are provided with or without pressure sensitive adhesive backing, depending upon application. All laminates feature color matching to FED STD 595, Pantone, or customer supplied color chips.





## NON-ILLUMINATED LAMINATES

Supplied on .010″ adhesive backed polyester film non-illuminated laminates are used to replace conventional painting and printing of metal panels. Screen printing of graphics is sub-surface to protect markings from being scratched off. Holes for switches, knobs, etc. are steel rule die cut. Background color is matched to customer requirements.

*Write for detailed specification sheets*

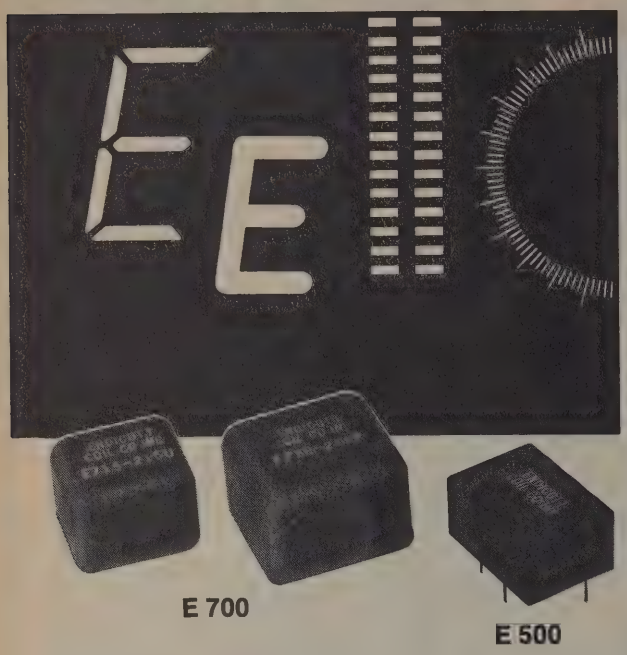
# Power your gas discharge displays from low DC voltage

When you must convert low DC voltages to nominal 200 or 250 V DC levels to activate your displays, choose the DC-to-DC power supply that's right for your application:



E 700

E 500

**E 700 Series** regulated or unregulated

**Input:** 5,9,12,15 V DC standard (others up to 48 V DC)

**Output:** 200 V DC @ 15 ma (or up to 3 W total)

**Size:** (unregulated) 1.1" (27.94mm) x 1.2" (30.48mm) x .910" (23.11mm) max. high
(regulated) 1.43" (36.32mm) x 1.5" (38.10mm) x 1.03" (26.16mm) max. high

**E 500 Series** unregulated

When you need high-volume units, the E 500 offers big savings while delivering the same dependable performance for which our E 700 is known.

**Input/Output:** Same as E 700

**Size:** 1.00" (25.4mm) x 1.38" (35.1mm) x 0.70" (17.8mm) high

MATRIX
SELF-SCAN II PANELS-THE MOST ADVANCED
DOT MATRIX DISPLAY AVAILABLE TODAY. W
COMPETITIVE PRICING, BETTER PERFORMANCE
THAN CRT'S FOR READABILITY, BRIGHTNESS
LINEARITY, SIZE, WEIGHT, LIFE
OVERALL PERFORMANCE CAPABILITIES.

for matrix formats up to 256 characters

E 900
or E 1200

**E 900 Series** unregulated

**Input:** 5, 12, or 15 V DC standard (other inputs available to your specifications)

**Output:** Available with either single or dual outputs, capable of up to 12 watts total. Single: 250 V DC @ 30 ma (48 ma on special order). Dual 250 V DC @ 30 ma, and -16 V DC @ up to 200 ma to provide the -12 V DC needed for the drive electronics in many applications using the Burroughs SELF-SCAN® or I.E.E. ARGUS® displays.

**Size:** 2" (50.8mm) x 2.5" (63.5mm) x .95" (24.1mm) high

**E 1200 Series** unregulated

**Input:** 12, 15 V DC standard (other inputs available to your specifications)

**Output:** 250 V DC @ 100 ma (other output voltages available to your specifications – up to 25 W)

**Size:** Same mounting dimensions as E 900; 1.19" (30.2mm) high

## Tell us about your display power needs!

- Custom designs
- Variations for multi-segment, bar graph and matrix gas discharge displays up to 256 characters
- Inputs from 5 V DC to 48 V DC
- Outputs from 5 V DC to 500 V DC
- Single and dual outputs (up to 25 W total)
- Regulated and unregulated

Although we developed these power supplies to activate gas discharge displays, our customers have used them for many other applications, including:

- Outputs to 1,500 V @ 1 ma for portable oscilloscopes and photomultiplier applications
- Multiple DC and/or AC outputs from battery sources
- LCD and electroluminescent display applications

*Gas discharge display power starts here!*

# THE SYLVANIA Mix 'n Match SYSTEM EXPLAINED

**Sylvania Mix 'n Match. The only system that offers you the universal parts flexibility built around two series of T-2 slide base lamps. The first is our Pilot Lamp series spanning 5 to 120 volts. The second is our Indicator Lamp series from 4 to 48 volts.**

**All the lamps in each series are physically identical. So sockets and lenses are fully compatible.**

**And in a number of instances, lenses and caps are even interchangeable between series.**

**As you can see, our system is calculated to make life a lot easier for everyone.**

**From the guy who builds the prototypes, to the guy who does the purchasing, to the guy who controls production inventory.**

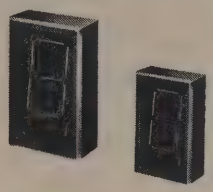
# IEE® The Display Maker . . .

### IEE • APOLLO INCANDESCENT TUBE DISPLAYS

Available in .4", .47" or .6' high, 7-segment characters with ±1 and decimal point options.

### IEE • AURORA INCANDESCENT FLATPACK DISPLAYS

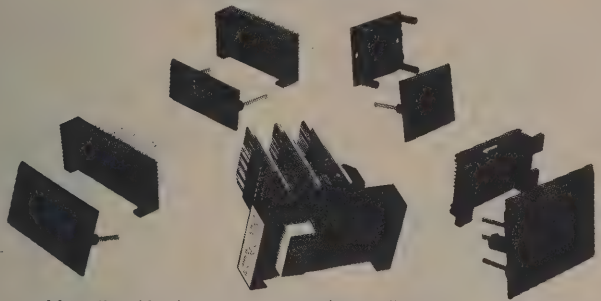


Available in .47" or .61" high, 7-segment characters and ± overflow 1 with decimal points.

### IEE • POLARIS LIQUID CRYSTAL DISPLAYS

Choice of reflective (ambient lighting) or transmissive (backlighting) types, DIP-packaging style.

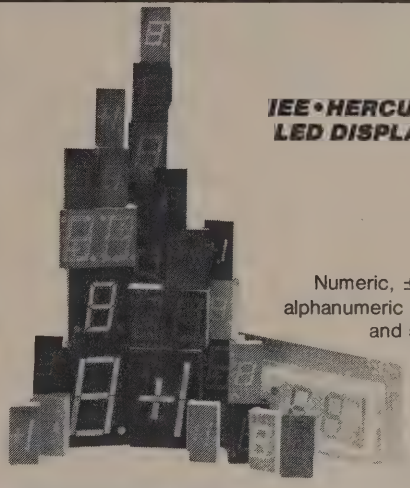
### IEE • ATLAS DISPLAY MOUNTING HARDWARE AND DECODER/DRIVER



Mounting Hardware accommodates all standard, DIP-packaged LED and other planar displays.

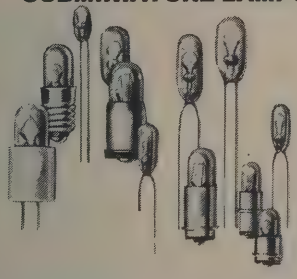
Decoder/Driver is designed to be integrally mounted onto the back of IEE-ATLAS Mounting Hardware

### IEE • HERCULES LED DISPLAYS



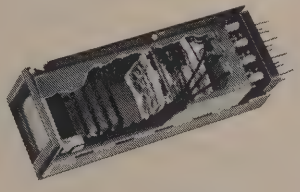
Numeric, ±1, hexadecimal or alphanumeric format; 7-segment and 5 x 7 dot matrix red characters from .270" to 1.02" high.

### IEE • ELECTRA SUBMINIATURE LAMPS



All standard sizes T-¾ through T-1¾; choice of all base configurations

### IEE • PROSWITCH MULTI-LEGEND ILLUMINATED PUSHBUTTON SWITCH



Takes the place of as many as 48 individual switches; legend surface doubles as a large pushbutton switch.

### IEE • JUPITER SOLID STATE INDICATORS

Choice of red, yellow, amber or green diffused light, T-1 through T-2 sizes.

### IEE • ARGUS ALPHANUMERIC DISPLAY SUBSYSTEMS

Available in 32, 64, 128, 256, 320, 480, 512, or 960-characters per panel; orange (filterable to red) or green, fourteen different configurations; a compact, readable alternative to a CRT.

### IEE • IRIS STATUS INDICATOR

Illuminate individual, combination, or all 12 message areas.

### IEE • TITAN PROJECTION DISPLAYS

Capable of displaying any image, color and message which is reproducible on film; 14 different models from .34" through 3.375" message areas.

# The busy designer's guide to IDI instant-delivery indicator lights

**The basic specs on the most popular indicator lights in the IDI line. On the shelf and ready for instant delivery, If you need to know more, ask Industrial Devices, Inc., Edgewater, NJ 07020; (201) 224-4700. We'll send you our complete, detailed catalog plus samples.**

## TINY-MITE™

**For tight spots and tight budgets.**

**Relampable sub-miniature wedge-base lamp indicator light assemblies and lamp sockets.**

Tiny-Mite sub-miniatures give you more room to work in when you're limited by small space and must keep costs down. The indicator light assemblies and sockets have a unique, patented socket construction which holds the incandescent lamp trimly and securely, makes reliable contact, won't loosen with vibration or shock, yet permits easy lamp removal and replacement. Available in wire lead, solder terminal, and printed circuit board versions.

Ruggedness and reliability of wedge-base lamps have been proved by hundreds of millions of them used every year. Wedge-base design reduces lamp cost because the base is formed from the glass of the bulb and its lead-in-wires — there are no separate parts or extra welded connections. Thirteen different relampable sub-miniature types available in a wide range of voltage ratings up to 120 Vac.

Tiny Mite indicator light assemblies are designed specifically for sub-miniature wedge-base lamps. Extraordinarily economical and compact. Two basic lens designs: hemispherical and flat-top. Stainless-steel bezels, polycarbonate lenses in red, clear, amber, white, green, blue, and yellow.

## MINI-SLIDE

**Secure seating, screw-in lenses, heavly-duty construction:**

**Relampable pilot light assemblies for high-quality products at low cost, in a wide voltage range up to 120 Vac.**

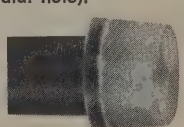
Solid-black plastic or mirror-finish stainless-steel bezels, round-light-diffusing screw-in lenses. Self-locking patented nylon torque-limiting nut eliminates stripped threads. The 120 Vac models are UL-listed and CSA-approved.

### SERIES 2800

For use with pilot lamps, in red, clear, amber, white, green, blue, yellow; .205″ quick-connect terminals. (1⅛″ dia. hole).

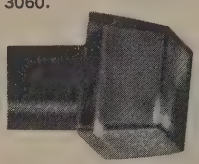
### SERIES 3060

For use with slide-base pilot lamps. Black phenolic socket accepts round, square, and angle snap-on/off lenses; .205″ quick connect terminals. Lamps can be replaced from front of panel. ½″ dia. hole).



### SERIES 3040

For use with short slide-base indicator lamps. Molded of black Nylon. Otherwise same as Series 3060.



### SERIES 3130

Dual-lamp legend lights for larger message area and brighter illumination. Rectangular incandescent pilot lights in 2, 3 and 4 terminal versions. Simple to install, easy to relamp. Lamps will not vibrate loose. In variety of lens colors with lamps or from 4 to 48 V. Quick-connect terminals. (Two ½″ dia. hole on ½″ centers, or .885″ x .500″ opening).

## LINE-O-LITE

**Distinctive design, and mounting is a snap:**

Attention-getters for warning and identification. If you need a bright, eye-catching rectangular bar of light, choose Line-O-Lite.

### SERIES 2330D

In red, amber, white, green, 120 Vac, with wire leads or .250″ terminals, (1$\frac{25}{32}$″ x 1$\frac{13}{32}$″ opening) for snap-fit into panels .055″ to .070″ thick, use speednuts for the rest.

### SERIES 3620D

In red, amber, white, green, 120 Vac, (⅝″ x ⅜″ opening) for snap-fit into panels .020″ to .130″ thick.

## GLO-DOT

**High visibility in tight spots:**

One-piece body and lens for fast installation. When you need a miniature general-purpose indicator light assembly for cramped locations, turn to the simple, compact construction of Glo-Dot. Tamper-proof, UL-recognized, CSA-approved.

### SERIES 2990D

Incandescent, 6, 12, 28 V, in red, amber, white, green, blue, yellow, with wire leads. (⅜″ dia. hole).

### SERIES 2990P

Incandescent, 6, 12, 28 V with plug bezel and low-profile lens, in red, amber, white, green, blue, yellow, with wire leads. ½″ dia. hole).

### SERIES 2120A

Neon, 120 Vac, in red, amber, white, with wire leads. (⅜″ dia. hole).

### SERIES 2110A

Neon 120 Vac, incandescent 6, 12, 28 Vac, in red, clear, amber, white, green, with wire leads or quick-connect terminals.

### SERIES 2150A

Neon 120 Vac, incandescent 6, 12, 28 Vac, in red, clear, amber, white, green, with wire leads or quick-connect terminals.

# MINI-DOT

**Pilot lights you push through panel from the front, lock from the back.**

**For fast mass-production mounting:**

A smart-looking series of incandescents and neons that mount quickly by pushing lens through front panel opening, then locking body to lens behind the panel, for secure, tamper-proof installation.

**SERIES 4730J**
Incandescent, 6, 12, and 28 V in red, amber, white, green, blue, yellow, neon, 120 Vac, in red, amber, white, green. (.180″ dia. hole).

**SERIES 4700A**
Neon, 120 Vac, in red, amber, white, green (5/16″ dia. hole).

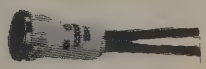
# OMNI-GLOW

**Closest thing to an all-purpose pilot light:**

Big on performance, wide in choice, long-lived, and low-cost. If you want a rugged, long-lived general-purpose indicator light assembly in a wide range of colors, lens shapes, round, flat, tapered; housing sizes and both lugs and leads, this is the one.

**SERIES 2620K**
Neon, 120 Vac, in red, amber, white, green with wire leads .250″ terminals, flush lens. (7/8″ dia. hole).

**SERIES 1030D**
With wire leads, 6, 12, 28 V. 120, 250 Vac, in red, amber, white, green lens. (1/2″ dia. hole). Also available with .187″ terminals for 120, 250 Vac.



**SERIES 1050A, DOME**
**1050C HI-HAT; 1050N SQUARE**
Dome; 1050C hi-hat; 1050N square with wire leads, 6, 12, 28 V, 120, 250 Vac, in red, amber, white, green, bue; or with .187″ terminals; all with round lens. (1/2″ dia. mounting hole).

# LED SUPER-BRITE

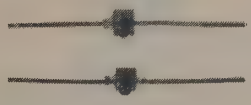
**The brightest, highest-efficiency lights available:**

Red, green, or yellow light-emitting diodes. A lifetime approximately 100,000 hours long. Low voltage, low power drain — ideal for solid-state and battery applications. Highly resistant to shock and vibration.

**SERIES 2191**
High-hat and hemispherical lenses in red, green, yellow, 6, 12, 24 V, wire leads. Built-in current-limiting resistor and rectifier diode permit their use in AC and DC applications and protect against damage from improper polarity connection. (5/16″ dia. hole).

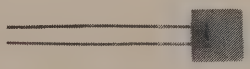
**SERIES 4303F**
T-1 LED for limited-space applications, in red, yellow, green; for voltage ratings 3 V up depending on resistor used.

**SERIES 4306R**
Rectangular LEDs in red, green, yellow, for voltage ratings 3 V up depending on resistor used.



**SERIES 4304H, 4305H**
T-1¾ LED in red, green, yellow, for voltage ratings 3 V up depending on resistor used, wire leads. Diffused and non-diffused (wide and narrow-angle) types. (17/64″ dia. hole).

**SERIES 4307T**
Micro-miniature LED for limited space, in red, green, yellow; for voltage ratings 3 V up depending on resistor used, wire leads.



**SERIES 5100H**
In black nylon snap-fit housing, wire leads, red, green, yellow, voltage ratings from 3 V up depending on resistor used. (1/4″ dia. hole).

# Can't find what you want here? Amazing.

**If it isn't here, IDI will modify a stock model for you, or custom-design and produce exactly what you want. High-volume production facilities hold prices down, speed delivery. If your only solution is a custom solution, ask for our catalog of special and custom indicator lights. Nothing can stop IDI from meeting your indicator light requirements.**

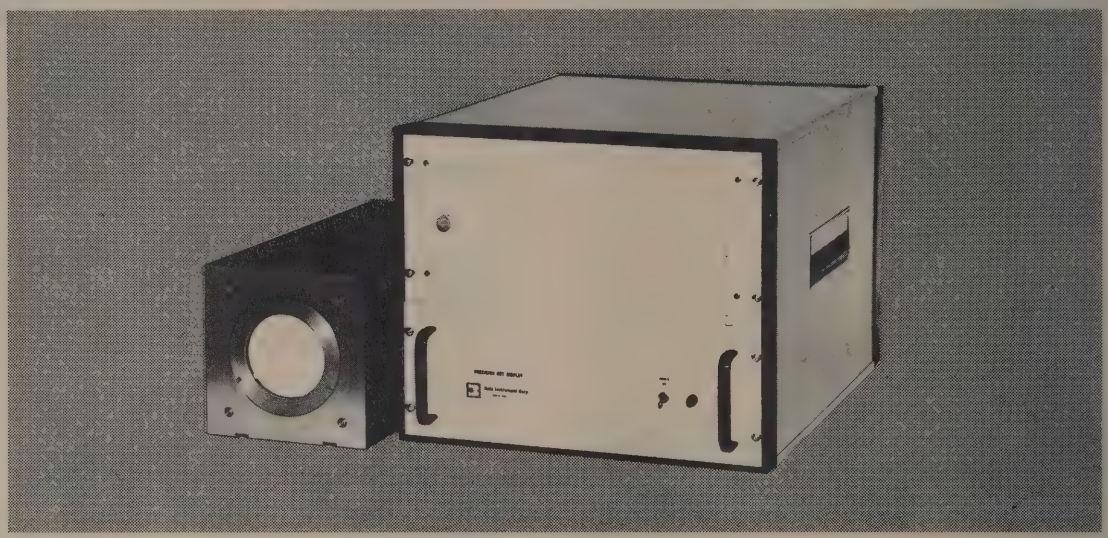
CRT DISPLAY SYSTEMS

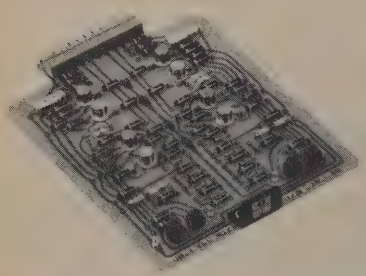
# Precision CRT displays



The Infodex line of Precision CRT Displays consists of a series of high resolution cathode ray tube displays utilizing all Silicon solid state circuitry for application in:

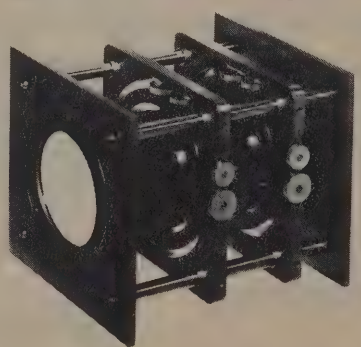
a. film and hard copy printing recorders
b. flying spot scanners
c. film readers
d. radar displays
e. computer output displays
f. TV monitors
g. Heads-Up displays

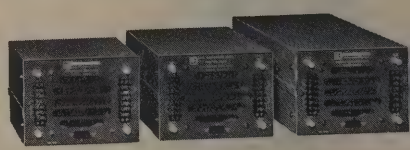
or any application requiring a precision programmable light source. They are capable of random access X-Y deflection or scanning at any rates from DC to the maximum bandwidth capability of the deflection system. A complete line of models is available.



## Modular CRT building block components

Individual, compatible plug-in circuits such as: DF2050 Dynamic Focus Generator; DF347 Dynamic Focus Amplifier; LC2656/2676 Precision Linearity Correction Circuit; VA2548 Video Amplifier (10 mhz); VA2549 Gamma-Corrected Video Amplifier (10 mhz); VA2077 Video Amplifier (30 mhz); SG1190 Sawtooth Generator; PP2425 Phosphor Protection Circuit; DA1340 Deflection Amplifier (±0.75 amperes); EDA800 Electrostatic Deflection Amplifier (350 volts plate-to-plate positive or negative); FR1882 Static Focus Regulator; BA1714 Blanking Amplifier. All circuitry features silicon semiconductors and temperature stable metal-film resistors throughout.





## ±35 Volt deflection amplifiers

The models DA223, DA224 and DA225 are dc-coupled, all-silicon, solid-state modular packages capable of supplying up to ±2.0, ±4.0 and ±6.0 amperes of deflection current respectively to each axis of a directly-coupled deflection yoke. A unique method of damping optimizes the amplifier for the particular yoke being used by means of an adjustable potentiometer. The amplifiers also feature extremely fast settling time and high bandwidth. The user has the choice of operating the amplifiers Class A for achieving nonlinearities of ±0.02% maximum or Class AB for minimum power consumption.

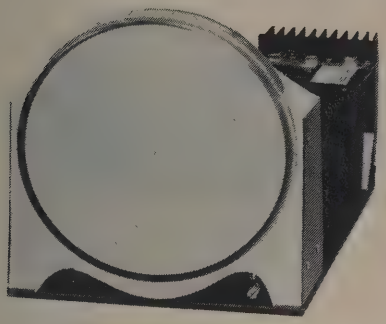
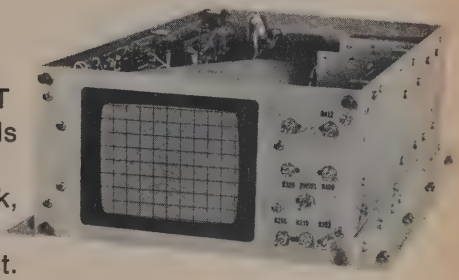
CRT DISPLAY SYSTEMS

# OEM CRT displays

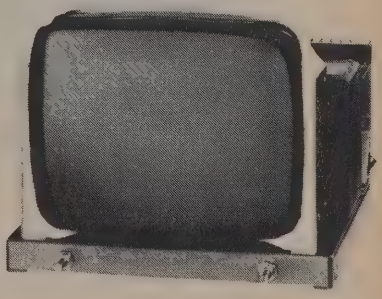


Infodex is a specialist in the design and manufacture of CRT Displays. Many standard models are available and because sub-assemblies are regularly in stock, custom designs can often be done in reasonable time and cost.



## STANDARD

6″ Flat Face X-Y
6″ Flat Face Raster Scan
9″ X-Y
17″ X-Y
7″ Flat Face Raster Scan
9″ Raster Scan
12″ Raster Scan
15″ Raster Scan
3″ Electrostatic, DC Powered



## CUSTOM

Screen sizes from one inch to twenty inches, X-Y and raster scan. On-off brightening and video modulation. Specials for the military, medical and marine markets.

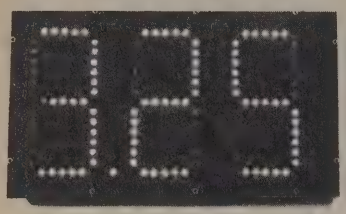
— FEATURING —

- Ready to mount into panel cutout
- Servicing from front without tools
- Supplied in attractive assemblies with bezel
- Includes anti-glare "Black-Out" panel & color filter
- Snap-in logic boards available with memory option
- All wear parts (lamps and logic) socket mounted
- Plus minus signs, colons, decimal, message modules optional

### Series 68031

**6 DIGIT CLOCK DISPLAY SHOWN**

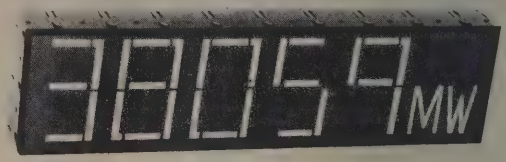
1.0" Characters — Viewing to 30 Ft.



### Series 68036 & OD68036

**3 DIGIT UNIT SHOWN**

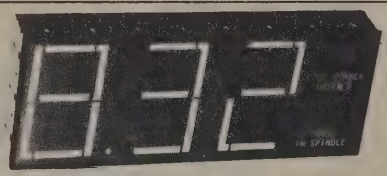
Indoor/Outdoor — Viewing to 150 Ft.



### Series 68032

**5 DIGIT MEGAWATT DISPLAY SHOWN**

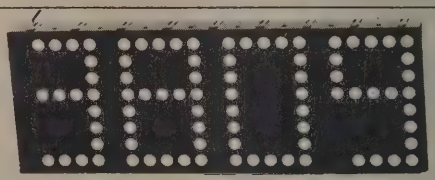
2.0" Characters — Viewing to 60 Ft.



### Series 68033

**3 DIGIT N. C. TOOL DISPLAY SHOWN**

2.7" Characters — Viewing to 80 Ft.



FOR OUTDOOR VIEWING

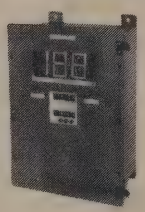
**4 DIGIT UNIT SHOWN**

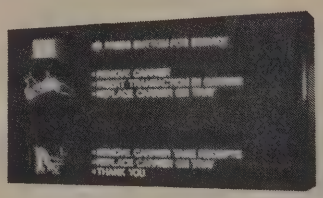
### Series OD68032/33

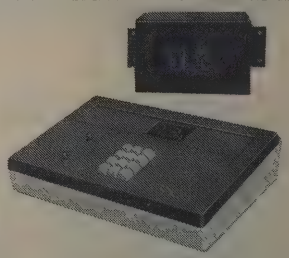
2.1"/2.9" Characters — Viewing to 60/80 Ft.

## SPECIAL SYSTEMS

We have supplied various hardware designed to meet special customer needs, including keyboard entry displays, up/down counters, hi-threshold interfaces, pre-determining counters, display/control systems and special enclosures. Call us to discuss your requirements.







## LIGHTED INDICATORS
## STATUS DISPLAYS
## BACK-LIGHTED/DEAD FRONT PANELS
## ANNUNCIATORS

### SERIES 68011, 68012, 68013 AND 68014

Any group of messages/symbols can be displayed in any combination of colors • Front panel graphics are back lighted using Std. MFB T 1¾" lamps • Basic message module sizes: 3/8" Sq, 3/8" x 3/4", 3/8" x 1-1/8", 3/8" x 1-1/2" or multiples of these • Units are supplied in an attractive package with bezel and "Black-Out" front panel, ready to snap into rectangular panel cutout • Common ground reduces installation time • Servicing can be done from the front • Lamp drivers and special logic available.

**74000 SERIES BACKLIGHTED/DEAD FRONT PANEL ASSEMBLIES** are available to meet a wide variety of medium to large size display applications. These are supplied to meet customer specifications.

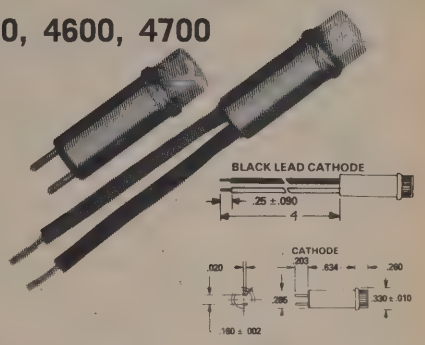
# LED, INCANDESCENT AND NEON INDICATOR LIGHTS

## CUSTOMIZED IN SEVEN DAYS

**LED'S** • Solid state reliability • Decorative panel mounting • Available in red, green and amber • DC voltage range 2 volts to 28 volts at 10 mA (utilizing internal resistor) • 4″ color coded stranded insulated leads or polarized BiPins standard — custom lead lengths available

## FRONT MOUNTING — 9/32″ HOLE CLEARANCE — SERIES 4400, 4600, 4700

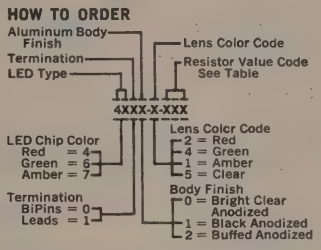
- Aluminum body in 3 anodized finishes: bright clear, black, and buff
- Stainless steel polarized BiPins available



### OPERATING PARAMETERS

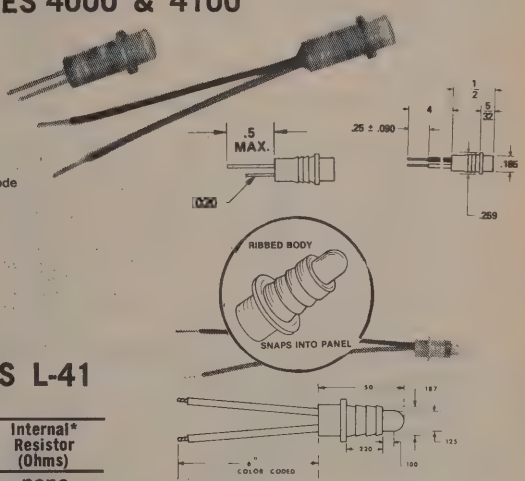
| Part No. XXXX-X- | Voltage | Current (mA) | Internal Resistor (Ohms) |
|---|---|---|---|
| 001 | 2 | 10 | none |
| 002 | 5 | 10 | 330 |
| 003 | 6 | 10 | 390 |
| 004 | 10 | 10 | 820 |
| 005 | 12 | 10 | 1000 |
| 006 | 15 | 10 | 1300 |
| 007 | 28 | 10 | 2700 |

### HOW TO ORDER



## FRONT MOUNTING — 3/16″ HOLE CLEARANCE — SERIES 4000 & 4100

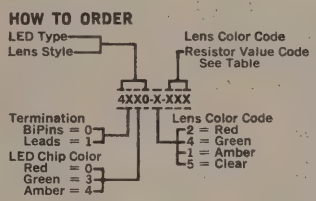
- Ultra miniature size
- One piece construction
- No hardware required — ribbed body snaps into panel
- Available in smooth body — hardware supplied upon request



### OPERATING PARAMETERS

| Part No. XXXX-X- | Voltage | Current (mA) | Internal Resistor (Ohms) |
|---|---|---|---|
| 001 | 2 | 10 | none |
| 002 | 5 | 10 | 330 |
| 003 | 6 | 10 | 390 |
| 004 | 10 | 10 | 820 |
| 005 | 12 | 10 | 1000 |
| 006 | 15 | 10 | 1300 |
| 007 | 28 | 05 | 5100 |

### HOW TO ORDER



## REAR MOUNTING — 3/16″ HOLE CLEARANCE — SERIES L-41

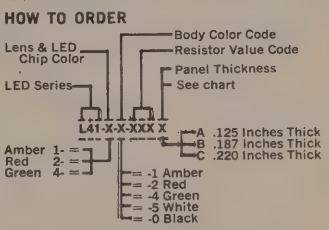
- Eliminates additional final assembly — component included in circuitry
- Available for panel thicknesses 1/8″, 3/16″, 7/32″
- Allows convenient circuitry location
- 22 AWG 6″ leads standard — custom lead lengths available
- TTL and MOS compatible
- Vibration and shock resistant
- No mounting hardware required — ribbed body snaps into panel

Note: Other resistor values for different current requirements are available on request.

### OPERATING SPECIFICATIONS

| Part No. L41-X-X-X | Voltage | Current (mA) | Internal* Resistor (Ohms) |
|---|---|---|---|
| 000 | 2 | 10 | none |
| 330 | 5 | 10 | 330 |
| 390 | 6 | 10 | 390 |
| 820 | 10 | 10 | 820 |
| 1000 | 12 | 10 | 1000 |
| 1300 | 15 | 10 | 1300 |
| 5100 | 28 | 05 | 5100 |
| 2700 | 28 | 10 | —— |

* Externally mounted to one lead due to physical size of resistor.



### HOW TO ORDER

### OPTO-ELECTRIC CHARACTERISTICS AT 25°C

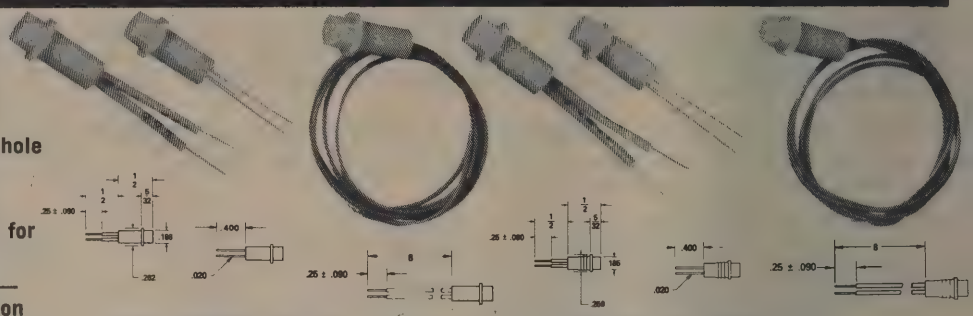
## CUSTOMIZED IN SEVEN DAYS

## ULTRA-MINIATURE INCANDESCENT



- Front mounting—3/16" clearance hole
- Available in 5 transparent and 5 translucent colors
- 400 series features ribbed body for snap in panel mounting
- Smooth body on the 300 series—mounting hardware supplied upon request
- Center-to-center mounting space 3/8" Series 300, 5/16" Series 400
- Standard 1/2" solid or 8" stranded insulated wire leads
- Custom lead lengths available
- Built-in T1 bulb
- 180° visibility
- Environmentally sealed
- Explosion proof
- High impact butyrate plastic—custom materials available
- Hot stamping legends available: Two 6 pt. (5/64") or one 8 pt. (3/32") characters in black or white
- 350 and 450 series available with nickel or gold finish BiPins

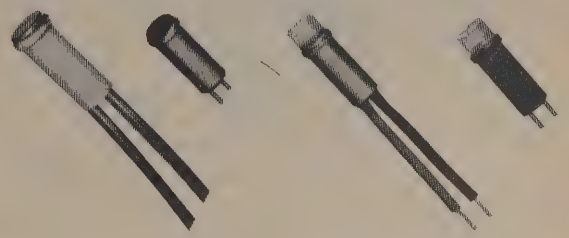
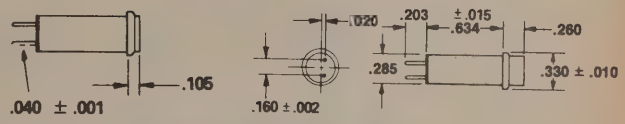
Economy version available — (unit sealed and no insulation on leads). To order place "N" before bulb type.

Note: * Neon assemblies without resistor attached require a current limiting device in the circuit.

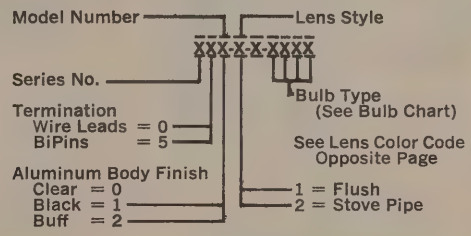
## ALUMINUM BODIED CARTRIDGE LIGHTS

- Anodized aluminum body — internally insulated
- Front mounting in 9/32″ clearance hole
- Stainless steel BiPin terminals (insulated from body) or 2″ stranded insulated leads
- Rapid assembly with optional mounting hardware





### HOW TO ORDER (700 SERIES ONLY)



## PC BOARD SOCKET PINS — MODEL SP-210

- Economy socket pins for lamps, LED's or other components
- Solders easily to PC boards — wave, hand, or flow
- Provides component replacement without additional soldering
- Accepts straight or right-angle leads
- Strong internal spring retention
- Accepts male leads to .020 dia and .180 long
- Mounts in .038 hole clearance (#62 drill)
- Base metal — beryllium copper
- Gold plating — 10 m in. 24k

# OPTO-ELECTRONICS

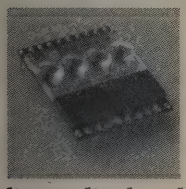
## The broadest selection available anywhere

Now Litronix offers an opto-electronic device for virtually every application. Over 300 LED displays, LED lamps, opto-isolators, IR emitters, photo-detectors and photo-voltaic cells. And more are coming every month.

You will find advanced products not available anywhere else. As well as widely-used standard devices at highly competitive prices.

Some highlights:

### ALPHANUMERIC LED DISPLAYS.

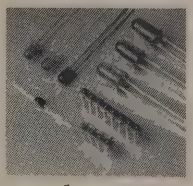


Character sizes from 0.16″ to 0.50″ in end-stackable arrays of 1 to 4 red characters — including an intelligent display that interfaces just like a RAM to μP buses.

### DIGITAL LED DISPLAYS.

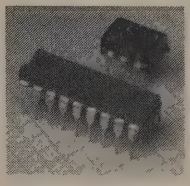
Green, yellow and red digits. Nine sizes from 0.1″ to 1″ high. In DIPs of 1 and 2 digits. On PCBs of 2 to 6 digits with edge connectors. Both light-pipe displays with very wide viewing angle and low-cost reflector displays. 70 different types.

### LED LAMPS.



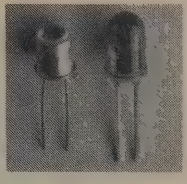
Red, orange, yellow and green lamps. T-1, T-1¾ and axial packages. Arrays of 2 to 10 lamps. With panel mounting clips. Lamps that flash on/off. Constant brightness lamps. Voltage-indicating lamps. 58 different types.

### OPTO-ISOLATORS.



One, two and four-channel opto-isolators. Current transfer ratios up to 320%. Isolation voltages up to 5000v. Transmission rates as high as 4 megabits/sec. 15 JEDEC types. 25 different types in all.

### IR EMITTING DIODES.



From medium to very high power. Beam widths from 6° to 60°. Hermetic and non-hermetic TO-18 size. Miniature with axial or radial leads. 30 different types.

### PHOTO-DETECTORS.

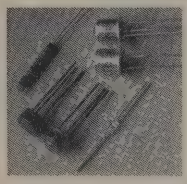


Photo-transistors and photo-diodes with acceptance angles from 6° to 73°. Hermetic high-reliability devices and low-cost non-hermetic devices. TO-18 packages, ceramic packages and miniature radial lead configurations. Arrays of 2 to 10 detectors. 47 different types.

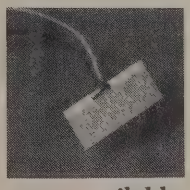
### PHOTO-VOLTAIC CELLS.



Silicon solar cells. Sensitivity from .04 microamperes to 2.8 microamperes. Twelve different types available.

For a well-illustrated 36-page catalog containing data on all devices in the product categories above phone your local distributor. Or contact Litronix at 19000 Homestead Road, Cupertino, CA 95014. Phone (408) 257-7910.

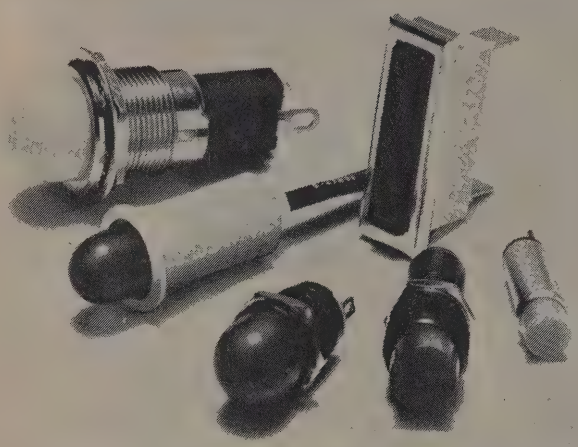
LITTELITES

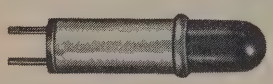
# INDICATOR LIGHTS. . .



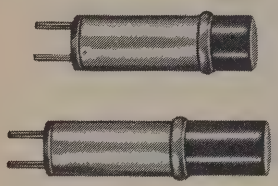
- **Broad line** . . . Littelites include Cartridge Lamps and Lampholders, Subminiature Lampholders, Miniature Lampholders, and Snap-Mount Plastic Lites . . . we offer a wider selection among these four product groups than any other single manufacturer.
- **UL/CSA** . . . All Littelites are UL Recognized or Listed and CSA Certified. New tools and molds assure you of the finest quality lights on the market today.
- **Fast** turn-around on large volume orders.
- **Off-the-shelf** availability from a nationwide network of Littelites distributors.
- **Special** requirements? Just give us a call (312) 824-1188.

## CARTRIDGE LAMPS/LAMPHOLDERS

SEND FOR CATALOG LL-C574

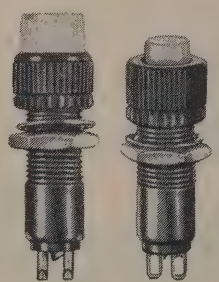


UL RECOGNIZED
CSA CERTIFIED
MEET MIL-L-3661 REQUIREMENTS



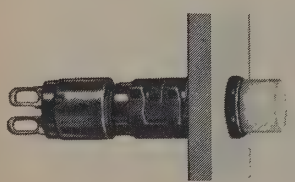
### Cartridge Lamps

Incandescent, neon, or solid state. Solid state units supplied with green, red, yellow, or amber LEDs. All cartridge lamps offer a wide choice of lens styles and colors. Mate with cartridge lampholders shown below.



### Cartridge Lampholders

Designed for rear mounting into 3/8" clearance hole. Turret pin, solder lug, or solder cup terminals. Available with flat for "D" hole mounting. Supplied separately or as complete assembly, which includes lens cap (smooth or fluted) or lens collar (.284" or .230" wide).

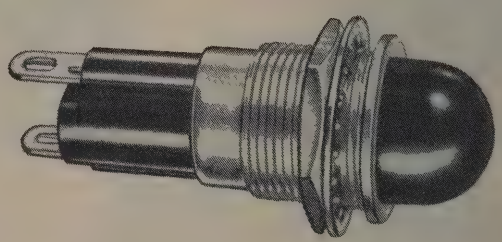


### Clips and Sockets

Provides inexpensive means of mounting cartridge lamps directly to the panel. Solder lug or solder cup terminals. Clip secures cartridge lamp in 9/32" mounting hole.

## MINIATURE LAMPHOLDERS

SEND FOR CATALOG LL-M574



- For front mounting into 11/16" clearance hole.
- Accommodate T3-1/4 or T2 bayonet based incandescent lamps and T3-1/4 bayonet based neon lamps.
- Screw or solder lug terminals
- Drip proof and "D" hole mounting available.
- Neon lampholders feature built-in resistor.
- Six basic lens styles available in wide choice of colors.
- **UL Listed, CSA Certified** (Solder Lug Terminals)
  **UL Recognized, CSA Certified** (Screw Type Terminals)

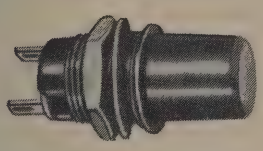
# . . . FROM LITTELFUSE

LITTELFUSE

## SUBMINIATURE LAMPHOLDERS

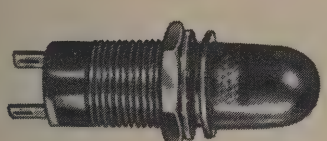
**SEND FOR CATALOG LL-S574**

Subminiature lampholders accommodate T1-3/4 incandescent or T2 neon midget flanged base lamps. All lampholders allow easy installation and replacement of the lamp and lens from the panel front. **UL Recognized. CSA Certified.**



### 920 Series

For front mounting into 15/32" clearance hole. Accept a T1-3/4 incandescent midget flanged base lamp (1.35-28V). Choice of four different lens styles. Meet requirements of MIL-L-3661.



### 921 Series

Front mounting into 15/32" clearance hole. Accommodate replaceable T2 neon midget flanged base lamps (C7A—105-125V AC-DC or C9A—110-125VAC). Built-in resistor limits lamp current. Meet requirements of MIL-L-3661.

### 922 Series

Three different mounting configurations: **922 Series**—front mount—15/32" clearance hole; **923 Series**—front mount—17/32" clearance hole; **924 Series**—front or rear mount—15/32" clearance hole.

Accept a T1-3/4 incandescent midget flanged base lamp (1.35-28V). Choice of four lens styles.

### 925, 926, 927 Series

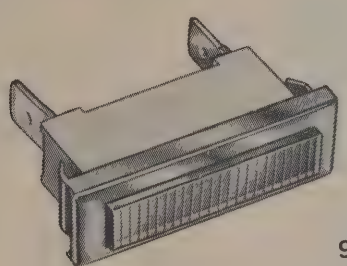
Three different mounting configurations: **925 & 926 Series**—rear mount—3/8" hole; **927 Series**—front mount—15/32" hole.

Accommodate either T1-3/4 incandescent or T2 neon midget flanged base lamps. Three different lens styles in smooth face or fresnel. Lampholders and lenses can be furnished with gaskets for drip proof applications.

## SNAP-MOUNT PLASTIC LITES

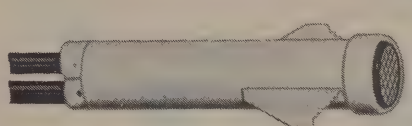
**SEND FOR CATALOG LL-P574**

Designed to snap into mounting hole without the use of auxiliary hardware. The 970 and 980 Series feature a pair of flex arms which ensure positive retention and protection against shock and vibration. **UL Listed. CSA Certified:** All units with wire leads.
**UL Recognized. CSA Certified:** Units with Q.C. Terminals.



### 960 Series

Snap-mount into 1.281" x .395" mounting hole. Available with neon (125-250V) or incandescent (6-28V) lamps. Can be supplied with 6" wire leads, 1/4" or 3/16" Q.C. terminals. Choice of fluted or smooth face lens.



### 970 Series

Snap-mount into .312/.318" diameter hole. Available with neon (125-250V), incandescent (6-28V) or solid state (1.8-28V) lamps. Solid state units supplied with red, yellow, amber, or green LEDs. Terminations include 6" wire leads or .125" Q.C. terminals. Choice of eight lens styles.

### 980 Series

Snap-mount into .500/.510" diameter hole. Available with neon (125-250V) or incandescent (6-28V) lamps. 6" wire leads or .187" Q.C. terminals. Fresnel lenses in six different styles.

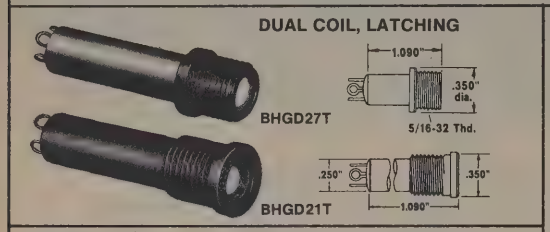
## BALL AND FLAG INDICATORS*

a **TALLEY INDUSTRIES** Company

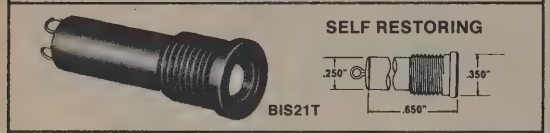
135 South Main Street, Thomaston, CT 06787
Phone 203-283-8261



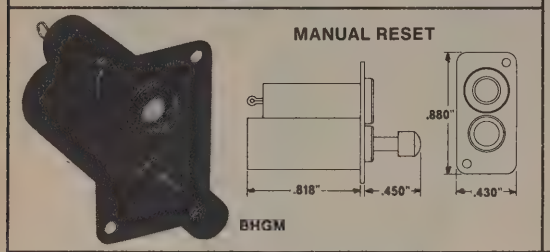
### MAGNETIC BALL INDICATORS
**(Electro-magnetically actuated displays.)**

An electrical pulse to unit rotates a 2-color ball to display the opposite color. No filaments to burn out or fail when used within limits. Power drain is negligible. Mounting configurations (hardware provided) include front or rear panel, sleeve or threaded. Seven standard colors and seven standard voltages 1.5 to 28 VDC. Op. temperature range is −65°C to +125°C. Units withstand over 20 G's vibration and 100 G's shock. Sleeve-mounting and manual reset tools are available. Special modifications include radiused dome lens, edge-lit lens, non-glare glass, O-Ring panel seal, square case, RFI shielding, internal diodes, flatted cases, and insulated lead wire terminations.

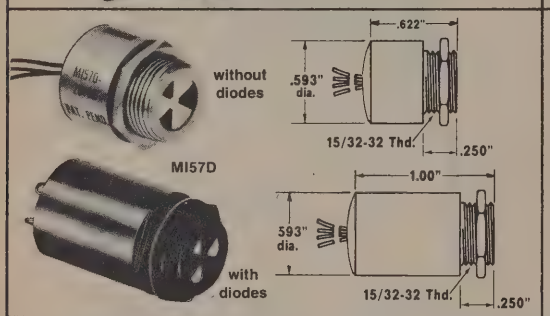
**Dual Coil Latching** Latching models retain fault color after the pulse is removed. Two discreet coils provide for SET and RESET. By far the most popular of Fault Indicators. Units retain reading in either mode magnetically with no power required. May also be reset with RT-22 reset tool. **Single Coil Latching** models are electrically SET by applying a 20 millisecond pulse to coil; electrically RESET by reversing polarity. Both models Qualified to MIL-1-81663/1 and MIL-1-83287/3.
(See Bulletin B-11 for details).



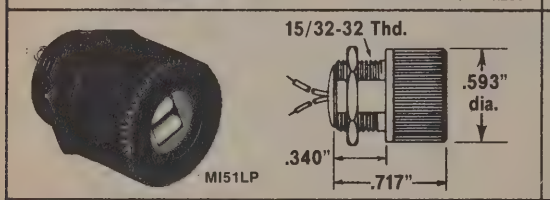
**Self-Restoring** models are ideal for Power-Off indication. Small, reliable, the display ball is magnetically biased to return and magnetically latch to its unenergized color when power fails. (See Bull. B-12 for details).



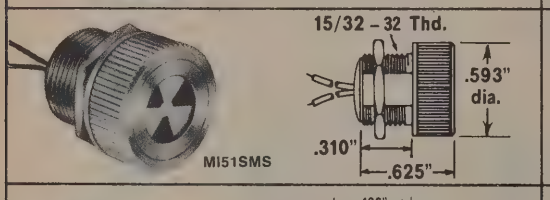
**Manual Reset** single coil model is electrically SET to display fault. No electrical switching or mechanical interlocking is required for RESET. Unit is reset by the magnetic field released by depressing the push button. (See Bull. B-13 for details).



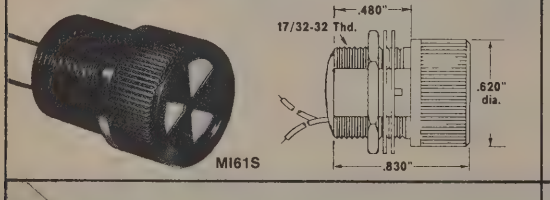
### MI57D (Dual Coil Elec. Reset.)
An internal-flag indicator requiring only pulse power to change color. No-Fault display can be ordered all white or all black. 25 ms pulse changes flag position to show segmented Fault color. Retains display after pulse by magnetically latching in position with no further power requirement. Reset is electrical. Features low power drain, positive indication, excellent visibility, high sensitivity, and fast response. Unit sealed and impervious to humidity, dust and salt spray. Standard display colors: black, white and red. Available in 6 to 28v dc. Operating temperature range: −65°C to +125°C. Available with or without arc suppression and/or steering diodes. Qualified to Mil-1-83287/2. (See Bulletin M-11).



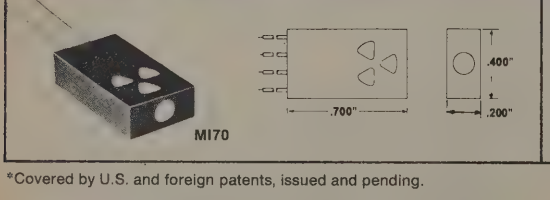
### MI51LP (Low Power Manual Reset.)
A manually resettable magnetic latching indicator requiring only 50 milliwatts pulse power to operate. Ideal for direct interface with TTL logic. Indicator displays red or white color upon application of a pulse width of 25 milliseconds. Display magnetically latches and holds pulse color until knurled knob is rotated 60 degrees clockwise, resetting indicator to all-black display color. Available in 1.5 to 28v dc. Operating temperature range: −65°C to +125°C. Qualified to Mil-1-83287/4. (See Bulletin M12).



### MI51SMS (Flag Indicator. Manual Reset.)
When a fault occurs, an electrical pulse causes the internal flag of this indicator to rotate to a position where it is positively held in a magnetic-locked FAULT position. It can be manually reset to NO FAULT position by rotating knob 60°. Can be special-ordered for both electrical and manual reset. Indicator provides positive indication under shock and vibration, and offers excellent visibility in strong incident light. Available in 6 to 28v dc. Operating temperature range −65°C to +125°C. (See Bulletin M-13).



### MI61S (Flag Indicator. Manual Reset or Elec. Reset.)
This internal flag, magnetic-latching indicator can be manually reset. When a fault occurs, a triggered electrical pulse causes the flag to rotate to a position where it is postively held in a magnetic-locked position. It may be reset by rotating knurled knob clockwise 60 degrees. The knob spring returns to its normal position. Unit is environmentally sealed and offers excellent visibility in strong ambient light. Available in 3 to 28v dc. Operating temperature range: −65°C to +125°C. Qualified to Mil-1-83287/1. (See Bulletin M-17).



### MI70 (Flag Indicator. Internal Switches.)
Designed to fit the latest requirements and concepts of modular packaging, particularly those of modern avionic systems where miniaturization and reliability are the basic criteria. A dual-view, low-profile unit for PC or panel mounting. Internal switching can also be provided to allow either isolated signal switching or internal switching. Arc suppressing diodes can be packaged internally. Available in 6 to 28v dc. Temperature range: −65°C to +105°C. (See Bulletin M-16).

*Covered by U.S. and foreign patents, issued and pending.

## Indicators

# INDICATOR LIGHTS

This Indicator Light section of the catalog has been compiled to provide the necessary specification information as concisely as possible, so the design or packaging engineer may readily select the unit which best meets his needs. In particular, the Indicator Selection Guide presents a speedy method of narrowing down the total number of indicators in this catalog to a small group for more detailed consideration.

As more and more indicators became available, the old system of requiring the customer to construct his own part number became more and more cumbersome. In this catalog, for the first time, complete assembly part numbers are tabulated for each indicator/cap combination. Very simple substitutions in these numbers allow changes in color, substitution of translucent for transparent lenses, etc. As in the past, the desired lamp number is added as a suffix to the part number. This new method in no way represents a change in the previous numbering system; it is only a faster method for determining the proper number.

These panel indicators embody the best of military and commercial materials and performance features. Materials, finishes, and workmanship, are more than adequate for conformance to Military, Federal, or industry specifications. In particular, pages 64 and 65 present a cross reference listing of Oak indicators which are on the MIL-L-3661B Qualified Products List, and also those which may be ordered against MS (Military Standard) designations.

Because of the wide variety of items in the Oak Switch Division Indicator Light line, it is possible in most cases to select a standard, off-the-shelf unit to meet a precise requirement. Innumerable variations can also be furnished, such as caps in special color combinations, lettered to meet your needs, either hot stamped, or engraved and filled.

The Oak Switch Division sales staff is always at your service whenever additional information or assistance is required.

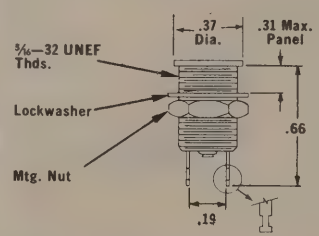
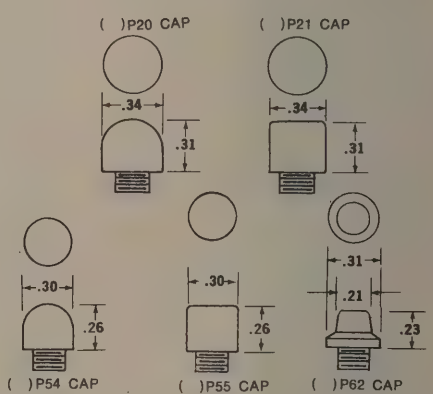
## 99-33180 SERIES

### BASE ASSEMBLY
99-33180



SCHEMATIC

### CAP STYLES



**Notes:**

1. **Material and Finishes:** Mounting tube, black glass filled nylon per MIL-M-19887. Mtg. nut aluminum, black anodized per MIL-A-8625A. Lockwasher, stainless steel or steel, nickel plate. Terminals, brass, tin plated per MIL-T-10727A.
2. **Cap Assembly:** Lens is high impact-resistant plastic per L-P-349a.
3. **Lamp:** T-1 sub-midget flange base. See lamp selection guide. Choose from Group M.
4. **Mounting:** Assembly mounts from front of panel. All mounting hardware supplied. Recommended mounting hole .328 + .015 — .000 diameter.
5. **Weight:** Approx. .12 oz less lamp.

**99-36980 SERIES**

**Notes:**

**1. Materials and Finishes:** Mounting tube and nut are stainless steel, passivated per MIL-S-5002. Wire leads #26 GA silver coated, stranded copper with TFE-flurocarbon insulation.

**2. Lens Assembly:** Lens is high impact-resistant plastic per L-P-393 (polycarbonate).

**3. Lamp:** (non-replaceable) MS 24367-683 subminiature T-1 with 5.0V @ .060 AMP rating.

**4. Weight:** Approx. 0.005 lbs. maximum.

**5. Mounting:** Assembly mounts from front of panel. All mounting hardware supplied. E.M.I. suppressed assemblies require paint free area on back side of mounting hole for E.M.I. conductivity.

Translucent colors: Add "TL" as suffix to Part No.
† Assembly conforms to requirements of MIL-L-3661.
See pages 62 & 63 for complete listing of military type designations.
*White if translucent color specified.

## sub-miniature, watertight

**95-33180 SERIES**

**NOTES:**

**1. Material and Finishes:** Mounting tube, black glass filled nylon per MIL-M-19887. Mtg. nut, aluminum, black anodized per MIL-A-8625A. Lockwasher, stainless steel or steel, nickel plate. Terminals, brass, tin plated per MIL-T-10727A.

**2. Cap Assembly:** Lens is high impact-resistant plastic per L-P-349a. Standard colors are transparent.

**3. Lamp:** T-1 sub-midget flange base. See lamp selection guide. Choose from Group M.

**4. Mounting:** Assembly mounts from front of panel. All mounting hardware supplied. Recommended mounting hole .328 + .015 —.000 diameter.

## miniature "big QT"

## 14-33880 SERIES
## 14-33881 SERIES
## 14-33882 SERIES

**Notes:**

**1. Materials and Finishes:** Housing and lamp base, gray glass filled nylon. Terminals, beryllium copper, gold flashed. Retainer clip, spring steel.

**2. Lens Cap:** High impact resistant plastic per L-P-393. (polycarbonate)

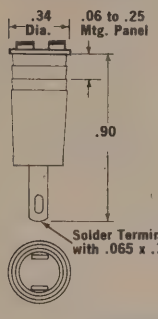
**3. Lamp:** Assembly accepts IPI based T-1¾ lamp, see lamp selection below. Lamp is replaced by removing snap-on cap.

**4. Mounting:** Two types optional.

A. Press-in; Assembly press fits into .281 dia. hole. No mounting hardware required.

B. Retainer clip; For mounting assembly into .200 ±.005 dia. hole or panels less than .06 thick. Order clip 067003000 separately.

### BASE ASSEMBLY 14-33880



### BASE ASSEMBLY 14-33881

## miniature, E. M. I. suppressed press-to-test

## 08-83281 SERIES

**Notes:**

**1. Material and Finishes:** Lens holder and front mounting nut is black anodized per MIL-A-8625A. Mounting tube & rear Mtg. nut, is bright nickel plated per QQ-N-290. Lockwasher is stainless steel. Terminals brass, gold plated per MIL-G-45204.

**2. Cap Assembly:** Lens is high impact-resistant plastic per L-P-349a. Lens holders are aluminum, black anodized.

**3. Lamp:** T-1¾ midget flange base. See lamp selection guide. Choose from Group A.

**4. Mounting:** Assembly mounts from rear of panel. All mounting hardware supplied. Flat on Mtg. tube provides for keyed installation.

**5. Weight:** Approx. .5 oz less lamp.

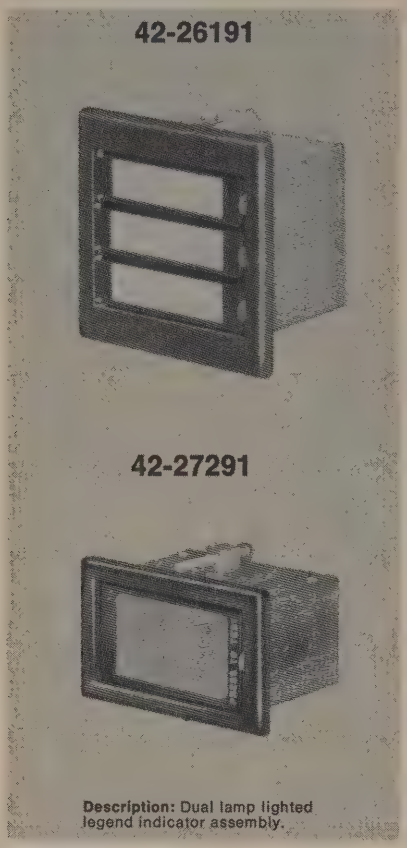
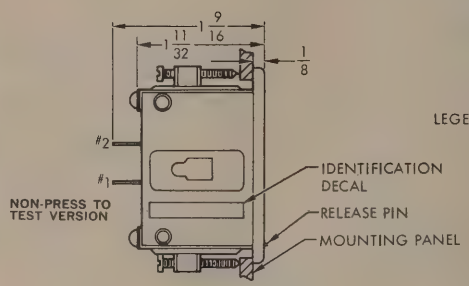
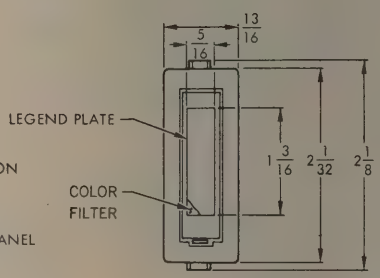
# MISSILITE Assembly

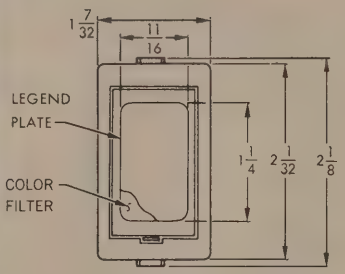


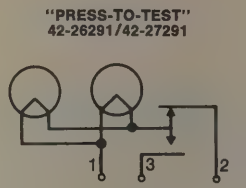
**Description:** Dual lamp lighted legend indicator assembly.

**42-26191** **42-26291** **42-27191** **42-27291**









## SPECIFICATIONS

**LEGEND:** Legend plate is replaceable from front of panel. Legend area may be imprinted with any letter or numeral combination, space permitting. For style and color, refer to page 66.

**LAMPS:** Two lamps are required per assembly and are replaceable from front of panel. Lamps are not included in part number shown. For lamp selection, refer to page 66, and ordering instructions.

**OPTIONS:** If vertical stacking is desirable, a second dash number is added. This number indicates the number of units required. Example: 42-26291-6-8 designates 8 units with red, Style A legend plates or 42-26291-66-4, designates 4 units with red, Style B legend plates. Example 2: 42-27291-6-3, designates 3 units with red, Style A legend plates; or 42-27291-66-4, designates 4 units with red, Style B legend plates. Refer to page 61 for dimensions of single or stacked assemblies. For horizontal or combined horizontal and vertical arrangements, please contact our sales department for part numbers, part dimensions, and cutout dimensions.
Note: If a second dash number does not appear on the part number, a single unit will be furnished.

**MOUNTING:** Single units are furnished with universal mounting brackets which enables the assembly to be secured at either top and bottom or at each side. Unless otherwise specified, multiple units will be supplied with mounting brackets at top and bottom only.

**PANEL CUTOUTS:** For panel cutout dimensions refer to page 61.

**WEIGHT:** Approximately 1.7 oz., less lamps per single unit.

# MISSILITE Assembly

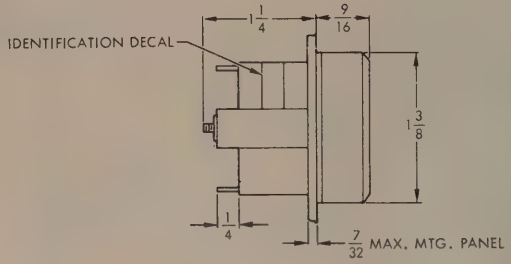
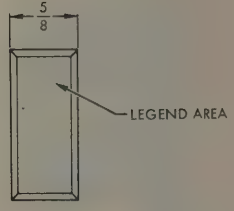
**Description:** Ungrounded dual lamp word warning indicator.

## 43-20580





### SPECIFICATIONS:

**LEGEND:** Legend area may be imprinted with any letter or numeral combination, space permitting. When necessary, special part numbers will be assigned for customer identification. For legend plate style and color refer to page 63.

**LAMPS:** Not supplied with assembly. Specify when ordering if desired. Two lamps required per unit. Consult lamp selection guide page 66. Unit is relampable from front of panel. For independent lamp illumination, specify 43-20880 Missilite.

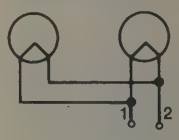
**MOUNTING:** See below for mounting panel cut-out information. Mounting hardware supplied with assembly.

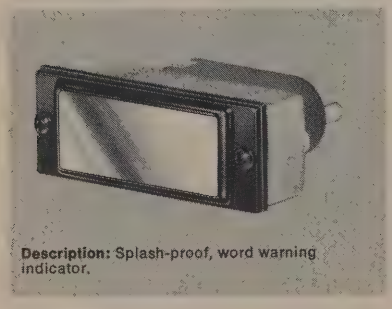
**WEIGHT:** Approximately 1.0 less lamp.

| Color | Legend Plate Style A | Legend Plate Style B |
|---|---|---|
| White | 43-20580-5 | None |
| Red | 43-20580-6 | 43-20580-56 |
| Green | 43-20580-7 | 43-20580-57 |
| Amber | 43-20580-8 | 43-20580-58 |
| Blue | 43-20580-11 | 43-20580-59 |

**NOTE:** To prevent accidental interchange of legends in multiple installations, lens caps will be indexed to proper base when this feature is specified by customer.

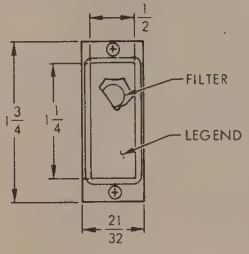
**43-20580 SCHEMATIC**

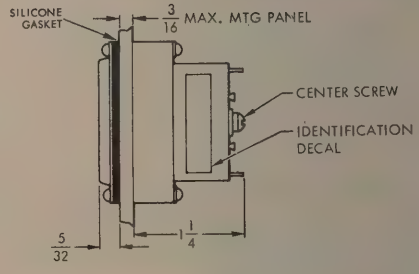




**Description:** Splash-proof, word warning indicator.

## 45-21090





### SPECIFICATIONS:

**LEGEND:** Legend area may be imprinted with any letter or numeral combination, space permitting. When necessary, special part numbers will be assigned for customer identification. For legend plate style and color refer to page 63.

**LAMPS:** Not supplied with assembly. Specify when ordering if desired. Two lamps required per unit. Consult lamp selection guide page 66. Relamping screw at bottom of base. For independent lamp illumination, specify 45-20990 Missilite.

**MOUNTING:** See below for mounting panel cut-out information. Mounting hardware supplied with assembly.

**WEIGHT:** Approximately .8 oz., less lamps.

**SPECIAL APPLICATIONS:** Unit is splash-proof when installed in panel and is designed to meet most military and commercial applications.

| Color | Legend Plate Style A | Legend Plate Style B |
|---|---|---|

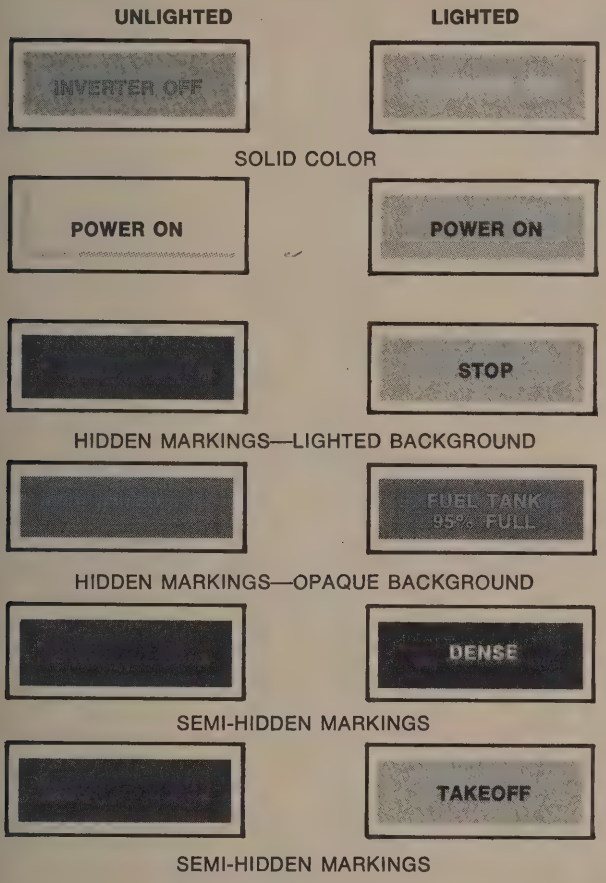
## LEGEND PLATE STYLE SELECTION GUIDE

Part numbers are included for specific assemblies having legend plate Styles A & B. Part numbers are available upon request for assemblies requiring legend styles and colors other than those listed on Missilite catalog pages.



**LEGEND PLATE STYLE A** — Visible opaque markings on translucent background. Standard markings will be black characters on white and yellow backgrounds, and white characters on backgrounds of all other colors.

**LEGEND PLATE STYLE B** — Visible black opaque markings on white translucent background. When lighted, the background changes to desired color.

**LEGEND PLATE STYLE C** — When unlighted, markings are obscured for minimum visibility. When lighted, the markings appear black against a lighted background of desired color.

**LEGEND PLATE STYLE D** — When unlighted, markings are obscured for minimum visibility. When lighted, the markings appear in the desired color, the background remains opaque.

**LEGEND PLATE STYLE E** — When unlighted, the markings are semi-visible on an opaque background. When lighted, the characters are clearly visible in desired color, background remains opaque.

**LEGEND PLATE STYLE F** — Semi-visible markings on background of color specified. When lighted opaque markings are sharply outlined.

## HOW TO ORDER IPI MISSILITES

Simply write or call the Oak representative in your area or the factory.

The following information must be included on the purchase order:

Specify the Oak part number with appropriate dash number (see individual pages).

Specify color and style of legend if requirements are for other than those parts listed herein.

Specify the desired legend plate markings. THE LEGEND PLATE WILL BE MARKED EXACTLY THE WAY IT APPEARS ON THE CUSTOMER'S DRAWING OR PURCHASE ORDER.

Specify lamp number in accordance with the lamp selection guide on page 66. Use lamp number as a suffix dash number to unit reference. Example: 42-26291-6-327.

Specify any requirements that deviate from standard i.e., side mounting for 42-46191 series, horizontal stacks of 42-47291, etc.

Oak will prepare individual customer specification control drawings for special configurations not covered by catalog part number.

These will be distinguished by a three digit dash number affixed to basic part number. Example: 42-26291-147.

## NEON GLOW TYPE

| | LAMP NO. | RATED VOLTAGE | STARTING VOLTAGE | RECOMMENDED SERIES RESISTOR | NOTES |
|---|---|---|---|---|---|
| **Size T-2** **Group C** | A1G | 105-125 AC OR DC | 65 VAC 95 VDC | 68KΩ | |
| | A1H (High Brightness) | 105-120 VAC 150 VDC | 95 VAC | 27KΩ | |
| **Size T-2** **Group D** | C7A | 105-125 AC OR DC | 65 VAC 90 VDC | 68KΩ | MS25252-C7A |
| | C9A (High Brightness) | 105-125 AC OR DC | 105 VAC | 27KΩ | MS25252-C9A |
| **Size T-3¼**  **Group E** | NE51 | 105-125 AC OR DC | 65 VAC 90 VDC | 100KΩ | |
| | NE51H (High Brightness) | 105-125 AC OR DC | 105 VAC | 27KΩ | |

**Notes:**
1. Candlepower values indicated are approximate initial mean spherical candlepower at rated voltage.
2. Service conditions such as voltage surges, temperature, shock, and vibration may contribute to a shorter average life.

# CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
# DER PRODUKTKATALOG FÜR ELEKTRONIKER
# ELECTRONIC ENGINEERS CATALOGUE

## The 1978 edition is out...and the response is in...
## IMMEDIATE AND OVERWHELMING

# ACCEPTANCE

The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to—and from—Western Europe.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 product headings & cross-references alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

# Pinlite® Incandescent Displays

- Directly-viewed incandescent design makes Pinlite displays ideal for high ambient light situations.
- Simple voltage reduction allows dimming for night use.
- High contrast ratio insures clear character definitions in a 10,000 ft.-candle incident light condition.
- 120° viewing angle.
- Patented cross-over filament arrangement eliminates "open corners" characteristic of other display types.
- Directly compatible with standard TTL driving networks.
- Easily multiplexed.
- "White" light allows filtering to a wide range of colors.

Pinlite displays are particularly desirable for applications requiring brightness and high reliability over a wide range of environmental conditions. Popular uses include aircraft cockpits, marine navigation, computer peripheral equipment, taxi meters and gas pump readouts.

## CONNECTORS

| Part Number | Description | Dimensions H (Inches) | Dimensions W (Inches) | Dimensions D (Inches) | List Price |
|---|---|---|---|---|---|
| CF-3H | For all "0" series decimal points, colons. | .700 | .094 | .385 | $ 4.25 |
| CF-9D | Connector with multiplex isolation diodes for "0" series 7-segment displays. | .562 | .208 | 1.000 | 10.55 |
| CF-9H | For all "0" series 7-segment, PM, EW, NS | .780 | .208 | .385 | 4.30 |
| CF-10D | Connector with multiplex isolation diodes for 1½ digit and hexadecimal displays. | .625 | .440 | 1.000 | 10.80 |
| CF-10H | Connector for 04N series 1½ digit displays and 04H series hexadecimal displays. | .875 | .390 | .385 | 8.95 |
| CF-20H | For 0-43, 0-44, 0-45, 0-63, 0-64, and 0-65 displays. | .875 | .334 | .385 | 12.15 |
| CF-204D | Connector with multiplex isolation diodes for 0-43, 0-44, and 0-45 displays. | .625 | .334 | 1.000 | 17.55 |
| CF-206D | Connector with multiplex isolation diodes for 0-63, 0-64, and 0-65 displays. | .625 | .334 | 1.000 | 17.55 |
| MDC-4 | For all Mini/DIP styles except decimal point. | .525 | .295 | .155 | .90 |

## DECODER/DRIVERS

| | | | | | |
|---|---|---|---|---|---|
| DD-20 | BCD to 7-segment decoder/driver and connector for "0" series. | .875 | .225 | 1.000 | $39.85 |
| DDL-20 | BCD to 7-segment decoder/driver and connector with memory for "0" series. | .875 | .225 | 1.500 | 63.20 |
| PLAND-76 | ASCII to 16-segment decoder/driver. | 1.360 | .960 | .450 | 59.00 |

## DRAWINGS

## LENS STYLE

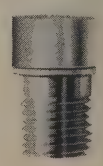
### DS

Matte black anodized bezel prevents sidelight emission. Blends with dark colored panels; contrasts with light colored panels. BI-COLOR has the added feature, white when unlighted and colored lighted.

### Q

Aluminum anodized bezel (matte silver appearing) allows 180° visibility, blends with light colored panels; contrasts with dark colored panels. BI-COLOR has the added feature, white when unlighted and colored when lighted.

### DSC



Aluminum anodized bezel (matte silver appearing) prevents sidelight emission. Blends with light colored panels, contrasts with dark colored panels. BI-COLOR has the added feature, white when unlighted and colored when lighted.

### STD

Flat, slightly projected lens gives 180° visibility.
Lens differs on 855 — see drawing.

### SE

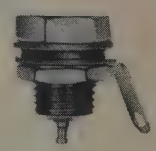
Edgelight for plastic panels. Small diameter light gasket minimizes wasted panel space. Can be relamped with gloved hands.

## BODY TYPES

### S

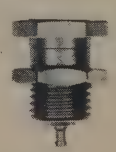
Presents bright metal Hex extending in front of the panel or in front of the shoulder washer on the SI model.

### SI



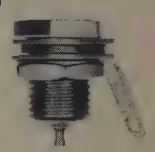
Presents bright metal Hex extending in front of the panel or in front of the shoulder washer.

### SS



Presents 5/16" bright metal Hex extends very little in front of the panel or in front of the shoulder washer on the SSI model.

### SSI



Presents 5/16" bright metal Hex extends very little in front of the panel or in front of the shoulder washer.

| LENS STYLE | LENS COLOR | LAMP TYPE | HOW TO ORDER |
|---|---|---|---|
| **QB** Matte black anodized bezel. Allows 180° visibility. Blends with dark colored panels; contrasts with light colored panels. BI-COLOR has the added feature, white when unlighted and colored when lighted. | **TRANSPARENT** RL — Red, *BL — Blue, *GL — Green, AL — Amber, CL — Clear<br>**TRANSLUCENT** RLUC — Red, WLUC — White, BLUC — Blue, GLUC — Green, ALUC — Amber<br>*Not recommended for use with neon lamps. | T-1 INCANDESCENT OR T-1 BASED LED | EXAMPLE: 101 (Model No.) RL (Lens Color); DSC (Lens Style) T-1 Based Lamp (Lamp Type) |
| **D** Skirted lens covers metal parts for neat panel appearance. Large lighted surface assures positive indication. BI-COLOR has the added feature, white when unlighted and colored when lighted. | **TRANSPARENT** RL — Red, *BL — Blue, *GL — Green, AL — Amber, CL — Clear<br>**TRANSLUCENT** RLUC — Red, WLUC — White, BLUC — Blue, GLUC — Green, ALUC — Amber<br>*Not recommended for use with neon lamps. | T-1¾ OR T-2 INCANDESCENT OR T-1¾ BASED LED | EXAMPLE: 864 (Model No.) RL (Lens Color); DSC (Lens Style) T-1¾ Based Lamp (Lamp Type) |
| **MB** Offers the same features as Type M. Black metal trim. Both accommodate T-1¾ based lamp or T-2 based neon lamp (NE2J or AIH types). | **GENERAL PURPOSE LENS MATERIAL** (Translucent except M lens): R — Red, W — White, B — Blue, G — Green, A — Amber, *C — Clear<br>**LEXAN LENS MATERIAL** (Transparent): RL — Red, BL — Blue, GL — Green, AL — Amber, CL — Clear<br>(Translucent): RLUC — Red, WLUC — White, BLUC — Blue, GLUC — Green, ALUC — Amber | T-1 INCANDESCENT OR T-1 BASED LED | EXAMPLE: 102SI (Body Type) AL (Lens Color); DSC (Lens Style) T-1 BASED LAMP (Lamp Type) |
| **M** Large lens for maximum visibility from all angles. Engineered to offer the most uniform light distribution. Full 180° visibility. | **GENERAL PURPOSE** (Translucent): R — Red, W — White, B — Blue, G — Green, A — Amber<br>**LEXAN LENS MATERIAL** (Transparent): RL — Red, BL — Blue, GL — Green, AL — Amber, CL — Clear<br>(Translucent): RLUC — Red, WLUC — White, BLUC — Blue, GLUC — Green, ALUC — Amber | T-1¾ INCANDESCENT OR T-1¾ BASED LED | EXAMPLE: 855SI (Body Type) G (Lens Color) 5 (Color Coding); D BI-COLOR BASED LAMP (Lamp Type) |

## BODY TYPES

**SK**

Presents small knurled flange in front of the panel or in front of the shoulder washer on the SKI model.

**SKI**

Presents small knurled flange in front of the panel or in front of the shoulder washer.

**SR**

Presents a small flange in front of the panel or in front of the shoulder washer on the SRI model.

**SRI**

Presents a small flange in front of the panel or in front of the shoulder washer.

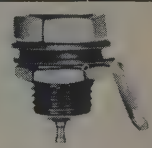
Presents bright metal Hex extending in front of the panel or in front of the shoulder washer on the SI model.

### SI



Presents bright metal Hex extending in front of the panel or in front of the shoulder washer.

## FIXED (NON-RELAMPABLE) LED SERIES
## LED: T-1 SIZE

- Lens Shape: Domed or Flat.
- Lens Colors: Red, Green, Amber, White and Clear in either transparent or translucent material.
  All lenses available with or without Fresnel rings.
- Mounting Hole — ¼" — Round or "D" hole. Center to Center Mtg. 5/16"
- Wire Wrap Terminals (will accept standard connector) and solderable.
- Available up to 18 VDC with built-in resistor.

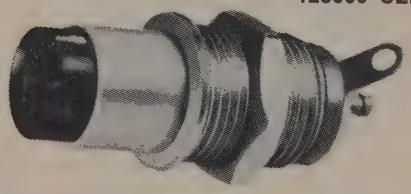
## SERIES 121000 AND 123000 TWO TERMINAL, FRONT RELAMPABLE

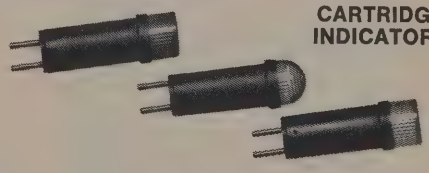
121000 SERIES
123000 SERIES



- Designed to use T-1 size flange based incandescent or LED light sources.
- 9/32" Diam. Mtg. Hole (Series 121000). Center to Center spacing 3/8".
- 5/16" Diam. Mtg. Hole (Series 123000). Center to Center spacing 1/2".
- Three lens styles available for either series in translucent or transparent material, plain or with fresnel rings.
- A variety of lens colors available.
- Terminals accept two (2) #22 AWG wires each and are isolated from case and panel.
- Body and lens bezels can be furnished in black or clear anodized finish.
- Hot stamping of lenses can be furnished upon request.
- Both Series are available in waterproof versions.
- RFI shielding can be provided on both Series.

## SLOAN CARTRIDGE INDICATORS

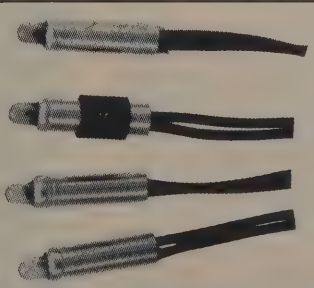
CARTRIDGE INDICATORS



- Designed to provide low cost, front panel light indication with a variety of light sources and multi-optional mounting features.
- Extremely rugged in construction, Sloan Cartridge units consist of an aluminum body incorporating Solid State, Incandescent or Neon light sources. Termination is by .040 diam. stainless steel pins.
- Lens styles are flat or domed in transparent or translucent material. All lenses incorporate Fresnel rings for maximum distribution of light output. A wide variety of lens colors are available.

**New**

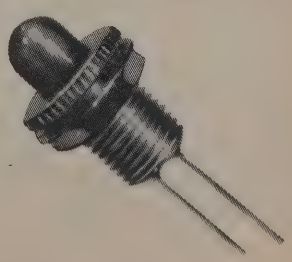
## 5L3 SERIES (T-1 LED)



- Red, Green or Amber
- 1/8" body diameter
- No lens required
- Non relampable
- Termination by color coded wire leads
- Voltages up to 14 VDC

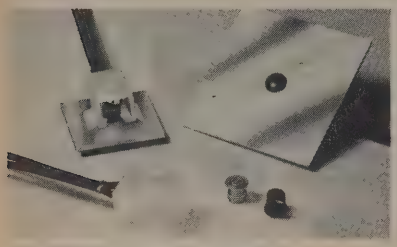
**New**

## 1L3 SERIES (T-1¾ HI-BRITE LED)



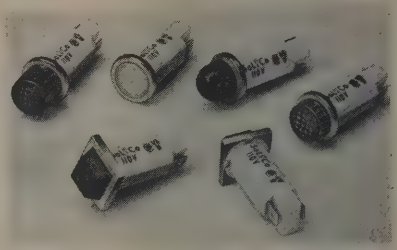
- Red, Green or Amber
- ¼"diam threaded metal body
- No lens required
- Non-relampable
- Voltages up to 14 VDC

# SoLiCo PILOT AND INDICATOR LIGHTS



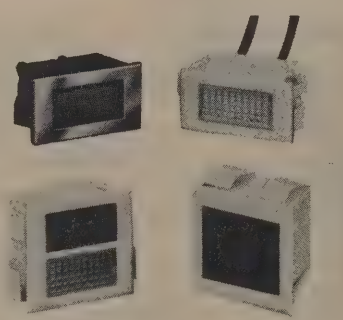
**1K14 SERIES**
Rear mounts in panel not more than .085" thick. Mounting hole .310" — .320"
**LAMP:** High brightness neon is standard with complete range of attached resistors available. Miniature incandescent in T-1¾ size available in range of 1.3 volt thru 28 volt.
**COLORS:** Lens colors are available in complete spectrum both in transparent and translucent material.
Recognized under the component program of U/L and CSA approved.

## A COMPLETE RANGE OF MULTI-FUNCTION INDICATOR LIGHTS

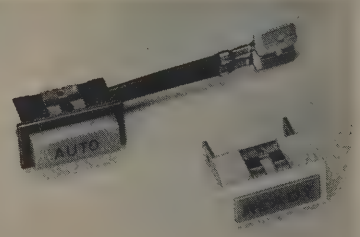


**5T SERIES**
**HOUSING:** Zytel 101, White is standard. However, Black, Red and other colors are available. Fits in ½" mounting hole (snap fit).
**RATING:** Same as 5S — 5L SERIES
**LAMP:** High brightness neon is standard with complete range of attached resistors available. Miniature incandescent in T-1¾ size available in range of 1.3 volt thru 28 volt.
**LENS:** Various styles with internal facets for maximum light refraction. Available in Lexan and Nylon.
**COLORS:** Lens colors are available in complete spectrum both in transparent and translucent material.
**BEZEL:** Optional, available in chrome or other finishes. Square or round depending on lens style.

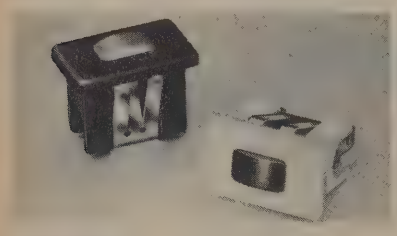
**3L SERIES** (with built-in resistor)
**3S SERIES** (resistor in lead)
These compact lights snapfit in a 5/16" hole. No additional hardware is necessary. Extended portion is .350 diameter by .110 inch high, while body length below shoulder is 1.420" long on 3L and .940" long on 3S.
Recognized under the component program of U/L and CSA approved. High brightness neon lamps with appropriate resistors to assure long life while achieving desired brightness. Complete range of incandescent lamps also available.
**LENS:** F4 and F5* lens is offered in a variety of colors and available in nylon or lexan. Decorative bezel with various finishes upon request. Chrome is standard.
**BODY COLORS:** White is standard although body can be molded in any color.
**LEADS:** Same as 5S.



**"R" SERIES**
These rectangular lights snap in securely (without additional hardware) into 1.312 or 1.280 by .375 inch opening. Material thickness range .030/.080 inch. 2R requires 1.280" by .812 inch mounting hole.
Recognized under the component program of U/L and CSA approved. High brightness neon lamps with appropriate built-in resistors to assure long life while achieving desired brightness. Complete range of incandescent lamps also available.
**LENS:** Ideal for vertical or horizontal hot stamp legends. These 1.150 by .250 inch lenses are offered in a variety of colors (nylon or lexan). Split lens variations also available (2R and 4R Series).
**BEZEL:** Decorative bezel in various finishes available (black, bright brass, etc.) Chrome plate is standard.
**LEADS:** Same as M SERIES.



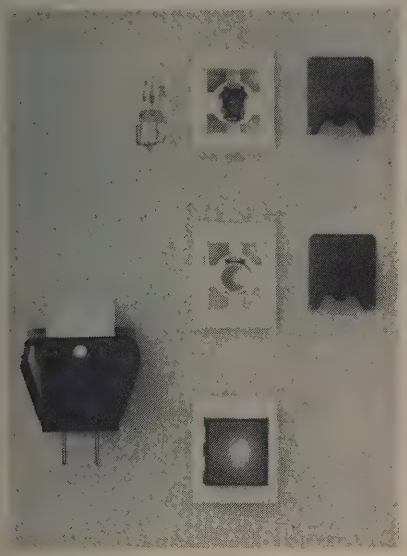
**"M" SERIES**
These compact units snap securely without additional hardware into .940 by .440 inch opening. Material thickness .031" — .093".
**LENS:** M Series with "H" lens features a .855 by .315 inch lens face — .170" high offering excellent raised lighting characteristics with a choice of colors. (Imprinting available).
M Series with "F" lens affords a full .860 by .315 inch lighting face ideal for hot stamping legends, even two lines if desired.
**BODY COLORS:** white or black available.
**LEADS:** Black plastic 105°C leads 6" long ends stripped ½" and tinned are standard. Any desired length and colored leads can be readily supplied. In addition, these leads can be provided with a variety of terminations — ring, female flag, etc. M series can be supplied with .250" or .187" male spades.



**S222 SERIES**
These lights snap securely without additional hardware into a rectangular opening 1.200 by .640 inch. Material thickness .045 to .065 inch.
**LENS:** Choice of colors available (nylon and acrylic). Red, white, amber, clear.
**LEADS:** S222 Series provided with screw terminals, S222-A with wire leads. S222-B provided with .250 male spade terminals.

**"L" SERIES**
Molded from DuPont Zytel 101. Standard colors are black or white, custom colors available upon request.
**Optional:** When ordering metal bezel, stainless steel is standard. Consult factory for other finishes.
Recognized under the component program of U/L and CSA approved.

# SoLiCo PILOT AND INDICATOR LIGHTS



### 1000 SERIES FEATURES REPLACEABLE LAMP

Snap-out lens and wedge base lamp (6-28 volt range) permits relamping from front of panel without tools.

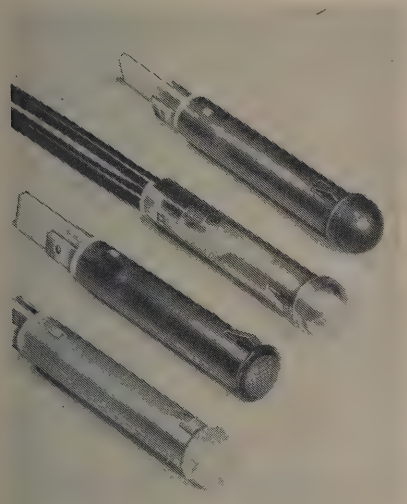
**MOUNTING INFORMATION:** Unit has self-locking ears; snaps into conventional .515″ x .625″ hole in panel .02″ to .156″ thick. Measures .750″ behind panel.

**RATING:** 6-28 volt and 125-250 volt. Recognized under the component program of Underwriters Laboratories, Inc. and CSA approved.

**LENS:** Full range of colors. .430″ x .460″ x .300″ high.

**HOUSING:** DuPont Zytel 101 available in white, red or black.

**TERMINATION:** Solder Lugs.



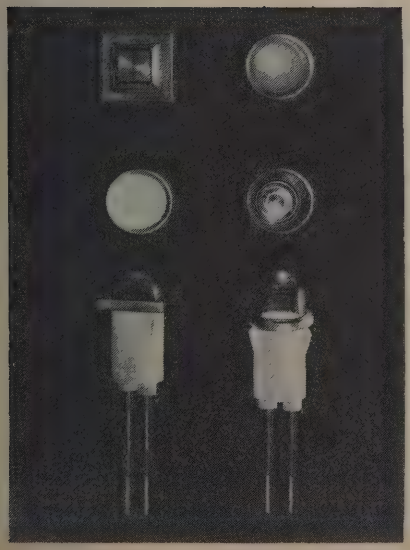
### 3W AND 3T SERIES

**MOUNTING INFORMATION:** Snap-in feature with self-locking ears. Fast assembly, no additional hardware necessary.

**BODY COLORS:** Lens and body one piece design. Available in all colors.

**TERMINATION:** 6″ wire leads standard on 3W, .187″ male tabs on 3T.

**LENS:** 3 configurations: dome, semi-dome, cylindrical flat top.



### 5S AND 5L SERIES

These stylish round body lights with chrome plated bezel mount into ½″ hole and are secured by self-locking "barbs." The overall body length below the bezel is .900″ on the 5S and 1.120″ on the 5L.

Recognized under the component program of U/L and CSA approved. High brightness neon lamps with appropriate resistors to assure long life while achieving desired brightness. Complete range of incandescent lamps also available.

**LENS:** A choice of lens styles and colors available. Nylon or Lexan material.

**BEZEL:** Decorative bezels in various finishes available (chrome plated is standard).

**LEADS:** Black plastic 105°C leads 6″ long, ends stripped ½″ and tinned are standard. Any desired length and color leads can readily be supplied. In addition, these leads can be provided with a variety of terminals, ring, female quick connect, male spade, etc.

### RT SERIES

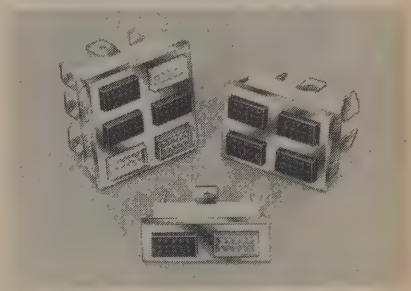
**MOUNTING INFORMATION:** These multiple function lights snap-fit into a 1.28″ x 1.234″ mounting hole in panels from .09″ to .30″ thick. No additional hardware is necessary.

**RATING:** Recognized under the component program of Underwriters Laboratories, Inc. and CSA approved at 125-250 volts.

**LENS:** Ideal for vertical or horizontal hot stamp legends. These 1.150″ x .250″ lenses are offered in a variety of colors (nylon or lexan).

**BEZEL:** Decorative bezel in various finishes available (black, bright brass, etc.). Chrome plate is standard.

**LEADS:** Black plastic 105°C leads 6″ long, ends stripped ½″ and tinned are standard. Any desired length and colored leads can be readily supplied. In addition, these leads can be supplied with a variety of terminations — ring, female quick connect, female flag, etc., or with .250″ male spades attached to the body.



### SR, 4R AND 6R SERIES

**MOUNTING INFORMATION:** These multiple function lights snap-fit into panels from .09″ to .30″ thick. No additional hardware is necessary.

**RATING:** Recognized under the component program of Underwriters Laboratories, Inc. and CSA approved at 125-250 volts.

**LENS:** Ideal for vertical or horizontal hot stamp legends. .485″ x .250″ lenses are offered in a variety of colors (nylon or lexan).

**BEZEL:** Decorative bezel in various finishes available (black, bright brass, etc.). Chrome plate is standard.

**LEADS:** Black plastic 105°C leads 6″ long, ends stripped ½″ and tinned are standard. Any desired length and colored leads can be readily supplied. In addition, these leads can be supplied with a variety of terminations — ring, female quick connect, female flag, etc., or with .250″ male spades attached to the body.

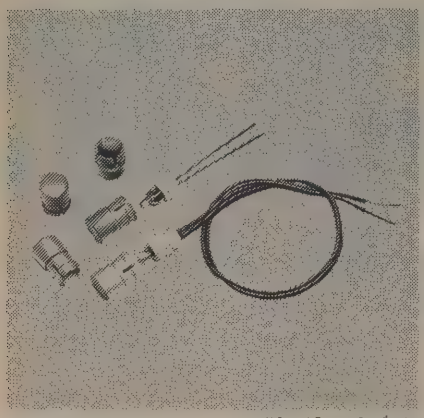
VCC MINIATURE INDICATORS

# CLIPLITE®

## SUBMINIATURE INCANDESCENT & NEON INDICATOR



U.S. and Foreign Pat. Pend

***VISIBILITY*** The CLIPLITE permits up to 180 degrees of viewing angle using either the incandescent or neon lamp.

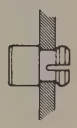
***COMPATIBILITY*** The CLIPLITE when used with the 5 volt 20 milliamp lamp is IC compatible. Application of this lamp and the CLIPLITE will provide full range of color and high light intensity.

***AESTHETICS*** The CLIPLITE gives any display or control panel the finished appearance equal to that of the most expensive indicator light assembly.

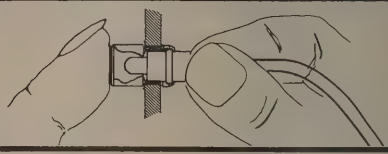
***DESIGN*** The CLIPLITE design and color have been optimized through the use of selected red, amber, green, yellow, clear, white and blue plastics to provide exceptionally high contrast and visibility.

***INSTALLATION*** The CLIPLITE requires no tools; just snap it into a ¼" hole and insert the lamp. Installation is completed in 6 seconds.

## *SIMPLE TWO-STEP INSTALLATION*



1 Snap the CLIPLITE into a ¼" panel hole.



2 While holding the CLIPLITE tight to the panel with your finger, insert the lamp into the CLIPLITE from the back.

VCC MINIATURE INDICATORS

# CLIPLITE®

## LED MOUNTING SYSTEM

U.S. and Foreign Pat. Pend

***VISIBILITY*** The CLIPLITE permits up to 180 degrees of viewing angle using any standard T 1¾ LED.

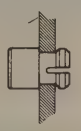
***BRIGHTNESS*** The CLIPLITE allows the use of the much brighter narrow beam LED. Example: HP 5082-4657, 12 mcd @ 10ma vs. current popular wide beam LED HP 5082-4650, 2 mcd @ 10ma. Correspondingly, the amber and green narrow beam LEDS typically increase brightness by a factor of 4 over the commonly used wide beam LEDS.

***AESTHETICS*** The CLIPLITE gives any display or control panel the finished appearance equal to that of the most expensive indicator light assembly.

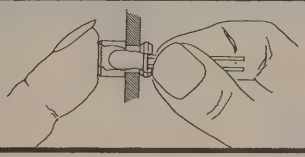
***DESIGN*** The CLIPLITE design and color have been optimized through the use of selected red, yellow, clear, green and amber plastics to provide exceptionally high contrast and visibility.

***INSTALLATION*** The CLIPLITE requires no tools; just snap it into a ¼" hole and insert the LED. Installation is completed in 6 seconds.

## *SIMPLE TWO-STEP INSTALLATION*



1 Snap the CLIPLITE into a 1/4" panel hole.



2 While holding the CLIPLITE tight to the panel with your finger, insert the LED into the CLIPLITE from the back.

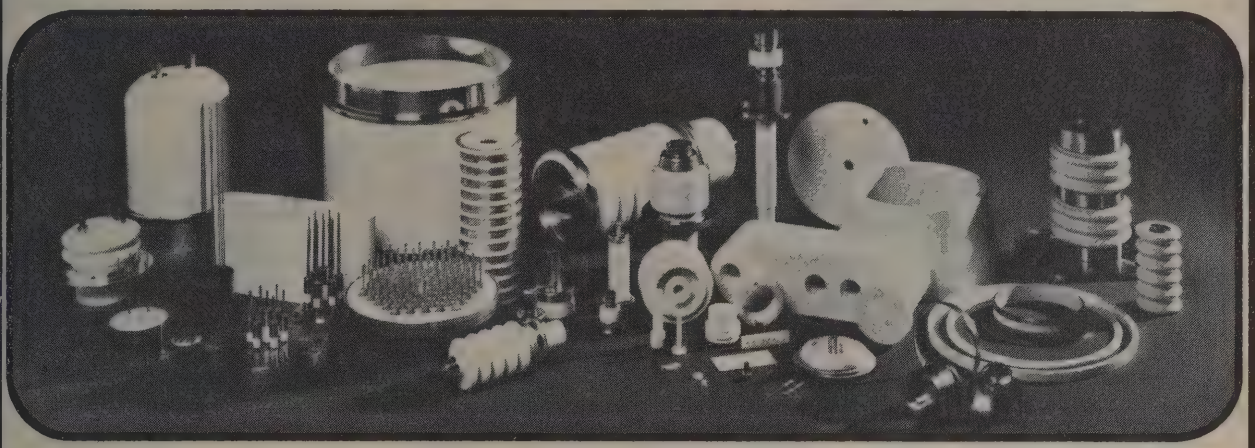
# ALBEROX ... *For outstanding performance in high temperature, hermetic terminals.*

We're SPECIALISTS in brazing METAL parts to high alumina CERAMICS for demanding HIGH TEMPERATURE, HERMETIC applications.

***CUSTOM HERMETIC CONNECTORS*** Multipin hermetic connectors for demanding vacuum and space applications requiring 400°C. bakeout — conditions where glass connectors won't stand up — are being produced in a variety of configurations. To save cost, Alberox can also provide connector sub-assemblies such as pin decks to be brazed or welded into shells or flanges by the customer.

***MINIATURE TUBE AND PIN SEALS*** Many high temperature applications require insulated pin or tube feedthrus. These are available with weldable or brazeable metal parts, and can be added to covers or flanges, etc. All Alberox feedthrus are suitable for cryogenic environments.



Since 1961, we have designed and produced a wide variety of seals for custom applications in diverse components such as . . .

- VACUUM FEEDTHRU TERMINALS
- CERAMIC ELECTRON TUBE AND VACUUM SWITCH ENVELOPES
- NUCLEAR REACTOR PENETRATOR FEEDTHRU TERMINALS and INSULATORS
- SQUIBB and DETONATOR CONNECTORS
- POWER SEMICONDUCTOR HOUSINGS
- SPACE FLIGHT HERMETIC CONNECTORS
- JET ENGINE THERMOCOUPLE COMPONENTS
- HIGH PRESSURE OIL WELL LOGGING FEEDTHRUS
- CAPACITORS and TRANSFORMER TERMINALS

In addition to the above, Alberox has designed and produced state-of-the-art components for critical nuclear devices.

The Alberox plant was designed and built specifically for the efficient production of ceramic-to-metal seals. We manufacture our own A-950 high alumina ceramic, which enables us to optimize on the best metalizing process for this ceramic; thus we can provide superior seals. By making our own ceramic, our customers benefit by fast delivery on custom designs.

*Another important feature of Alberox is that all of the plating requirements are met "in-house", including nickel, gold, copper, silver, bright tin and solder plating!*

We have several types of BRAZING FURNACES for brazing ceramic-to-metal and metal-to-metal parts in HIGH VACUUM, or HYDROGEN, ARGON or any other specified atmosphere! The standard operating procedure is to custom program the brazing cycle, taking into account the ceramic, the types of metals, braze materials and the atmosphere.

Alberox exercises complete control, from the design stage right through all manufacturing operations — to meet or exceed the highest quality standards and maintain the fastest delivery in the industry. Products made by Alberox are assured to outperform all design parameters set for them!

***HIGH PRESSURE FEEDTHRUS*** *Alberox A-950 Alumina* has extraordinarily high compressive strength (350,000 psi). By using this strength to its best advantage, ceramic-to-metal seals can be produced to withstand high static or dynamic pressures. Thousands of these seals have been manufactured by Alberox.

***MULTITERMINAL FEEDTHRUS*** Multiterminal feedthrus differ from multipin connectors in that individual feedthru terminals are brazed or welded into a metal deck or flange. These feedthrus are generally used for higher voltage applications than can be accommodated by a regular ceramic pin deck or connector. Alberox has an extensive line of catalog tubular terminal bushings which are often used for the individual feedthrus. In this way, custom multiterminal feedthrus can be delivered quickly.

***POWER FEEDTHRUS*** Copper, or just about any other type of metal, from ⅛ inch to over 1 inch in diameter can be provided in power feedthrus. Modifications of our standard catalog tubular and fluted terminal bushings are often perfectly suited, and custom ceramic-to-metal seal designs can be easily accommodated. Weldable or brazeable flanges also can be added to the feedthrus to allow easy installation on existing flanges or bulkheads.

***INSULATORS AND STANDOFFS*** Insulators and standoffs can be supplied in tubular or fluted shapes, bare or glazed, with or without metal adapters or studs. Alberox manufactures plain ceramic parts for use as spacers, insulators, supports, isolators, decks, or washers. Metalized and glazed cylinders are also available for envelopes of high power electron tubes such as Thyratrons or for vacuum switches.

***CATALOG HIGH VOLTAGE BUSHINGS*** Alberox stocks the largest variety of high voltage tubular and fluted high alumina terminal bushings in the industry. Modifications to these catalog items are easily made. Typical modifications are: special studs, brazed-in-center conductors, different metal parts, finishes and ceramic dimensional changes. Fast delivery at reasonable prices can still be maintained. Ask for Catalog #472 which illustrates details of these parts.

Alberox is ready to assist you with your ceramic-to-metal seal design requirements. When you need FAST DELIVERY of SUPERB ceramic-to-metal seals, at realistic prices — contact ALBEROX.

# Big shielding problem?

## How's this for size?

This magnetic shield was built by Amuneal for a critical military radar application. Even though the shield is pretty large, it's the size of the *problem* that we're talking about. The specifications called for extremely tight dimensional tolerances and the most stringent electrical performance characteristics we have ever encountered. All this, plus the fact that we had only six weeks to design it, determine the best method of fabrication, tool up, build it, perform complete analytical testing, and deliver. This is just one example of Amuneal's performance in designing and manufacturing magnetic shields to meet all kinds of tough specifications. If you have a shielding problem, big or little, talk it over with us. A phone call is all it takes.

# Four ways to build better Power Chokes...

## with ferrite cores from Fair-Rite

When designing switch mode power supplies, you can provide more stable inductance for the filters in the presence of DC load currents, by using these types of ferrite cores:

**1.** 
Gapped pot cores for exceptional shielding qualities.

**2.** 
Gapped E-cores, giving moderate shielding at lower cost.

**3.** 
Round bobbins; priced lower yet; some shielding qualities, and highly stable.

**4.** 
Square bobbins; most economical; some shielding properties, and least affected by DC.

To absorb or convert electro-magnetic energy with the right ferrite core...

# Get the JOULE BOX

## from Fair-Rite

When you use EMI suppression devices to absorb energy, or design transformer circuits to convert it, take advantage of Fair-Rite's new SHIELD BEAD, BALUN AND BROADBAND KIT: an unprecedented 34 different ferrite cores in 7 materials to help you quickly optimize circuits or approximate final designs. Includes "beads on leads" taped and reeled to EIA RS-296C, for automatic insertion. "Joule Box" comes with impedance vs frequency curves, attenuation curves, plus wide band transformer design data.

To get your Kit, send check or money order for $10, with your name and address, including Organization where applicable, and we'll ship the Kit postpaid from stock, with technical information.

If you prefer, order on your Organization PO or letterhead; we'll ship the Kit and bill you $10 plus shipping.

Or, send for Free technical information only; please specify.

**Also available: Free Application Notes "A Hanna Curve for Ferrite Cores" and "Use of Ferrites for Wide Band Transformers".**

**TELCON METALS LTD.** is one of the largest manufacturers of nickel-iron and cobalt alloys for magnetic applications. Their fully integrated facilities provide raw materials and fabricated components covering the whole range of commonly used soft magnetic materials.

## SOFT MAGNETIC ALLOYS SUPPLIED IN STRIP—ROD—BAR—WIRE—FOIL

| NICKEL-IRON | COBALT-IRON |
|---|---|
| 76% Nickel | PERMENDUR 49 |
| 50% Nickel | PERMENDUR 24 |
| 36% Nickel | SUPERMENDUR |

### THERMOSTATIC BIMETALS

We offer a complete selection of Telcon thermostatic bimetals for various temperature ranges and environments. Their varied mechanical properties, hardnesses, thermal activities, and thermal and electrical conductivities make it easy for the user to select the right one for his particular requirements. Available in thicknesses from .004" to .125" and widths as small as 1/16" in coils and flat lengths.

### MAGNETIC SHIELDS UP TO 30" DIAMETER FOR CATHODE RAY TUBES & TRANSFORMERS by Telcon Metals Ltd.

### MELTING, ROLLING, FABRICATING, ANNEALING FROM START TO FINISH IN ONE FACILITY

Telcon Metals, Ltd., has its own in-plant facilities to handle every phase of the magnetic shield manufacturing process from start to finish. This means 100% Telcon supervision all the way — from the melting and rolling of the raw material to the fabrication and annealing of the magnetic shield. Telcon's total production method is based on a century of experience in the manufacture of alloys. All these factors are your assurance that you get a sensibly priced, high quality product.

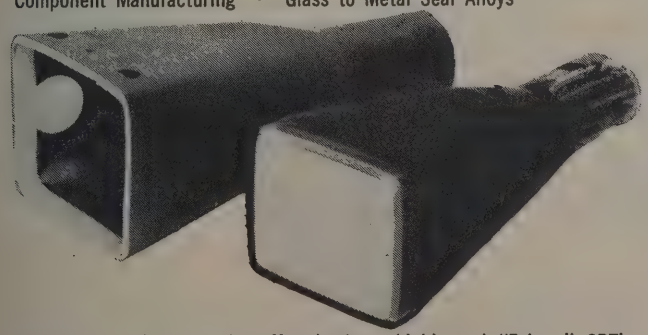
### A NEW CONCEPT IN MAGNETIC SHIELD CONSTRUCTION

Specially developed for quantity production of high efficiency complex shields, new TELFORM construction utilizes precision drawn segments to drastically reduce welded seams. The result is extra close fitting shields with improved shielding characteristics. This new technique is applicable for CRT tubes up to approximately 20" long. No premium charge even though dimensions, finish and appearance are far more uniform throughout batches than conventionally fabricated shields. Rapid delivery after initial tooling. Available in 80%, 50% and 36% nickel-iron alloys.

**Extremely Competitive Prices on Custom Shields.**
**Send for Illustrated Catalog and Ask for a Quotation.**

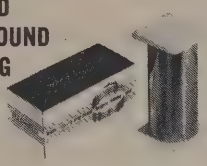
**OTHER TELCON PRODUCTS**

- Thermostatic Bimetals
- High Permeability Strip, Rod & Wire for Component Manufacturing
- Glass to Metal Seal Alloys



Substantial savings can be offered when shields and "Brimar" CRT's are purchased as assemblies.

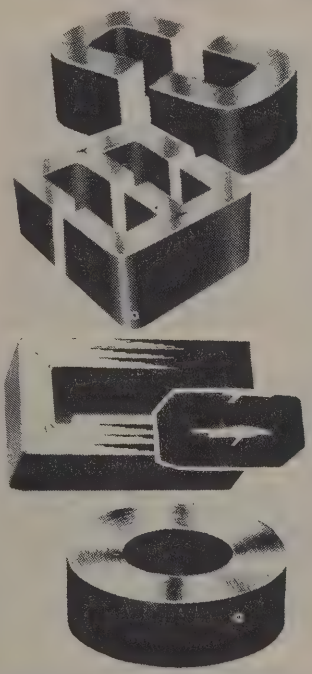
### TELSHIELD WRAP-AROUND SHIELDING FOIL



Shield components efficiently, simply, from unwanted signals with easy-to-use Telshield. Available in 0.001 in.-0.010 in. thickness tape, in widths of 3/32 in-6 in. Special handy packs for laboratory and R & D use.

**ALL ALLOYS AVAILABLE AS COMPONENTS FABRICATED IN HOUSE.**

### E, C AND TOROIDAL TAPE WOUND CORES BY TELCON MAGNETIC CORES, LTD.



- Grain oriented Silicon Steel Cores.
- Made to EIA Spec. RS217 and trade specifications by our British associate TELCON MAGNETIC CORES LTD. . . . one of the largest manufacturers of grain oriented silicon steel components.
- Available in all American standard or special sizes to American core numbers. Popular types available from New York warehouse for immediate delivery.
- Sold at prices that help you solve your constantly rising cost level problem.
- Produced by one of the largest manufacturing facilities in the world.
- Now, also available, LL distributed gap cores for small transformers where temperature and/or gap VA may be problems. Can replace 4 to 6 mil cut cores, 6 mil laminations, and sometimes Ni-Fe laminations.
- Toroidal cores available in 2, 4, 6 and 12/13 mil tape thickness. Cores can be supplied impregnated or edge bonded for improved rigidity. Also available gapped or cut.

### "C" CORE COMPRESSED AIR BANDING TOOL by TELMAG

Manufacturing rejects caused by variations in banding of "C" transformer cores can now be eliminated. The new "C" core Compressed Air Banding Tool provides consistent banding stresses in assembly-line operation. By making cores useful which were formerly rejected, the tool soon pays for itself.

# BERYLLIUM COPPER PRECISION SPRINGS

**Highest quality beryllium copper springs, *micro-processed* from 100% laboratory-certified stock for superior performance. All standard products available from stock!**

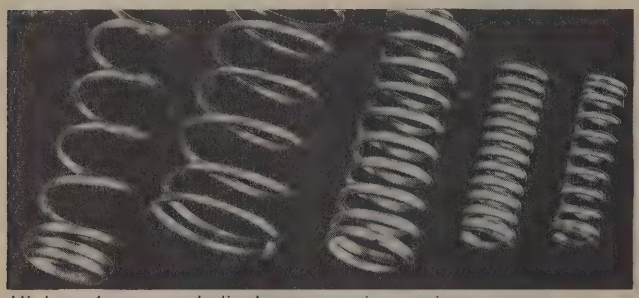
Instrument Specialties precision springs are made from extra quality beryllium copper made to our specifications.* Every lot is tested to be sure that each lot meets these stringent specifications. The exact lot appropriate for the design and application of a particular spring is then selected to meet individual requirements.

Springs are hardened in accordance with the individual requirements of each particular application to develop a *balanced* combination of precise tolerances, high yield strength, ductility, conductivity, stability and long life. Every step in the manufacturing process is controlled by experienced craftsmen using specially designed equipment and relying on over 30 years of experience in the production of the highest quality beryllium copper precision springs.

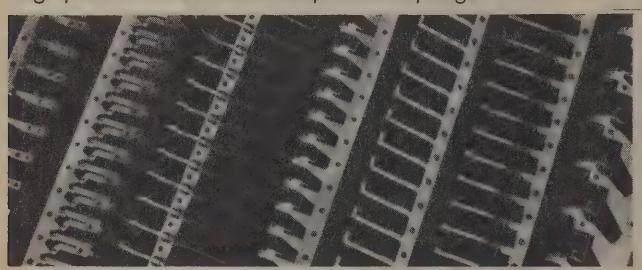
*Beryllium copper used is Alloy No. 25, conforming to ASTM-B194 and Federal QQ-C-533a Alloy 172.

**COMPLETE ENGINEERING AND DESIGN SERVICE**

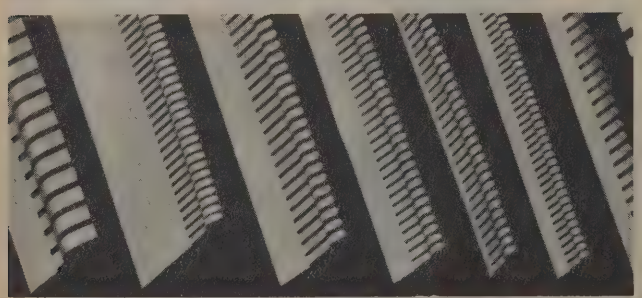
Instrument Specialties is recognized as the leader in the industry; our engineers are available at all times to assist you in solving your problems in the application of beryllium copper springs. Our extensive knowledge and long experience enable us to recommend better parts at lower costs. Prototype quantities can be produced quickly and economically. Just call or write today, or contact any of our representatives.



*High-performance helical compression springs*



*Micro-processed strip springs for automated assembly*



*Micro-processed finger contact strip springs*

### Micro-Processed Coil Springs

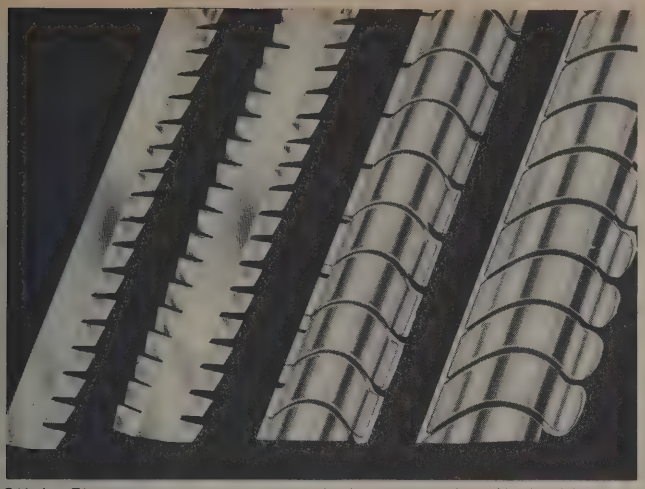
Micro-processed helical compression springs for use as balance weights, brush springs, clutch springs and many other applications. Fabricated from high-strength, heat-treatable beryllium copper and formed on specially designed coiling machines, I/S coil springs offer long life, uniformity and high stability. Two to ten times closer tolerances reduce adjusting and testing after assembly. Pitch, length and number of coils are accurately controlled to meet exacting requirements, and are subjected to exacting load tests.

### Strip Springs

Micro-processed flat springs in easy-to-handle strip form are available for automated production, such as rapid positioning in plastic molds or other assemblies. Each length is handled and positioned only once. Individual springs can be separated with finger pressure with no trace of burr. Soldering, welding, plating, tinning, riveting can be performed while the entire strip is intact. Tangling is eliminated. (Also available with CONTIPS® precious metal contacts and Selective Plating.)

### Finger contact shielding strips

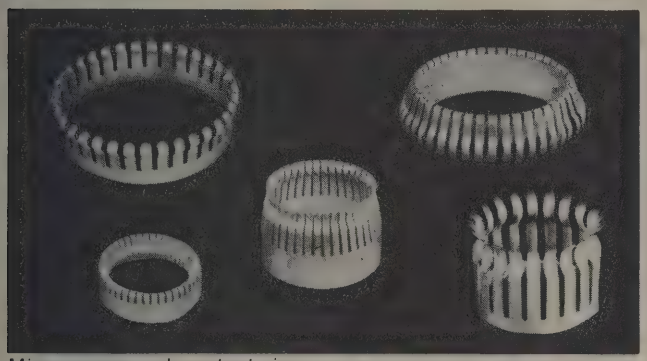
Micro-processed finger contact strip springs for grounding and shielding in high-frequency equipment and for forming large-diameter contact rings are offered in a wide variety of configurations. Various lengths to 16"; widths, contours and hole locations can be specified for many catalog items. Standard finish is "bright finished" (tarnish resistant). A wide variety of electroplated finishes can be specified, depending on surface conditions. Finger contact strips are also available with CONTIPS® precious metal contacts.



*Sticky-Fingers—a new concept in instant RFI/EMI shielding*

### Sticky-Fingers® Self-Adhesive Shielding

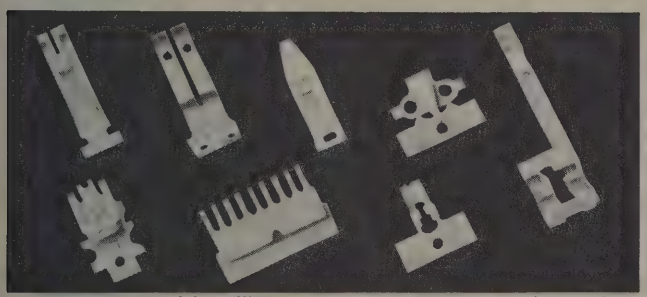
Sticky-Fingers®, a high-performance finger contact strip with its own self-adhesive, provides an extremely tight, instant bond to shield against RFI/EMI in all types of metal cabinets and electronic enclosures. Installed by simply peeling off protective paper backing and placing strip in position, Sticky-Fingers adhere instantly; bond permanently. Soldering or mechanical fastenings are completely eliminated. Sticky-Fingers' adhesive meets MIL Specs for salt spray, shock and humidity cycle tests, and is unaffected in temperature ranges from −65 F to 160 F. Shielding effectiveness is greater than 108 dB at 10 GHz, and 70 dB at 200 kHz magnetic.



*Micro-processed contact rings*

### Micro-processed contact rings

Precision micro-processed contact rings are offered in a wide variety of sizes and shapes and in standard finishes for tube cavities, tuning and shielding applications. Contact rings are supplied in diameters from 0.160"up, in male or female configurations. Almost any number of fingers can be specified. Micro-processing assures precise uniformity to unusually close tolerances. Contact rings are supplied in "bright finished" (tarnish resistant). A wide variety of electroplated finishes can be specified, depending on surface conditions. Contact rings can also be supplied with CONTIPS® precious metal contacts which do not affect spring qualities.

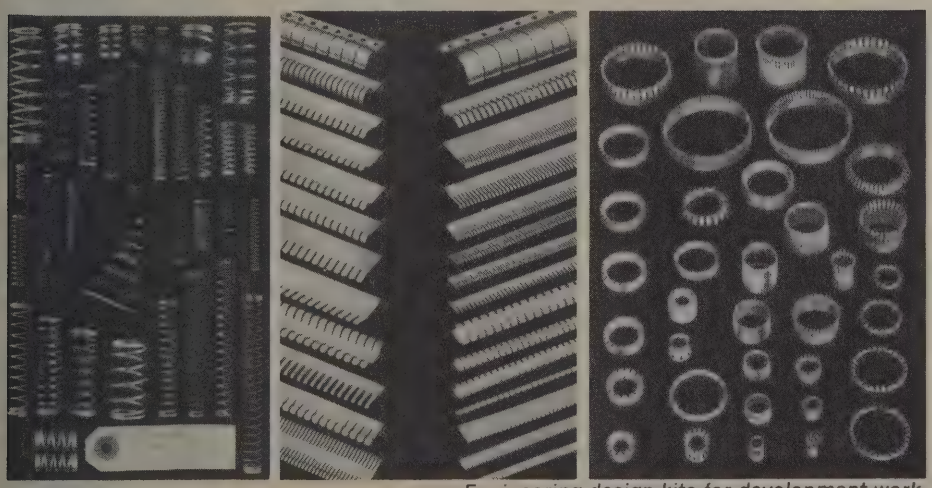


*A wide variety of beryllium copper stampings can be custom-designed and produced to meet most any specific requirement*

### Custom Flat Springs and Stampings

Instrument Specialties is equipped to supply custom machining and heat treating to meet specialized customer requirements.

Included are welded spring assemblies, riveted contact springs, inlaid or overlaid strip precision metal springs and other stampings, whether of a spring nature or not.



*Engineering design kits for development work*

### Engineering design kits

Instrument Specialties can supply design engineers with engineering design kits of selected beryllium copper spring samples for use in development work. Each kit contains a comprehensive assortment of beryllium copper springs. Each sample is selected and tagged for proper identification. Each design in the kit can be readily duplicated for prototype or production requirements.

**Kits are available as follows:**

Coil springs, 50 samples
CAT. No. 97-44 $25.00

Finger contact strips, 34 samples
CAT. NO. 97-272 $30.00

Contact rings, 36 samples
CAT. NO. 97-273 $25.00

# Full Coverage

## ITT Thermotech Surrounds You with Service And Quality

At ITT Thermotech you can expect complete company involvement with your custom molded plastic job from start to finish. Each department is staffed with individuals who, in total, account for many years of experience in precision plastic molding. These people cover your job completely through estimating, mold design, raw material selection and control, manufacturing, quality control, to on-time delivery.

In addition to its ability to mold high tolerance, intricate parts, ITT Thermotech is capable of offering an Engineering service. And, even though we don't literally serve your order on a silver platter, we place a high degree of emphasis on giving you the excellent service you expect from ITT Thermotech.

Call us for an estimate. And find out what we mean by "full coverage".

**ITT THERMOTECH**

1202 South Fifth St., Hopkins, Minnesota 55343, 612-933-9400 • 3200 Tyrone Blvd., St. Petersburg, Florida 33710, 813-347-2191

# Precision makes the big difference at ITT THERMOTECH

**Coils and Bobbins**—Our many years of experience brings you superior technical know-how in the design and manufacturing of coil forms and bobbins. ITT Thermotech maintains an unusually wide selection of standard sizes and in addition can custom produce them to your specifications, whether simple or intricate shapes.

**Two-Color Keytops** — ITT Thermotech maintains an extensive stock of two-color keytops in both semi-matte and gloss finish. Requests for two-color single, 1½, 2, and 3 position keytops and one-color space bars are filled from a large stock of off-the-shelf sizes, colors, and inscriptions. We also welcome the opportunity to quote on special requirements.

**Intricate Parts & Materials** — ITT Thermotech's design and production personnel like the challenges of intricate configurations in a wide variety of materials. No shape is too intricate . . . no material too difficult to mold. We have even designed special equipment to handle the tougher ones.

**Custom Products** — Our skilled mold designers want to work with you to help you design and produce your plastic parts. For years, we have done intricate design engineering, helped design complex parts and even done complete product changes from metal to plastics.

**Find the difference at . . .**

**NOTES:** 1. Normal tolerance of $\mu i$ is ±20%. Permeability values vary with size of toroids used. $A_L$ values listed in the toroid section (Group L) reflect this variation. 2. For extended temperature ranges or tighter temperature coefficients of permeability, contact Krystinel Engineering Dept. 3. Loss data include both coil and core losses as read on a one inch dia. toroid for K-31, K-21, K-01, K-41 and K-11; and one half inch dia. toroid for K-14, K-61, K-81 and K-83. 4. Hysteresis loop data were taken using a D.C. balistic galvanometer @ 25°C.

| .006 | — | 4 |
| .006 | — | 15 |
| .010 | — | 4 |
| .010 | — | 15 |

Standard foils shipped immediately from stock. All sizes available with double-faced pressure sensitive tape and release coated liner. Foils can be slit to a minimum width of ¼", with or without backing. Width tolerance ±.010. Backed and slit foils shipped one week after receipt of order. All foil is Perfection Annealed for maximum attenuation.

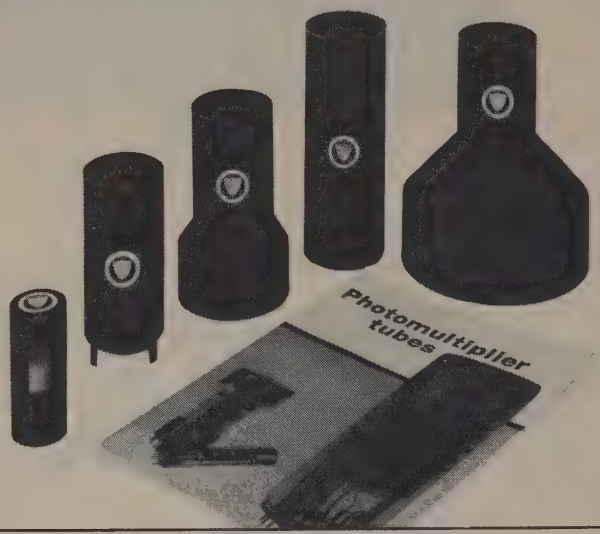
# photomultiplier tube shields...

**Precision shields shipped from stock for 90% of photomultiplier tubes.**



## MAGNETIC SHIELD DIVISION

MAGNETIC SHIELD DIV. CO-NETIC NETIC PERFECTION MICA CO.

Perfection Mica Company
750 North Thomas Drive
Bensenville, Illinois 60106
(312) 766-7800 TWX (910) 256-4815

CO-NETIC magnetic shields improve the amplification characteristics of photomultiplier tubes by providing significant attenuation of magnetic fields. Effective shielding is ensured over a wide range of field intensities. When grounded, the shields provide protection against electrostatic interference.

CO-NETIC shields are highly resistant to shock and vibration. The shields have minimal retentivity and do not require periodic re-annealing.

Custom engineered shields are available in any quantity. Call for design assistance or send print for prompt quotation.

**NOTES:**
Unless otherwise noted:
**Dimensions** — All ID
**Material** — .040" Thick Co-Netic AA
**Finish** — Black baked enamel; texture outside, flat inside.
**a** — Upper end closed.
**b** — Dimensions D & E are measured from the outside of the outer shell. Dimension G is the maximum OD. Material — Three layers, separable; outer .049 Netic S3-6, two inner .031 Co-Netic AA Finish — Netic S3-6, black oxide; Co-Netic AA, none.
**c** — Has three tabs, spaced 120° apart, to grip the metal collar of the PM tube.
**d** — Material — .031" Co-Netic AA.

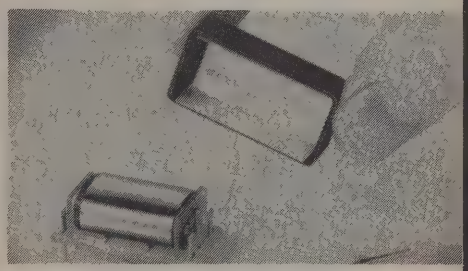
## LAB KITS & PROBES

Lab Kit contains assorted CO-NETIC and NETIC shielding materials, double-faced pressure sensitive tape for shield construction and 20 millivolts/gauss A.C. magnetic pickup probe ..... all for $99.50
Probe only, 20 mV/gauss ..... $49.50
Ultra sensitive probe only, 60 mV/gauss ..... $79.50

## COMPONENT SHIELDS

Standard enclosures for transformers, CRT's, small motors, relays and reed switches are available from stock. Magnetic Shield Division is also the preferred source for custom shields to your specifications. Extensive standard and special tooling provide fast shipment. Call for design assistance or send print for prompt quotation.

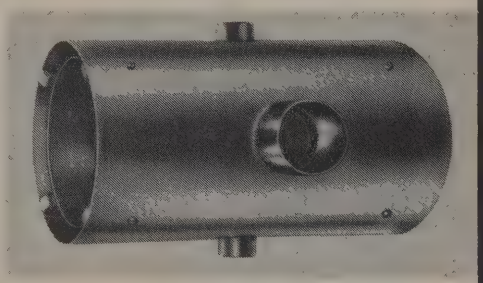


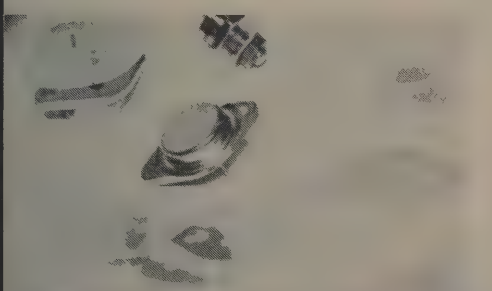
## INTER-8 WEAVE CABLE

Our patented, woven configuration of four signal leads provides superior attenuation over a twisted pair. Attenuation improvement of unshielded INTER-8 WEAVE cable is −20 db for radiation and −12 db for pickup. An additional −20 db is obtained with our braided CO-NETIC jacket. Available in solid/plain or multiple/tinned AWG 24 wire.

## ZERO GAUSS CHAMBERS

Zero gauss chambers provide the ultimate in magnetic shielding. Magnetic Shield Division's general-purpose zero gauss chamber offers a significant reduction in both static and time varying fields found in laboratory and research environments. Degaussing coils can be furnished, and a Helmholtz coil system can be incorporated to generate known fields. Three concentrically spaced CO-NETIC chambers with closed ends and removable covers are provided. Placement of openings is optional. Attenuation in excess of −60 db is typical.

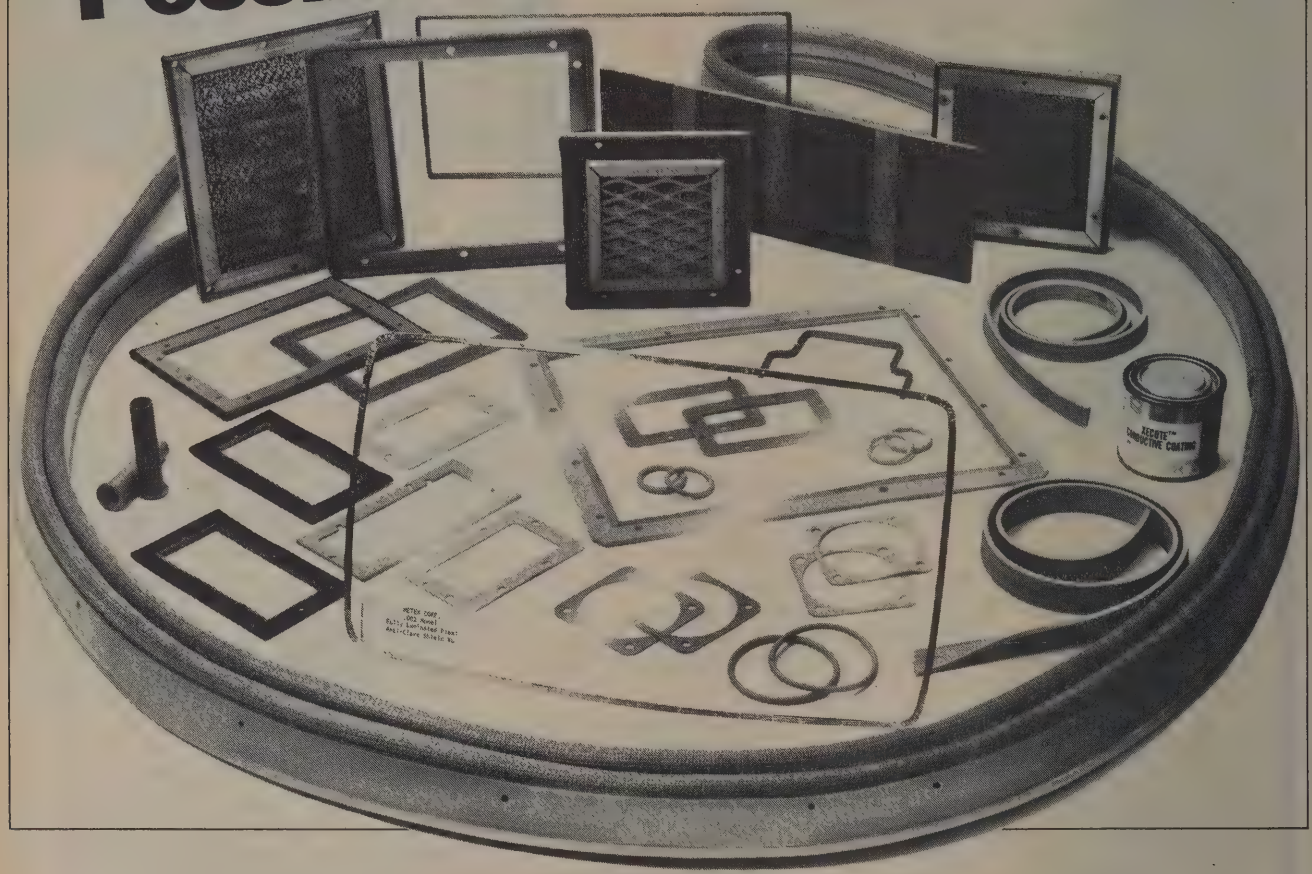




## MICA INSULATORS

Available in sheet, wafer, flakes and ground form. Clear, natural and built-up sheet stock thicknesses from .002″ to .062″. Save tooling expense on a wide variety of fabricated parts, including semi-conductor insulators in .002″ to .003″ thickness with .002″ hole tolerances. Excellent heat resistance and high dielectric strength provide improved breakdown protection and increased efficiency of electronic components.

# Infinite EMI/RFI Shielding Possibilities from Metex



Metex EMI/RFI shielding comes in an infinite assortment of shapes and sizes for every conceivable electronics application, from sophisticated mobile communications and radar systems to fluorescent lighting fixtures. Fact is, we're the most experienced company in the business, worldwide.

That's why, when you get hung up on an interference problem, call your Metex representative. No matter what kind of shielding your application requires, the chances are Metex has a design for it. If not, we'll create one, just for you.

Part of our problem-solution technology is the use of knitted metal. Another is our Xecon® Conductive Elastomer. When we combine the two, the result is Metex Armored Xecon® Gasketing. The most advanced EMI/RFI shielding available. Anywhere.

Metex Shield Vu™ Windows allow you to see clearly (98% visibility) into any cabinet, chamber or digital display without EMI/RFI leakage. Again, we use knitted metal – between panes of acrylic or glass.

Omni Cell® Panels, with our transverse-oriented honeycomb configuration for ventilation shielding, are opaque to all electrostatic polarization vectors.

Metex Combo® Gaskets can be designed to accommodate any pressure differential application regardless of joint unevenness. They're available in combinations of six different standard elastomers and two different knitted metals. The knitted metal strip comes with or without an elastomer core.

Metalex® Shielded Frames are a combination of knitted metal gasketing mounted within an extruded aluminum cross section.

So, whether you can best use custom designed Combo® or Pola® Shielding Gaskets in sheets, rings or strips, or conductive coatings, Metex should be your first thought when it comes to EMI/RFI shielding.

And, to help you realize the infinite possibilities of Metex shielding, we want you to have, free of charge, our 124 page EMI/RFI Shielding Handbook, acclaimed the world over as the "textbook" of the field. Write to us on your company letterhead, at 970 New Durham Road, Edison, N.J. 08817, or on the west coast, 20437 S. Western Ave., Torrance, Ca. 90501.

Or, if you need an answer right away, talk to one of our applications engineers in N.J. at 201•287-0800, or in California on 213•320-8910. Also ask about samples and our free video seminars, offered periodically.

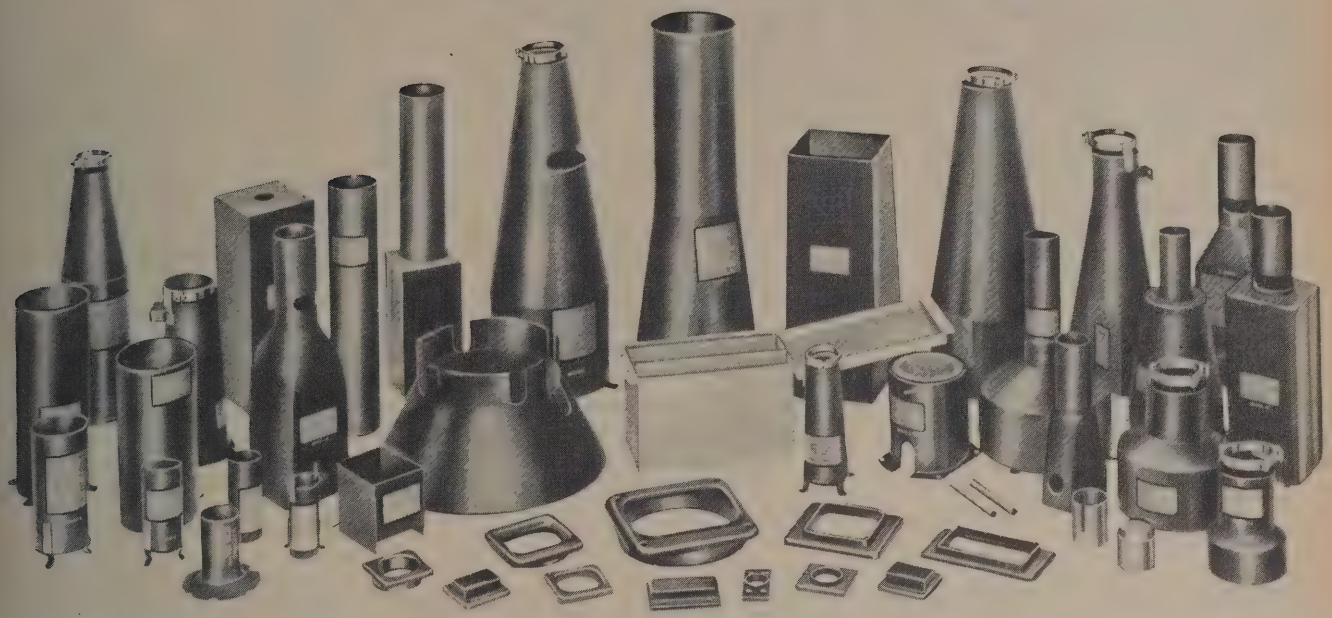
# The utmost in Magnetic Shielding



**Worlds most complete line of off-the-shelf magnetic shielding for side-window and end-on PM tubes, cathode ray and storage tubes.**

With over 35 years experience in the design, fabrication and production of magnetic shielding, backed by the metal forming expertise of its parent company, Bomco, Inc., MuShield's listing of a guaranteed field reduction on all material and every shield is your assurance that MuShield's quality is unsurpassed.

### Magnetic Shielding for Research and Industry

MuShield offers a complete line of off-the-shelf magnetic shielding as well as providing design and engineering support for the production of custom shields. MuShield's personnel are published authorities on the design and production of magnetic shielding and are ready to help in the design of new shields.

### Raw Materials and Heat-Treating Capability

MuShield provides three basic types of shielding material: MuShield High Saturation Material, which has permeability ranging from 200 to as high as 50,000 and a saturation point between 18,000 and 20,000 gauss; MuShield Medium Permeability Material, normally used as a buffer, with a saturation point of approximately 15,500 gauss and permeabilities from 12,500 to 150,000; and MuShield High Permeability Material, which has a minimum permeability of 80,000, at B-40, a maximum permeability of 350,000, and a saturation point of approximately 7,500 gauss.

MuShield offers a Special Heat Treating and Processing Service that gives magnetic shielding material optimum permeability and low-shock characteristics. All MuShield products are heat treated by this special process as a standard manufacturing procedure.

Shielding fabricated of MuShield material may be processed with our Special Heat Treating and Processing Service. Permeability of fabricated parts that receive the Special Heat Treating and Processing Service is guaranteed.

### Seamless Magnetic Shielding Tubing

MuShield offers seamless magnetic shielding tubing in sizes .050" to 1-1/4" in diameter. Like all MuShield products, the permeability of MuShield seamless tubing is guaranteed.

### Magnetic Tape Preserver Cases

MuShield manufactures a variety of tape preserver cases for the protection of magnetic tapes from degradation caused by proximity to magnetic or electrical fields. MuShield will also manufacture cases to customer specifications.

### Send for Free Catalog

The MuShield catalog is a "must have" reference piece for the engineer concerned with magnetic shielding. All MuShield magnetic shields are listed according to the actual CRT, photomultiplier, and storage tubes they are designed to shield. Design aids, a description of MuShield Material, and the Special Heat Treating and Processing Service are also included. The MuShield catalog is a reference piece that will prove invaluable to the design engineer and buyer.

# Stackpole CERAMAG® Ferrites:

Stackpole has pioneered since 1947 in the large-scale production of soft ferrite components—products that have set the standard for uniformity and dependability in the electronics industry.

CERAMAG is Stackpole's trademark for its family of soft spinel ferrite compositions. Each material is usable over a portion of the frequency range of 1 kHz to over 200 MHz.

The large selection of CERAMAG materials and tooling that Stackpole offers makes possible new designs heretofore impractical or impossible.

As each CERAMAG material has a unique set of characteristics, the design engineer should carefully choose the precise ferrite needed to achieve an optimum system design.

Our expertise lies in designing the best core material and providing it in a usable configuration at the most reasonable cost. We will work with your design engineer and support him with our expertise.

For information on The Right Ferrites, write for Bulletin 59-103, to: Stackpole Carbon Company, Electronic Components Division, St. Marys, Pa. 15857. Telephone: (814) 781-1234. TWX: 510-693-4511.

| CHARACTERISTICS | MATERIAL GENERIC TYPE |
|---|---|
| | Initial Permeability ($\mu_o$) |
| | Saturation Flux Density ($B_s$) |
| | (@ H oersteds) |
| | Residual Flux Density ($B_r$) |
| | Coercive Force (H ) |
| | Temperature Coefficient of $\mu_o$ (25°C to 100°C) (T.C.) |
| | Curie Temperature ($T_c$) |
| | Volume Resistivity @ 25°C ($\rho$) |
| | Max. Usable Frequency (F) |

**Saturation Induction, $B_s$—**
Maximum possible induction in a material; value is approached asymptotically (with increasing H) by the normal magnetization curve and the hysteresis loop.

**Coercive Force, $H_c$—**
The demagnetizing force necessary to reduce the Residual Induction to zero.

**Residual Induction, $B_r$—**
The magnetic induction corresponding to zero magnetizing force in a magnetic material which is in a symmetrically, cyclically magnetized condition.

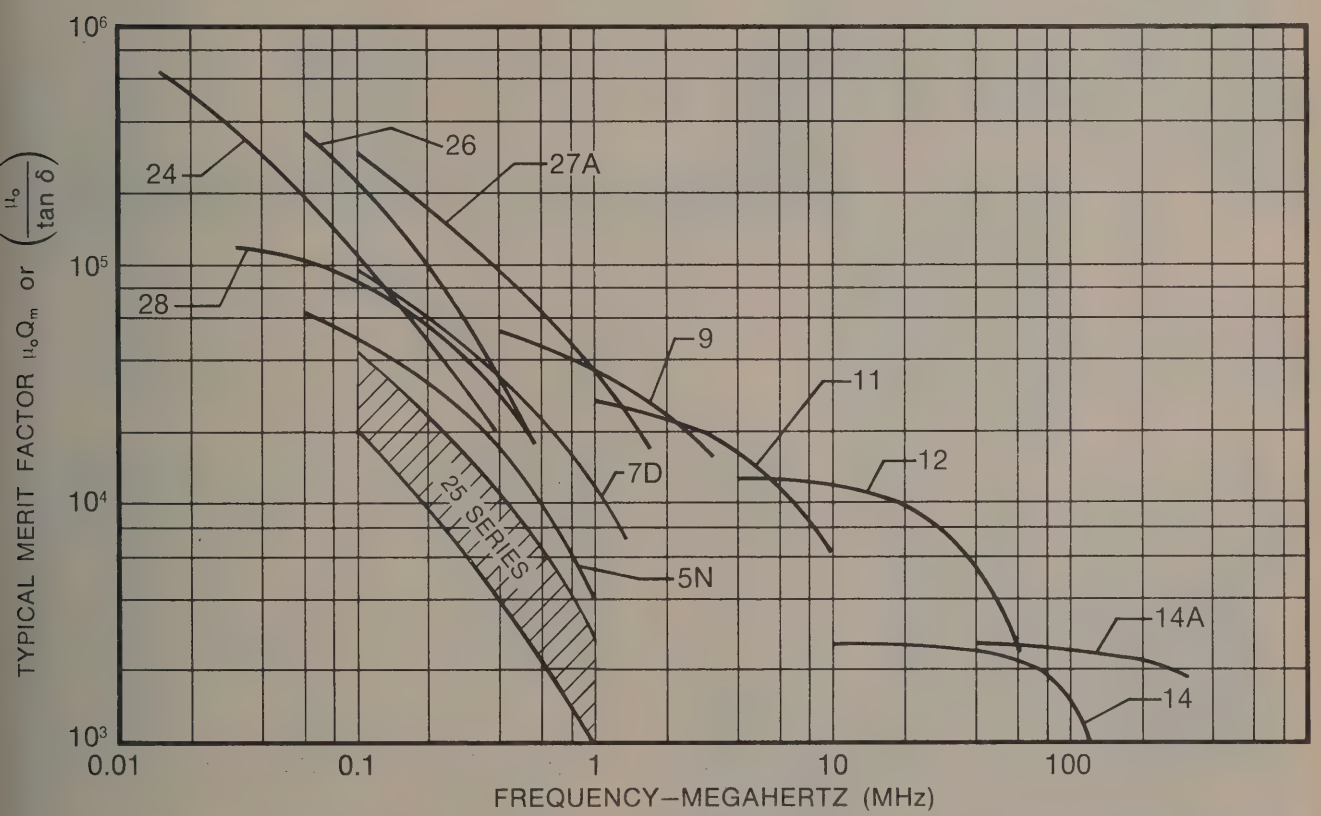
**Temperature Coefficient of Initial Permeability, T.C.—**
The relative change of initial permeability per degree centigrade, in percent.

**Curie Temperature, $T_c$—**
Stackpole Carbon Company defines Curie Temperature as that temperature, in degrees centigrade, at which the $\mu_o$ of a material becomes 1/10 the maximum value of $\mu_o$.

**Volume Resistivity, $\rho$—**
The resistance of a one-cm cube of material.

**General Tolerances on Characteristics**
These will vary depending upon configuration and application.

| | |
|---|---|
| $\mu_o$ | ±20% |
| $\mu_m$, $B_s$, $B_r$, $H_c$ | ±25% |
| T.C. | ±50% |
| $T_c$, $\rho$, D.F., K | Typical |
| $B_u$ | +15% |



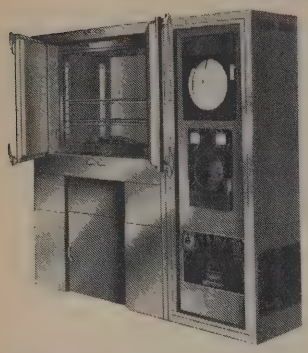
CERAMAG is a family of materials capable of operating over the frequency range of 1k Hz to over 200 MHz.

The $\mu_o Q_m$ product may be regarded as a figure of merit for a given ferrite, since it provides a measure of the useful frequency response. $Q_m$ is the material quality factor, and $\mu_o$ is the toroidal initial permeability.

The section of the $\mu_o Q_m$ curve shown indicates the most suitable area of operation for each material in the ungapped (toroid) configuration.

STACKPOLE

# BLUE M TEMPERATURE CONTROLLED EQUIPMENT FOR CRITICAL RESEARCH/PRODUCTION WORK



## FULL-RANGE TEMP./HUMIDITY CHAMBERS

Maximum capability cabinets to perform all current MIL humidity tests. Dual wet and dry bulb POWER-O-MATIC 60® Proportioning Control Systems assure absolute stability and reliability. Horizontal mechanical convection units feature programming, separate monitoring recorder, and built-in overtemperature protection. Range: −18°C. to +93°C. (±½°C.). Meets MIL-202D, Method 106C, Step 7A; automatically performs −10°C. dip without changing cams. Maintains R.H. ±½%. Chamber sizes: 5.8, 11, 27 and 64 cu. ft.

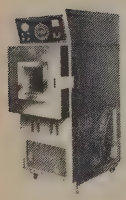
## ALSO . . .

Full-Range Single Steady State Chambers

HUMID-FLOW™ Air-Cooled Chambers

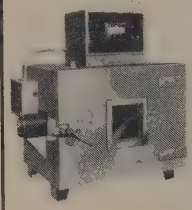
New −40°C. Extended Range Cabinets

New +150°C. Steady State Cabinets



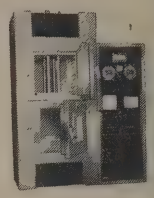
### VERSA-RANGE® REFRIGERATED TEST CHAMBERS

Two versatile ranges: −100°F. to +400°F. and −40°F. to +200°F. Five chamber sizes — 3 to 64 cu. ft. Patented POWER-O-MATIC 60 Control for incomparably reliable performance. Also −40°F., −120°F. chest type units. Overtemperature protection.



### STABIL-THERM® $LN_2$ CHAMBERS

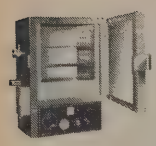
Front or top opening models. −185°C. to +200°C. with solid-state instrumentation. Similar units with $CO_2$ as coolant have −73°C. to +300°C. range. Quality construction throughout, including overtemperature protection.



### THERMAL SHOCK TEST CHAMBERS

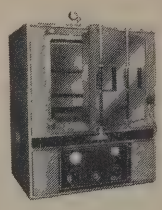
Dual Cabinets for MIL-STD-202 and 883; Versa-Whirl Baths for MIL-STD. 883, Method 1011, Conditions A to F. Latter available as an integrated, automated facility.

## *TYPICAL EXAMPLES OF AMERICA'S FINEST, MOST COMPLETE LINES OF OVENS AND FURNACES*



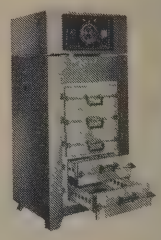
### LIFE-TEST OVENS

Variety of types, sizes and ranges. POWER-O-MATIC 60 Control for unequalled reliability. Also Batch Ovens to 96 cu. ft. including new Class A units meeting recommendations of NFPA Bulletin 86A and Wattage Dissipation Chambers.



### INERT GAS OVENS

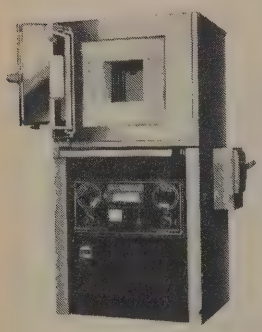
Complete line includes units with manual gas control on up to fully automated chambers with programming. Temperatures to 1100°F. Most have POWER-O-MATIC 60 Control; all have built-in overtemperature protection.



### DRAWER OVENS

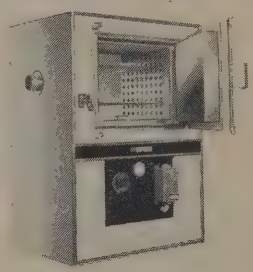
Models include 3 and 5 drawer chambers and 5 door, 5 shelf units. Temperatures to +600°F. Enable different batches of small parts to be processed separately and independently. POWER-O-MATIC 60 Control.

## HIGH TEMPERATURE CHAMBERS — OVENS TO +1300°F. (+704°C.) . . . FURNACES TO +2950°F. (+1620°C.)



Ultra-Temp Ovens, gravity and mechanical, with ranges to +1300°F. Completely redesigned for improved efficiency and safety. Feature new patented POWER-O-MATIC 80™ Solid-State Proportioning Control for true straight-line performance. Available with a variety of accessories including programming. Complete line of Furnaces includes new models with POWER-O-MATIC 80 Control for proportional performance at temperatures to +2950°F. Many models available with new microprocessing control.

## FRICTION-AIRE™ — THE PATENTED ELECTRIC OVENS WITH NO HEATING ELEMENTS . . . NOW WITH 3 MODELS U.L. LISTED FOR CLASS 1, GROUP D SERVICE!



Air turbulence is the only source of heat . . . non-electric POWER-O-MATIC 90™ Control provides superb ±0.5°C. proportional performance. U.L. Listed models have 15°C. above ambient to +150°C. (+302°F.) range — remain well under +215°C. under any operating conditions. Other models built to N.E. Code recommended practices for Class 1, Group D locations . . . others engineered for general-purpose applications of a critical nature. Also Batch types. Various sizes . . . temperatures to +260°C. (+500°F.). You can't buy a safer chamber!

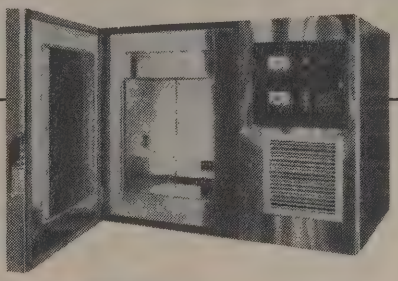
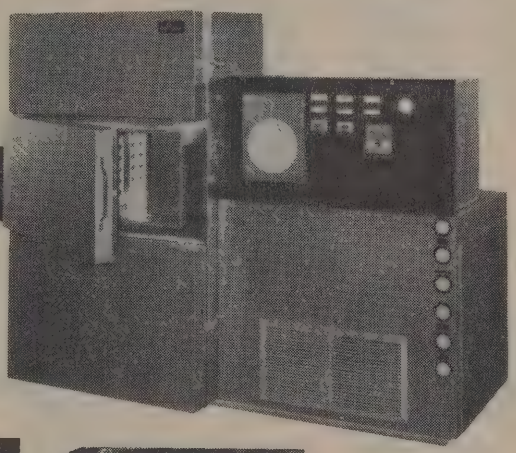
*Serving the electronics industry with environmental simulation and test equipment*



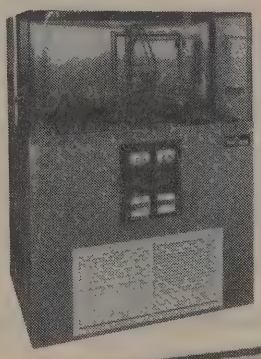
## ENVIRONMENTAL TESTING

19 standard sizes of chambers in 3 temperature ranges, all mechanically refrigerated, for high/low temperature or temperature/humidity. Microprocessor programming available on all models for automation of test sequences.



## TEMPERATURE CYCLING

Air to air temperature cycling. Illustrated model ATS-3HC achieves the extremes of 150°C and -65°C in less than 2 minutes and is completely mechanically refrigerated. Test load remains stationary permitting temperature cycling under power.

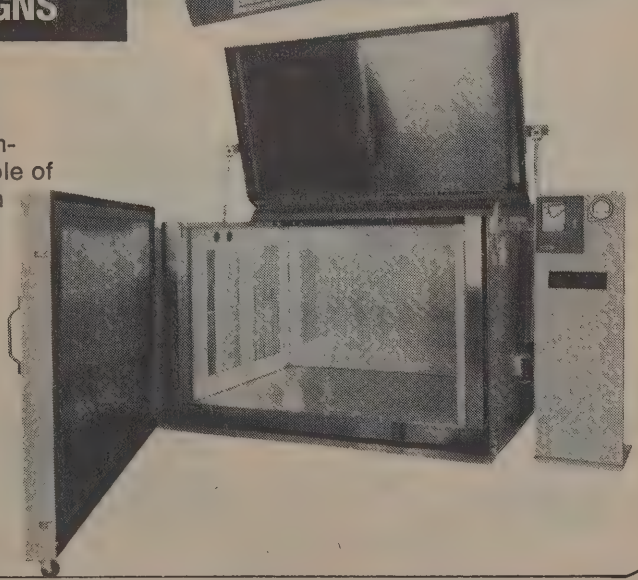


## THERMAL SHOCK

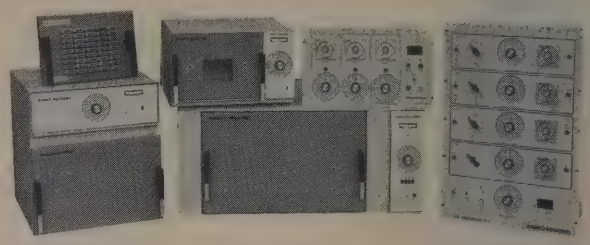
Liquid to liquid thermal shock baths for conducting Mil. Std. 883A available in incoming inspection and production Q.C. versions. Models are completely automatic in operation and designed for minimized fluid evaporation losses.

## STANDARDS AND SPECIAL DESIGNS

Chambers for requirements as simple as the storage of epoxy (illus. at left) to one of a kind. Illustrated at right is a 120 cu. ft. unit with a temperature range from 150°C to -54°C. It is capable of cycling a 500 pound, heat dissipating load from extreme to extreme in less than 30 minutes.

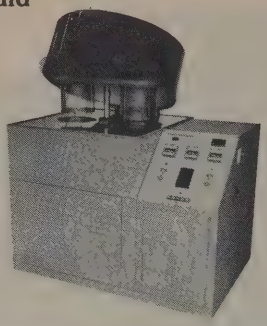


# ENVIRONMENTAL SIMULATION EQUIPMENT

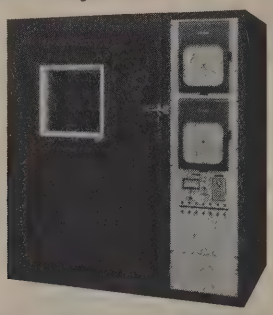


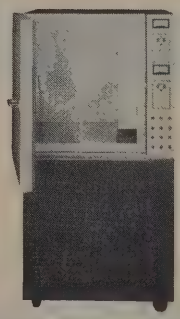
## BENCH TEMPERATURE CHAMBERS
**9 Models • Programmers • Fixtures**

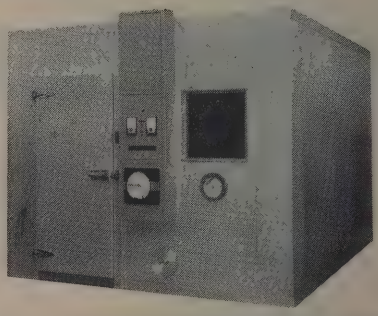
## THERMAL SHOCK - TEMPERATURE CYCLING
**Liquid to Liquid**
**Air to Air**
**Vertical**
**Rotary**



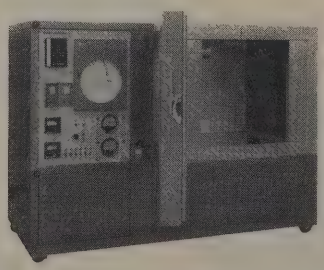
## ENVIRONMENTAL SIMULATION CHAMBERS AND ROOMS
**Temperature-Humidity**
**Temperature**

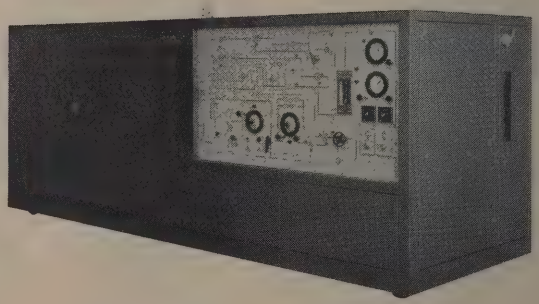






## CUSTOM DESIGN
**Air or Fluid Conditioners**
**Temperature Processing**
**Product Testing**
**Vibration**
**Altitude**





- Temperature: −300° to +1000°F
- Humidity: 5% RH to 95% RH
- Altitude: Ambient to 300,000 Ft.
- Sizes: 0.4 Cu. Ft. to 5000 Cu. Ft.

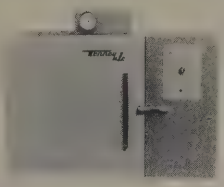
## BENCH TOP TEMPERATURE CHAMBERS

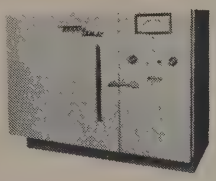
Work space:
1½ & 5 cubic feet.
Temperatures:
−112°F to +350°F
±¼°F
(−80°C to +177°C)



**Bulletins 108 and 123.**

## BENCH MODEL TEMPERATURE-HUMIDITY CHAMBERS

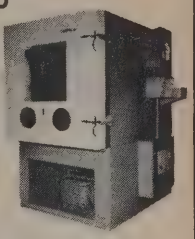
Work space:
3 & 5 cubic feet.
Temperatures:
−100°F to +350°F
(−73°C to +93°C)
Humidity capabilities:
20% RH to 98% RH.



**Bulletins 101 and 123.**

## TENNEY SERIES HIGH-LOW TEMPERATURE AND TEMPERATURE HUMIDITY TEST CHAMBERS

Work Space:
5 cubic feet to
64 cubic feet.
Temperatures:
−112°F to +350°F,
(−80°C to +177°C)



**Bulletins 103, 104, 106, 126 and 127.**

## TH & T SERIES MODERATE RANGE TEMPERATURE-HUMIDITY CHAMBERS

10 cubic feet thru
65 cubic feet.
Temperatures:
Low to 0°F (−17°C)
High to 200°F (+93°C)
Humidity:
optional

**Bulletins 109 and 111.**

## MIL-STD-781 AGREE TEMPERATURE-VIBRATION CHAMBERS

Sizes:
Available in sizes for mating with vibrator units having table tops from 2 square feet to 40 square feet.

**Bulletin 105.**

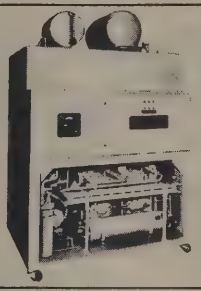
## TENNEYZPHERE ALTITUDE-TEMPERATURE CHAMBERS

Work space: 5 cubic feet thru 64 cubic feet.
Temperatures:
−100°F to +350°F
(−73°C to +177°C)
Altitude: To 200,000 feet.
Humidity: Optional

**Bulletins 117 and 118.**

## KOLD-PAK PACKAGED REFRIGERATION SYSTEMS

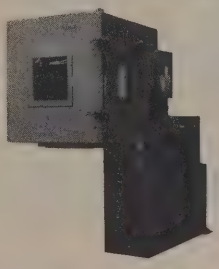
Temperatures:
Low to −100°F
(−73°C)
High to +250°F
(+121°C)



**Bulletin 114.**

## VIBRATION TEMPERATURE CHAMBERS

Sizes: Standard from 5 cubic feet to 64 cubic feet.
Temperatures:
−100°F to +350°F
(−73°C to +177°C)
Humidity: Optional



**Bulletin 102.**

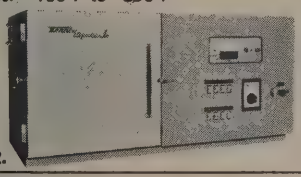
## MULTI-RANGE PRECISION TEMPERATURE BATHS

Work space:
One gallon &
9 gallon.
Temperatures:
−100°F to +248°F
(−73°C to +120°C)

**Bulletins 107 and 125.**

## SPACE JR. THERMAL VACUUM SPACE SIMULATORS

Work space: 14" diameter x 12" deep
Vacuum: To 7.5 x $10^{-8}$ torr.
Temperatures: −100°F to +350°F
(−73°C to +177°C)



**Bulletin 112.**

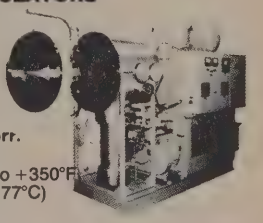
## WALK-IN ENVIRONMENTAL CHAMBERS AND ROOMS

Used for controlled environmental parameters of altitude, temperature, rain, humidity and other conditions. Available as single piece unitized or semi-unitized packages. Also, in modular panels for field construction.

**Bulletins 113**

## THERMAL VACUUM SPACE SIMULATORS

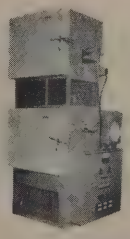
Sizes:
Standard,
1½ feet to
6 feet
diameters.
Vacuum capability:
To 1 x $10^{-9}$ torr.
Temperatures:
From −320°F to +350°F
(−196°C to +177°C)



**Bulletin 120.**

## MECHANICALLY REFRIGERATED THERMAL SHOCK CHAMBERS

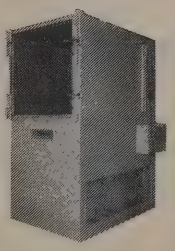
Work Space:
3, 5 & 8 cubic feet
Temperatures:
Top compartment
to +350°F (+177°C)
Lower compartment
to −100°F (−73°C)
Center compartment
ambient optional.



**Bulletin 121.**

## VACUUM CHAMBERS AND VACUUM OVENS

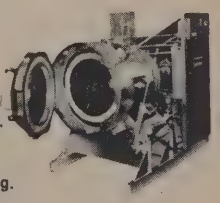
Work space:
4 thru 27 cubic feet.
Temperatures:
To +300°F (+150°C)
Vacuum:
To 148 microns
(200,000 feet)



**Bulletin 110.**

## AUTOCLAVE SYSTEMS

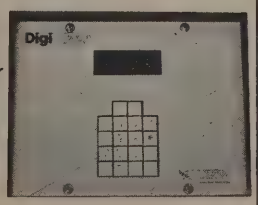
Sizes:
Small laboratory models to large production units.
Temperatures:
+500°F (260°C)
Pressure: to 1000 psig.
Vacuum : Optional



**Bulletin 122.**

## DIGITENN

Microprocessor based programmer for new and existing chambers.



**Bulletin 131**

## TENNEY SUB-ARCTIC INDUSTRIAL CABINETS AND COLD STORAGE CHESTS

Work space:
6 thru
12 cubic feet.
Temperature ranges:
Low to −120°F)
(−84°C)
High to +350°F (+177°C)

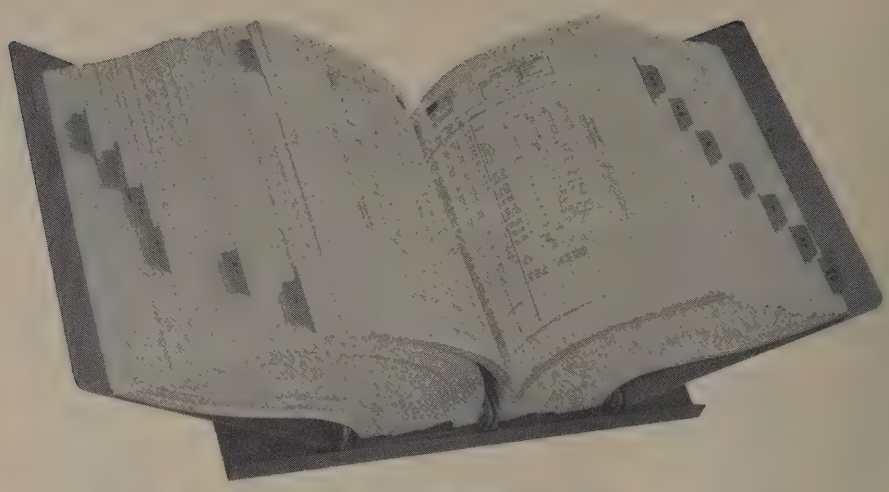
**Bulletin 115.**

## BURN-IN CHAMBER

Size and number of doors may be specified to meet any burn-in requirement.

Typical temperature range: +32° F (0° C) to +140° F (+60° C)

**Bulletin 133**



# UNITED PRICING REPORTS

## the single source that speeds up invoicing, pricing, quoting, purchasing and estimating

Electronic component prices change so fast, you'd need a team of people just to keep up.

United Pricing Reports is the better way. When you subscribe to Pricing Reports you receive 1500 pricing sheets (3000 pages) of the latest prices, as of the date we ship them to you.

This gives you, in a single source, up-to-the minute selling prices on more than 500,000 electronic components.

United Pricing Reports gives you accurate resale prices at the exact moment you need them. Not hours or days later. So it helps you eliminate frantic phone calls, letter writing and catalog scanning to check on prices when you write an invoice or type a purchase order.

## Twice weekly price updates.

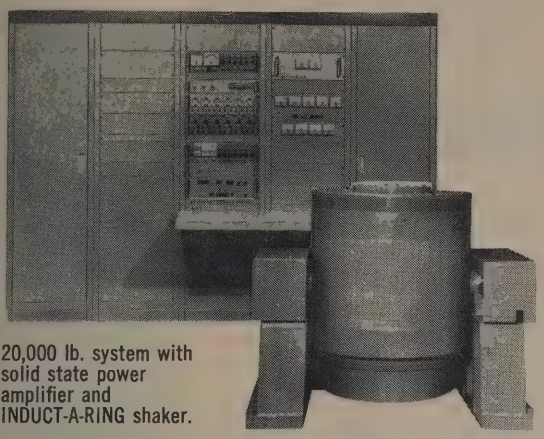
One week after you receive your Pricing Reports source book (1500 pricing sheets) you begin receiving twice weekly price updates. You simply take these new price pages and replace the now obsolete pages with them.

The whole process is simple. All information is organized alphabetically by manufacturer. And each manufacturer's price schedule is listed by part number in numerical/alphabetical sequence.

One more thing. When we promise twice weekly updates, we deliver. 52 weeks a year, consistently. Not monthly or every other month. We have a tradition of delivery on our promises, and we're certainly not going to stop now.

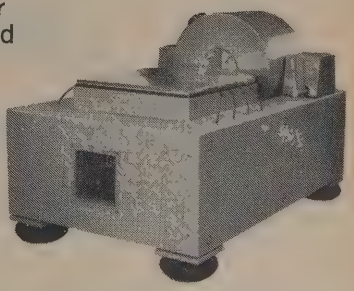
*UNITED TECHNICAL PUBLICATIONS, INC., DIV. OF COX BROADCASTING CORP., 645 STEWART AVE., GARDEN CITY, N.Y. 11530 (516) 222-2500 TWX-510/222-*

# ELECTRODYNAMIC VIBRATION TEST SYSTEMS



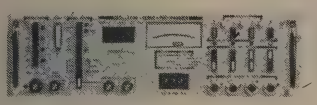
20,000 lb. system with solid state power amplifier and INDUCT-A-RING shaker.

- 50 to 40,000 lb. force systems for sine and random vibration
- Systems powered by solid state amplifiers to 256 kVA
- INDUCT-A-RING shakers for unmatched performance and reliability
- Control instruments for MIL-STD-781C, 810C and 202E testing
- 6 inch stroke electrodynamic force generators
- PERMALINE Slip Table on combined seismic base



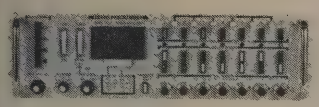
Shaker and slip table on PERMALINE combined seismic base.

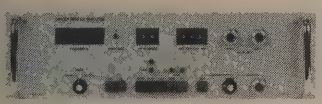
## CONTROL INSTRUMENTATION



**BASIC SINE CONTROL**

The OSP-4 is our most economical, compact sine control system. Provides sine sweep and servo control for test programs of up to four levels. Input charge amplifier is standard.



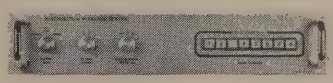


**DELUXE SINE CONTROL**

The OSC-1S and SPA-7 comprise our most comprehensive sine control system. Sine sweep and programmable servo control are provided for tests of up to seven levels. Both frequency and vibration level are digitally displayed. Sweep rate and test duration may be preselected to provide automatic shutdown. Automatic or manual modes for selecting crossover frequencies are provided. Input charge amplifier is standard.

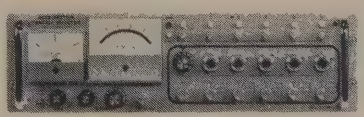
**TRACKING FILTER**

Model TF22 Tracking Filter features fixed or constant 10% bandwidth which varies between 2 and 200 Hz. Log DC output is standard. Modular construction allows six channels per 19″ rack.



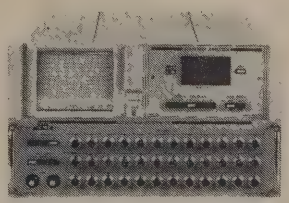
**SIGNAL AVERAGER**

Model MAC-8 Averaging Control features eight individually selectable data channels for control to the average signal level. Can be used for sine or random testing.



**SIGNAL SELECTOR**

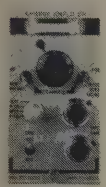
Model ACS-6 automatically selects the highest (or lowest) acceleration input. Accepts six sine acceleration signals, and gates to the output whichever signal reaches its preset limit.



**LOW COST RANDOM CONTROLS**

Model SG-36 Spectrum Generator and Model A-36 Spectrum Analyzer provide simplified manual equalization and real time analysis for random vibration testing as required by MIL-STD-781C, 810C, and 202E.

## SIGNAL CONDITIONERS



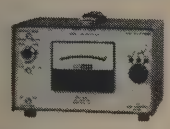
**Model D22PM** Basic Charge Amp

**Model D22PMH** Differential Charge Input Switchable Filters

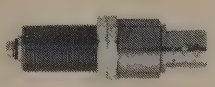
**Model D22PMR** Charge/ Strain Gage Amp

**Model D22PMB** Bridge Conditioner

The D22 Series Signal Conditioners are offered for use with piezoelectric and strain gage transducers. Integrated circuit design provides superior low noise characteristics in a rugged modular construction. Units shown here are only a few examples of a complete family of signal conditioners that permit a wide variety of dynamic and static measurements.

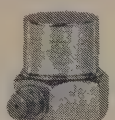


**Model 1610M** Vibration Monitor provides readout of acceleration, velocity or displacement on 1% log scale meter.



**Model 22CA-2** Two Wire Remote Charge Preamp. Operates with any Model 22 instrument.

**Model 11PA-2** Two Wire Remote Voltage Preamp. Operates with any Model 22 instrument.



A full line of piezoelectric accelerometers are offered for general purpose vibration testing and for many special applications.

**INDUSTRIAL VIBRATION MONITORS**

The Series 800 Vibration Alarm Module is used with the Series 8800 Industrial Accelerometer to monitor Displacement, Velocity, and Acceleration. Adjustable alarm and time delay circuits are provided, permitting low cost, comprehensive machinery health monitoring. Multichannel systems available.

**INDUSTRIAL ACCELEROMETERS**

The Series 8800 Industrial Accelerometer features integral electronics giving low output impedance, and rugged cable. Bearing cap or frame mounted accelerometer technique utilizes the total vibration spectrum, compared to limited response of proximity probes or velocity pickups.

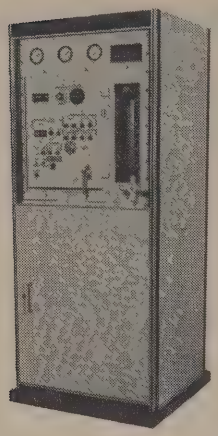
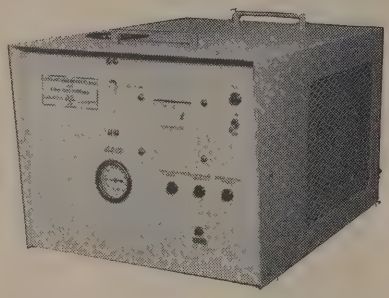
# CLOSED LOOP COOLING SYSTEMS
# OIL PURIFICATION SYSTEMS
# COMPRESSED AIR DEHYDRATORS

We are happy to quote on Standard or Special Units in any quantity



This unit, built for Hughes, circulates coolanol for testing of TWT's.

## CLOSED LOOP COOLING SYSTEMS



This unit provides the cooling for a CAT X-Ray System.

This Heat Exchanger is ground support Test Equipt. for the Air Force.

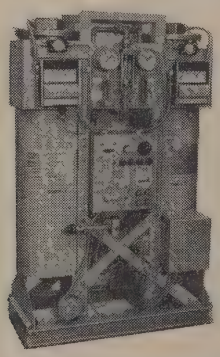
- Units are completely self-contained including Pump, Reservoir, Heat Exchanger, and Interlocks
- Wide variety of Flow Rates, Controls, and Instrumentation available
- Standard or special units available

• TYPES OF COOLING INCLUDE-

Liquid-to-Air. Liquid-to-Air Refrigerated.
Liquid-to-Water. Liquid-to-Liquid Refrigerated.

(Liquid may be water or any exotic coolant)

## COMPRESSED AIR DEHYDRATORS



Dual Tower Desiccant Dehydrator Qualified for Naval Use

- Refrigerated (Dew Pt. 35°F) or Dual Tower electrically reactivated (Dew Pt. -65°F)
- Designed for Marine or Industrial Use
- Qualified for severe environments, including shipboard shock & vibration

## FLUID PURIFICATION SYSTEMS

RECLAIMS EXPENSIVE OILS TO BETTER THAN NEW CONDITION WITHOUT HEAT

**REMOVES** — Moisture to 25 PPM, Particulates to .45 microns, Dissolved Gas to 2%, Salt Water to trace levels.
**FROM FLUIDS** — Hydraulic, Lubricating, Insulating, Transformer, X-Ray Oils.
**APPLICATIONS** — Automotive Plants & other machining operations, Ships, Submarines, Aircraft Ground Support Facilities, Transformer Mfrs., Capacitor Mfrs., or wherever clean or high dielectric strength oil is required.
**MOISTURE REMOVAL** — 20 Gallons per day based on hydraulic oil at 120° F. Initial water content 10,000 PPM, final water content 50 PPM.
**SPECIFICATIONS** — Horsepower 8. Size 36x36x70. Weight 1200 lbs. Flow Rate 6-18 GPM

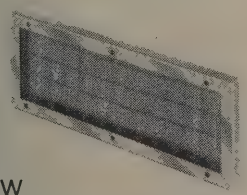
# EVANS air filters

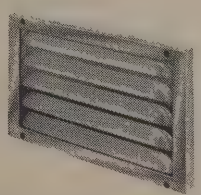
## for Electronic Cabinet Application

. . . used on Computers . . . Card Readers . . . Tape Transports . . . Transceivers . . . Power Supply Units . . . both large and small cabinetry. Evans Air filters are permanent. Rigid. Aluminum. Made to withstand the brutal abuse of military field conditions. Frames have mitered corners for smooth, close tolerance fit. Die cut, expanded aluminum grids are criss crossed and precision fitted into each filter. Patented Brillo Lock design gives more air delivery with positive cleaning results.

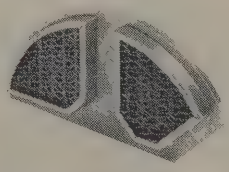
| | |
|---|---|
| Tolerance: | ± 1/32″ |
| Velocity: | 200 to 900 FPM |
| Efficiency: | 75% AFI Test |
| Finishes: | Available in chemical film finish to meet requirements of MIL-C-5541 . . . MIL-F-14072 . . . MIL-A-8625 |
| Sizes: | Filter of 1/2″ or 3/4″ dimension. Made to a maximum area 400 sq. inches . . . with maximum length 25″ on one side without special bracing. For complete information write or call. |



LOW RESISTANCE FILTER
Special serts permit fastening solidly to blower unit. Made for air drop equipment.



LOUVERED FILTERS
For outside application. Louvers protect filter media from water, ice, snow.



HEAVY DUTY UNIT
For rugged military use. Extra rigid frame made from .063 aluminum.

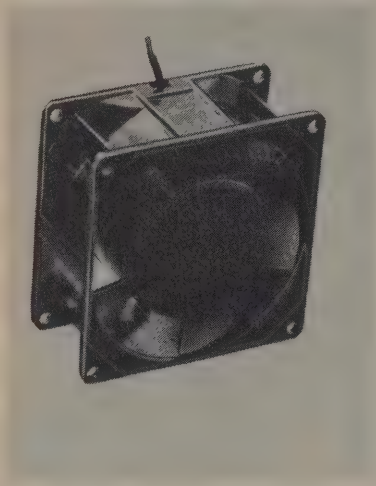
## AXIAL FAN MODEL 126



- Popular 3⅛ x 1½ inch size
- 2 13/16 inch mounting centers
- 22 CFM at .1 inch of water, 32 CFM at Free Flow
- 50% quieter than competitive fans
- U.L. recognized file 64887
- Reduced flow versions for very quiet applications
- Sleeve or ball bearing

| Part Number | Volt | Current | Delivery |
|---|---|---|---|
| 760-126LH- 2182-11115 | 115 | 45 ma | 13 CFM |

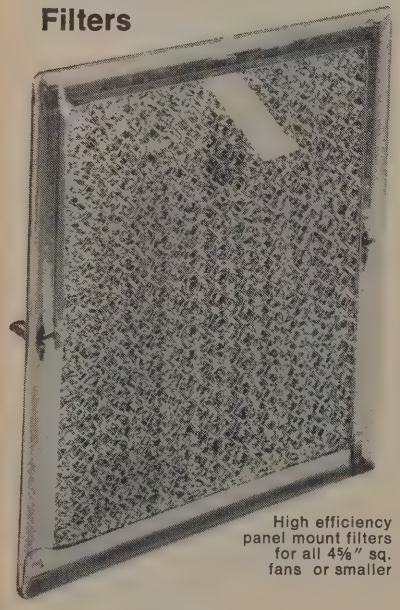
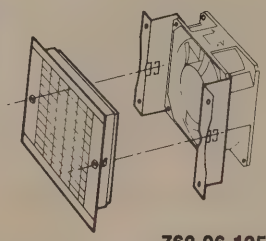
## AXIAL FAN ACCESSORIES

### Filters



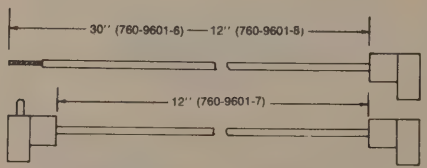
High efficiency panel mount filters for all 4⅝" sq. fans or smaller

| Filter P/N | Size | Mounting Hole Centers |
|---|---|---|
| 760-100-45 | 5 11/16 x 5 11/16 x ¼ | 5 3/16 ±1/16 |



**760-96-125**

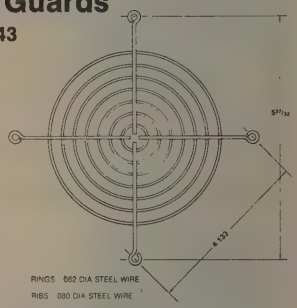
For all 4½ inch square fans; prevents coarse materials from entering unit. Filter mounts easily to the body of the fan by use of attached spring clips. Wire mesh screen is held in place by a pair of quick-release screws.



UL approved #18GA wire molded terminal ⅜ inch end stripped.
760-9601-6 — 30" long
760-9601-7 — 12" jumper for multiple connection
760-9601-8 — 12" long

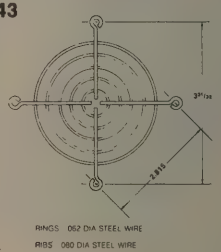
### Finger Guards

**760-9601-43**



Fits all 4½ inch square fans. Meets UL spacing requirements.
Bright zinc finish over steel wire.

**760-12601-43**

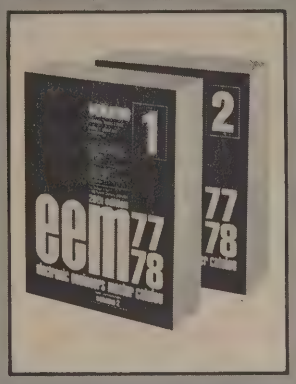


Fits all 3⅛ inch square fans. Meets UL spacing requirements.
Bright zinc finish over steel wire.

# WE KNOW OUR STUFF

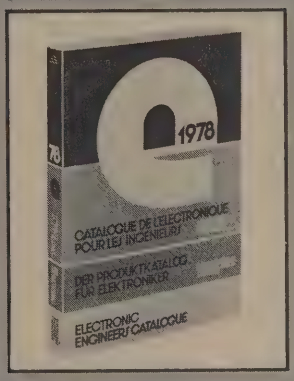
## 41 YEARS OF EXPERIENCE IN CATALOGING, 21 EDITIONS OF eem

### eem/ELECTRONIC ENGINEERS MASTER CATALOG —



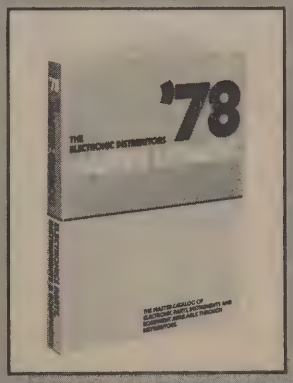
The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.

### ELECTRONIC ENGINEERS CATALOGUE



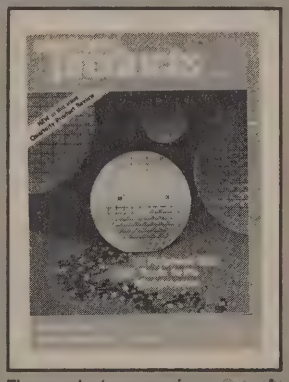
The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.

### ELECTRONIC DISTRIBUTORS MASTER CATALOG —



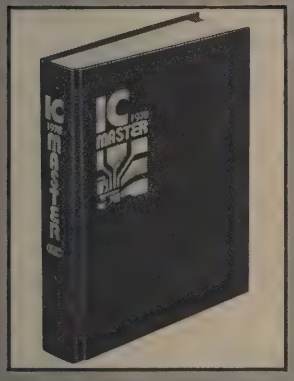
The only national catalog designed exclusively for distributors and their customers featuring electronic parts, instruments and equipment.

### ELECTRONIC PRODUCTS MAGAZINE —



The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

### IC MASTER AND THE UPDATES —



The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

### eem FILE SYSTEM —

The only filing system designed especially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

### UTP CUSTOM CATALOGS —

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

### UNITED COST AND PRICING SERVICES —

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

# OFF-THE-SHELF MODELS

## Our well-built airmovers are rugged and reliable

Standard **Boxer** fans, rugged ball and new **Grand Prix** sleeve bearing types, both rated at more than 10 years operating life. **Super Boxer** for exceptional output at high back pressure. Versatile **DC Boxer** accepts DC and converts it to drive the unit's AC motor, eliminates brush wear, RF noise and other common DC motor problems. Miniature **PeWee Boxer,** delivering the highest cooling punch of any fan its size.

These reliable performers feature Boxer's sturdy all-metal construction, compact design for ease and flexibility of installation, and patented long-life bearing systems, as do **MiniBoxers, Tandem Boxers, Hi-Fi Boxers** and the new **Fulmar** fans. There's also the slim-profile **Condor** (3½″ thin by 10″ dia.) with air delivery to 575 cfm, and quality proven **IMCair** fans and centrifugal blowers. They are all distributor stocked for immediate availability.

If you'd like complete specifications and performance parameters for our full line of airmovers, send for 20 page catalog #ND7. It's available from **IMC Magnetics Corp., New Hampshire Division. Tel. (603) 332-5300.**

# CUSTOM DESIGNED MODELS

## We make centrifugal blowers, propeller fans, vaneaxial and tubeaxial airmovers...

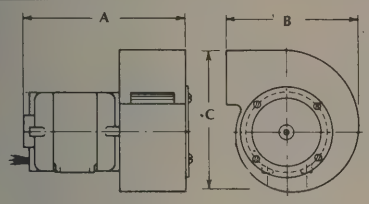

Figure A

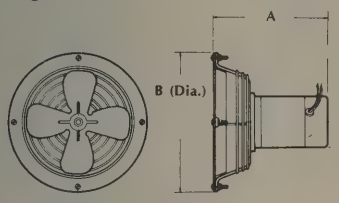

Figure B

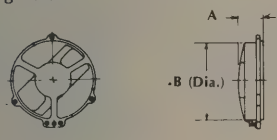

Figure C

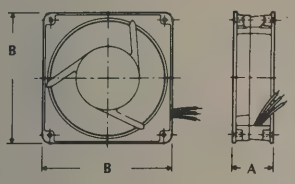

Figure D

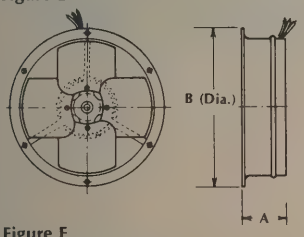

Figure E

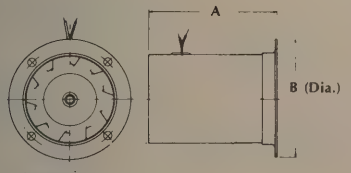

Figure F

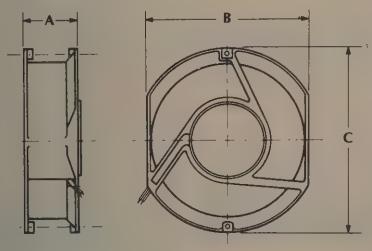

Figure G

to meet your most demanding cooling requirements. Slim-profile IMCool tubeaxials, compact (4-11/16" to a side) Boxers and MiniBoxers in Mil-Spec, 400 Hz and variable frequency versions, propeller fans and centrifugal blowers for intake or exhaust, against back pressure, and in harsh environments. Also, high performance vaneaxials from miniature IMCube (1" cube) to 14.5-inch diameter sizes, automatic air density/speed compensating "Hi-Slip" models for high altitude applications. Air deliveries from 6.5 to 3500 cfm.

Select from the thousand or more catalog designs, a sampling of which appear below, or we will custom design to your exact specifications . . . new systems, evolving systems, exasperating parameters, it's all in a days work for our Applications Engineering Section.

Thermoelectric heat pumps are now being used in industrial and military equipment that requires small, efficient, vibration free, cooling systems. Marlow Industries Standard heat pumps are available from stock for off-the-shelf delivery. The smaller heat pumps can be mounted on TO-37 or TO-8 headers. The larger modules can be mounted to a Flat Plate for ease of installation into a system. Related products such as temperature controllers/power supplies, and heat sinks are also available.

To assist you in selecting a thermoelectric heat pump for your next requirement, write for our "Guide To Thermoelectric Heat Pumps."

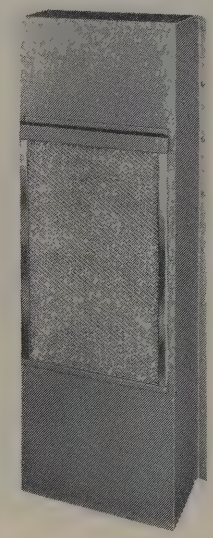
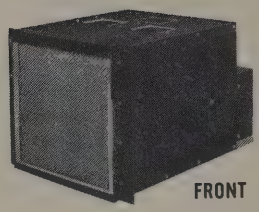
# AIR CONDITIONERS • HEAT EXCHANGERS • HEAT PIPES

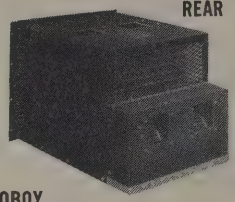


SLIMBOY



FRONT

REAR



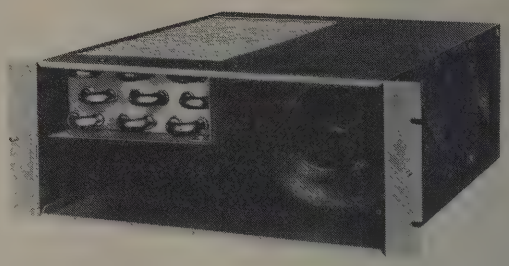
LOBOY

## AIR CONDITIONERS

- FOR COMPUTER-CONTROLLED MACHINE TOOL SYSTEMS
- ELECTRONICS • COMPUTERS
- 5000 TO 10,000 BTU

**SLIMBOY** — For longer life and greater reliability for solid state components and controls packaged door-mounted or rack-mounted units in 115 or 220 volts. Easy to install. Dimensions 19″ wide x 52 1/16″ high x 9½″ deep. Sealed to prevent induction of ambient or polluted air. Centrifugal blowers deliver cool air at high velocity to heat producing components. Pressure-sensing by-pass valve prevents freezing of coil. 20,000 hours continuous duty assured.

**LOBOY** — All the performance characteristics of the SLIMBOY in a compact 6000 BTU package, 19″ x 15 23/32″ high x 25 1/16″ deep. Operates on 115 volts, 60 Hz; 135 lbs; draws 12 amps.

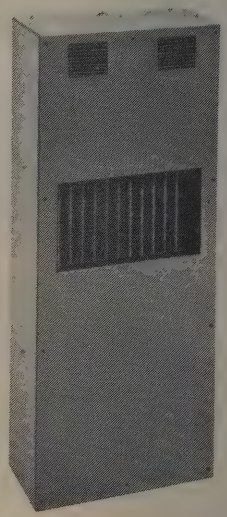


## HEAT EXCHANGERS

These water-cooled heat exchangers are designed for mounting in the front panel of a 19″ electronic cabinet and for removing the heat from the air being recirculated within the cabinet. The system does not use room ambient air nor does it exhaust warm inside cabinet air into the atmosphere. An interior cabinet temperature of 80°F (max.) with a 1 KW heat dissipation can be maintained. The unit employs 66°F to 70°F chilled inlet water.

Substantially more cooling may be obtained by using refrigerated water or direct expansion of a refrigerant.

## HEAT PIPE HEAT EXCHANGERS



The business end of these McLean cooling systems consists of a bank of heat pipes and two dual centrifugal blowers. A highly efficient method of cooling and recirculating electronic cabinet air without introducing ambient, contaminated, or polluted air into the enclosure.

Hot cabinet air is drawn through the bottom half of the heat pipe bank, thus cooling it, and discharging this cool air into the cabinet at 350 CFM at 0″ SP. A blower draws ambient air through the top half of the heat pipe bank, cooling the heat pipes and discharging heated air into the atmosphere.

A stable interior temperature 16°F above ambient is maintained. The unit mounts on the door or mounting rails of the rack and does not take up interior space.

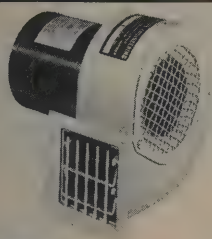
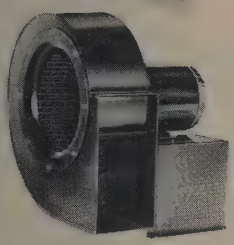
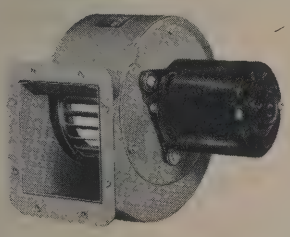
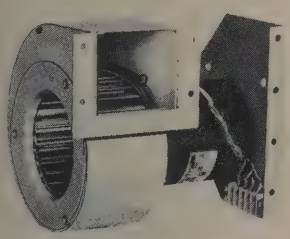
# SINGLE & DUAL CENTRIFUGAL BLOWERS FILTER GRILLE PANELS







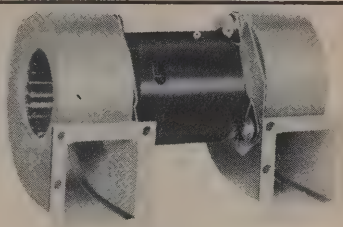


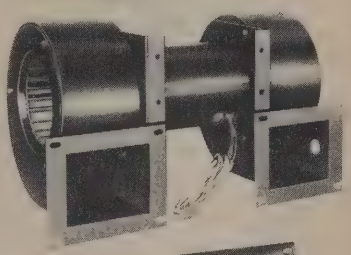
**SINGLE CENTRIFUGAL BLOWERS**—McLean does have a large selection of single centrifugal blowers engineered to meet a wide variety of CFM output and pressure characteristics. Inlet duct flanges, exhaust outlet flanges and protective screens are available. CW and CCW rotations can be supplied. Each motor has been specifically designed for the application, bearings are properly loaded, double shielded and permanently lubricated. Motor and wheels are balanced to precision tolerances assuring vibration-free operation. All motors are UL approved. These blowers may be operated in any shaft position.

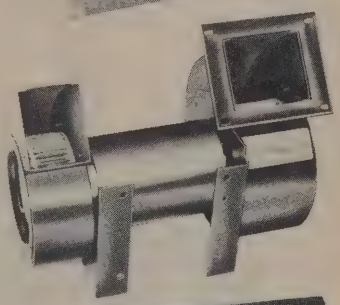
CFM output ranges from 50 to 2000 CFM with static pressures from 0" to 3.0" SP. Motors can be supplied for any AC frequency or power.

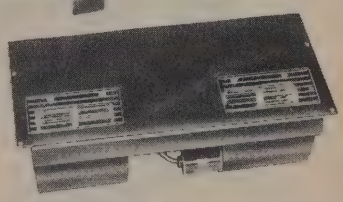
**DUAL CENTRIFUGAL BLOWERS**—There is an extensive variety of McLean Dual Centrifugal Blowers offering a wide choice of static pressure and output characteristics. Wheel diameters range from 3" to 12". Motors can be supplied for any AC frequency or power, single or three phase. Each motor has been specifically designed for the application, bearings are properly loaded, double shielded and permanently lubricated. Motors and wheels are balanced to precision tolerances assuring vibration-free operation. All motors are UL approved.

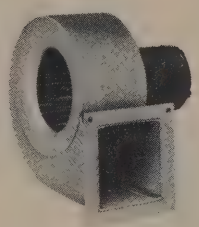
Exhaust outlet flanges, inlet duct flanges, protective screens and various types of mounting flanges and supports are available.

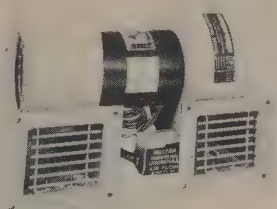












## FILTER GRILLE PANELS

Filter Grille Panels are for use in electronic cabinets where louvered area is needed to permit adequate ventilation. These panels may be used as an air inlet or air outlet. They are available with two different grille designs as shown herewith and are complete with dust filters. Can be supplied in standard EAI cabinet heights from 3½" x 10½" and widths 9½", 19". 24" and 30".

# PACKAGED COOLING EQUIPMENT

### RACK–MOUNTED BLOWERS

Over 100 models available in any panel width. Heights from 3½" to 12¼". Airflows to 1000 CFM. Pressurize systems with cool, filtered air. Prevent dust from entering systems. Standard EIA notching. Quick, easy mounting. No cutting. No filing. Also Packaged Fans for pressurizing or evacuating. Four sizes. Airflows from 275 to 120 CFM. All units available to Commercial, Military or EMI Shielded Specifications.

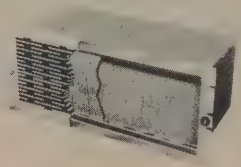
* ALL MODELS ARE 19" WIDTH EXCEPT ID300B (HALF PANEL) ** ALL MOTORS ARE 115V 50/60 HZ UL APPROVED
UNITS ALSO AVAILABLE TO OTHER RACK WIDTHS AND FOR RECESSED INSTALLATION

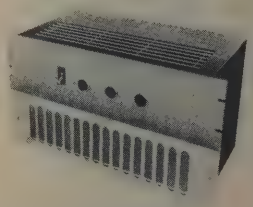


### EMI—SHIELDED UNITS

All packaged blowers available with an EMI shield and wave guide media built into the airstream. Cuts signal leakage inward or outward.

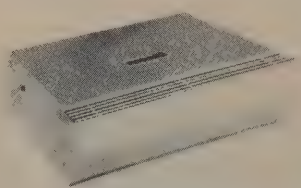
### HEAT EXCHANGERS

Maintain cabinet temperature at 80°F maximum with 1 KW heat dissipation. Air recirculates in rack and is cooled by exchanger in blower case.



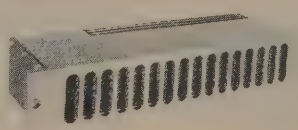
### HEATER—COOLERS

For unheated field installations. Maintains an even 65°F with surrounding air as low as 10°F.



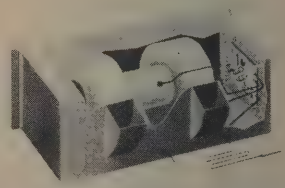
### SIDEWINDER BLOWERS

More air. More pressure. Less space. Delivers 180, 350 or 515 CFM in a 17" wide airstream.



### SLOT BLOWERS

Ideal for jam-packed circuitry. Delivers 150 CFM from a 3½" panel. Quiet.



### SOLID STATE TEMPERATURE CONTROLLERS

Cuts noise level. Modulates blower speed. Keeps operating between 80-90°F. Costs less than air conditioning.

*Also a broad line of accessory equipment including grilles, controls, etc.*

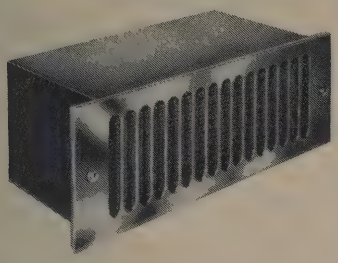
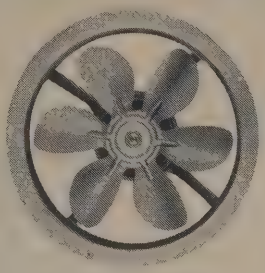
# FANS—Venturi, Orifice, Panel, Reversible



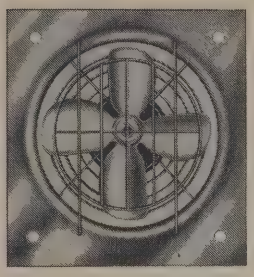
## PACKAGED PROPELLER FANS

McLean Packaged Propeller Fans are for applications where static pressure requirements are low and where low cost is a consideration. Three models available in 5¼", 7", and 8¾" panel heights. Units operate at 115V/50 Hz. Life-lubricated bearings. Permanent washable filter supplied as standard equipment.



## ORIFICE-MOUNTED

**SERIES 1NB65-80** Push or pull airflow. 275,300, or 395 cfm. Dimensions 4" x 8½" or 4¾" x 10¼". Strong, light axial flow aluminum for maximum pressure. Mounts top, bottom, or side. Quiet, vibrationless. 115 volts, 50/60 Hz, 1600 rpm or 3000 rpm.



## PANEL-MOUNTED

**SERIES 1PB65** Low cost, long life, ready-to-mount, shaft in any position: Easy to install. Propeller side and motor side protected with heavy wire guards. 280 cfm, 3100 rpm, 70 watt, 115 volt, 50/60 Hz, permanent lube. 10" square panel on 9" centers, 4$^{23}/_{32}$" deep.

## REVERSIBLE FILTER BOX PROPELLER FANS

Mechanically reversible. Wide range of airflows. Flexible mounting. Efficient, versatile, compact.

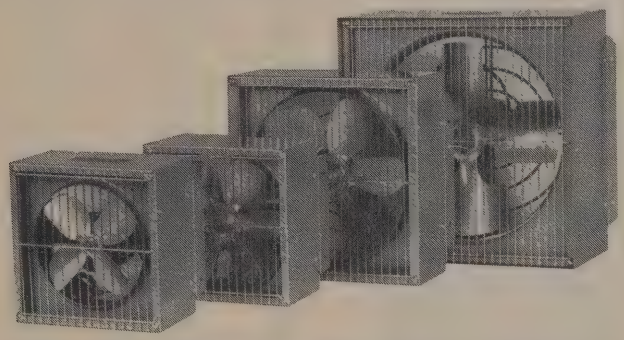
**Model 1RB65** delivers 275 cfm, 3100 rpm 4½" deep x 8⅞" square

**Model 1RB80** delivers 450 cfm, 1650 rpm 4½" deep x 8⅞" square

**Model 1RB100** delivers 725 cfm, 1600 rpm 4½" deep x 12⅛" square

**Model 1RB120** delivers 1200 cfm, 1450 rpm 4½" deep x 15⅛" square

**Model LA120** Back Draft Damper is used in conjunction with Model 1RB120. Louvers automatically open when power is applied and close when power is off. May be used in horizontal or vertical positions.



MODEL 1RB65 MODEL 1RB80 MODEL 1RB100 MODEL 1RB120

# SOLID STATE COOLING WITH THERMOELECTRICS

## THERMOELECTRIC (PELTIER) HEAT PUMP MODULE SPECIFICATIONS

Thermocouples constructed of N & P elements of highest grade bismuth telluride in form of oriented polycrystalline ingots. Ingot ends soldered to copper bus bars interfaced with ceramic plates, affording good mechanical integrity, high dielectric strength and thermal conduction. Ceramic faces lapped flat (designated Type L) for mechanical interfacing (compression) with heat exchangers. Solderable hot face available on special order, specify Type TL. Temperature Range, −150°C to +110°C. Solid state construction.

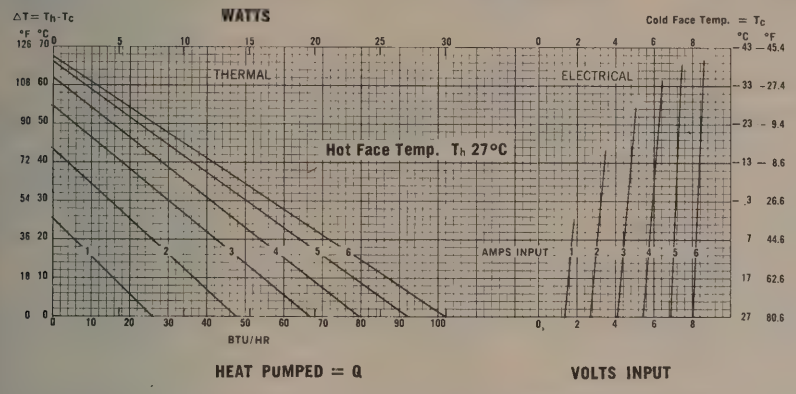
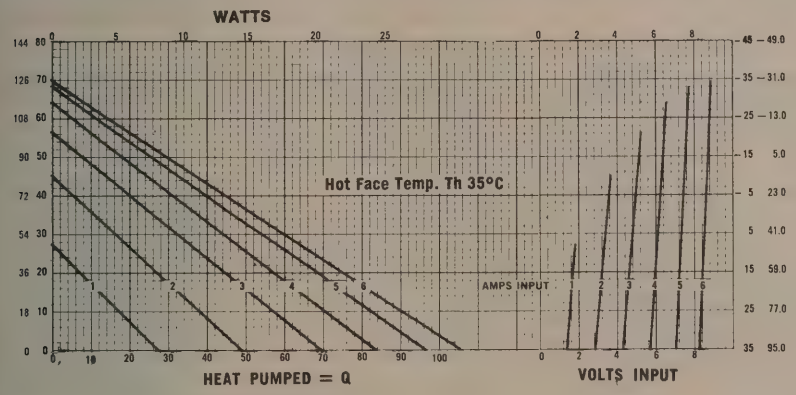
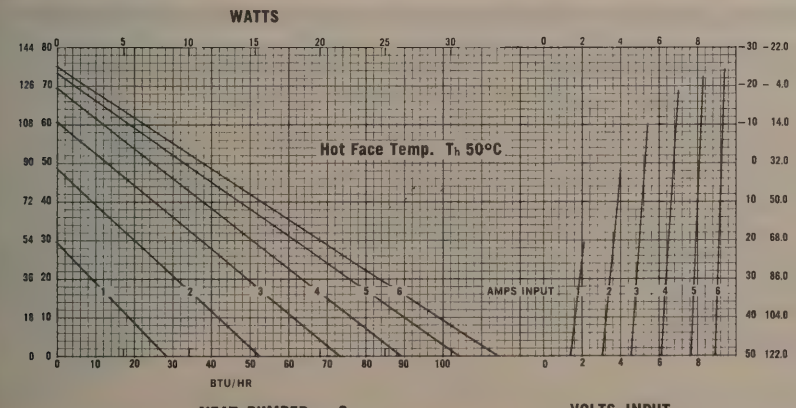
## MODULE PERFORMANCE CHARTS

### HOW TO USE PERFORMANCE CHARTS

1. CP1.4-71-06L — Use charts below. Interpolate for values of Th between 27°C to 35°C, and 35°C to 50°C. Extrapolate for values below 27°C or above 50°C (limits −10°C to +80°C) using linear (straight line) relationship.
2. Conversion To Other Full Modules — Convert I, Q, and V values from CP1.4-71-06L charts using parameter multipliers tabulated at right. Tc, Th and △T values apply universally to all modules.
3. Conversion To Partial (Fractional) Modules — Follow Step #2. Next, convert from full to partial module by applying Q and V multiplier listed in Module Specifications Tables, shown on opposite page. Example: See partial module number CP1.4-35-06L listed in Module Specification Table, also listed in Parameter Multipliers Table): Q and V MULTIPLIER = 35 thermocouples ÷ 71 thermocouples = 0.49 ≈ ½.







| MODULE NUMBER | MODULE TYPE | PARAMETER MULTIPLIERS (BASED ON CP 1.4-71-06L Graphs) I AMPS | Q WATTS | V VOLTS |

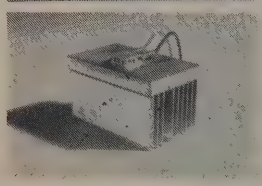
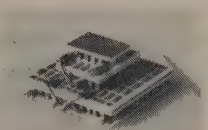
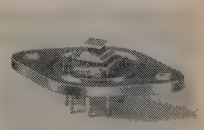
## SPECIAL HEAT PUMP ASSEMBLIES







Special assemblies are available in O.E.M. quantities, designed to customer requirements, using heat exchangers furnished by customer or by Melcor. Multi-stage cascades also available in standard and custom configuration, with temperature differentials to 105°C (4 stage). Beryllia ceramic construction with solder interfacing between stages.

## Pamotor Fans

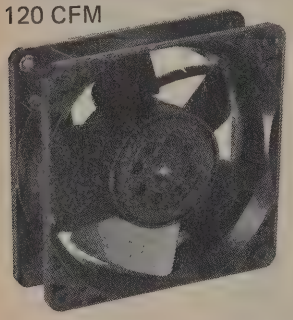
PAMOTOR offers a wide selection of cooling devices each designed to give you a maximum performance at minimum cost. As a result of many years of engineering excellence, PAMOTOR fans have earned a reputation for reliability, high quality and low noise operation. The unique PAMOTOR design, awarded numerous patents, is ounce-for-ounce the best investment for your cooling dollar.

All PAMOTOR fans are warranted to be free of defects in materials and workmanship for a period of one year. The PAMOTOR PENTAFLOW ™ premium grade series are warranted for five years.

Every model in the premium PENTAFLOW ™ series incorporates the seven basic points of superiority that are designed into all standard PAMOTOR fans: lightweight, durable all-metal construction .... high reliability .... low noise level .... low operation temperature .... optimized shape factor .... minimum electromagnetic field .... low true cost.

## 4600XP Pentaflow™ Premium Fan

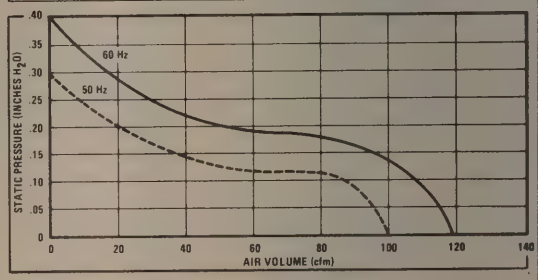
120 CFM



**Size:** 4½" Square x 1½" Deep
**Advantages:** Extra high airflow at maximum back pressure.
**Construction:** All-metal, shaded-pole motor, terminal block.
**Life:** 100,000 hours continuous at 25° C without maintenance.
**Max. Operating Temp.:** +55° C.
**Safety Codes:** UL recognized, Yellow Card E41168. CSA certified. Also conforms to IEC and VDE standards.

Fan accessories are available.

| Model Number | Sintered Iron Sleeve | Ball Bearing | Voltage (ac) | Frequency (Hz) | Input Power | Airflow (cfm) | Speed (rpm) | Weight (ounces) | Noise Level dB (A) | Noise Level dB (SIL) |
|---|---|---|---|---|---|---|---|---|---|---|
| 4600XP | X | | 115 | 50/60 | 18 W | 120 | 3100 | 18 | 46 | 34 |



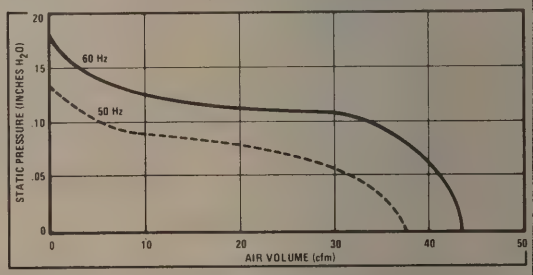
## 8500P Pentaflow™ Premium Fan

43 CFM

**Size:** 3-1/8" Square x 1½" Deep
**Advantages:** Compact high airflow, low noise.
**Construction:** All-metal, shaded-pole motor, 12" leads.
**Life:** 100,000 hours continuous at 25° C without maintenance.
**Max. Operating Temp.:** +55° C.
**Safety Codes:** UL recognized, Yellow Card E41168. CSA certified. Also conforms to IEC and VDE standards.

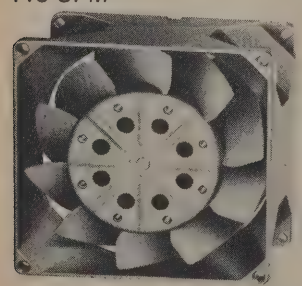
Fan accessories are available.

| Model Number | Sintered Iron Sleeve | Ball Bearing | Voltage (ac) | Frequency (Hz) | Input Power | Airflow (cfm) | Speed (rpm) | Weight (ounces) | Noise Level dB (A) | Noise Level dB (SIL) |
|---|---|---|---|---|---|---|---|---|---|---|
| 8500P | X | | 115 | 50/60 | 13 W | 43 | 3200 | 18 | 38 | 22.3 |



## 2500S Series Shaded Pole Fans

115 CFM



**Size:** 4½" Square x 2" Deep
**Advantages:** Powerful, concentrated air stream, high cooling capacity.
**Construction:** All-metal, shaded-pole motor, 12" leads.
**Life:** 100,000 hours continuous at 25° C without maintenance.
**Max. Operating Temp.:** +55° C.
**Safety Codes:** UL recognized, Yellow Card E41168. CSA certified. Also conforms to IEC and VDE standards.

Fan accessories are available.

| Model Number | Sintered Iron Sleeve | Ball Bearing | Voltage (ac) | Frequency (Hz) | Input Power | Airflow (cfm) | Speed (rpm) | Weight (ounces) | Noise Level dB (A) | Noise Level dB (SIL) |
|---|---|---|---|---|---|---|---|---|---|---|
| 2500S | X | | 115 | 50/60 | 27 W | 115 | 3300 | 32 | 53 | 37.5 |
| 2550S | X | | 230 | 50/60 | 27 W | 115 | 3300 | 32 | 53 | 37.5 |

## 4800X Series Shaded Pole Fans

70 CFM

**Size:** 4½" Square x 1½" Deep
**Advantages:** The quietest of fans in this size.
**Construction:** All-metal, shaded-pole motor, terminal block.
**Life:** 100,000 hours continuous at 25° C without maintenance.
**Max. Operating Temp.:** +55° C.
**Safety Codes:** UL recognized, Yellow Card E41168. CSA certified and VDE approved. Also conforms to IEC standards.

Fan accessories are available.

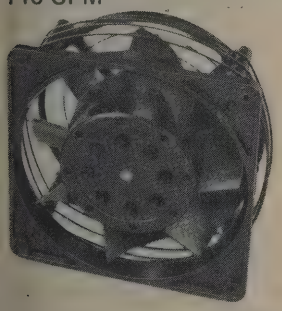
## 5500S Series Shaded Pole Fans

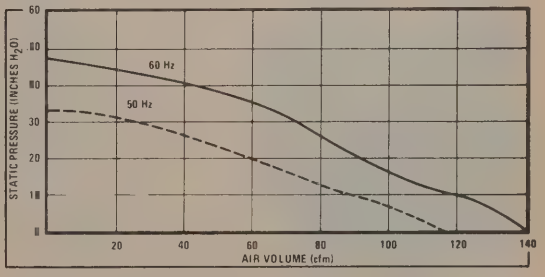
140 CFM



**Size:** 4½" Square x 2" Deep
**Advantages:** Axial and radial air entry for use in high density cooling applications, built-in finger guard.
**Construction:** All-metal, shaded-pole motor, 12" leads.
**Life:** 100,000 hours continuous at 25° C without maintenance.
**Max. Operating Temp.:** +55° C.
**Safety Codes:** UL recognized, Yellow Card E41168. CSA certified. Also conforms to IEC and VDE standards.

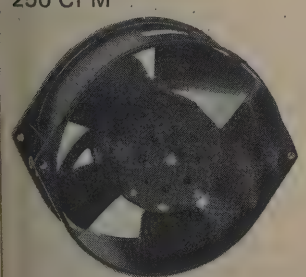
Fan accessories are available.

| Model Number | Sintered Iron Sleeve | Ball Bearing | Voltage (ac) | Frequency (Hz) | Input Power | Airflow (cfm) | Speed (rpm) | Weight (ounces) | Noise Level dB (A) | Noise Level dB (SIL) |
|---|---|---|---|---|---|---|---|---|---|---|
| 5500S | X | | 115 | 50/60 | 40 W | 140 | 3300 | 35 | 50 | 37 |
| 5550S | X | | 230 | 50/60 | 38 W | 140 | 3300 | 35 | 50 | 37 |



## 7600S Series Shaded Pole Fans

250 CFM



**Size:** 6" Diameter x 2" Deep
**Advantages:** High airflow, excellent back pressures.
**Construction:** All-metal, shaded-pole motor, 12" leads.
**Life:** 100,000 hours continuous at 25° C without maintenance.
**Max. Operating Temp.:** +55° C (*+85° C).
**Safety Codes:** UL recognized, Yellow Card E41168. CSA certified. Also conforms to IEC and VDE standards.

Fan accessories are available.

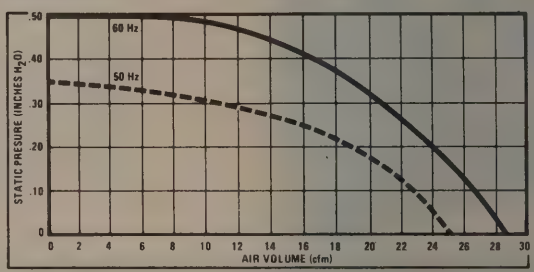
| RL90-18/50 | X | | 230 | 50/60 | 19 W | 29 | 2600 | 23 | 57 | 42.7 |



The PAMOTOR solid state brushless DC Fans have been engineered to tackle those specialized applications which require highly reliable DC performance. Especially efficient, they out-perform similar sized fans at normal operating back pressure and offer greater air volume (CFM) as well as reduced noise levels and power drain. (The power drain at maximum back pressure is approximately 20% of that required in conventional AC units.) These fans also achieve a new low in magnetic radiation and RF noise, thereby assuring the pure signals necessary for critical airborne and shipboard use.

These fans do not require an external voltage inverter. This means that you save valuable mounting space and weight because the only consideration in mounting is the fan itself.

The brushless DC motor is polarity protected to avoid accidental damage and costly down time.

Available voltage ranges include: 9.5 to 14 VDC (12 VDC nominal); 19 to 28 VDC (24 VDC nominal); and 38 to 56 VDC (48 VDC nominal).

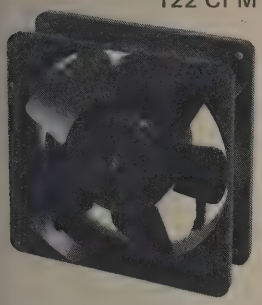
## Model 4112X DC Fan

122 CFM (variable)



**Size:** 4½" Square x 1½" Deep
**Advantages:** Solid state integral electronics, no external inverter required, low input power, high variable airflow, locked rotor and polarity protected.
**Construction:** All-metal, brushless electronic motor, terminal block.
**Life:** 100,000 hours continuous at 25° C without maintenance.
**Max. Operating Temp.:** +80° C.
**Safety Codes:** Conforms to UL, CSA, IEC and VDE standards.

Fan accessories are available.

Patent No. 3-873-897

## Models 8112 & 8124 DC Fans

41 CFM (variable)

**Size:** 3-1/8" Square x 1½" Deep
**Advantages:** Solid state integral electronics, no external inverter required, low input power, high variable airflow, locked rotor and polarity protected.
**Construction:** All-metal brushless electronic motor, 12" leads.
**Life:** 100,000 hours continuous at 25° C without maintenance.
**Max. Operating Temp.:** +80° C.
**Safety Codes, Model 8112:** Conforms to UL, CSA, IEC and VDE standards. **Model 8124:** UL recognized, Yellow Card E41168. Also conforms to CSA, IEC and VDE standards.

Fan accessories are available.

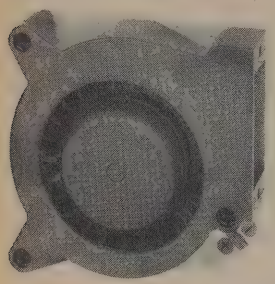
## RL90-18/24 DC Radial Blower

31 CFM (variable)



**Size:** 4-3/4" Square x 1½" Deep
**Advantages:** Solid state integral electronics, no external inverter required, low input power, high concentrated variable airflow, locked rotor and polarity protected.
**Construction:** Makrolon housing, ultramid wheel, brushless electronic motor, 12" leads.
**Life:** 100,000 hours continuous at 25° C without maintenance.
**Max. Operating Temp.:** +80° C.
**Safety Codes:** UL recognized, Yellow Card E41168. Also conforms to CSA, IEC and VDE standards.

Patent No. 3-873-897

## Model 900 Induction Fan

34 CFM (variable)

**Size:** 3-1/8" Diameter x 1½" Deep
**Advantages:** Ultra compact - little mounting space required, very quiet, variable airflow, extremely low stray field, axial and radial air entry.
**Construction:** Special polyamid, induction motor, 6" leads.
**Life:** 100,000 hours continuous at 25° C without maintenance.
**Max. Operating Temp.:** +55° C.
**Safety Codes:** UL recognized, Yellow Card E41168. Also conforms to CSA, IEC and VDE standards.
**Capacitor Required:** 5.6 mfd.

| Model Number | Sintered Iron Sleeve | Ball Bearing | Voltage (ac) | Frequency (Hz) | Input Power | Airflow (cfm) | Speed (rpm) | Weight (ounces) | Noise Level dB (A) | Noise Level dB (SIL) |

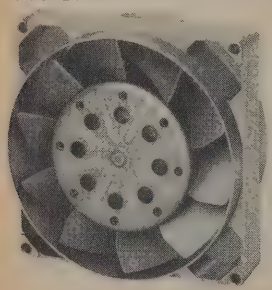
## Model 1300 Induction Fan

120 CFM



**Size:** 4½" Square x 2" Deep
**Advantages:** Compact, stable airflow and back pressures, ideal for tube mounting.
**Construction:** All-metal, induction motor, 3" leads.
**Life:** 100,000 hours continuous at 25° C without maintenance.
**Max. Operating Temp.:** +55° C.
**Safety Codes:** Conforms to UL, CSA, IEC and VDE standards.
**Capacitor Required:** 2 mfd.

Fan accessories are available.

| Model Number | Sintered Iron Sleeve | Ball Bearing | Voltage (ac) | Frequency (Hz) | Input Power | Airflow (cfm) | Speed (rpm) | Weight (ounces) | Noise Level dB (A) | Noise Level dB (SIL) |

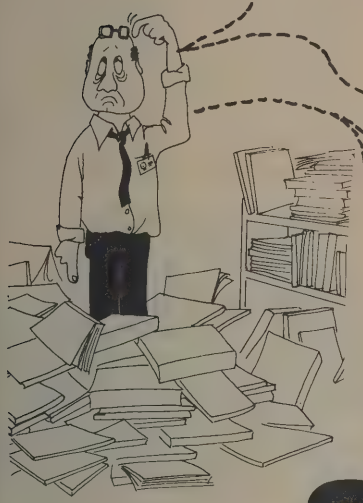
***What can I use to keep all the manufacturers' product data I receive in order?***

***What system makes filing or retrieving manufacturers' catalogs fast and easy?***



***Which file system have thousands of engineers purchased because they know it works?***

# eem FILE SYSTEM

## THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

**Here's how to order your eem FILE SYSTEM:**

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

## Muffin® Fan

**The dependable, low cost, largest selling fan for commercial cooling applications.**

- 105 cfm (49.6 L/Sec) free air delivery
- 4.71″ sq. x 1.50″ depth (119.6 mm x 38.1 mm)
- weight: 17.2 oz. (0.49 kg)
- acoustical rating as low as NC-43
- more than 10 years continuous duty at 20°C
- impedance protected
- for ambients to 70°C
- UL yellow card recognized and CSA certified

Catalog Sheet COM 040

## Whisper® Fan

**The quiet one-for efficient cooling where low acoustical disturbance is a must.**

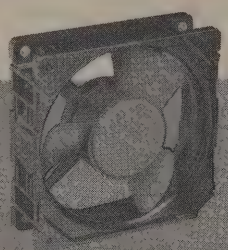
- 52 to 75 cfm (24.5 to 35.4 L/Sec) free air delivery
- 4.71″ sq. x 1.50″ depth (119.6 mm x 38.1 mm)
- weight: 17.2 oz. (0.49 kg)
- acoustical rating as low as NC-26
- 10 years continuous duty at 20°C
- impedance protected
- for ambients to 70°C
- UL yellow card recognized and CSA certified

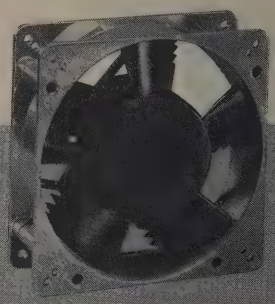
Catalog Sheet COM 050

## Mohawk™ Fan

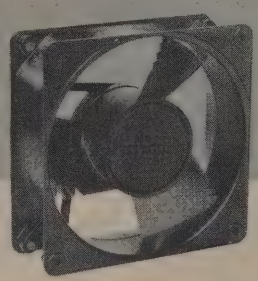
**Highest air flow, quietest performance for 5¼″ (133.3 mm) rack mounted equipment.**

- 127 cfm (59.9 L/Sec)
- 5.06″ sq. x 1.53″ depth (128.5 mm x 38.8 mm)
- weight: 22 oz. (0.73 kg)
- all metal housing
- exclusive Feathered Edge™ blade for low noise level operation, as low as NC-45
- slow speed 100 cfm (47.2 L/Sec) model for noise levels as low as NC-42
- noise attenuator accessory provides even further noise reduction of 5 dB
- impedance protected
- for ambients to 70°C
- UL component recognition and CSA certification applied for





FOR COMMERCIAL APPLICATIONS



### Commercial Products Safety Agency Acceptances

1. UL component recognition file no. E 31293
2. CSA Certification file no. LR 20495
3. Plug & Cord accessories listed under UL file no. E 42397
4. All models 100% tested to meet 1500 VAC dielectric strength for one minute (production line equivalent 1800 VAC for 1 second)

## Muffin® XL Fan

**Sturdy one-piece metal venturi provides popular mounting and terminal configurations of Centaur fan. High performance and low noise level, with Muffin reliability.**

- 115 cfm (54.3 L/Sec) free air delivery
- 4.69″ sq. x 1.54″ depth (119.1 mm x 39.1 mm)
- weight: 21 oz. (0.61 kg.)
- convenient ground lug bosses
- Feathered Edge™ airfoil blades for quietest operation
- available in two flow directions, air over struts or air over blades first
- impedance protected
- for ambients to 70°C
- UL yellow card recognized

Catalog Sheet COM 043

# Rotron Fans and Blowers

ROTRON INC. Woodstock, N. Y. 12498 ☐ 914 • 679-2401 ☐ TWX 510-247-9033

## Lyric® Fan

**Thinness and low noise level are features that make this small fan the ideal choice for computer terminals.**

- 31 cfm (14.63 L/Sec) free air delivery
- 3.14″ sq. x 1.38″ depth (79.75 mm x 35.05 mm)
- weight: 15 oz. (0.43 kg)
- rugged die cast zinc housing
- acoustical rating as low as NC-35
- leadwire and terminal models
- impedance protected
- for ambients to 70°C
- UL yellow card recognized

## Sprite® Fan

**A smaller size fan that delivers relatively high pressures at close-to-maximum air delivery.**

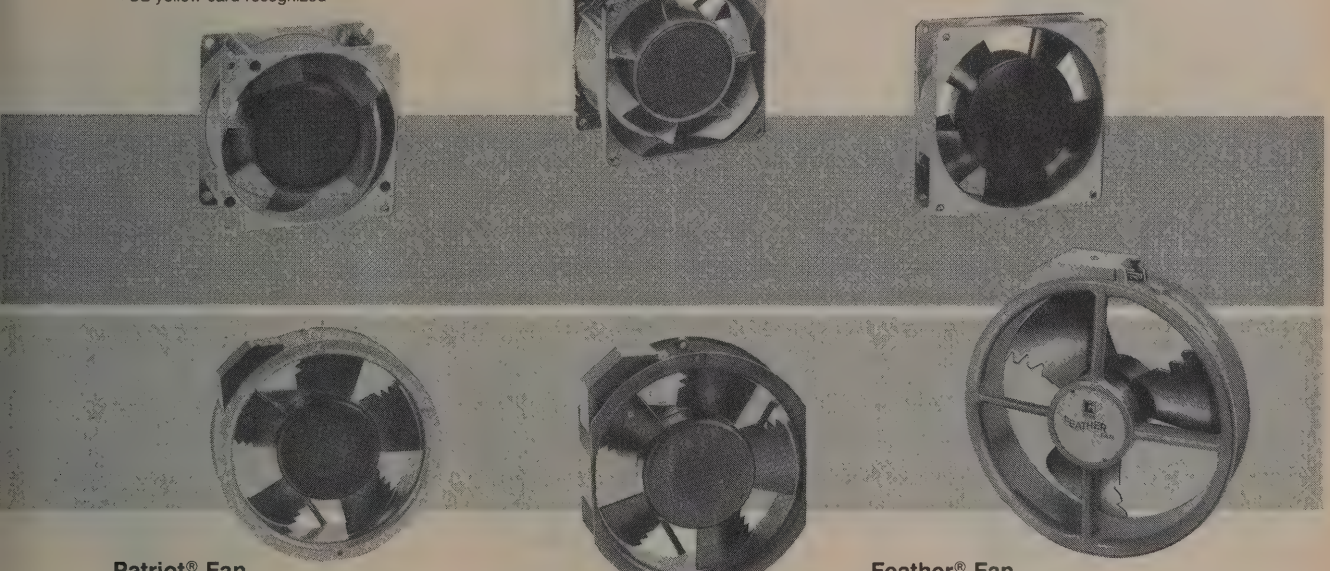
- 35 cfm (16.5 L/Sec) free air delivery
- 3.14″ sq. x 1.64″ depth (79.2 mm x 41.7 mm)
- weight: 18 oz. (.51 kg)
- famous Muffin motor reliability
- acoustical rating as low as NC-28
- rugged die-cast zinc housing
- impedance protected
- for ambients to 70°C
- UL yellow card recognized and CSA certified
- Lead wire and terminal models

Catalog Sheet COM 030

## Wafer Fan

**1″ (25.4 mm) thickness and low noise level for cooling applications in tight spots in equipment used near operators.**

- 37 cfm (17.5 L/Sec) free air delivery
- 3.63″ sq. x 1″ depth (92.2 mm x 25.4 mm)
- weight: 10 oz. (0.28 kg)
- acoustical rating as low as NC-41
- one-piece die-cast zinc housing
- impedance protected
- for ambients to 55°C
- UL yellow card recognized



## Patriot® Fan

**Quiet high pressure performance in a compact rugged fan.**

- 240 cfm (113.3 L/Sec) free air delivery
- 6.75″ dia. x 2″ depth (171.5 mm x 50.8 mm)
- weight: 1.84 lbs. (0.84 kg)
- acoustical rating as low as NC-47
- one-piece die-cast aluminum housing
- long life ball bearings
- permanent split capacitor motor, capacitor provided
- for ambients to 70°C
- UL yellow card recognized

Catalog Sheet COM 083

## Major® Fan

**For low cost, low noise, high pressure/volume cooling in the tightest of spaces.**

- 240 cfm (113.3 L/Sec) free air delivery
- 6.75″ x 5.92″ x 2.00″ depth (171.5 mm x 150.4 mm x 50.8 mm)
- weight: 1.84 lbs. (0.84 kg)
- acoustical rating as low as NC-53
- one-piece die-cast aluminum housing
- long life ball bearings
- thermally protected
- for ambients to 70°C
- permanent split capacitor motor, capacitor provided
- UL yellow card recognized

Catalog Sheet COM 080

## Feather® Fan

**High volume air performance where space is severely limited, particularly in depth.**

- 270 cfm (127.4 L/Sec) free air delivery
- 7″ dia. x 2.47″ depth (177.8 mm x 62.7 mm)
- weight: 1.5 lbs. (0.68 kg)
- exclusive new Feathered Edge™ blade is extra quiet at free delivery, NC-48
- permanently lubricated ball bearings
- permanent split capacitor motor, capacitor provided
- for ambients to 65°C
- UL yellow card recognized

Catalog Sheet COM 090

ROTRON INCORPORATED

**ROTRON INC.** Woodstock, N. Y. 12498 ☐ 914 • 679-2401 ☐ TWX 510-247-9033

## Scout™ Fan

**Versatile, compact line of fans for applications demanding packaging in the tightest spots. Available with 3 impeller options, for use with customer designed air passages.**

- 25 to 105 (11.8 to 49.6 L/Sec) free air delivery
- 1.6″ (40.64 mm) depth, impeller dia. 2.93″ to 4.19″ (74.42 to 106.4 mm)
- weight: 12 oz. (0.34 kg)
- acoustical rating dependent on application, maximum NC-45
- famous Muffin motor reliability
- impedance protected
- for ambients to 70°C
- UL yellow card recognized

## Biscuit® Blower

**The only air moving device that fits inside a 1¾″ rack panel mounted instrument.**

- 25 cfm (11.8 L/Sec) free air delivery
- high pressure capability
- built around famous Muffin fan features
- 4.75″ sq. x 1.56″ depth (120.65 mm x 39.7 mm)
- weight: 19 oz. (.54 kg)
- acoustical rating as low as NC-42
- for ambients to 70°C
- UL yellow card recognized

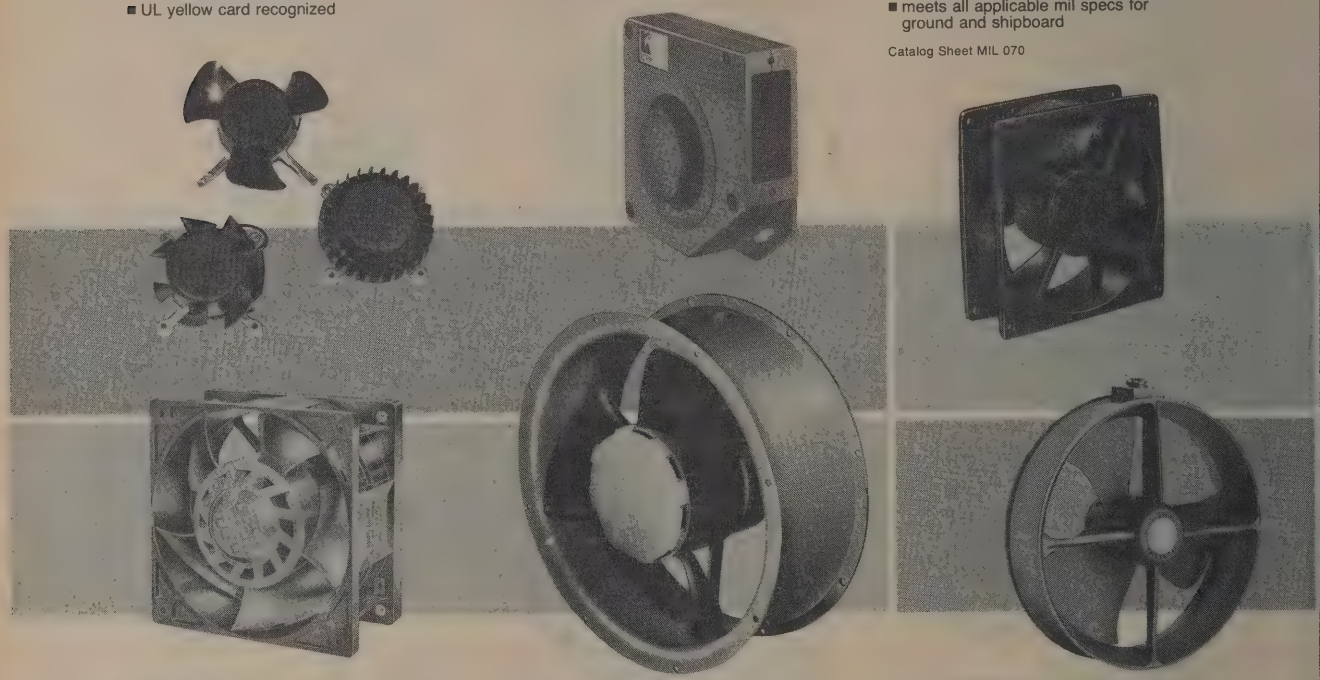
Catalog Sheet COM 130

## Spartan Fan

**The MIL SPEC version of the famous Muffin.**

- 113 cfm (53.3 L/Sec) free air delivery. 132 cfm (62.30 L/Sec) for 400 Hz model
- unusually high pressure characteristics (up to 6.85″ [174 mm] $H_2O$)
- dimensionally interchangeable with the Muffin fan (4.71″ sq. x 1.50″ [119.6 mm x 38 1 mm])
- double shielded stainless steel ball bearings
- lubricated for life
- highly efficient multi-slot motor
- withstands ambients from −60°F (−54°C) to +212°F (+100°C)
- venturi, spiders, and hub are single aluminum casting for shock and vibration resistance
- meets all applicable mil specs for ground and shipboard

Catalog Sheet MIL 070



## Tarzan® Fan

**High air volume and pressure combined, for tightly packed cabinets and chassis.**

- 340 cfm (160.5 L/Sec) free air delivery
- 6.91″ sq. x 4.34″ depth (175.5 mm x 110.2 mm)
- weight: 5 lbs. (2.26 kg)
- acoustical rating as low as NC-57
- ball bearing thermally protected motor
- for ambients to 55°C
- centrifugal blower performance in a compact axial flow fan
- UL yellow card recognized and CSA certified

Catalog Sheet COM 120

## Caravel® Fan

**Maximum air volume, from a narrow fan, for flushing large racks and cabinets.**

- 590 cfm (278.5 L/Sec) free air delivery
- 10″ dia. x 3.5″ depth (254 mm x 88.9 mm)
- weight: 4.4 lbs. (1.99 kg)
- ball bearing thermally protected slow speed motor
- exclusive new Feathered Edge™ (pat. pend.) blade for low noise level operation
- acoustical rating as low as NC-45
- for ambients to 60°C
- UL yellow card recognized and CSA certified

Catalog Sheet COM 110

## Saucer® Fan

**High volume and high pressure both, from a minimum of fan space.**

- 275 cfm (129.8 L/Sec) free air delivery
- generates pressures up to .5″ (12.7 mm) $H_2O$
- driving motor entirely within hub for minimum depth 2.50″ (63.5 mm), dia. 7″ (177.8 mm)
- pre-lubricated stainless steel ball bearings
- for ambients from −60°F (−54°C) to +257°F (+125°C)
- clamping rings at venturi ends for easy mounting
- meets all applicable military specifications

Catalog Sheet MIL 080

# Rotron Fans and Blowers

ROTRON INC. Woodstock, N. Y. 12498 ☐ 914 • 679-2401 ☐ TWX 510-247-9033

## Aximax® 1, 2 & 3

**Family of miniature, high performance air movers for airborne and other critical space/weight/performance applications.**

- free air delivery from 11 cfm to 157 cfm (5.2 to 74.1 L/Sec)
- optional Altivar® motors automatically increase speed with altitude
- life expectancies from 10,000 hours at 72°C, at 22,000 RPM
- withstands ambients up to 257°F (125°C)
- sizes: 1½″ x 1½″ (38.1 mm x 38.1 mm), 2″ x 1½″ (50.8 mm x 38.1 mm), and 3″ x 2⅝″ (76.2 mm x 58.7 mm)
- weight: 4 oz. (113 grams), 4-1/2 oz. (128 grams) and 14 oz. (.4 kg) respectively
- meet all applicable military specifications

Models for 115 VAC, 1 phase, 400 Hz; 200 VAC, 3 phase, 400 Hz; and 115 VAC, 1 phase, 60 Hz

Catalog Sheets MIL 020, 030, 040

## Propimax® 2, 3 & 3B

**Large-volume and high pressure air movers for airborne equipment.**

- free air delivery from 22 to 225 cfm (10.3 to 106.2 L/Sec)
- offer pressures as high as 7″ (177.8 mm) $H_2O$ at cut-off
- optional Altivar® motors automatically increase speed with altitude
- life expectancies of 10,000 hours at 72°C, at 22,000 RPM
- withstand ambients up to 257°F (125°C)
- size/weight: 3¼″ x 1½″ (82.5 mm x 38.1 mm) and 6.5 oz (184.3 g) for Propimax 2, 3¾″ x 2″ (95.3 mm x 50.8 mm) and 15.2 oz. (431 g) for Propimax 3 & 3B
- meet all applicable military specifications

Models for 115 VAC, 1 phase, 400 Hz; 200 VAC, 3 phase, 400 Hz; 115 VAC, 1 phase, 60 Hz

Catalog Sheets MIL 050, 060

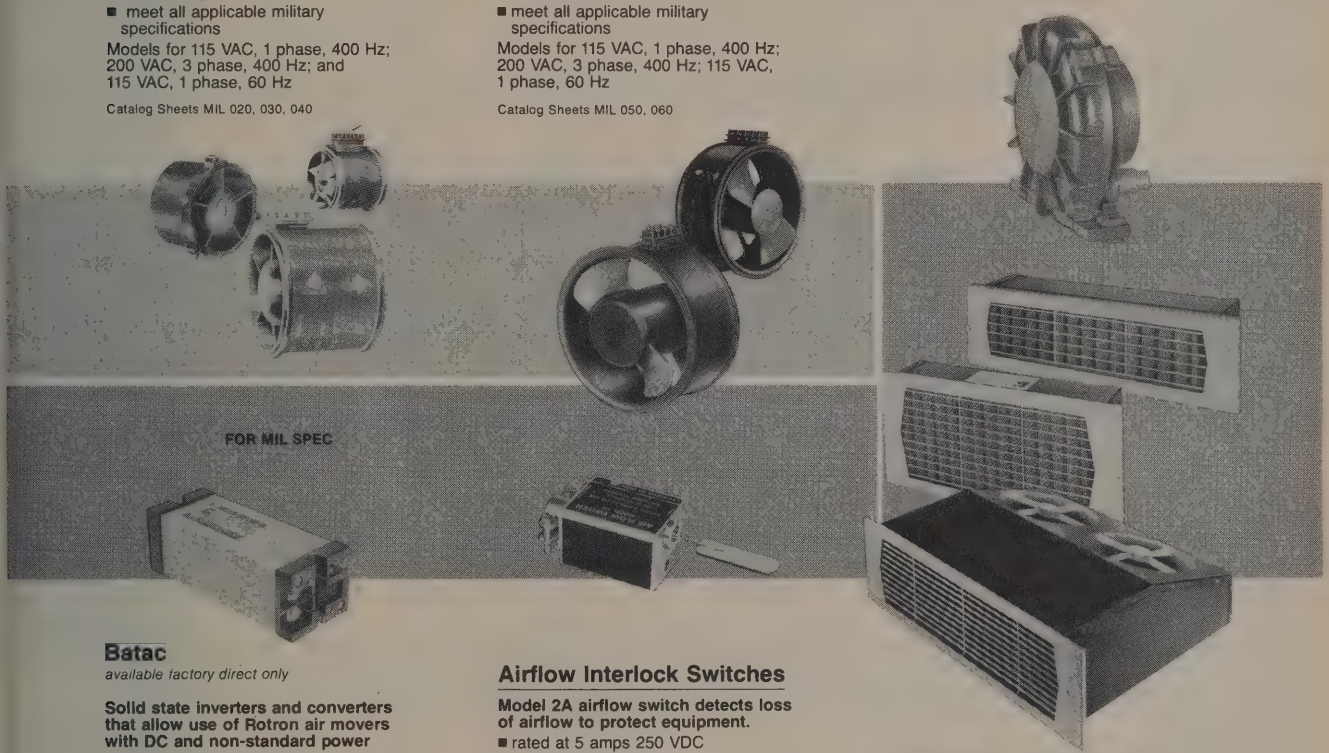
## Mini-Spiral

*available factory direct only*

**A compact, high pressure, low flow air mover**

- pressure/suction over 3 inches of $H_2O$
- up to 3.8 cfm (1.8 L/Sec) free air delivery
- 4.15″ dia. x 1.81″ depth (105.4 mm x 45.7 mm)
- weight: 17 oz. (0.47 kg)
- acoustical rating as low as NC-39
- impedance protected
- long life ball bearings
- minimal power consumption (10 watts)
- two pole, shaded pole motor
- UL yellow card recognized

Catalog Sheet COM 140



## Batac

*available factory direct only*

**Solid state inverters and converters that allow use of Rotron air movers with DC and non-standard power sources.**

- enclosed in solder sealed or resin-filled cases
- compact sizes: from 1.29″ x .97″ x 1.09″ (32.7 mm x 24.6 mm x 27.68 mm) to 2½″ x 3½″ x 5⅛″ (63.5 mm x 88.9 mm x 128.58 mm)
- for ambients −40°C to +71°C
- allows Rotron fan reliability from DC power sources
- available with protection for accidental reversal of input voltage
- every design tailored to a specific fan load

## Airflow Interlock Switches

**Model 2A airflow switch detects loss of airflow to protect equipment.**

- rated at 5 amps 250 VDC
- SPDT actuation
- interchangeable vanes available for sensitivity ranges
- mounts to round or flat duct with single screw

Determinator Kit available with complete set of 8 vanes and model 2A switch in plastic box

Catalog Sheet MIS 010

## Modulair® Cabinet Blowers

**Special air moving packages incorporate proven Rotron fans and blowers to maximize airflow and simplify installation.**

- fit standard 19″ (483 mm) relay racks and cabinets
- incorporate washable filters, and grilles for attractive appearance.

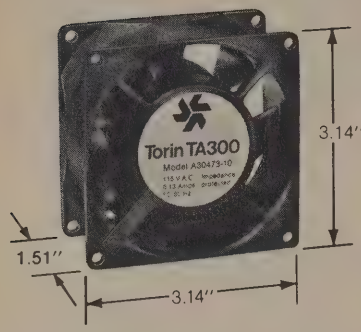
## TA300

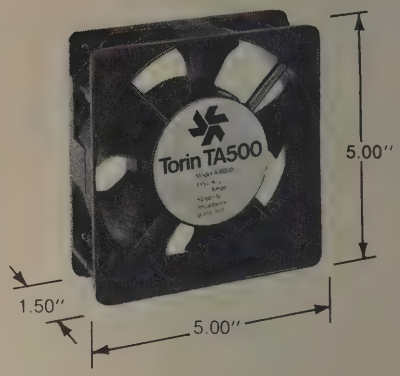


TA300 offers strong performance with lower noise levels and less power input than other fans of a comparable size. A specially designed motor and improved aerodynamics of the impeller combine to make this a most efficient package. Air delivery 36 CFM at 0″ SP. Available with 115 or 230 volt motor, 50/60 Hz.

## TA450

Available in two versions, a standard high performance series, and an "S" series featuring low sound, as low as PSIL 32. Performance makes this fan a natural for a wide range of applications. Air delivery 105 CFM at 0″ SP. Available with 115 or 230 volt motors, 50/60 Hz.

## TA500



TA500 delivers up to 20% more air than 4½″ units, at a lower sound level, down to PSIL 40, yet it is completely interchangeable with matching mounting holes with any 4½″ unit. Air delivery 130 CFM at 0″ SP. Available with 115 or 230 volt motor, 50/60 Hz.

## Single Centrifugal

Largest selection of any maker. All motors have Class A insulation, ball bearings, thermal overload protection.

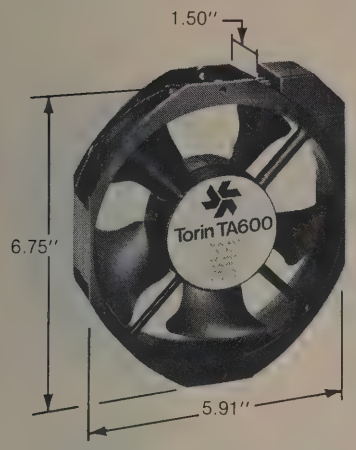
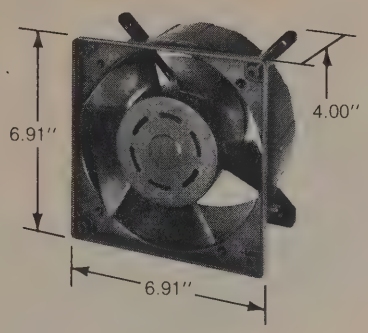
## TA600



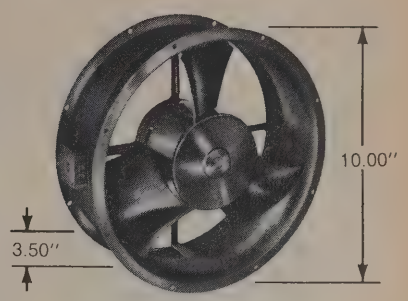
TA600 is only 1½ inches thick, making it the thinnest fan of its size produced in the United States. Its CFM per watt is high relative to other units of these dimensions. Air delivery up to 251 CFM at 0″ SP. Available with 115 or 230 volt motor, 50/60 Hz.

## TA700



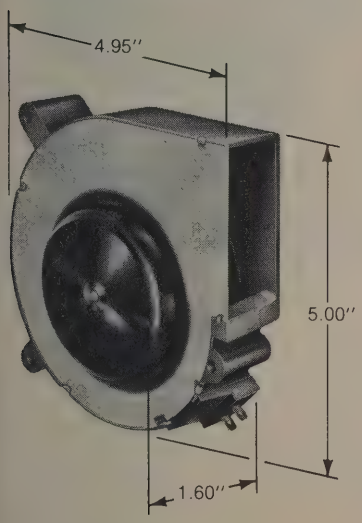
The TA700 is a tube-axial unit developed to produce greater air delivery than any other blower of its size and type. It was designed specifically for applications that demand a large volume of air working against moderate static pressure. It outperforms competitive units in air flow, power consumption and quietness of operation. Air delivery up to 380 CFM at 0″ SP. Available with 115 or 230 volt motor, 50/60 Hz.

## TA1000



TA1000 tube axial has the lowest power and noise for equivalent air delivery of any unit of its type. TA1000 is especially effective in applications where a large volume of air is required, and where moderate system resistance exists. Examples would be cabinet flushing of relay rack and communications packages and printed circuit card chassis in computers. Air delivery up to 530 CFM at 0″ SP. Available with 115 or 230 volt motor, 50/60 Hz.

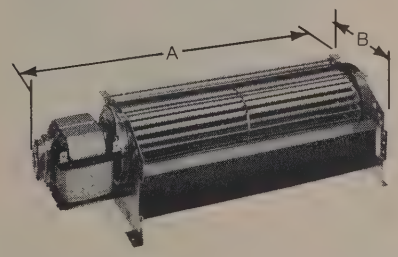
## SC382—Pancake Centrifugal



SC382-29666 features an extremely thin profile, 1⅝″ deep. Its housing is all metal in construction, and the impeller is plastic. The integral motor has proven bearing design presently in use on most sleeve bearing motors.

The SC382 produces high velocity air at good static pressure Air delivery 26 CFM at 0″ SP. 115 volt motor, 50/60 Hz.

## Transverse Flow



Transverse Flow Blowers utilize the entire width of the impeller blades, they take air in across the entire width of impeller and discharge it at that width.

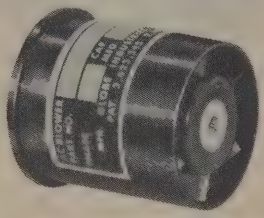
# TRW GLOBE MOTORS

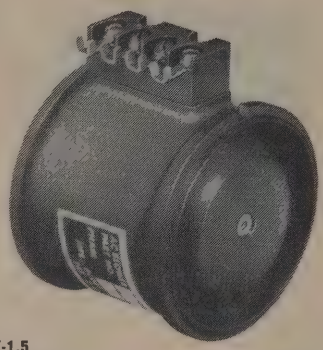
## FANS AND BLOWERS

TRW Globe offers a wide range of a.c. and d.c. fans and blowers for every cooling need. Many standard models are stocked for 48 hour delivery. And because Globe is the largest precision motor source, we can move fast to provide engineered specials in prototype or production quantities. Check your needs below. Hundreds of other units are available.



**VAX-1**

1⅛" VANEAXIAL A.C. or D.C. VAX-1-AC delivers 10 cfm @ .6" $H_2O$. 26 v.a.c., single phase, 400 Hz. 1.5 oz. VAX-1-DC delivers 8.5 cfm @ .5" $H_2O$. 26 v.d.c. 1.4 oz.



**VAX-1.5**

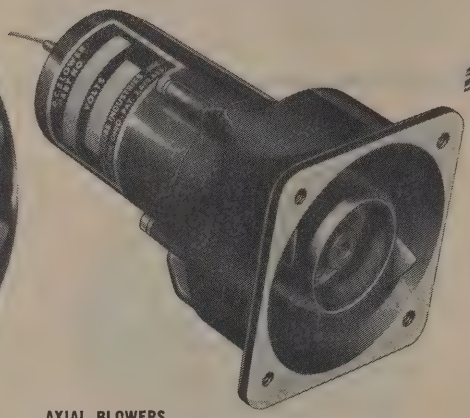
1¾" VANEAXIAL A.C. or D.C. VAX-1.5-AC delivers 12.0 cfm @ 1.9" $H_2O$. 115 v.a.c., single phase, 400 Hz. 4.0 oz. VAX-1.5-DC delivers 15 cfm @ 1.3" $H_2O$. 27 or 50 v.d.c. 5.0 oz.

**VAX-3**

3" VANEAXIAL. Four types A.C. and D.C. deliver 85 to 165 cfm at 0" $H_2O$. 115 and 200 v.a.c.; 12 and 28 v.d.c. 14 to 17 oz.

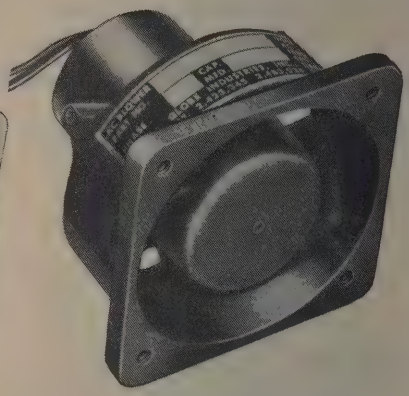
**VAX-4-FC**

4" HIGH ALTITUDE VANEAXIAL A.C. delivers 170 cfm @ 0" $H_2O$, 140 cfm @ 2.1" $H_2O$ at 25,000 ft. or 95 cfm @ 2.5" $H_2O$ at sea level. 200 v.a.c., 3-phase, 400 Hz. 2 lbs.



**AXIAL BLOWERS**

Axial blowers deliver up to 62 cfm free air, available in a.c. or d.c. 27 to 200 v.a.c. 1, 2 or 3-phase, 60 and 400 Hz. 4 to 70 v.d.c. 5 to 9½ oz.



**VARIABLE FREQUENCY FANS & BLOWERS**

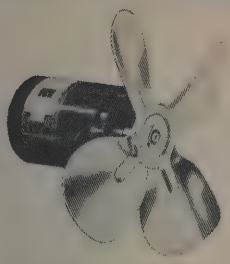
Consist of Type MC or SC variable frequency motors powering a wide range of axial or centrifugal blowers and fans. Max. output 85 cfm @ 0" $H_2O$. 27 to 200 v.a.c., 1, 2 and 3-phase, 320 to 1,200 Hz. 2.7 to 10 oz.

**VAX-4.5-GR**

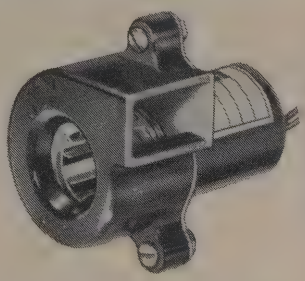
4½" VANEAXIAL A.C./D.C. delivers 315 cfm @ 0" $H_2O$ or 220 cfm @ 1.75" $H_2O$. UNIVERSAL 115 v.a.c., single phase, 60 Hz. or 115 v.d.c. 4½ lbs.

# TRW GLOBE MOTORS

## FANS AND BLOWERS



**OPEN FANS**
Fans deliver up to 195 cfm @ 0″ $H_2O$, a.c., d.c. or a.c./d.c. 4 to 120 v.d.c. 200 v.a.c., 1, 2 or 3-phase, 60 and 400 Hz. 2.3 oz. min.



**CENTRIFUGAL BLOWERS**
1″ to 2½″ RH or LH scroll models, a.c. or d.c., round or rectangular outlet, produce up to 50 cfm free air. 115 to 200 v.a.c., 60 and 400 Hz. D.C. versions 27 v.d.c. 4 to 18 oz.

**PAX-3**
3¼″ PROPAXIAL A.C. delivers 120 cfm @ 0″ $H_2O$ with Type MCS 2 pole motor, and 62 cfm @ 0″ $H_2O$ with Type MCS 4 pole motor. 200 v.a.c., 3-phase, 400 Hz, D.C. versions available.

WRITE FOR CATALOG

## Call/Write for Most Comprehensive L-C Filters Catalog in Industry

Allen Avionics is staffed and organized to provide precision L-C Filters and Delay Lines with fast delivery. Your most difficult engineering problems are solved by our high level engineering staff in conjunction with sophisticated computer programs, enabling rapid filter design determination.

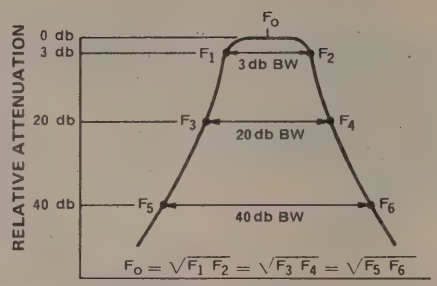
Allen Avionics computer designs are generated for the four basic filter types: Lowpass, Highpass, Bandpass, and Bandstop. These are built-in Butterworth, Tchebycheff, Elliptical, Gaussian, and Bessel functions. All Allen Avionics products are manufactured in the U.S.A.

## BANDPASS

**PROTOTYPES OFTEN DELIVERED IN LESS THAN 3 DAYS**

**Types:** Butterworth, Tchebycheff, and Elliptic Function.
**Frequency Range:** 400 Hz to 30 MHz.
**Impedance Range:** 50 ohms to 10K ohms.
**Construction:** Epoxy encapsulated or sealed in metal can.
Order any center frequency required. Interpolation between frequencies listed below is valid.

| Shape Factor | 20 db BW / 3 db BW | 40 db BW / 3 db BW |
|---|---|---|
| Ao | 3.65 | 7.85 |
| B | 1.60 | 2.50 |
| C | 1.45 | 1.85 |
| E | 1.20 | 1.45 |



1 db MAXIMUM RIPPLE

**SIZE (INCHES)**

**Sealed in Metal Can. Printed Circuit Terminals, End Terminals or Connectors available where applicable:**

M — 3.00 x 1.625 x 1.125
N — 4.00 x 1.500 x 1.250
O — 5.00 x 1.500 x 1.250
P — 6.00 x 1.500 x 1.250
Q — 7.00 x 1.500 x 1.250
NN — 4.00 x 4.000 x 1.250
OO — 5.00 x 4.000 x 1.250

**Encapsulated in Epoxy Container:**

V — 1.75 x 1.750 x .875
W — 2.50 x 1.125 x .750
X — 3.00 x 1.500 x 1.000
Y — 4.00 x 1.500 x 1.125
$Y_1$ — 4.00 x 2.000 x 1.250
Z — 4.50 x 2.500 x 1.375

| Center Frequency (Fo) | Q Range Fo / 3 db BW | Impedance Range (Ohms) | Shape Factor | Insertion Loss | Size |

# CUSTOM-BUILT L-C FILTERS LINEAR PHASE LOWPASS

## LINEAR PHASE LOWPASS FILTERS

**Types:**
Bessel, Gaussian, Equal Phase Ripple and Transitional (Gaussian to 6 db).

**Frequency Range:**
400Hz to 50MHz.

**Impedance Range:**
50 ohms to 20K ohms.

**Low Delay and Phase Distortion in Passband.**

**Very Low Pulse Distortion (Low Overshoot).**

**Construction:**
Epoxy encapsulated or sealed in metal can.

## DELIVERY: PROTOTYPES CAN OFTEN BE DELIVERED IN LESS THAN 3 DAYS

**The lowpass filters listed below are typical units that we build. We do manufacture linear phase lowpass filters with any cut-off frequency between 1KHz and 50MHz.**

## SIZE (INCHES)

**Sealed in Metal Can. Printed Circuit Terminals, End Terminals or Connectors available where applicable:**

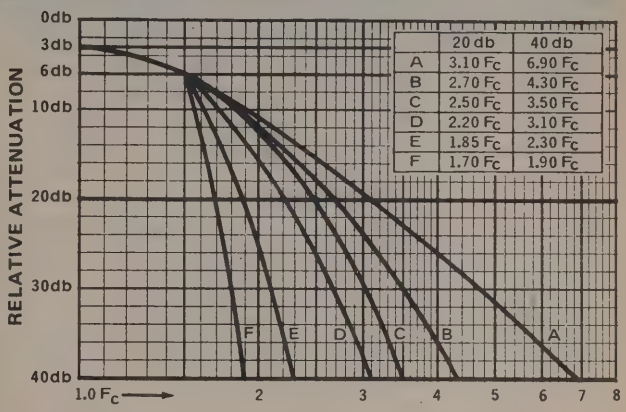
K — 1.50 x 1.000 x .800
L — 2.00 x 1.625 x 1.125
M — 3.00 x 1.625 x 1.125
N — 4.00 x 1.500 x 1.250

**Encapsulated in Epoxy Container:**

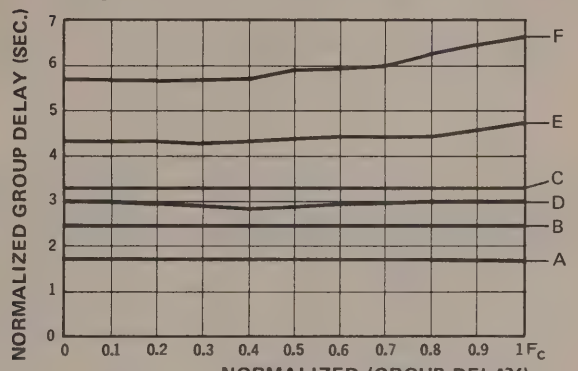
U — 2.00 x 1.125 x .750
W — 2.50 x 1.125 x .750
X — 3.00 x 1.500 x 1.000
Y — 4.00 x 1.500 x 1.125
Z — 4.50 x 2.500 x 1.375

The graph at right illustrates ideal delay characteristics.
Consult table below for typical realizable values.

| Shape Factor | Max. Phase Distortion | Maximum Overshoot | Typical Delay Variation |
|---|---|---|---|
| A | ±2° | 1.5% | 3% |
| B | ±2° | 1.5% | 3% |
| C | ±2° | 1.5% | 3% |
| D | ±3° | 3% | 8% |
| E | ±7° | 6% | 13% |
| F | ±12° | 9% | 17% |



| | 20 db | 40 db |
|---|---|---|
| A | 3.10 $F_c$ | 6.90 $F_c$ |
| B | 2.70 $F_c$ | 4.30 $F_c$ |
| C | 2.50 $F_c$ | 3.50 $F_c$ |
| D | 2.20 $F_c$ | 3.10 $F_c$ |
| E | 1.85 $F_c$ | 2.30 $F_c$ |
| F | 1.70 $F_c$ | 1.90 $F_c$ |



$$\text{GROUP DELAY} = \frac{\text{NORMALIZED (GROUP DELAY)}}{2\pi F_c \text{ (Hz)}}$$

## ½ db MAXIMUM RIPPLE — 1 db MAXIMUM INSERTION LOSS

## SHARP DELAY EQUALIZED LOWPASS FILTERS

By the utilization of delay equalization techniques, Allen Avionics now designs and manufactures a complete line of sharper cut-off, flat delay lowpass filters than shown above. We offer these with 40db to 3db ratios as small as 1.22 and delay distortion of less than 10%.

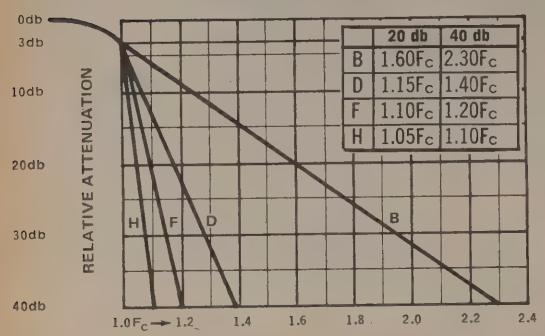
## CUSTOM-BUILT LOWPASS & HIGHPASS L-C FILTERS

**PROTOTYPES CAN OFTEN BE DELIVERED IN LESS THAN 3 DAYS**

**Types:** Butterworth, Tchebycheff, Gaussian, Bessel and Elliptic Function.
**Frequency Range:** 200 Hz to 200 MHz.
**Construction:** Epoxy encapsulated or sealed in metal can.
The Lowpass and Highpass Filters listed below are typical units that we build. We do manufacture units with shape factors and cut-off frequencies in-between those listed.

### LOW PASS FILTERS



| | 20 db | 40 db |
|---|---|---|
| B | 1.60Fc | 2.30Fc |
| D | 1.15Fc | 1.40Fc |
| F | 1.10Fc | 1.20Fc |
| H | 1.05Fc | 1.10Fc |

### SIZE (INCHES)

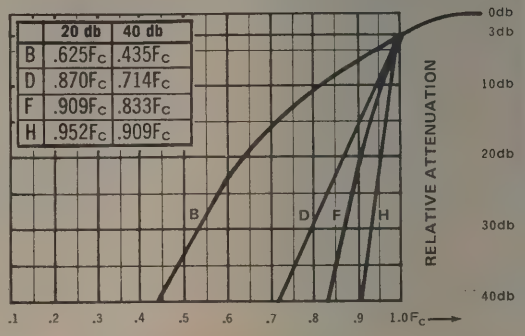
**Sealed in Metal Can with B.N.C. Connectors:**

L — 2.00 x 1.625 x 1.125
M — 3.00 x 1.625 x 1.125
N — 4.00 x 1.500 x 1.250
O — 5.00 x 1.500 x 1.250

**Encapsulated in Epoxy Container:**

S — 1.25 x .875 x .625
U — 2.00 x 1.125 x .750
W — 2.50 x 1.125 x .750
X — 3.00 x 1.500 x 1.000
Y — 4.00 x 1.500 x 1.125
Z — 4.50 x 2.500 x 1.375

### HIGH PASS FILTERS



| | 20 db | 40 db |
|---|---|---|
| B | .625Fc | .435Fc |

## FILTER MODULES

**FIXED FREQUENCIES · EXTERNALLY TUNEABLE**
**DUAL IN LINE CONSTRUCTION**

Feature Low Noise, High Input, Low Output impedance. O insertion Loss.

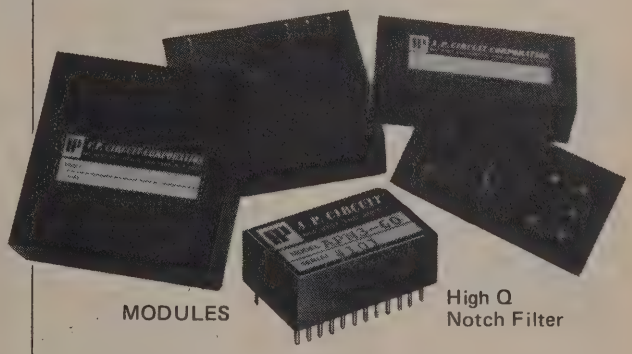
- Low-Pass
- High-Pass
- Band-Pass
- Ellyptic

STD. FREQUENCIES:
0.01 Hz–200,000 Hz
4 pole 24 Db/Octave or
8 pole 48 Db/Octave

**High Q Band reject including 60 Hz noise elimination filter**

Signal Conditioning Units assembled to customer specifications.

For a complete catalog and additional information write to Dept. P.



MODULES

High Q Notch Filter

## NEW:
## VOLTAGE TUNEABLE FILTERS

Both our instruments and modules are now available with voltage controlable tuning.

ALL-TRONICS

# RADIO INTERFERENCE FILTERS

## PLF-H series • PLF-R series

**ATTENUATION:**

**PLF-H SERIES:**
100 Db: 14 KHz-10 GHz
MIL-STD-220A,
Load Condition

**ALSO**

100 Db: 14 KHz-20 MHz
Full Load Condition with
Extended Range Buffer
Networks

**PLF-R SERIES:**
100 Db: 14 KHz-10 GHz
MIL-STD-220A,
Load Condition

**FEATURES:**

- **EXTREME RELIABILITY:** Special features specifically developed for secure communications areas, shielded rooms, etc., in continuous service for years without failure.
- **FIELD REPLACEABILITY:** Each individual phase filter is easily replaceable in field without the use of any special tools.
- **LEAKPROOF:** Each individual phase filter, completely hermetically sealed and leakproof.
- **INDESTRUCTIBLE TERMINALS:** Terminal assemblies are made of indestructible alumina ceramic.
- **FLEXIBLE LEADS:** Flexible leads to the electrical connection preventing possibility of damage to terminals.
- **NO FIRE OR EXPLOSIVE HAZARD:** Non-flammable impregnant used wherever applicable.
- **MAXIMUM VOLTAGE DROP:** 2 volts.
- **MAXIMUM OPERATING TEMP.:** 85°C.
- **OVERLOAD SAFETY:** 140% of rated current for 15 minutes in compliance with MIL-F-15733E. Short term current capability in excess of 10 times rating without damage.

For Architects' & Engineers' Specifications, Request Catalog AR-73

## PLF-2300 series • PLF-2100 series • PLF-1900 series

**RFI / EMI FILTERS** FOR 25 • 30 • 50 • 100 • 150 • 200 AMP CIRCUITS

At 277 VAC Line-to-Ground or 480 VAC Line-to-Line • 0-60 Hz
(0-400Hz Available in 1900 & 2100 Series)

SINGLE PHASE FILTER WITH WIRING CHAMBERS FOR DIRECT INSTALLATION

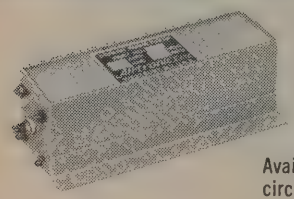
INSERTION LOSS:

PLF-2300 Series — 100 db from 14 KHz to 10 GHz in accordance with MIL-STD-220A, load condition.
PLF-2100 Series — 100 db from 100 KHz to 10 GHz in accordance with MIL-STD-220A.
PLF-1900 Series — Effective range from 100 KHz to 1 GHz.

For Architects' & Engineers' Specifications, Request Catalog AR-73

## PLF-1700 series • PLF-1500 series

## RFI / EMI FILTERS

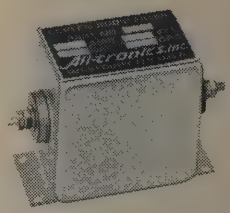


**5-10-15 AMP CIRCUITS**
**At 130 VAC Line-to-Ground**
**0-400 Hz**

Available in single, dual and/or triple circuits in each current rating. Insertion loss when measured in accordance with MIL-STD-220A provides 50 db at 14 KHz and 100 db at 90 KHz out to 1 GHz.

**5 • 10 • 15 • 25 • 50 • 75 • 100 • 200 • 300 AMP CIRCUITS at 250 VAC Line-to-Ground IN BOTH 0-60 Hz & 0-400 Hz Series**
(0-400Hz Series to 100 AMPS only)

Reliable, low-cost, hermetically sealed filters providing insertion loss with effective range from 150 KHz to 150 MHz.



## RFI/EMI TESTING LABORATORY • FCC • MILITARY • RTCA

All-Tronics also maintains a complete RFI/EMI Testing Laboratory. The combination of large modern RFI shielded rooms, the latest in interference testing instrumentation, and top level know-how provide a complete testing service that is capable of covering all of the latest requirements of FCC, Military, Commercial and foreign interference specifications. The laboratory is an approved FCC testing lab specializing in Part 15 and Part 18 compliance testing and consulting. The military interference testing capabilities include testing to specifications such as MIL-STD-220A, MIL-STD-461A, MIL-STD-6181D, MIL-STD-826A and MIL-I-16910C.

In addition to RFI/EMI interference levels caused by your equipment, All-Tronics can also perform susceptibility testing to determine the effects of RFI/EMI emissions on your product. Along with FCC and Military interference testing, All-Tronics also performs interference tests specifically prepared by the Radio Technical Commission for Aeronautics for the commercial aviation industry. In the commercial power field, All-Tronics has and is capable of performing site surveys on power lines, power stations and sub-stations. Test plans per MIL-STD-831 and consultation on test methods for your products are also available.

# Must You Meet MIL-STD 461?

## Here's where EXPERIENCE counts!

With the introduction of MIL-STD-461, the previously employed fixed 50-ohm test system, as defined by MIL-F-15733 and MIL-STD-220A, is becoming inadequate to describe true interference noise conditions. Filters are now tested dynamically — that is, from a low impedance source into a finite load simulating true operating conditions. With the new developments of solid state devices which have made inverters practical, direct rectification of the AC power has become prevalent. However, this rectification and these inverters produce large amounts of narrowband and broadband noise from relatively low impedances in the form of current rather than voltage. In addition this noise occurs at much lower frequencies than the previously used test minimum of 14 kHz. As a matter of fact, the first current spike of interest will be at the third harmonic of the power frequency and there will be substantial spikes at the chopper (inverter) frequency and its harmonics. Axel Electronics has the capability of simulating the noise spectrum to be filtered. This is accomplished by the use of a 3 phase full wave bridge (in a three phase system) with a load connected. The bridge diodes used are identical to those in the actual system as one element determining the raw noise (before filtering).

Alternately, Axel Electronics can also use the current injection method of simulation whereby a single frequency interference is injected and, with the use of current probes, the attenuation at that frequency is measured.

Axel Electronics also has the capability to simulate your system and determine the degree of filtering required by the use of its extensive library of computer programs specifically developed for the above application.

Each filter can be supplied with complete documentation of the filtered response, either in the form of a photograph from a swept frequency technique, or tabular form from finite frequency measurements.

Axel has shipped thousands of filters over the years to help our customers meet the requirements of MIL-STD-461 Notice 1, Notice 2, Notice 3 and Notice 4. Our expertise in designing filters for current attenuation and for testing under operating conditions has made this possible. Another feature of these filters is the ability to meet the magnetic radiation requirements of MIL-STD-461 by the use of magnetic liners within the filter itself.

A typical example of a requirement is demonstrated in the photographs below. Figure 1 indicates the raw noise before filtering. Figure 2 is the specified limit of MIL-STD-461, Notice 3, and Figure 3 indicates the results using Axel filter 10B625-1, shown.

The engineering staff of Axel Electronics is always available for consultation regarding your requirements, and can recommend solutions to your specific MIL-STD-461 filtering problems. We are uniquely qualified to solve them efficiently, economically, and expeditiously.

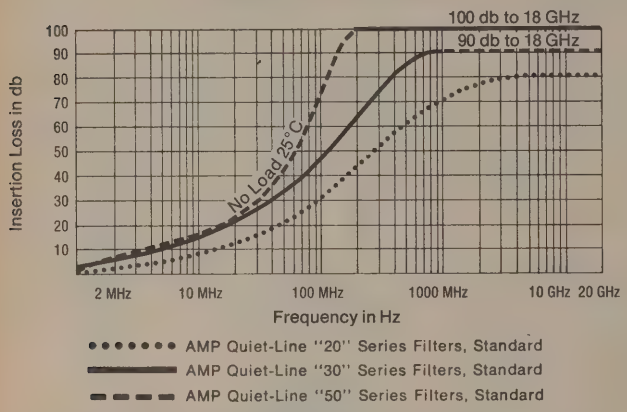
# The noise stops here.

## Introducing Quiet-Line. The new name in filters from the filter specialists—AMP.

Win the battle against systems noise and static discharge, with our new Quiet-Line series of miniature and sub-miniature feed-through filters.

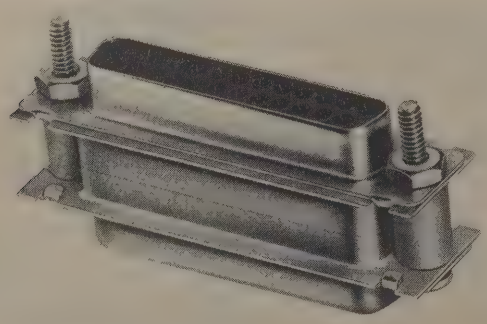
**Insertion Loss vs. Frequency**



An advanced absorptive filtering concept, combined with a unique manufacturing process, gives these filters the highest insertion loss specifications in the industry.

With two basic space-saving filter lines—the standard "20," "30" and "50" series, and the matching premium(P)-performance series—you get across-the-board design coverage. Also available are .025² post filters, an industry first from AMP. Applications range from commercial mobile radios and computer peripherals to military microwave systems and avionics.

No internal resonances—rugged, one-piece construction distributes inductance and capacitance over the filter. You also get high power capability—ratings to 15 amperes load current—and great versatility in mechanical configurations. Assemblies are available with filters mounted on a common ground plate, or as a cable interface, ready for termination.



### Specifications—AMP Quiet Line filters.

## DELAY LINES . . . . . For Commercial and Military Applications.

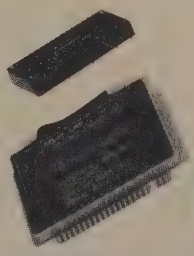
**MINIATURE DIP**

Pins 14 to 16
Delay/rise time 4 to 7
Delay 5 to 1000ns
Taps 10% of total delay

**DISTRIBUTED**

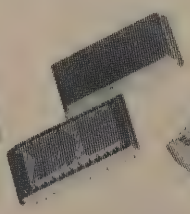
Bandwidth to 50 MHz
Delay 10ns to 1000ns
Taps Available

**LUMPED CONSTANT**



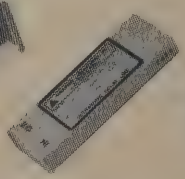
Bandwidths to 50 MHz
Delay 10ns to 3us
Taps available
Electrically variable delay available

**SAW**



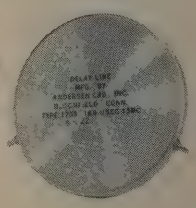
Frequency 10 MHz to 500 MHz
Bandwidth to 200 MHz
Delay 100ns to 50 us
Up to 60 taps

**GLASS**



Frequency 5 to 60 MHz
Bandwidth to 30 MHz
Delay 2 to 250us

**QUARTZ**



Frequency 5 to 100 MHz
Bandwidth to 50 MHz
Delay 1us to 4.8 ms

## SIGNAL PROCESSING SUB-SYSTEMS .....For radar, ECM, communications, and laser recording.

PULSE COMPRESSION RECEIVERS

PULSE EXPANSION—COMPRESSION EQUIPMENT: complete sub-systems including dispersive delay lines and all necessary electronics to perform pulse expansion, pulse compression, and sidelobe suppression.

UNITY GAIN DELAY CHANNELS: complete sub-systems containing dispersive or non-dispersive delay lines with electronics needed to satisfy specified gain, amplitude and phase requirements.

UNITY GAIN VIDEO DELAY MODULES: containing the modulation drive and recovery circuitry necessary to pass base-band NTSC, SCAM and PAL video with outstanding fidelity. Available in 1H, 2H, 1/2H or custom delay time configurations. For dropout compensators, verticle aperture correctors, comb filters, video disc systems.

# FOR ANY TYPE OF LC FILTER
## *CALL THE LEADER*

Low pass, high pass, band pass,
band stop, equalizers, weighting, roofing,
C-notch, C-message and junction filters

From 1.0 Hz to 1000 MHz, designed to commercial or Mil Specs. Our competent staff of filter engineers has made us a top rated supplier in the Instrumentation, Communications, Telemetering, Telephony and Computer industries.

No order too small. If you need one or one thousand, **we will be happy to quote.**

**ANY QUANTITY, FAST QUOTATIONS, FAST DELIVERY, LOW PRICES**
**For further information — call or write today!**

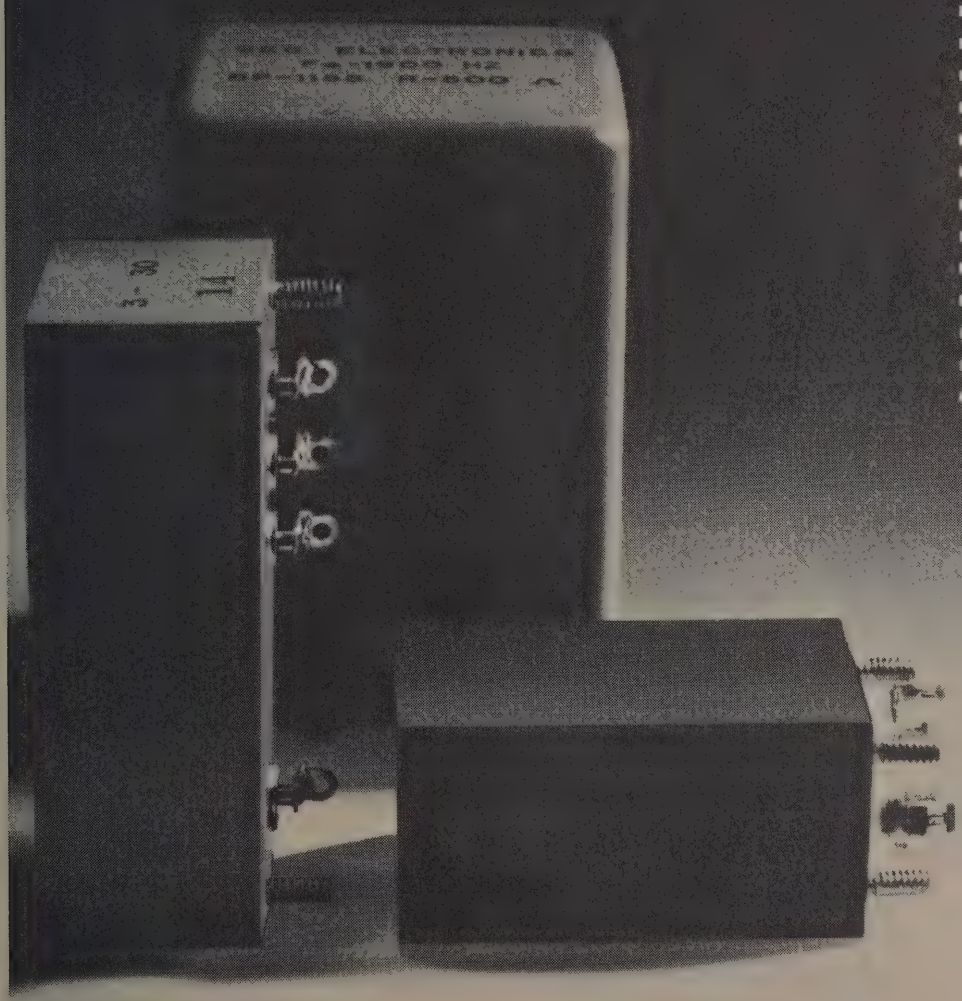
**Dept. E8, 511 Victor Street, Saddle Brook, NJ 07662 • 201/843-6886**

CP Chesterfield Products/inc.

# COMSTRON·SEG

## for all your LC and CRYSTAL filter needs

- Datacom
- Telecom
- Eye Pattern
- Hilbert Transform
- Linear Phase
- High Pass
- Low Pass
- Band Pass
- Band Reject
- Matched
- Delay Equalized
- Amplitude Equalized
- Time Domain
- FDM
- Optimum
- Thompson
- Butterworth
- Chebyschev
- Cauer
- Bessel
- Elliptic
- Legendre
- Channel Simulation



COMSTRON·SEG's on-time delivery of "impossible" filters from engineering conception to mathematical synthesis, through quality oriented production, satisfies our most demanding customers.

Whatever your needs . . . from spectral shaping and phase correction to time-domain synthesis . . . you can rely on the filter experts at COMSTRON·SEG. Computer-optimized custom designs from DC to 120MHz with sharp roll offs or phase correction or narrow bandwidths, all in production quantities with competitive pricing. NAME IT AND COMSTRON·SEG WILL DELIVER IT ON SCHEDULE!

Comstron·Seg

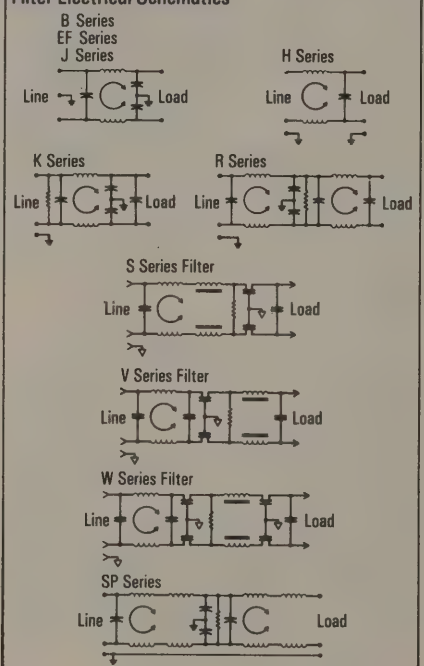
**Filter Electrical Schematics**



**B Series*** These filters are general purpose types—effectively providing RFI control of line to ground noise in a small size at lowest cost. They are available in a broad selection of current ratings and termination styles.

**EF Series*** Now VDE approved. These filters incorporate the special IEC (International Electrotechnical Commission) power line connector. This connector has 4 mm minimum pin spacing and complies with all current and proposed requirements for use with industrial and test equipment in the European market where a detachable power cord is part of the equipment design. The EF series features extremely low leakage current; meets IEC, VDE, CSA and ASA requirements for data processing equipment.

**H Series*** These filters are designed for use in health care equipment and are recognized under UL 544 specification. Model 6H1 is suited for patient care equipment. Models 6H4 & 6H9 are suited for non-patient equipment (equipment that is intended for use where contact with the patient is unlikely).

**K Series*** These filters are similar to the B Series but have the added feature of being extremely effective in the control of line to line as well as line to ground RFI interference. The K Series is particularly suited where pulsed, continuous and/or intermittent RFI interference is present and should be used where line to line interference protection is required.

**R Series*** These filters are dual T section RFI power line filters and provide premium performance at moderate cost. They are well suited for low impedance loads where noisy RFI environments are present. At frequencies as low as 150 KHz, the R Series has an insertion loss as high as 40 DB. They control pulsed, continuous and/or intermittent interference. The R Series provides extremely low leakage current without deterioration of insertion loss characteristics.

**SP Series*** These filters have been developed to reduce the RFI noise which is generated in switching type power supplies. Specifically it is suited for equipment that must comply with the requirements of VDE 0875 in West Germany and the proposed FCC specifications in the USA. These filters provide high insertion losses for both line-to-ground and line-to-line emissions throughout the frequency range. This is accomplished without any degradation of performance due to the large peak currents drawn by switching type power supplies.

**S, V & W Series*** These filters combine line-to-ground RFI filters with additional circuitry to reduce low frequency line-to-line noise. They are designed to protect equipment from malfunctions due to conducted line interference coming into the equipment from the line (susceptibility). They are particularly effective when applied in equipment using switching type power supplies, SCR and $T_2L$ circuits.

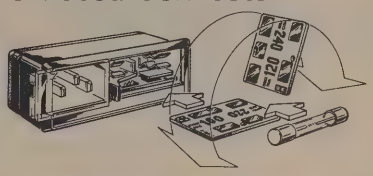
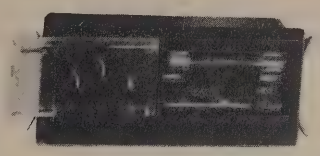
## The VS & F Voltage Selecting & Fused Connector





Available to the industry for the first time in one unit a voltage selector switch, a connector and a fuse. The VS & F allows equipment to operate anywhere in the world. **Four operating voltages** — The VS & F and a simple transformer modification allows the equipment to operate at 100, 120, 220 or 240 volts 50-400 Hz. Voltage selection is made with a unique voltage selector card. **Easy installation** — Only one rectangular cut-out is required for easy snap in mounting. **Built-in safety** — The fuse and voltage selector card are enclosed behind a see-thru cover which cannot be moved until the power cord is removed from the equipment. **UL & IEC** — The VS & F has an IEC approved connector. UL SE-01 fire retardant polyester housing and complies with UL and IEC requirements. **RFI Filter** — Available with RFI filter. Minimum insertion loss at .5 MHz is 18 DB, at 2.0 MHz to 5.0 MHz 40 DB.

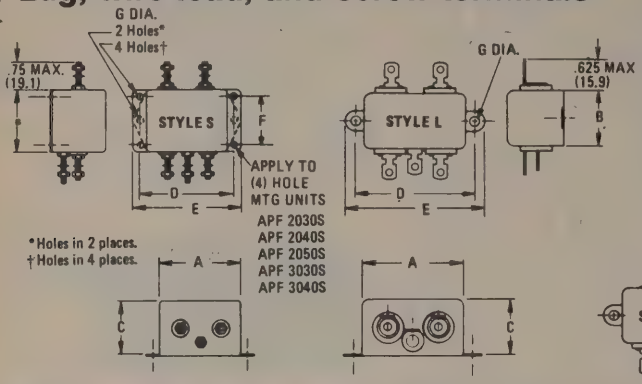
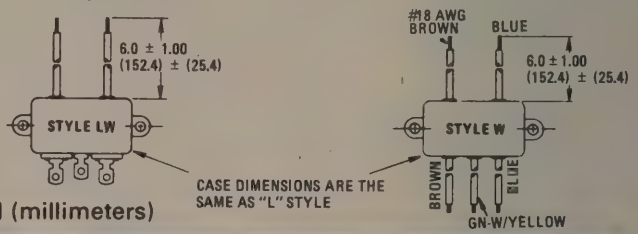
## LINE-TO-LINE AND LINE-TO-GROUND INTERFERENCE FILTERS

### Lug, wire lead, and screw terminals



A list of stock filters for most electro-magnetic interference (EMI) applications. For line-to-line and line-to-ground uses. **Rated Voltage:** 115-250VAC, 50-60 Hz **Tested Dielectric Strength:** 2100 VDC. **Leakage Current:** 0.5 ma at 115 VAC; 1.0 ma at 250 VAC. **Insertion Loss Curves** — Measured in 50 ohm system per MIL-STD-220. UL recognition for data processing. **Applications include:** business machines, office machines, copy machines, computer systems, calculators, disc drives, printers, tape drives, microwave ovens plus other major uses.



**Standard Stock Ratings** — Dimensions in inches and (millimeters)

## SPECIFICATIONS

- **Transfer characteristics** – Butterworth
- **Gain in pass-band** – 0 db ± .2 db.
- **Cut-off frequency accuracy** – ± 2% @ –3 db.
- **Maximum input voltage** – 10 volts peak.
- **Skirt Attenuation** – 24 db / octave.
- **DC drift** – 20uV / ℃ typical.
- **Supply Voltage** – ±15V typical (±9V to ±18V operational).
- **Temperature range** – 0℃ to +70℃ (standard); –55℃ to +125℃ (on request).
- **Temperature Coefficient** – .03% / ℃. Better on request.
- **Power Consumption** – 200MW Maximum.

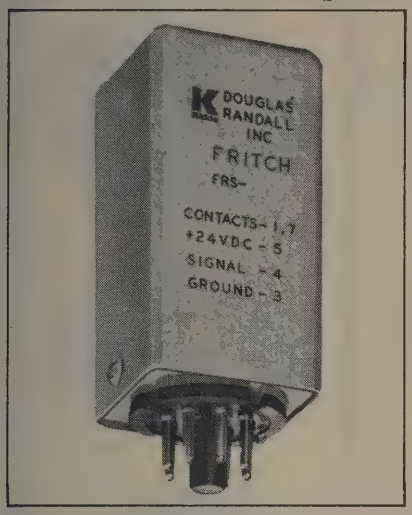
## FRITCH® — Frequency Responsive Switch



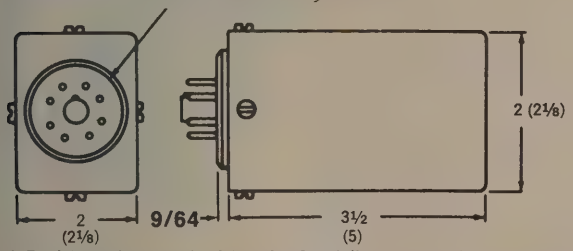
**The FRITCH® is a sensitive, rapid tone detector combining solid state circuitry with a Reed Relay output. Two basic types are made:**

**Type I — Used where only one frequency is present.**

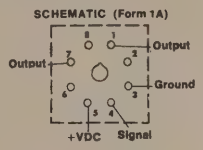
**Type II — Used where several frequencies are present.**

**DOUBLE TONE FRITCHes detect two frequencies. They are prefiltered to operate in the presence of several frequencies and can incorporate optional time delays to minimize the effect of spurious signals. They are ideal for detecting touch tone pairs over telephone lines.**

STANDARD OCTAL TUBE BASE



SCHEMATIC (Form 1A)



DIMENSIONS IN PARENTHESIS ( ) ARE FOR DOUBLE TONE FRITCH

® Registered trademark of Douglas Randall Frequency Responsive switch. (Patent 3584275)

### Specifications

**FREQUENCY RANGE:** 7 Hz to 100 KHz.

**BANDWIDTH:** Must Operate: ±2% fo. May Operate ±5% fo.

**NORMAL CHANNEL SPACING:** 11%.

**INPUT SIGNAL LEVEL:** 5 VRMS, 1 VRMS or 0.7 VRMS (odbm). Special to .050 V.

**INPUT IMPEDANCE:** 25,000 ohms typical.

**RESPONSE TIME:** To 75 pulses per second depending on frequency.

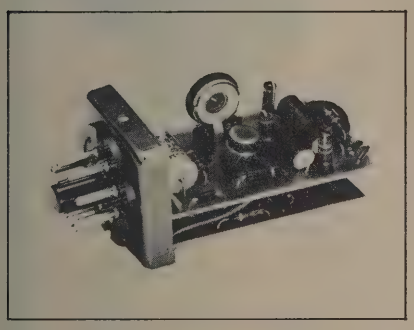
**DC POWER INPUT:** 12 V or 24 VDC ±10% (other voltages available).

**OUTPUT CONTACTS:** Form 1A, 2A, 1B, 2B, 1C or 1A1B. Solid state output optional.

**CONTACT RATING:** Form A or B — 10 W, 0.5 A or 250 VDC Max. Form C — 3 W, 0.25 A or 28 VDC Max.

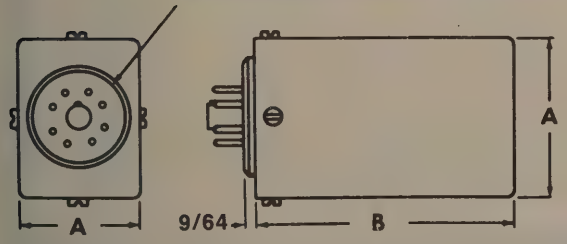
**ENVIRONMENTAL LIMITS:** Shock: 50 g; Vibration: 35 g; Temperature: −0°C to +50°C.

## Oscillators



**Douglas Randall Oscillators are solid state RC devices. The oscillator circuit operates continuously. The output stage is gated to a low impedance driver circuit, insuring extremely rapid signal response and freedom from frequency shift due to keying. Keying is accomplished by connecting the proper terminal to the power supply common (see schematic). The oscillators have reverse polarity protection incorporated in the unit to protect them if improperly connected. Single, double and triple tone versions are available in standard octal plug housings. They are also available for P.C. Mounting.**

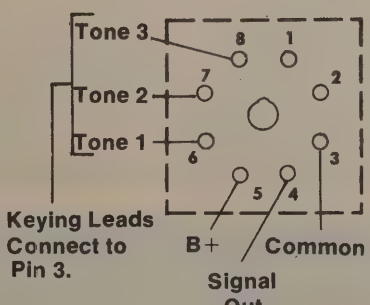
STANDARD OCTAL TUBE BASE



**Dimension**
**Single Tone**
**A — 1½**
**B — 2¾**

**Double or Triple Tone**
**A — 2**
**B — 3½**

SCHEMATIC



### Specifications

**DC POWER INPUT:** 12 V or 24 VDC ±10% (other voltages available).

**LOAD IMPEDANCE:** 600 ohms.

**OUTPUT SIGNAL:** Standard, 1 V RMS.

**DISTORTION:** 1%.

**RESPONSE TIME:** 50 Microseconds.

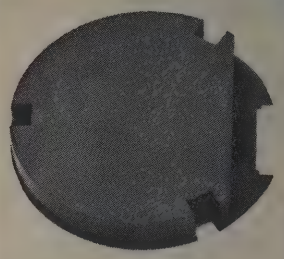
**DECAY TIME:** 50 Microseconds.

**FREQUENCY RANGE:** ±1%: 0°C to 40°C. ±1.5%: −20° to +65°.

# ESC LC FILTERS

## DC to 100 Mhz

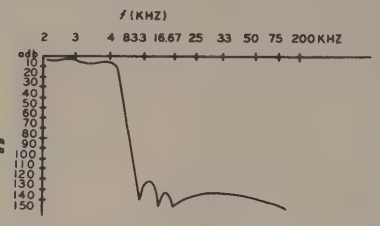
- Low Pass
- Band Reject
- RC
- Phase Matched
- High Rel
- High Pass
- Wideband
- Linear Phase
- Attenuation Matched
- Comb
- Band Pass
- Audio
- Constant Group Delay
- Low Transient Response
- Attenuation Equalizers



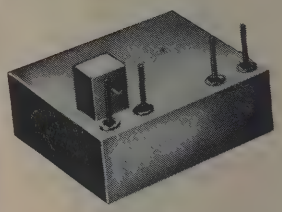
**SONAR FILTERS IN PHASE AND AMPLITUDE MATCHED SETS**

Linear phase bandpass and lowpass filters, with phase and amplitude matched passbands. Matching can be accomplished for any number of channels; generally three filters made a set, but as many as 900 have been phase and amplitude matched. ESC produces filters for Sonobuoys and audio comb analyzers.

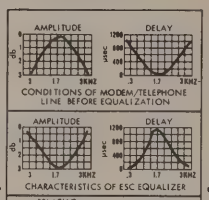
**HIGH ATTENUATION 140 db AIRCRAFT RADIO LOW PASS FILTERS**



ESC is the leading manufacturer of high attenuation filters. These filters provide more than 140 db attenuation of harmonic frequencies in the audio band and have controlled minimum phase shift. Size is only 1.2 x 1.0 x .58.

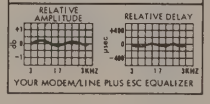


**ESC EQUALIZERS**



ESC produces custom designed equalizers for group delay and amplitude distortion. In particular, ESC produces custom designed compromise equalizers for modem manufacturers to correct for transmission line and modem produced amplitude and phase (delay) distortion. Equalization allows modem sets to be used at highest possible rates with minimum distortion. Contact ESC for your specific requirement.

**ESC TELEPHONE LINE SIMULATORS**



They provide voice-band data systems users with nominal worst case conditions of amplitude and envelope delay of Bell Telephone voice bandwidth data channel 3002 and C1, C2 and C4 conditioning.

**FILTERS FOR THE TELEPHONE INDUSTRY**

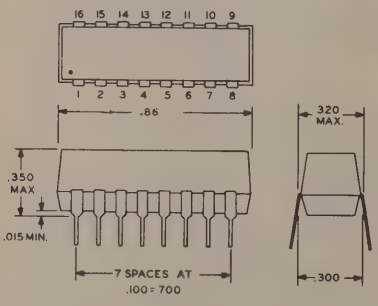
ESC has a full line of 1010 Hz Band reject filters. Low profile versions for standard telephone testing production equipment. Available in 600 Ω and 900 Ω balanced and unbalanced versions to "Western Electric" specifications.

2600 Hz Band reject filters available to standard "Bell" specifications or in miniaturized version with height approximately ½". Low cost for standard "SF" Signalling equipment.

**ULTRA SHARP HIGH SPEED DATA MODEM FILTERS**

ESC produces a series of lowpass, bandpass and band suppression filters in 60 Khz to 108 Khz range for use in high speed (150 Kbps) data modems. Filters have very sharp attenuation characteristics, low group delay distortion and more than 60 db intermodulation distortion and are made in compact sizes for PC board capability.

**DIP LOW PASS FILTER SERIES**



**SPECIFICATIONS:**

- Insertion Loss: less than .5 db at .1 Fc
- Ripple: less than 1 db in Passband to Fc
- Attenuation: less than 3 db to Fc; greater than 50 db at 3 Fc
- Operating Temp: – 55°C to + 125°C
- Built to conform to applicable portions of MIL-F-18327
- Mounting: Standard 16 Pin configuration
- For other filter types in DIP configuration contact plant

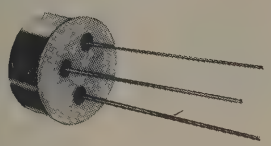
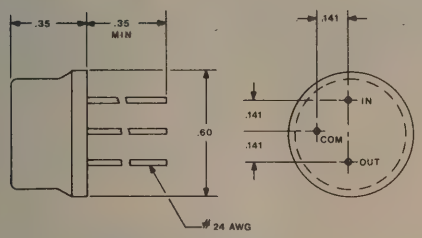
### TO-8 LOW PASS FILTERS





*Request Bulletin-TO-8*

**SPECIFICATIONS:**

- Insertion Loss: ..... Less than .5 db at .1 $f_c$
- Ripple: ..... Less than .5 db Peak to Peak in pass-band.
- Attenuation: ..... Series M: 12 db/octave roll-off from 3 db point.
  Series P: 18 db/octave roll-off from 3 db point.
- Operating Temp. Range: ..... Military: -55°C to + 125°C. Conforms to applicable portions of MIL-F-18327.
  Commercial: 0° to + 70°C.
- Mounting: ..... Standard TO-8 -- see diagram.

STANDARD TYPES:

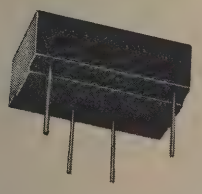
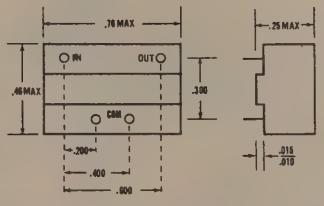
### ESC DUAL-IN-LINE DIF® FILTERS





Five series of filters, three lowpass and two highpass. As example DIF-L39 lowpass series is listed below. Also available is linear phase series DIF-LP, lowpass series DIF-L20, highpass series DIF-H20 and DIF-H39. Full specifications for attenuation and typical characteristics such as phase shift, group delay and pulse response are presented in catalog. A bandpass filter can be formed by tandem connection of a lowpass and highpass (minimum bandwidth is one octave).

**SPECIFICATIONS:**

| | |
|---|---|
| INSERTION LOSS | <.5 db at .1Fc |
| RIPPLE | <±1 db in Passband (to Fc) |
| ATTENUATION | <3 db to Fc |
| | >39 db at 2.5 Fc & higher frequencies |

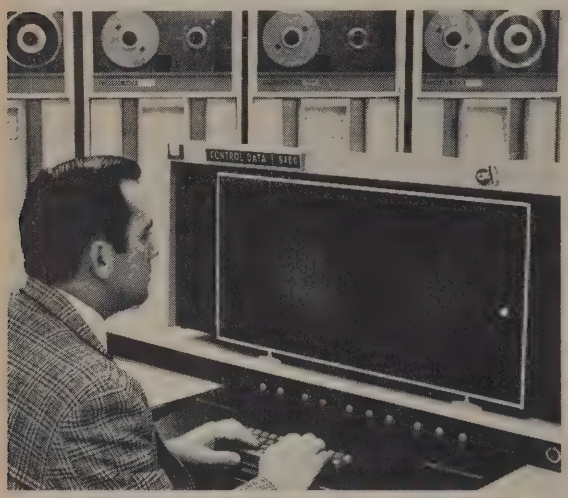
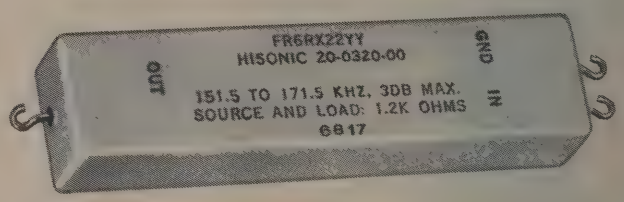
# CUSTOM FILTERS

Low, band or high pass and band stop filters with optimum amplitude and/or delay characteristics can be supplied to your special requirements and MIL-F-18327 Construction utilizes precision inductors and high quality capacitors of special films or silvered mica, according to frequency and space requirements. Operating frequencies range to 100 MHZ. Temperature stabilization for both amplitude and frequency can be effected. Mechanical styles may be epoxy encapsulated or hermetically sealed metal in sizes from 0.2 to 200 cu. in.





To keep pace with the most sophisticated technologies of network design, Hisonic engineers have direct in-plant access to the tremendous capabilities of large late-generation computers. The Hisonic staff includes specialists with up to 25 years experience in precision inductor and filter network design. It also includes advanced mathematicians with backgrounds of program development, who are able to achieve design excellence not otherwise attainable.

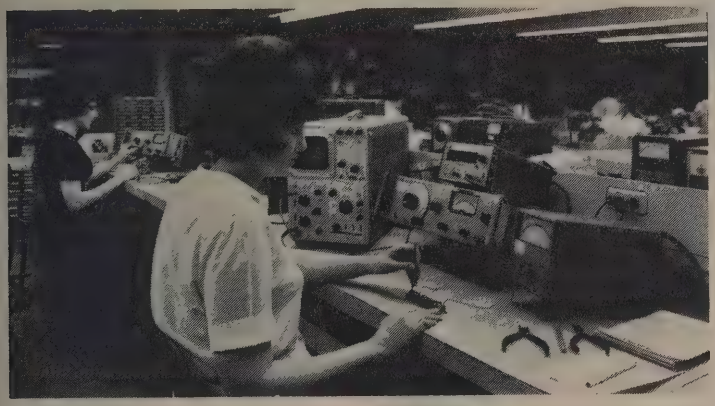
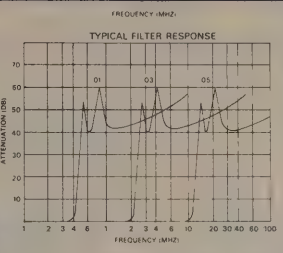
# STANDARD FILTERS

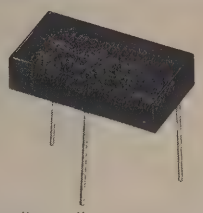
## FOR HIGHEST SELECTIVITY

Standard filters are computer designed by modern network methods for minimum stop to pass band ratios. Applications are those requiring optimum utilization of frequency spectrum.



Technicians adjust critical response of special band pass filters utilizing adjustable ferrite core inductors. Modern precision test equipment is employed in association with MIL I 45208 Quality Control procedures.





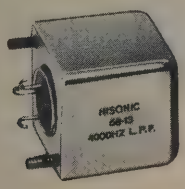
.72" x .40" x .23 encapsulated.

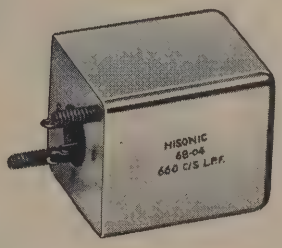
### MINIATURE SERIES 550 LOW PASS

**ELECTRICAL SPECIFICATIONS**

- IMPEDANCE: 100 ohms standard.
- INSERTION LOSS: .5db max. at .1Fc.
- RESPONSE:
  3DB max. at Fc
  40DB min. at 1.5 Fc
- SIGNAL LEVEL: Max. power in mw = 10
- OTHER IMPEDANCES AND FREQUENCIES: Write for data sheet.
- TEMPERATURE RANGE: −55 to +105°C
- STANDARD CUTOFF FREQUENCIES:

| Fc (MHZ) | HISONIC PART NUMBER |
|---|---|
| .40 | 20-0550-01 |
| 1.0 | 20-0550-02 |
| 2.0 | 20-0550-03 |
| 5.0 | 20-0550-04 |
| 10.0 | 20-0550-05 |
| 20.0 | 20-0550-06 |





### SERIES 68 LOW PASS

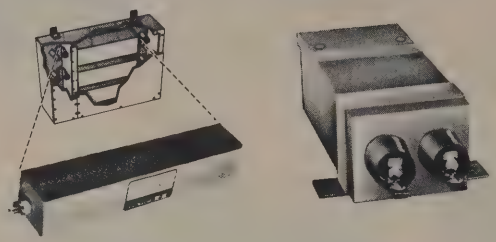
# HOPKINS ENGINEERING CO.

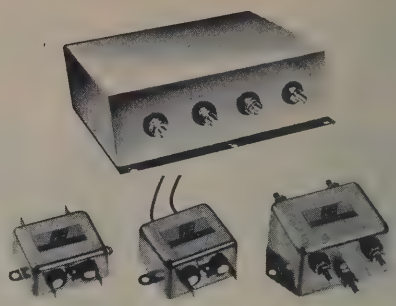
## WORLD'S LEADER IN EMI/RFI FILTERS

12900 Foothill Blvd., San Fernando, California 91342 • Phone: (213) 361-8691 • TWX: 910-496-1531

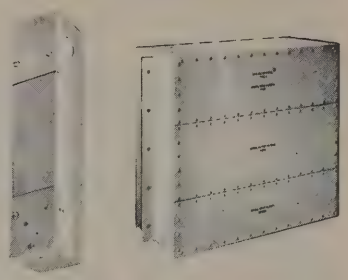
### HEAVY DUTY POWER LINE FILTERS



### DATA PROCESSING FILTERS



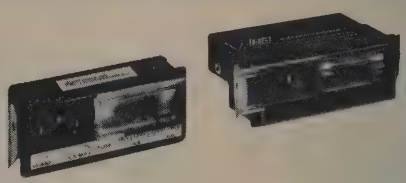
### COMMUNICATION FILTERS



### UNIVERSAL RFI/EMI FILTER

### CUSTOM FILTERS

### FILTERED FUSE CONNECTOR MODULE



ENGINEERING CATALOGUE AVAILABLE UPON REQUEST

### FACILITIES CAPABILITY

Hopkins' Engineering Company is a leading manufacturer of RFI/EMI filters. It was founded in 1945 and offers engineering design and manufacturing expertise in solving electromagnetic interference problems.

### MANUFACTURING

A wide variety of filter designs are manufactured in our modern fully equipped 30,000 square foot factory. Quality is built into every Hopkins filter by skilled production personnel and an efficient prototype department offers prompt delivery of new designs. Hopkins has manufactured products to the most exacting military programs for over 25 years.

### ENGINEERING

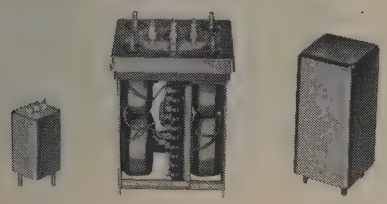
Hopkins' engineers have developed thousands of filter designs to meet a variety of military and industrial RFI/EMI suppression requirements. This versatility coupled with the latest filter design techniques and use of computer assisted design programs allows our engineers to develop filters of optimized circuitry, performance, reliability, and cost.

### QUALITY ASSURANCE

A policy of rigid quality control practices are employed. Quality materials and high workmanship standards insures a product that meets or exceeds specification requirements. Our quality assurance department maintains established procedures to control the quality and reliability objectives of the customer and Hopkins Engineering Company.

# HERTZ FILTERS

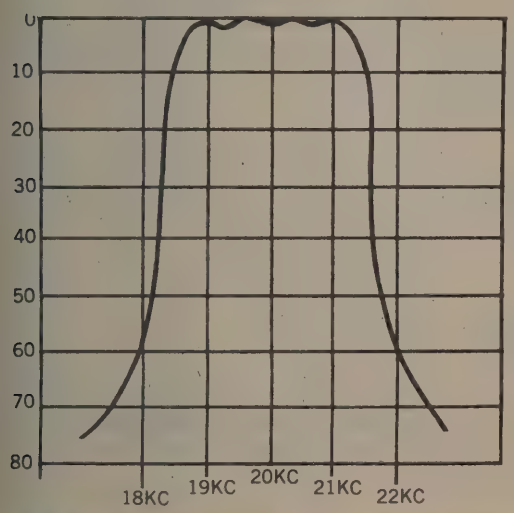
## BAND PASS FILTERS CUSTOM DESIGNED TO FILL YOUR NEEDS



Hertz Filter Corporations' engineering department is made up entirely of specialists in the field of custom design of band pass filters. They are all fully experienced and prepared to help you solve your filter problems. Call or write Hertz for reliable service and prompt delivery.

### FEATURES

1. Filters, Band Pass, Passive
2. Center Frequencies — 50 Hz to 50 Meg Hz
3. Shape factors — better than 2.0 for ratios of 60 db to 3 db
4. Bandwidth to center frequency ratio — up to 10%
5. Phase linearity — within 10° through passband
6. Low passband insertion loss
7. Better than 80 db attenuation 50% above and below center frequency
8. Input and output impedances as required
9. Low input and output impedances in stop band
10. Low passband ripple
11. L, C, and R elements only



### PARTIAL LIST OF HERTZ FILTERS
(all filters in accordance with MIL-F-18327)

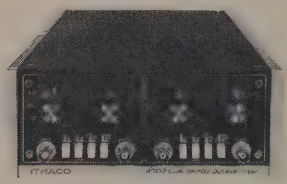
## THE PREDICTABLE FILTERS

### MODEL 4302 LABORATORY DUAL FILTER



ACCURACY/PHASE MATCH: ±3% of setting / ±6°

FREQUENCY RANGE: 10 Hz – 1 MHz

ATTENUATION: 24 dB/octave all modes; 48 dB/octave series hi- or lo-pass, > 100 dB max attenuation

CHARACTERISTICS: selectable Butterworth or Bessel

HUM AND NOISE: <75μV rms X1 gain; <10μV rms X10 gain

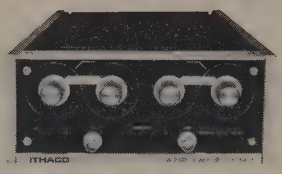
COUPLING: selectable AC or DC

GAIN: selectable X1 or X10 for each section

LOW DISTORTION: <.005% at 1kHz X10 gain

LOW COST: $688

### 4210 SERIES CALIBRATED LAB FILTERS



ACCURACY/PHASE MATCH: ±1% of setting / ±2°

FREQUENCY RANGE: .01 Hz – 1MHz in 3 models

ATTENUATION: 24 dB/octave all modes; >100 dB max.

CHARACTERISTICS: selectable Butterworth or Bessel

HUM AND NOISE: <70μV rms

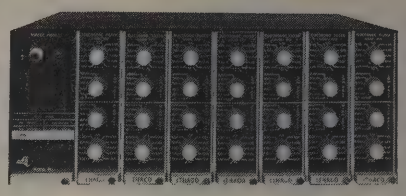
COUPLING: DC in lo-pass; AC all other modes

GAIN: optional selectable 0/10/20/30/40 dB

BATTERY POWER: available as option

THREE MODELS TO CHOOSE FROM AT $995

### 4110 SERIES MULTI-CHANNEL FILTERS



ACCURACY/PHASE MATCH: ±1% of setting / ±2°

FREQUENCY RANGE: ±.01 Hz – 1MHz in 3 models

ATTENUATION: 24 dB/octave all modes; >90 dB max.

CHARACTERISTICS: Butterworth only

HUM AND NOISE: <70μV rms

COUPLING: DC in lo-pass; AC all other modes

BANDPASS: characteristics completely predictable and repeatable ±1% / ±0.1 dB all settings

THREE MODELS TO CHOOSE FROM, $861 to $914

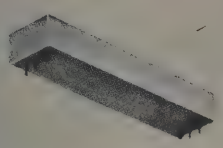
### LOW PASS FILTERS

**Frequency Range:** DC to 50MHz
**Impedance Range:** 1 ohm to ∞
**Stop Bands:** 10 to 80db

### BAND PASS FILTERS

**Frequency Range:** DC to 50MHz
**Band Width:** 1% to >100%
**Stopband:** 10 to 80db
**Impedance Range:** 1 ohm to ∞

### HIGH PASS FILTERS



**Frequency Range:** DC to 50MHz
**Impedance Range:** 1 ohm to ∞
**Stop Bands:** 10 to 80db

### BAND REJECT FILTERS

**Frequency Range:** DC to 50MHz
**Band Width:** 1% to >100%
**Stop Band:** 10 to 80db
**Impedance Range:** 1 to ∞

# Custom LC Filters

### COMPUTER-AIDED SERVICE

The following examples of KR's LC filter design capabilities are but a small representation of the broad range of our experience. Through our use of an IBM 360, level 60 computer, output data plotted against frequency including impedance, attenuation, phase, group delay and phase delay can be evaluated to supply an immediate quotation.

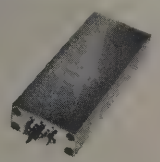
### BROAD EXPERIENCE IN DESIGN OF THESE FILTER TYPES

Low Pass • High Pass • Band Pass • Band Reject • Linear Phase • Constant Group Delay • Phase Matched • Attenuation Matched • Phase Equalizers • Delay Equalizers • Attenuation Equalizers • Low Transient Response •

# DIP Filters

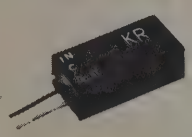
For information on our complete line of DIP filters, send for our new catalog.

### MATCHED PHASE & ATTENUATION



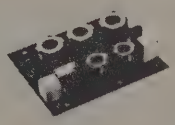
**Typical Specifications:**
Phase Matched ± 2½° In Pass Band
Attenuation Matched ±.25db In Pass Band for use in Sonar & other multi channel systems.

### MAXIMUM FLAT DELAY (BESSEL) FILTER



**Size (Typical):** .75" x .75" x 1.5"
**Frequency Range:** 1.5KHz to 1MHz
**Z Range:** 50 to 10 K
**Overshoot:** <1%
**Delay Flat:** <2% to Fc

### LINEAR GROUP DELAY VIDEO FILTER



**Typical Specifications:**
**L.P. Cutoff:** 4.5 MHz
**I.L.:** <1db
**Passband Ripple:** <±.1db
**Pass Band Delay Distortion:** <25 nsec.
**Stopband:** >25db

### GROUP DELAY & ATTENUATION EQUALIZER NETWORK

To correct system introduced delay distortion & attenuation roll off.

# Constant Group Delay Filters

Computer-designed and checked to give equal ripple delay over the pass band insuring exact delay and attenuation characteristics.

**Frequency Range:** DC to 50 MHz
**Impedance Range:** 1 ohm to ∞
**Temperature Range:** —55°C to +125°C.
Complete Encapsulation
Hermetic Seal
P.C. Board Construction
**Case Configuration:**
Stock or Custom Designed
P.C. Card
Dual In-Line
Standard Hardware Program

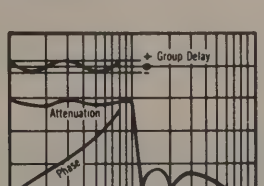
**All filters conform to applicable mil specifications.**

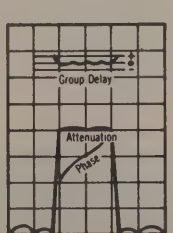
### Phase & Attenuation Matching

Differential phase and attenuation matched to eliminate the need for adjustments in multi-channeled systems.

### Linear Phase Filters

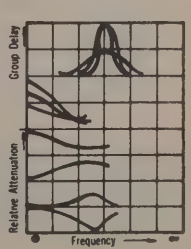
To reduce distortions and lower transient response in modulated systems.



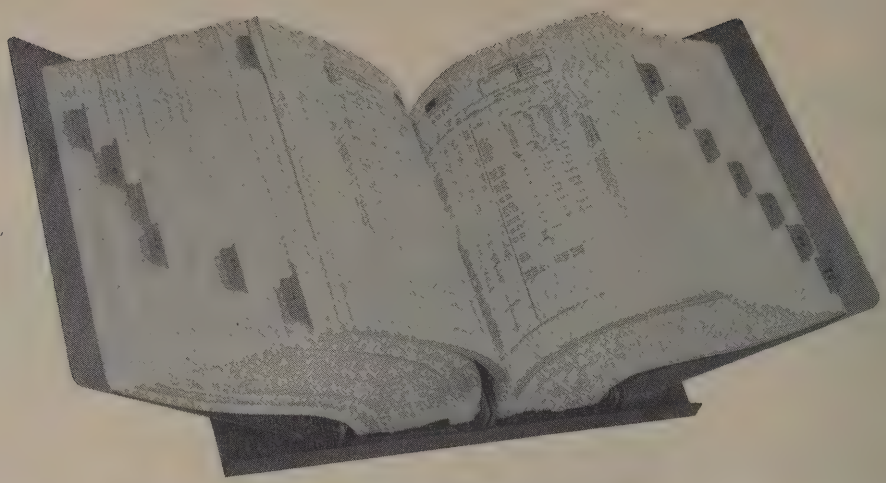


### Equalizers

**Phase/Delay/Attenuation**
Computer-designed correction networks derived from system error curves.



Printed in USA



# UNITED PRICING REPORTS

## the single source that speeds up invoicing, pricing, quoting, purchasing and estimating

Electronic component prices change so fast, you'd need a team of people just to keep up.

United Pricing Reports is the better way. When you subscribe to Pricing Reports you receive 1500 pricing sheets (3000 pages) of the latest prices, as of the date we ship them to you.

This gives you, in a single source, up-to-the minute selling prices on more than 500,000 electronic components.

United Pricing Reports gives you accurate resale prices at the exact moment you need them. Not hours or days later. So it helps you eliminate frantic phone calls, letter writing and catalog scanning to check on prices when you write an invoice or type a purchase order.

## Twice weekly price updates.

One week after you receive your Pricing Reports source book (1500 pricing sheets) you begin receiving twice weekly price updates. You simply take these new price pages and replace the now obsolete pages with them.

The whole process is simple. All information is organized alphabetically by manufacturer. And each manufacturer's price schedule is listed by part number in numerical/alphabetical sequence.

One more thing. When we promise twice weekly updates, we deliver. 52 weeks a year, consistently. Not monthly or every other month. We have a tradition of delivery on our promises, and we're certainly not going to stop now.

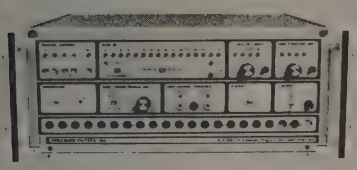
## SYSTEM 216
### PROGRAMMABLE AMPLIFIERS AC - DC - AUTO-RANGING

16 channel amplifier systems with automatic gain ranging or programmable gain only. A system consists of a main-frame, a plug-in control module and up to 16 plug-in amplifiers. In the automatic gain ranging systems the output level is maintained at a level suitable for recording on tape while the gain status of all channels is recorded on a separate track.



- AUTOMATIC GAIN RANGING
- PROGRAMMABLE GAIN, LFRO, MODE, & TC
- GAIN: -12dB to +78dB
- LOW-NOISE DIFF. INPUT
- OVERLOAD DETECTORS
- PLUG-IN LOW-PASS FILTERS
- COMPUTER INTERFACES
- BANDWIDTH 1 Hz-500kHz
- 1° PHASE ACCURACY

**PLUG-IN CONTROL MODULES**

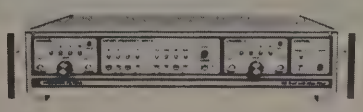
| | |
|---|---|
| 216-XX-C-01 | IEEE Bus (488) |
| 216-XX-C-02 | Interface for TTY |
| 216-XX-C-03 | Interface for Mini |
| 216-XX-C-04 | Manual Control Only |
| 216-XX-C-05 | Ampl. Status MUX/ DEMUX |

**AMPLIFIER SYSTEMS**

| | |
|---|---|
| 216-01 | Automatic Gain-Ranging/ Programmable AC Amplifier |
| 216-02 | Automatic Gain-Ranging/ Programmable DC Amplifier |
| 216-03 | Programmable AC Amplifier Gain: -12dB to +78dB |
| 216-04 | Programmable DC Amplifier Gain: 0dB to +60dB |

## MODEL 602
### DUAL-CHANNEL FILTER HP-LP-BP-BR

This two-channel filter has programmable gain & cutoff frequency and direct readout of channel overload. It is housed in a 3½" high rack-mounting cabinet and contains a control card to interface a mini-computer. Precisely controlled low-pass, high-pass or time-delay (linear-phase) filters are available which cover four decades of cutoff frequencies in the range .01 Hz to 150 kHz.



- 1° PHASE ACCURACY
- HP-LP-BP-BR
- -80 dB at 2 $F_c$
- ELLIPTIC FILTERS
- LINEAR-PHASE FILTERS
- PROGRAMMABLE GAIN & CUTOFF FREQUENCY
- OVERLOAD DETECTORS
- COMPUTER INTERFACES: IEEE, TTY, BUFFERED I/O

**CONTROL OPTIONS**

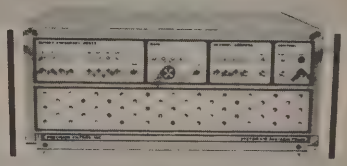
| | |
|---|---|
| 602-C-01 | IEEE Bus (HP-IB) |
| 602-C-02 | Interface for TTY |
| 602-C-03 | Interface for Mini-computer's Buffered I/O |
| 602-C-04 | Manual Only |

**FILTERS**

| | |
|---|---|
| 602-01-XXX | 10 Hz - 150 kHz |
| 602-02-XXX | 1 Hz - 15 kHz |
| 602-03-XXX | .1 Hz - 1.5 kHz |
| 602-04-XXX | .01 Hz - 150 Hz |
| 602-XX-LP1 | 6 pole, 6 zero LP |
| 602-XX-HP1 | 6 pole, 6 zero HP |
| 602-XX-TD1 | 6 pole, 4 zero TD |

## SYSTEM 616
### MULTI-CHANNEL PROGRAMMABLE FILTERS

This 16-channel filter system with programmable gain and cutoff frequency consists of a 7" high rack-mounting main frame with power, connections, and controls for all channels; a plug-in control module for interfacing a minicomputer; and up to 16 plug-in filters. Precisely controlled low-pass, high-pass and time-delay (linear-phase) filters are available which cover four decades of cutoff frequencies in the range .01 Hz - 150 kHz.



- 1° PHASE ACCURACY
- HP-LP-BP-BR
- -80 dB at 2 $F_c$
- -90 dB at 1.56 $F_c$
- ELLIPTIC FILTERS
- LINEAR-PHASE FILTERS
- PROGRAMMABLE GAIN & CUTOFF FREQUENCIES
- COMPUTER INTERFACES: IEEE, TTY, BUFFERED I/O

**PLUG-IN CONTROL MODULES**

| | |
|---|---|
| 616-C-01 | IEEE Bus (HP-IB) |
| 616-C-02 | Interface for TTY |
| 616-C-03 | Interface for Mini-computer's Buffered I/O |
| 616-C-04 | Manual Only |

**PLUG-IN FILTER MODULES**

| | |
|---|---|
| 616-01-XXX | 10 Hz - 150 kHz |
| 616-02-XXX | 1 Hz - 15 kHz |
| 616-03-XXX | .1 Hz - 1.5 kHz |
| 616-04-XXX | .01 Hz - 150 Hz |
| 616-XX-LP1 | 6 pole, 6 zero LP |
| 616-XX-LP2 | 12 pole, 12 zero LP |
| 616-XX-HP1 | 6 pole, 6 zero HP |
| 616-XX-TD1 | 6 pole, 4 zero TD |

**PRECISION FILTERS, Inc.**
303 West Lincoln Street, Ithaca, New York 14850 (607) 277-3550

# RtroN RFI/EMI FILTERS

For Data Processing, Industrial Controls, and Instrumentation Applications. Meets U.L. and C.S.A. requirements. Low Leakage without sacrificing Insertion Loss. Excellent Quality at Low Cost.

VOLTAGE RATING 115/250

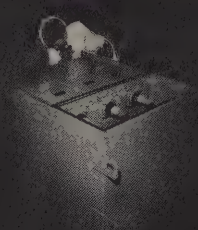
# Manufacturers of over 10,000 RFI/EMC filter types.

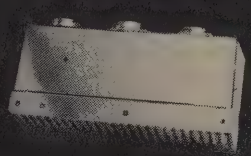
RFI, the nation's leading filter supplier, offers the most complete range of products in the industry. Sophisticated, complex, multi-circuit filter assemblies, or simple feedthru capacitors - we make them all.

These are just a few of the more than 10,000 different filter designs by RF INTERONICS for specific customer requirements. For detailed information concerning standard and custom-engineered parts, contact our sales department.

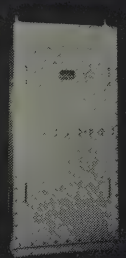
Subminiature "MICRO-FILTER"® for use in power and signal lines rated up to 230 VAC.



Much bigger ones, too. Ratings from 1 milliamp to 2,000 amps; 0.1 volt to 20,000 volts; fractions of an ounce to more than 1,000 lbs.



156 circuit, hermetically sealed high-reliability filter assembly – for use in aircraft data-link equipment.



1100 circuit filter cabinet for red/black secure communications.

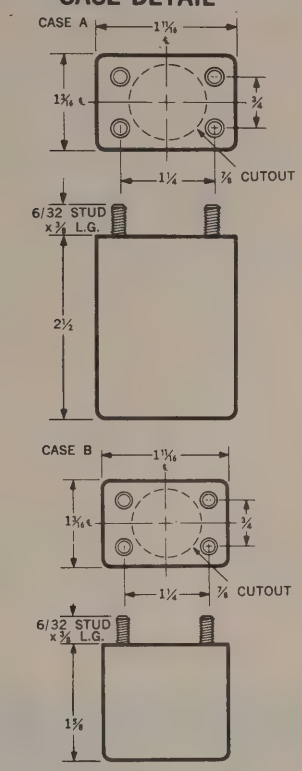
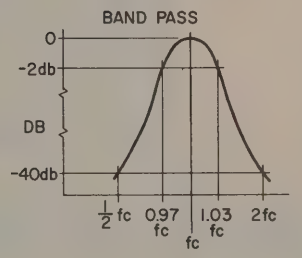
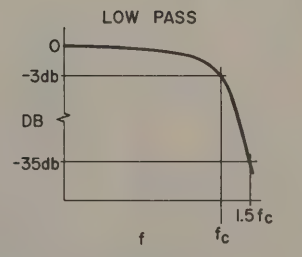
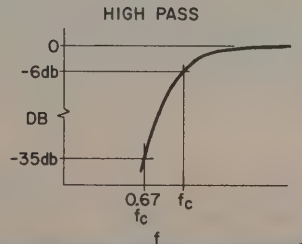
## CASE DETAIL









STERLING TRANSFORMER CORP.
DEPT. EM, 510 DRIGGS AVENUE • BROOKLYN, NEW YORK 11211 • TELEPHONE: (212) 782-4200

# SPECTRUM CONTROL INC.

**SPECTRUM CONTROL . . .** The company was founded upon the basic philosophy of encompassing literally the spectrum of services in the EMI/EMC technology . . . services offered within reasonable cost structures.

Today, Spectrum Control facilities must rate among the most efficient in the industry. Advanced test equipment, shielded test rooms and a fully experienced engineering staff combined with a broad range of electronic components qualifies Spectrum as a unique source for total program management of electromagnetic interference.

Your EMI/EMC problem in electronic or electromechanical equipment can be assumed in total by Spectrum engineers . . . including testing, planning and control, from the initial stages to final resolution of the problem. At the outset an EMC control plan is formulated. This involves in-depth analysis of engineering drawings, circuitry, specifications and the equipment. Next, Spectrum provides consulting service to assist compliance with the control plan. EMI testing to the latest applicable specifications are conducted at your plant site by a team of experienced Spectrum engineers; or, if more convenient, specific equipment and apparatus can be brought directly to our test facilities.

As the problem is pinpointed, Spectrum Control has the total facilities to affect satisfactory, economical solution. Corrective action may involve circuit changes, packaging changes . . . or require EMI Filters, gaskets, metal shields or other types of hardware. Whatever is required, Spectrum Control is equipped with qualified personnel, plant facilities and a broad range of reasonably priced components to help resolve your EMI/EMC problems.

## INDUSTRIAL CONSUMER APPLICATIONS

A rapidly increasing number of industrial and consumer products, equipment and systems are potential sources of electromagnetic interference. Spectrum Control specializes in air navigation and avionics, microwave ovens, control circuits, power supplies, electrical instruments, electric motor noise suppression . . . just about any application where EMI impairs optimum performance.

## MILITARY APPLICATIONS

Today's powerful communications systems, radar systems and other high performance systems demand the ultimate in electromagnetic compatibility. Spectrum Control offers one of the best equipped, independent test facilities in the United States. Spectrum is capable of performing to the following applicable specifications:

MIL-STD-461/462
MIL-STD-826
MIL-I-6181
MIL-I-26600
MIL-I-16910
FCC-Part 15
FCC-Part 18

**EMC Planning, Control and Testing . . . a total approach to electromagnetic compatibility!**

# TRW UTC TRANSFORMERS — INDUCTORS

## ULTRAMINIATURE HIGH Q INDUCTORS
## MINIDUCTOR SERIES

**PACKAGING** Hermetically sealed. MS, MM, MH, MW, epoxy molded symmetrical toroids. ML, hipermalloy shield cased, hum reducing laminated inductor. MO, epoxy molded hum reducing laminated inductor. All have straight pin terminals for printed circuit applications.

**TERMINALS** Per MIL-STD-1276.
**MIL SPECS** To complete MIL-T-27D Specs. Mil Type TF5R20ZZ.

| Type No. | Tolerance Inductance at 25°C | Test Frequency | Test Level RMS V | Max. L Variation −55°C to +105°C |
|---|---|---|---|---|

# TRW UTC TRANSFORMERS

# FILTERS

## UTC "FLATS"* ELECTRIC WAVE FILTERS

**DESIGNED, MANUFACTURED AND SUCCESSFULLY TESTED TO COMPLETE MIL-F-18327 SPECIFICATIONS**

These filters meet today's need for flat component configurations, have excellent attenuation characteristics and are ruggedized to Grade 6, MIL-F-18327. Straight pin terminals and flat construction make these units ideally suited for printed circuit applications. These filters are hermetically sealed in flat metal cases shielded to reduce hum pickup. FP-A Case: 2" x 2" x ½" h., 2.5 oz. FP-B Case: 2" x 1½" x ⅜" h., 2 oz. FP-C Case: 2" x 1½" x ½" h., 2.2 oz.

**FHH-200:** Flat package high pass filter, source and load 10K ohms. Units are within 1 db up to 300 Hz 3 db ±1 db at 200 Hz, and have an attenuation of at least 40 db at frequencies below 140 Hz. FP-A Case. Mil Type: FR6RX33YY1.

**FLH-600:** Flat package low pass filter, source and load 10K ohms. Units are within 1 db from DC to 450 Hz, 3 db ±1 db at 600 Hz, and have an attenuation of at least 40 db at frequencies above 800 Hz. FP-A Case. Mil Type: FR6RX11YY1.

**FLH-5000:** Flat package low pass filter, source and load 10K ohms. Units are within 1 db from DC to 4.2 kHz, 3 db ±1 db at 5 kHz, and have an attenuation of at least 43 db at frequencies above 6400 Hz. FP-B Case. Mil Type: FR6RX11YY1.

**FLL-3500:** Flat package low pass filter, source and load 600 ohms. Units are within 1 db from DC to 3 kHz, 3 db ±1 db at 3500 Hz, and have an attenuation of at least 40 db at frequencies above 4500 Hz. FP-A Case. Mil Type: FR6RX33YY1.

**FLL-18000:** Flat package low pass filter, source and load 600 ohms. Units are within 1 db from DC to 15 kHz, 3 db ±1 db at 18 kHz, and have an attenuation of at least 43 db at frequencies above 23 kHz. FP-A Case. Mil Type: FR6RX11YY1.

**FLL-50000:** Flat package low pass filter, source and load 600 ohms. Units are within 1 db from DC to 42 kHz, 3 db ±1 db at 50 kHz, and have an attenuation of at least 43 db above 64 kHz. FP-B Case. Mil Type: FR6RX11YY1.

**FBH-1:** Flat package Broad Band Pass Filter has a source and load of 10K ohms. Units are within 3 db from 1 kHz to 2 kHz, and have an attenuation of at least 36 db at frequencies below 500 cps and above 4 kHz. FP-C Case. Mil Type FR6RX22YY1.

**FBH-10:** Same as FBH-1, except less than 3 db from 10 kHz to 20 kHz, attenuation of at least 36 db below 5 kHz and above 40 kHz.

## INTERSTAGE AND LINE FILTERS

Available in stock frequencies listed below (numerical part of type — number is center frequency in Hz on band pass or cutoff frequency in Hz on low and high pass filters). Compact shielded cases hermetically sealed to MIL-F-18327 specs. BMI, LMI, BML Cases: 1⅜" x 1 1⁄16" x 1⅝" h.; wt., 6 oz. HMI, HML, LML Cases: 1⅜" x 1 1⁄16" x 2½" h.; wt., 9 oz. The BMI filters are band pass interstage units designed to operate between 10,000 ohms and a grid. They provide a gain of 2 at center frequency. BTI units are same as BMI, but 10,000 ohms output. BML band pass filters, similarly, work into a grid, but have an input impedance of 500/600 ohms. They provide a gain of 9.

HMI filters are high pass interstage units.

LMI filters are low pass interstage units.

HML filters are high pass with input and output impedance of 500/600 ohms.

LML filters are low pass filters with input and output impedance of 500/600 ohms.

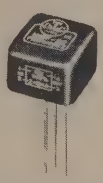
## MNF/MWF BAND PASS TELE-MINIFILTER

Both MNF and MWF types are designed for 10K source and load impedance. Low profile and pin terminals make these filters ideally suited for printed circuit applications. Mil-F-18327 Type FR7RX22ZZ1

MNF filters are down less than:
3 db. at ±7.5% of Center Frequency.
15 db. min at ±25% of Center Frequency.
Attenuation is greater than 40 db. beyond 1.75 x Center Frequency and .58 x Center Frequency.

MWF filters are down less than:
3 db. at ±15% of Center Frequency.
15 db. min. at ±50% of Center Frequency.
Attenuation is greater than 40 db. beyond 2.5 x Center Frequency and .4 x Center Frequency.



**MNF-.4 thru MNF-5.4**
1⅜" sq. x ½" high
Weight 1 oz.

**MNF-7.35 thru MWF-70**
2⅜2" sq. x ½" high
Weight ⅓ oz.

| UTC Type | Center Frequency kHz | Band Width± (%) |

## MINIFILTERS*

These units provide almost the same characteristics as the standard interstage units listed at the bottom left, although extremely miniaturized. Hermetically sealed to MIL-F-18327 specs. B Type Case: ¾" x ¾" x 1⅛" h.; wt., 1 oz. H and L Cases: 1" x 1" x 1⅜"h; wt., 2¼ oz. Center frequency in Hz on band pass or cutoff frequency in Hz on low and high pass filters is indicated by type numbers."

BPM units (BAND PASS) have 2:1 gain. Attenuation is approximately 2 db ±3% from center frequency, and 35 db per octave as shown. source 10,000 ohms, output to grid, tapped for 10,000 ohms.

BPM units (band pass) have a 2:1 gain grid output. Attenuation is less than 2 db ±3% from center frequency and 35 db per octave. Source 10,000 ohms, output to grid, tapped for 10,000 ohms. Can be connected for band reject response."
Source and load 10,000 ohms.
LPM units (LOW PASS) are down less than 6 db at cutoff frequency, and more than 30 db at 1.5 cutoff frequency, 40 db at 1.65 cutoff frequency. Source and load 10,000 ohms.

# TRW UTC TRANSFORMERS FILTERS & INDUCTORS

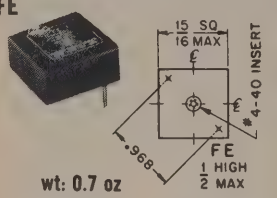
## FE, FI MINIATURE INDUCTORS

**DESIGNED, MANUFACTURED AND TESTED TO COMPLETE MIL-T-27**

**SPECIFICATIONS**

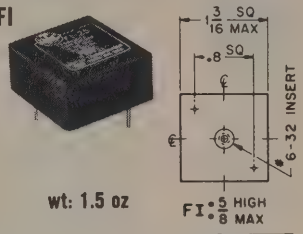
FE, FI miniature inductors are ideal for transistor and printed circuit applications, having both pin terminals and a molded flat construction. These units are symmetrical toroids providing maximum Q in minimum size. The FE and FI inductors are adjusted at 1V, 1 kHz. All units are adjusted to a tolerance of ±1%. The maDC max. shown is for approximately 5% drop in inductance. The temperature stability is unequalled from −55°C to +100°C. For AC level limitations, a general rule of thumb would be to consider the maximum AC current approximately equal to the maximum DC current rating. All units Mil Type: TF5R20ZZ.

FE

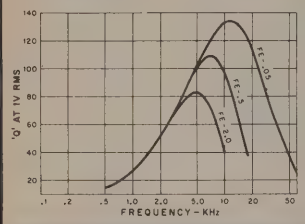


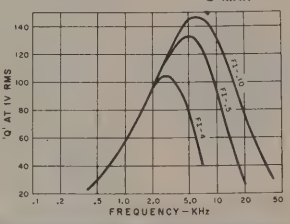
wt: 0.7 oz

FI



wt: 1.5 oz





| Type No. | Ind. Hy (0 DC) | maDC Max. | DCRΩ Max. |

| MQL-4 | 400 | 100 | 2100 |
| MQL-5 (For 60 Hz and lower) | 2500 | 625 | 13K |

## VARIDUCTORS

These variable inductors are ideal for use in tuned circuits, equalizers, oscillators, etc.

## HVC, TVC VARIABLE INDUCTORS

**PACKAGING** — Hermetically sealed. Metal encased. Inductance variation controlled by adjustment screw on top of case. Range is covered in 900° rotation. Setting is positive. TVC is tapped version of HVC, with taps at 30% and 50% of total turns.

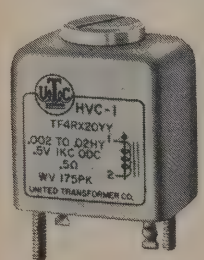
**RANGE** — HVC, TVC +200% −70% of nominal value.

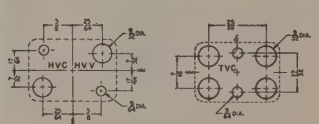
**TEMPERATURE STABILITY** — At mean inductance, from −55°C to +105°C. HVC & TVC: ±1.5%.

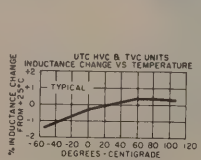
**MIL TYPE TF4R20YY Size** — 1⅛ x 25/32 x 1 3/32 h, Wt. 2 oz.

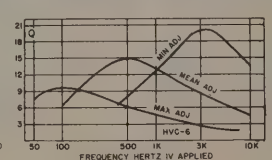
| Type No. | Tapped Type No. | Min. Hys. | Mean Hys. | Max. Hys. | maDC | DCRΩ +20% |
|---|---|---|---|---|---|---|
| HVC-1 | TVC-1 | .002 | .006 | .02 | 100 | .5 |
| HVC-2 | TVC-2 | .005 | .015 | .05 | 60 | 1.4 |
| HVC-3 | TVC-3 | .011 | .040 | .11 | 40 | 3.6 |
| HVC-4 | TVC-4 | .03 | .1 | .3 | 30 | 8.6 |
| HVC-5 | TVC-5 | .07 | .25 | .7 | 20 | 22 |
| HVC-6 | TVC-6 | .2 | 6 | 2 | 15 | 55 |
| HVC-7 | TVC-7 | .5 | 1.5 | 5 | 10 | 141 |
| HVC-8 | TVC-8 | 1.1 | 4 | 11 | 7 | 360 |
| HVC-9 | TVC-9 | 3 | 10 | 30 | 5 | 950 |
| HVC-10 | TVC-10 | 7 | 25 | 70 | 3.5 | 2220 |
| HVC-11 | TVC-11 | 20 | 60 | 200 | 2 | 5550 |
| HVC-12 | TVC-12 | 50 | 150 | 500 | 1.5 | 15.6K |

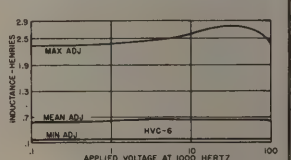
**Choosing Type No.:** If frequency is above 100 Hz, use type providing required inductance between mean and min. values.











# TRW UTC TRANSFORMERS — INDUCTORS

## SR POWER INDUCTORS

SR power inductors are a new development, optimizing saturation characteristics with temperature rise. By special design, TRW/UTC has achieved higher LI² capability with lower DCR for a given size. Another way to see this improvement is to realize that these units produce less drop in inductance with DC for their size than comparable available units. See the curves below for typical capability in each size.

These inductors have low losses in the 3 to 100 kHz frequency range, making them ideal for switching regulator and AC filter choke applications.

The type numbers correspond to their inductance values in microhenries, which are measured at 1 V, 10 kHz, 0 DC with an inductance tolerance of +15%, −5%. Current listings $I_1$ are for approximately 10% drop in inductance with a typical 20°C temperature rise, and listings $I_2$ are for a 20% drop in inductance with a typical 40°C temperature rise.

Values of inductance other than listed in an existing size are available. Part number would be:

SR (A, B, or C)—(inductance in microhy at 0 DC)

Single-winding construction is assumed unless otherwise specified.

## USE OF CURVES

**EXAMPLE 1** Select an inductor to meet a requirement of 200 μhy at 3 amps with a maximum temperature rise of 20°C.

First, calculate LI², where L is in microhenries and I is in amperes. LI² = 200 × 3 × 3 = 1800.

Study the curves below to find the smallest coil that has a temperature rise less than 25°C. For LI² = 1800, SRA ≈ 30°C, which is too high for this requirement. However, the SRB curve shows an acceptable heat rise of 15°C and 92% of initial inductance at LI² = 1800. To meet the requirement of 200 μhy at 3 amps, inductance at 0 DC ≈ $\frac{200}{.92}$ = 217. Look in the itemized listing for an appropriate coil. Select SRB-220. Recalculate LI² = 220 × 3 × 3 = 1950. Check the curve to verify that the heat rise is still under 20°C for the new value of LI².

**EXAMPLE 2** Select an inductor to meet a requirement of 750μhy minimum at 0 DC, with a maximum range in inductance of 15% at 1 amp and 25% at 1.5 amp. Looking at the itemized listing, select SRA-800. Calculate LI² as in Example 1. For 1 amp, LI² = 800; for 1.5 amp, LI² = 1800.

Check the SRA curve for the drop in inductance. It is less than 10% at 1 amp, and less than 20% at 1.5 amp, which is acceptable.

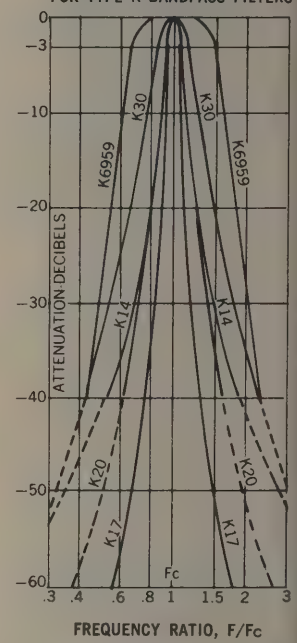
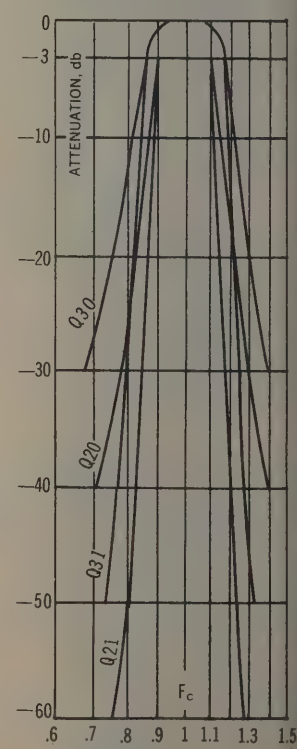
***The bandwidth for any of the above filters can be increased or decreased to specification.***

TYPICAL RESPONSE CURVES FOR TYPE K BANDPASS FILTERS

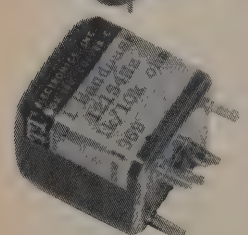


FREQUENCY RATIO, F/Fc

TYPICAL RESPONSE CURVES FOR TYPE Q BANDPASS FILTERS



FREQUENCY RATIO, F/Fc



**WIDE BAND FILTERS:** Bandwidths of ±16% or greater can be obtained by ordering TTE standard High pass and Low pass filter sections as a composite network. Select numbers from the Series H and J listings on the next page which give the desired attenuation slopes and combine these numbers. For example to obtain a slope of 40db at 0.65 of the lower frequency cut-off, $F_{c1}$, (High pass section) and 40db at 1.6 of the upper frequency cut-off, $F_{c2}$, (Low pass section) use H6959. **THE HIGH PASS SERIES NUMBER IS FIRST, FOLLOWED BY THE LOW PASS NUMBER.** Types with dissymmetrical attenuation slopes can be combined. Also specify the 3db down cut-off frequencies $F_{c1}$ and $F_{c2}$ and impedance. The price is the sum of the HP and LP section prices.

**INSERTION LOSSES** for bandpass types between equal terminations are from 0.5 to 6db depending upon bandwidth, frequency and size. K10 and K11 types have about 10db, and K12 types about 5db flat loss. **SPECIALS** are available for center frequencies from 10Hz upward and 60db to 3db bandwidth ratios as sharp as 2.0:1. **TO ORDER** Specials, also specify (5) bandwidth and (6) stop band attenuation required.

**TO ORDER BANDPASS FILTERS** — Specify (1) TTE Series No., (2) minus 3db frequencies, (3) source impedance, (4) load impedance. **PRICES** $39 to $160 each.

**TELEMETERING:** Refer to Series K20, K21B, K30, K31B, Q20, Q21, Q30 or Q31.
**TO ORDER** specify IRIG Channel number, source and load impedances.

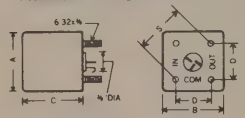
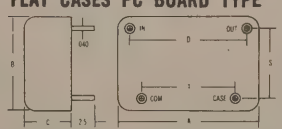
**CHASSIS MOUNT TYPE**



**FLAT CASES PC BOARD TYPE**



FROM 500KHz UPWARD FLAT CASE "COM" IS CONNECTED TO CASE.

**BNC AND SMA CONNECTIONS ARE AVAILABLE**

**NOTES:** TTE Filters are epoxy encased within hermetically sealed steel cases. The case finish is copper plate per MIL-C-14550 under fused tin per MIL-T-10727A. The maximum power output without de-tuning is 10 to 20 milliwatts for most low frequency types. K10 and K12 types are tested at 100mV and B83 types at .77V output for all imped. levels. Terminations are regarded as resistive unless otherwise specified.

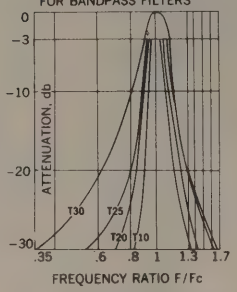
| T30 | 100MHz | 300MHz | $\pm 10\% F_c$ | 30db at $.35F_c$ & $1.65F_c$ | 50 | 33 |

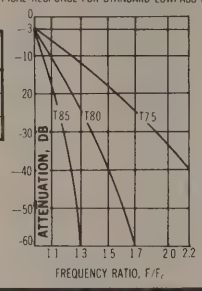
TYPICAL RESPONSE CURVES FOR BANDPASS FILTERS

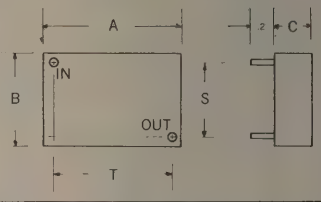


### LOWPASS — ANY FREQUENCY FROM 10MHz TO 500MHz

| Series | Attenuation, db | Cut-off Ratio | Source & Load Ohms | Case No. |
|---|---|---|---|---|
| T75 | 40 | 2.2 | 50 | 33 |
| T80 | 60 | 1.7 | 50 | 42 |
| T85 | 60 | 1.3 | 50 | 44 |

TYPICAL RESPONSE FOR STANDARD LOWPASS FILTERS





| Case | A | B | C | S | T |
|---|---|---|---|---|---|
| 33 | 1.16 | .66 | .38 | .38 | .8 |
| 36 | 1.6 | 1.0 | .5 | .65 | 1.3 |
| 42 | 2.2 | .74 | .38 | .44 | 1.9 |
| 44 | 3.0 | .75 | .38 | .44 | 2.7 |

**TO ORDER BANDPASS** Specify (1) TTE Series Number, (2) Center Frequency, (3) Minus 3db frequencies. The approximate price is $65. Other Bandwidths may be specified.

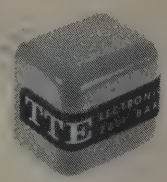
**TO ORDER LOWPASS** Specify (1) TTE Series Number, (2) Cutoff frequency.

**PRICES** $47 to $110.

## SUBMINIATURE

### BANDPASS FILTERS FOR ANY FREQUENCY FROM 300Hz TO 100MHz

| Series | $F_c$ Center Freq. Range Min. | Max. | Bandwidth @ −3db Max. | Stopband Attenuation | Source Ohms Min. | Source Ohms Max. | Load Ohms Min. | Load Ohms Max. | Case No. |
|---|---|---|---|---|---|---|---|---|---|
| S10 | 300Hz | 1KHz | $\pm 7.5\% F_c$ | 40db at $.55F_c$ & $1.8F_c$ | 10k | 10k | 10k | 10k | 31 |
| S11 | 1KHz | 5KHz | $\pm 7.5\% F_c$ | 40db at $.55F_c$ & $1.8F_c$ | 1k | 10k | 1k | 10k | 31 |
| S12 | 5KHz | 50KHz | $\pm 7.5\% F_c$ | 40db at $.58F_c$ & $1.75F_c$ | 1k | 1k | 1k | 1k | 30 or 31 |
| S13B | 50KHz | 999KHz | $\pm 7.5\% F_c$ | 40db at $.58F_c$ & $1.75F_c$ | 500 | 1k | 500 | 1k | 30 or 31 |
| S14B | 1MHz | 100MHz | $\pm 7.5\% F_c$ | 40db at $.58F_c$ & $1.75F_c$ | 50 | 500 | 50 | 500 | 31 |
| S20 | 300Hz | 1KHz | $\pm 15\% F_c$ | 40db at $.4F_c$ & $2.5F_c$ | 10k | 10k | 10k | 10k | 31 |
| S21 | 1KHz | 5KHz | $\pm 15\% F_c$ | 40db at $.4F_c$ & $2.5F_c$ | 1k | 10k | 1k | 10k | 31 |
| S22A | 5KHz | 50KHz | $\pm 15\% F_c$ | 40db at $.4F_c$ & $2.5F_c$ | 1k | 10k | 1k | 10k | 30 or 31 |
| S23B | 50KHz | 999KHz | $\pm 15\% F_c$ | 40db at $.4F_c$ & $2.5F_c$ | 500 | 1k | 500 | 1k | 30 or 31 |
| S24A | 1MHz | 100MHz | $\pm 15\% F_c$ | 40db at $.4F_c$ & $2.5F_c$ | 50 | 500 | 50 | 500 | 31 |



**TO ORDER BANDPASS** specify (1) TTE series number, (2) center frequency, (3) source and load impedance. The approximate price is $78 each.

**TO ORDER HP** and **LP** specify (1) TTE series number, (2) cut-off frequency, (3) source and load impedance. The approximate price is $70 each.

**IMPEDANCE GUIDE:** standard impedances for HP and LP types are 10K (1KHz to 5KHz) 1K to 10K (5KHz to 10KHz) 300 ohms to 1K (10KHz to 100KHz) 50 ohms to 1K (100KHz to 500KHz) 50 ohms to 300 ohms (0.5MHz to 1MHz) 50 to 75 ohms (1MHz to 10MHz) 50 ohms (from 10MHz to 100MHz).

**CASE GUIDE:** the standard cases for HP and LP types are case 29 (1KHz to 5KHz) case 30 (5KHz to 1MHz) case 31 (1MHz to 100MHz).

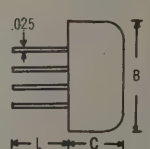
### HIGHPASS
FROM 1KHz to 100MHz

| Series | Min. Attn. db | Cut-off Ratio F/FC |
|---|---|---|
| S60 | 30 | 1.41 |
| S61 | 40 | 1.67 |
| S62 | 50 | 1.96 |
| S63 | 60 | 2.45 |

### LOWPASS
FROM 1KHz to 100MHz

| Series | Min. Attn. db | Cut-off Ratio F/FC |
|---|---|---|
| S40 | 30 | .7 |
| S41 | 40 | .59 |
| S42 | 50 | .51 |
| S43 | 60 | .4 |

| Case | A | B | C | T | L |
|---|---|---|---|---|---|
| 29 | .75 | .75 | .75 | .1 | 1.0 |
| 30 | .75 | .75 | .5 | .1 | 1.0 |
| 31 | 1.19 | 1.19 | .5 | .2 | 1.0 |

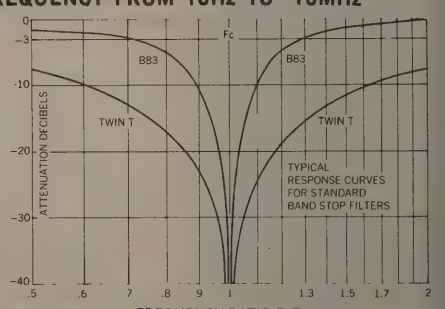


**BNC AND SMA CONNECTORS ARE AVAILABLE**

## BAND REJECT

### STANDARD FILTERS FOR ANY CENTER FREQUENCY FROM 10Hz TO 10MHz

| Series | $F_c$ Center Freq. Range Min. | Max. | Bandwidth −3db | Attenuation | Impedance Ohms Min. | Impedance Ohms Max. | Circuit | Case No. |
|---|---|---|---|---|---|---|---|---|
| B83 | 10Hz | 1MHz | $.77F_c$ & $1.3F_c$ | 50db Notch | 50 | 1 Meg. | L-C | 4 |
| D | 10Hz | 100KHz | $.25F_c$ & 4 $F_c$ | 50db Notch | SEE ORDERING INSTRUCTIONS BELOW | | Twin-T | 2 |
| F | 10Hz | 100KHz | $.25F_c$ & 4 $F_c$ | 60db Notch | | | Twin-T | 2 |
| R20 | 100Hz | 3999Hz | $BW_{3db}/BW_{40db} \leq 5$ | | 10K | 50K | L-C | 4 or 13 |
| R30 | 4KHz | 10MHz | For $BW_{40db} \geq 10\% F_c$ | | 50 | 10K | L-C | 4 or 13 |



**TO ORDER BAND REJECT FILTERS** — Specify (1) TTE Series No. or Letter, (2) center frequency, (3) source impedance, (4) load impedance. For Series R20 and R30 specify 40db bandwidth. Twin-T prices and cases apply to all filters using capacitor values from 0.1 MFD to 500 pF. $C = 1/8.85FHz\ (R_{source}R_{load})^{1/2}$. C is in farads. Filters with null frequencies as low as 1Hz are available. Terminations are regarded as resistive unless otherwise specified.

**PRICES** $19 to $64.

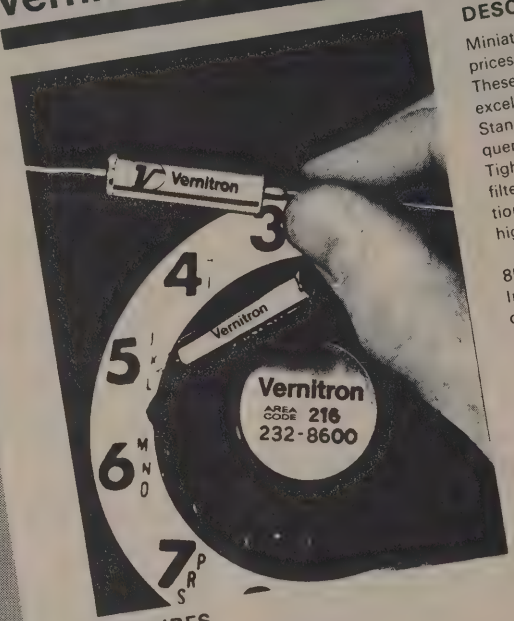
## Vernitron CERAMIC LADDER FILTERS — 9, 11 and 17-disc



### DESCRIPTION

Miniature ceramic i-f filters are available at reasonable prices for use in Military and commercial equipment. These rugged, light weight, fixed-tuned devices offer excellent selectivity and stability in less than 0.1 cu. in. Standard stop band rejection to 80 dB and center frequency tolerance varies between ± 2 and ± 3 kHz. Tighter tolerances available on special order. These filters are designed for communications circuit applications where precise center frequency tolerance and high stop band rejection are required.

Standard models in 6 dB bandwidths from 2 kHz to 85 kHz are available at 455• kHz center frequency. Input and output impedence is between 1000 and 2000 ohms.

•Also available in 500 kHz center frequency.

### APPLICATIONS

These Ladder Filters are ideal for transistorized i-f amplifier circuitry as well as IC's in AM and FM sets. Their small size, ruggedness and high stopband rejection make them particularly suitable for airborne and hand-held transceivers.

### FEATURES

- Stopband Rejections to 80 dB
- Small Size
- Lightweight
- Shape Factor ≤ 2:1
- Hermetically Sealed
- Vibration and Shock Resistant
- Excellent Stability
- Fixed-Tuned

**100-700 kHz**

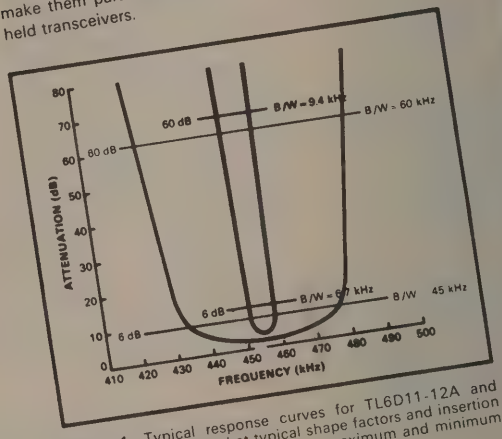


Figure 1. Typical response curves for TL6D11-12A and TL40D11-72A. Note that typical shape factors and insertion losses are considerably better than maximum and minimum values shown in table below.

## LADDER FILTERS

Series LTL

100 to 270 kHz

*Bandpass capabilities 1 to 10%*

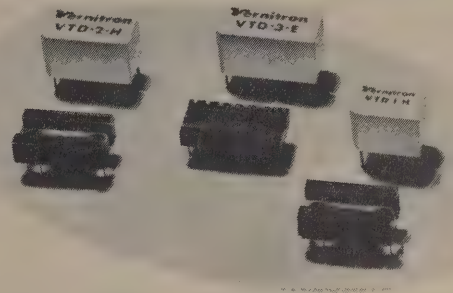
For the medium-frequency range, these rugged ceramic bandpass filters offer advantages in price and size over LC filters. Typical shape factors of 2.0 to 1 are achieved in this unique ladder design.

Ideal for navigation and instrumentation applications.

**Any Operating Frequency Between 100 kHz and 270 kHz.**

*SEND FOR BULLETIN 94043*

## 455 kHz LOW-COST MINIATURES



*For today's compact COMM receivers*

Vernitron has designed the new "VTD" Series of Ceramic Ladder Filters in 3 model groups. VTD-1 models offer 40 dB Bandwidth and stopband of 25 dB to 27 dB. VTD-2 offers 50 dB Bandwidth and stopband of 30 dB to 40dB, and VTD-3 offers 60 dB Bandwidth and stopband of 40 dB to 45 dB. VTD-4 offers 55 dB stopband and VTD-5 offers 70 dB Bandwidth and 60 dB stopband.

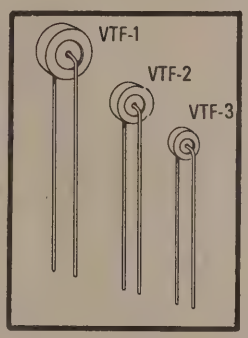
*Bulletin 940 VTD 1-2-3-4-5*

New Miniature Flat Pack Available Summer 1978

## RESONATORS FOR OSCILLATOR CONTROL

Series VTF

175 to 1006 kHz



Series VTF-1/175-249 kHz

Series VTF-2/250-346 kHz

Series VTF-3/347-1006 kHz

**Applications:** Digital clock generators, oscillator elements, frequency-selective bypass elements, coupling elements, bandpass filters, notch filters, data transmission.

**GENERAL SPECIFICATIONS**

| | |
|---|---|
| Resonant Frequency Tolerance | 1.0% to 2.0% dependent on frequency |
| Temperature Stability | 0.2% of resonant frequency |
| Operating Range | —20°C to +60°C. |
| Resonant Impedance | Less than 30 ohms |

*Bulletin 940 VTF*

## $f_o$–7.5 to 50 kHz

*Designed for Omega Applications*

**LOW FREQUENCY FILTERS (LF)**

Single Resonator
2, 3 or 4 Resonator
Cascades

High-performance miniature for LF communications or Omega systems—featuring selection of any $f_o$ from 7.5 to 50 kHz. Single-resonator units have rejection to greater than 40 dB; cascaded units to above 90 dB. Standard Omega models at 10.2, 11.33 and 13.0 kHz, available in commercial or hermetically-sealed militarized versions.

**FEATURES**

- **Any $f_o$ Between 7.5 and 50 kHz**
- **Phase Stability <1.5° Over 60 dB Range**
- **Temp. Stability Within 0.2%**
- **Low Insertion Loss**
- **Passive—No External Power Req'd**
- **Fixed-tuned**

**APPLICATIONS**

Low frequency receivers, specifically Omega series; selective calling, underwater sound, command-destruct; air or maritime navigation receivers.

**Write for Data Sheet 94037**

# CAPTIVE HARDWARE

See other Raytheon Products in EEM

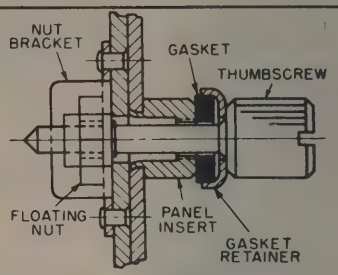
Opto-electronics—Section 3700
Switches—Section 5100
Knobs—Section 2400
Test Jacks—Section 2100

## CAPTIVE HARDWARE

Raytheon captive hardware was designed to fill the need for a standard line of stainless steel fastening hardware which would meet government specifications. MIL-E-16400 (ships) and when painted or dull—MIL-E-5400 and MIL-P-11268 (sig C).

Available in a variety of sizes to handle almost any requirement, the complete captive assembly consists of a slotted-head thumb screw, an insert bushing for securing the thumb screw to the panel, a captive floating nut assembly which is fastened to the chassis member or rack, and a gasket retainer and rubber gasket for use when a dust proof, splash proof seal is required.

The panel insert is secured in a hole of suitable dimensions by flaring the end on an arbor press. The nut assembly is fastened to the chassis member or rack with either rivets or mounting hardware.



### MATERIALS

**Screw**—303 stainless steel per QQ-S-763, Class 303, Cond. A passivated per MIL-F-14072
**Insert**—302 stainless steel per QQ-S-763, Class 302, Cond. A
**Gasket**—Rubber per MIL-R-3065, RN500B
**Gasket Retainfer**—302 stainless steel per QQ-S-766, Class 302
**Nut Bracket Assembly**—Cold rolled steel bracket per QQ-S-692, MIL-B-12128A. Cadmium plated per QQ-P-416, Type II, Class I with iridescent chromate film.

## DATA ACQUISITION SYSTEMS

**A.D. Data Systems offers a low cost approach to datalogging thru a series of loggers with output in computer compatible format. Units are available with RS 232 output or magnetic tape cassette, so that the data can be processed by any RS 232 compatible equipment.**

ML-1
MINILOGGER

### SERIES ML MINILOGGERS

Portable, battery operated loggers with magnetic tape cassette output. Ideal for use in remote locations for collecting data to be processed in a central location.

#### ML-1 SINGLE CHANNEL

Displays and records analog data at selected time intervals, with elapsed time recorded after each block of data. Options include inputs from A.C. signals, thermocouples, current transmitters and similar instruments.

#### ML-10 TEN CHANNEL

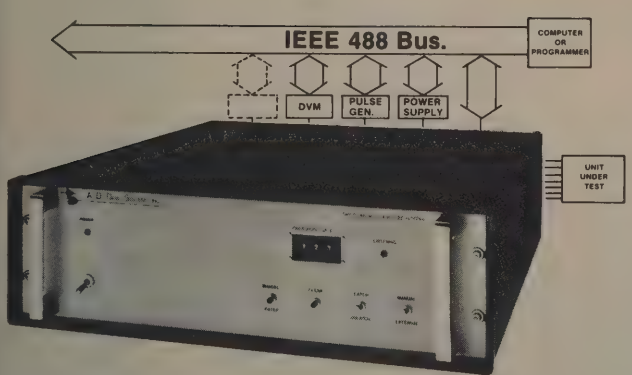
Records up to 10 analog inputs, 32 digital inputs and real time clock with scan interval selection. Clock, digital inputs, and analog data are displayed on the front panel. Options are available for measuring different signal inputs such as thermocouples and for outputs in RS 232 compatible format.

### SERIES 14 DATALOGGERS

Multiple analog inputs, expandable in 10 channel modules, with autoranging thru ±.1999V, ±1.999V, and 19.99V. Real time digital clock and digital inputs with scan interval select. Output in RS 232 compatible format at either 110, 300, 1200, or 2400 baud to drive terminals, printers, or datacassettes. Also available with options for thermocouple measurements.

## AUTOMATIC TEST EQUIPMENT

### SWITCHING MATRIX



MODEL 56
SWITCHING MATRIX

**SERIES 56 SWITCHING MATRICES** are offered as the most versatile method of switching available for automatic test equipment and similar applications.

The mainframe is available with the following features:

- IEEE compatibility
- 16 bit computer I/O control
- Microprocessor control

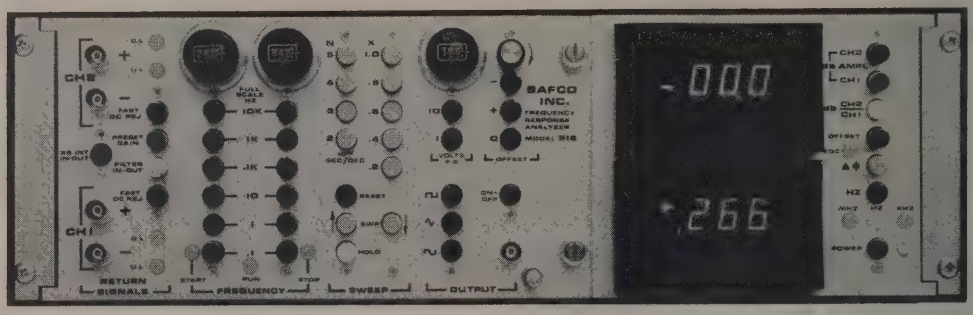
Modules are available with the following features:

- Flexibility in matrix configuration
- High frequency signal switching
- Power level signal switching
- Power switching

# A COMPLETE LINE OF FREQUENCY RESPONSE ANALYZERS

WITH

High Noise & Harmonic Rejection (Fourier Analysis). Direct Readout of Amplitude, Phase Shift, Frequency, AMP. Ratio (db). Fast, Simple Operation. Low Cost, Portable. Calibrated, Low Distortion Test Signal with D.C. Offset.

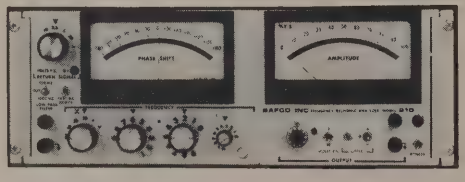


## MODEL 916
## UNIVERSAL TWO CHANNEL SWEEP F.R.A.

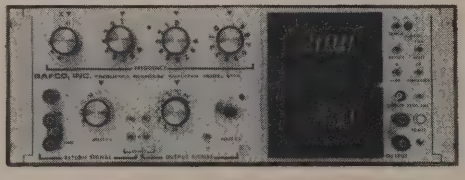
916 - .005 Hz to 10,000 Hz • 916M - .01 Hz to 20,000 Hz • 916H - .025 Hz to 50,000 Hz

- DISPLAYS & PLOTS AMP. RATIO (db) & PHASE SHIFT VS. LOG FREQUENCY
- OPEN LOOP RESULTS FROM CLOSED LOOP TESTS
- AUTOMATIC GAIN CONTROL – 80 db DYNAMIC RANGE IN EACH CHANNEL
- CONTINUOUS SWEEP OVER ANY PORTION OF 6½ DECADE FREQUENCY RANGE
- DIRECT OPERATOR CONTROL OF ALL FUNCTIONS – SWEEP SPEED, SWEEP SENSE, INTEGRATE TIME
- HIGH NOISE & HARMONIC REJECTION – FOURIER INTEGRAL ANALYSIS
- OPTIONS: CARRIER, AMPLITUDE SERVO, MECHANICAL IMPEDANCE

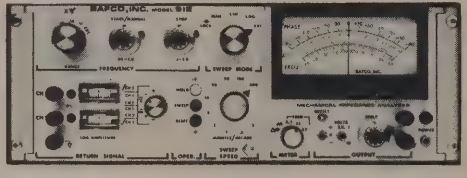
● REMOTE PROGRAMMING – MODEL 920 ●



**MODEL 910-B**
SINGLE CHANNEL – 0.1-20,000 Hz
LOW COST – DUAL METER – CONTINUOUS READING



**MODEL 911A-2D**
SINGLE CHANNEL – .01 -10,000 Hz
DUAL DIGITAL READOUTS – AMPLITUDE RATIO (DB) & PHASE SHIFT



**MODEL 912**
MECHANICAL IMPEDANCE ANALYZER – TWO CHANNEL 1.-20,000 Hz. A.G.C. OVER 60 DB IN EACH CHANNEL. DIRECT PLOT OF AMPLITUDE RATIO (DB) AND PHASE SHIFT VS. LOG FREQUENCY. ARTIFICIAL INTEGRATION.

BAFCO, INC. welcomes your inquiry, and is pleased to assist you in selecting the model analyzer best suited to your frequency response measurement needs. Send for complete catalog of all models.

## AC VOLTMETERS and MULTIMETERS

Model 3630A

■ **AC Voltmeters Digital and Analog.** True RMS, Average and Peak Responding. Sensitivities from 100 μV to 1 kV full scale. Bandwidths from 0.1 Hz to 1 GHz. 19,999 counts. AC/DC coupled models. Resolution to 1 μV; Accuracy to 0.01%. Linear and log voltage and dB indication. Floating inputs/battery and line powered. IEEE 488 Adaptable Models.

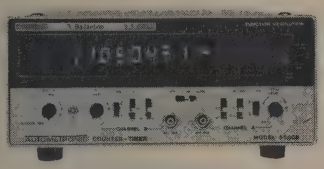
**REQUEST CATALOG V78**

■ **Portable Digital Multimeters, RMS Responding.** 1999 counts. 6 functions. 35 ranges from 10 μV to 1200 V ac and dc; 10 nA to 1.999 A ac and dc; 10 milliohms to 19.99 megohms. Accuracy to 0.05%.

Model 3028B

Over 25 Commercial, Industrial and Military Models to Fit Your Application.

## FREQUENCY COUNTERS and COUNTER-TIMERS



Model 5500B-08

■ **Intelligent Universal Counter Timers.** Model 5500B: DC to 110 MHz, 8 digits, automatic resolution, ATE oriented. IEEE 488 Adapter.

Model 5500B-Opt. 35: to 1 GHz.

**REQUEST CATALOG C78**

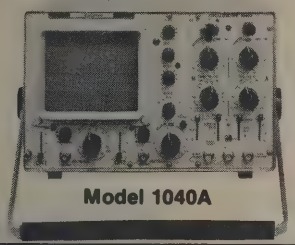
■ **Communications Counters.** Sensitivities to 15 mV.

Model 5720A: Low cost, 8 digit, 80 MHz. 0.01 Hz resolution in 1 sec.

Model 5725B: Low cost, 6 digit, 225 MHz for field, CB, and general usage.

Model 5760A: 600 MHz, 8 digit, line/battery, operated. TCXO and proportional oven clock positions.

## PORTABLE OSCILLOSCOPES/DUAL CHANNEL



Model 1040A

■ **15MHz/20MHz/40MHz Models.** Sensitivities to 50 μV/cm; mixed and delayed sweeps to 20 ns/cm. Field/bench capability. Rugged. Reliable.

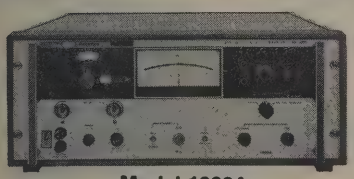
■ **10MHz Miniscope Models Tool Kit Size.** Dual trace.

**Other Instruments:**

- **Oscilloscope Calibrators**
- **Time Mark Generators**
- **Transient Recorders**

**REQUEST CATALOG O78**

## AC CALIBRATION STANDARDS and THERMAL TRANSFER DEVICES



Model 1600A

■ **Automatic AC/DC Transfer Standard.** DC to 100 MHz. 0.25 V to 1200 V/100 MHz.

■ **Coaxial Thermal Converters to 1 GHz.** 0.1 V to 135 V.

■ **Micropotentiometers to 900 MHz.** 17 μV to 1.4 V.

■ **RF Voltage Comparators.** 10 mV to 10 V/1 GHz.

■ **AC/DC Voltage Calibrators.** Accuracy to 100 ppm . . . Resolution and repeatability to 20 ppm. Ranges from 17 μV to 1 kV.

**REQUEST CATALOG S78**

All fully NBS traceable and certifiable. Complete capability for traceable voltage and current and power metrology measurements.

## DIGITAL PANEL METERS

Model 8300B

**39 Voltage and Current Models. 4½, 3½, 2½ digits.** Superior long time stability. Accuracies to ± (0.01% rdg + 0.01% fs).

**Longtime reliability — 3 years LCD display warranty.**

**0.5" and 0.7" high characters.** High contrast illuminated white on black displays and daylight-viewing power-saving reflective displays.

**8300B Series** — 20 mV to 1000 V; 2 μA to 2A; less than 1 W power consumption.

**8300E Series Engineering Units** — Readout in actual units of measurement as specified.

## CLAMP-ON CURRENT-MEASURING PROBE — F. W. BELL, Inc.

# F. W. BELL CURRENT GUN™ PROBE

## DESCRIPTION

The Model CG-100A Current Gun Probe lets you measure currents from dc to 1 kHz and from 0 to 200 amps accurately, quickly and safely on your voltmeter or scope.

No need to break the circuit or disturb insulation. Merely squeeze the trigger and slip the probe over any conductor up to ¾-inch in diameter. This Hall effect device is the end result of technology developed and perfected over the years by F. W. Bell and proven in the 1776 Current Meter.

## SPECIFICATIONS

| | |
|---|---|
| ACCURACY: | 2.0% of rated output |
| RANGES: | ±10 A (dc or Peak ac)<br>±100 A (dc or Peak ac)<br>100% overrange capability* |
| OUTPUT: | ±1 V/10 A<br>±1 V/100 A |
| FREQUENCY RESPONSE: | dc to 1.0 kHz<br>operable to 5.0 kHz* |
| OUTPUT IMPEDANCE: | approximately 125 Ω |
| RECOMMENDED LOAD: | ≥100 kΩ |
| OPERATING TEMPERATURE RANGE: | −10°C to +65°C |
| BATTERY LIFE:<br>(4 AA SIZE REQUIRED) | Mercury—60 hours continuous<br>Alkaline—30 hours continuous<br>Nicad—8 hours continuous |
| PROBE ISOLATION CAPABILITY: | 600 V dc or Peak ac |
| APERTURE SIZE: | 0.75" (19 mm) diameter |
| WEIGHT: | approximately 2 lbs. (0.9 kg) |
| | *with slightly reduced accuracy |

## ORDERING INFORMATION

BELL INC.®

# CURRENT MEASURING AND SENSING EQUIPMENT — F. W. BELL, Inc.

## DIGITAL CURRENT METER

Model 1776

### DESCRIPTION

The Bell model 1776 digital current meter provides a revolution in metrology via its ability to accurately measure ac, dc, (and ac on dc) current with non-contact, clamp-on probes. No longer is it necessary to break the circuit to make a current measurement. This time-saving feature is extremely helpful in the troubleshooting, repair and design fields. Now it's possible to obtain current measurements more easily and safely than voltage measurements with complete isolation from the bus.

The Bell model 1776 digital current meter introduces virtually no resistance on dc readings and extremely small impedance on ac readings. In this way, measurements can be made with a minimum of disturbance in the measured circuit.

The unique circuit design, coupled with the digital readout, provides a wide dynamic range of measurements with excellent resolution. Peak read and hold capability is standard. This function permits you to read and hold the reading of the peak current appearing on the measured conductor. The 1776 is designed for portable operation with internal rechargeable batteries and for 115/230 Vac, 50-60 Hz line operation.

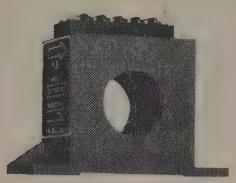
### PROBES

There are three clamp-on probes available for the Bell 1776 digital current meter. Each probe is designed for a distinct full scale range. These ranges are 1000 amperes, 100 amperes, and 10 amperes. The probes are self-calibrating and are interchangeable on any 1776 digital current meter. The probes have a 100% overrange capability with reduced accuracy.

### SPECIFICATIONS

| | |
|---|---|
| Current Ranges (with applicable probe) | 1000 amperes. F.S.<br>100 amperes. F.S.<br>10 amperes. F.S. |
| Accuracy | |
| dc | ±1.0%. F.S. |
| ac (Sinusoidal) | ±1.0%. F.S. |
| Peak Detection (dc accuracy) | ±2.0%. F.S. |
| Frequency Response | dc to 5 kHz |
| Power Requirements | 115/230 Vac 50/60Hz and internal rechargeable Nicad batteries, with built-in trickle charge circuitry. |

## DC AND AC CURRENT SENSORS



### FEATURES

- Fast-responding
- Non-contact operation
- Output voltage isolated from input
- Very low insertion impedance
- Minimal distortion from adjacent conductors
- Amplified and non-amplified models available

### DESCRIPTION

F. W. Bell current sensors are designed to meet the challenging requirements of many different current measurement applications. The sensors are compact, non-contact, Hall effect devices.

The Bell current sensors function by sensing the magnetic field surrounding a current-carrying conductor.

### SPECIFICATIONS

| model | rated current | rated output | accuracy |

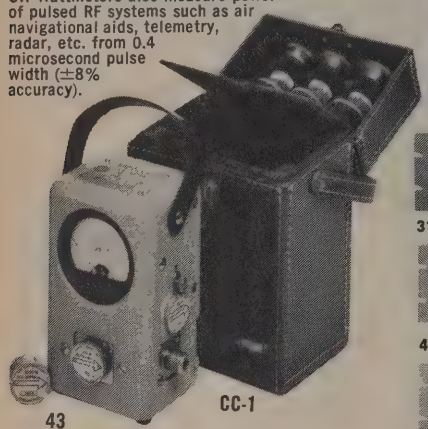
## Quality Instruments For RF Power Measurement

50 ohms nominal

Insertion instruments for measuring and monitoring incident and reflected power in coaxial transmission lines with ±5% of full scale accuracy. Insertion VSWR is less than 1.05. Net power under any load condition is the difference between incident and reflected power readings, which also yield load VSWR from a nomograph. 4311 and 4314 THRULINE Peak and CW Wattmeters also measure power of pulsed RF systems such as air navigational aids, telemetry, radar, etc. from 0.4 microsecond pulse width (±8% accuracy).

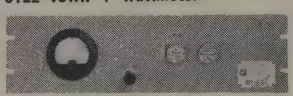


43 CC-1

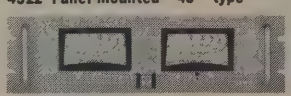
4111-18

460

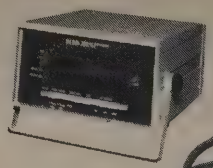
3122 VSWR + Wattmeter



4522 Panel-mounted "43" type



3127 | 3128

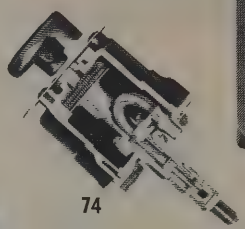


4371 Digital Multirange Broadband Wattmeter, self-contained elements. (Analog Version: Model 4370)

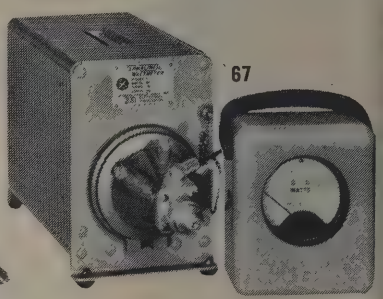
6254

6154

Direct reading instruments for absorbing and measuring RF power. The load section of the TERMALINE Wattmeter serves as a dummy load. The indicating meter is calibrated to read RF power directly in watts with ±5% of full scale accuracy (to 500MHz).



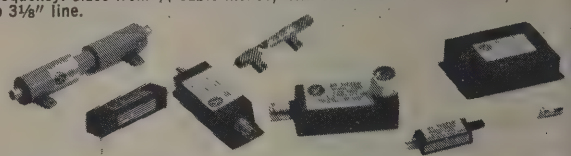
74



67

### COAXIAL RF FILTERS

Custom engineered or field-proven designs. High rejection attenuation filters available with Low-pass cut-off from 16 to 2700MHz (about fifty designs of 400MHz). Hi-pass cut-off frequencies from 30 to 1000MHz, Band-pass as narrow as 5% of center frequency. Sizes from ¼ cubic inches, with subminiature connectors, to 3⅛" line.



## THRULINE® RF Directional Wattmeters

| Model | Connectors | Frequency (MHz) | Power Ranges (Watts) | U.S. Price |
|---|---|---|---|---|
| | | PLUG-IN ELEMENTS | | |
| 43 | QC (1) | For CW, FM, and TV (black level) | | $120 |

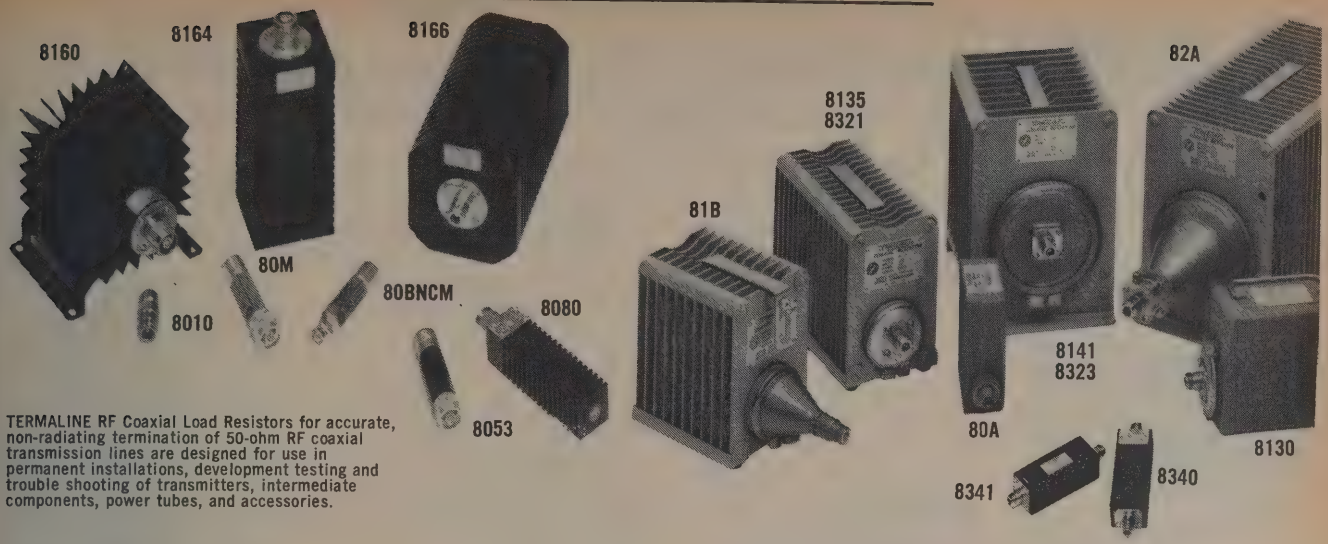
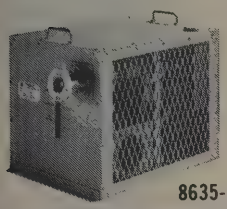
| 74 | 1P6T | 140 | 72-R | 2P-Rev. | 125 |



TERMALINE RF Coaxial Load Resistors for accurate, non-radiating termination of 50-ohm RF coaxial transmission lines are designed for use in permanent installations, development testing and trouble shooting of transmitters, intermediate components, power tubes, and accessories.



8635-115

No external water supply is needed for the new 10kW Self-Cooling MODULOAD® RF Load Resistor Module. In a scant three cubic feet of space, the integral heat-exchanger permits continuous 10kW dissipation in 5° to 45° ambients (−20°C to +20°C with anti-freeze).

**QC-TYPE CONNECTORS (Quick Change):** Adaptable to particular TERMALINE, THRULINE, and TENULINE units, these connectors may be quickly changed in the field. Connector types available are: Female or male BNC, TNC, N, C, SC, HN, LC, UHF, LT, 7/8", and 1 5/8" EIA Flanged.

Normally supplied: (1) Female N, (2) Female LC, (3) Male N.

**OTHER BIRD INSTRUMENTS:** THRULINE® RF DIRECTIONAL POWER SENSORS • SENTRILINE® FILTER-COUPLERS • COAXIAL RF FILTERS • NEW: VSWR/WATTMETERS.

Prices are subject to changes without notice. F.O.B. Cleveland, Ohio.

**Standard Units: Stock to 12 weeks delivery**

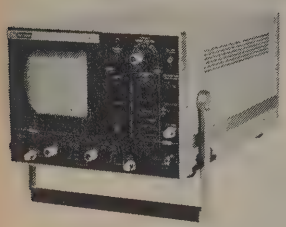
Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

## DUAL-TRACE 5" 30 MHz TRIGGERED SWEEP SCOPE . . . LOWEST PRICE 30 MHz SCOPE WITH SIGNAL DELAY



**Model 1474 / $999.00**
INCLUDING PROBES

### FEATURES

• Rise time 11.7 nS or less • Built-in signal delay line permits view of high frequency pulse rise time • Triggers on signals up to 50 MHz • Mode automatically shifts between CHOP and ALTERNATE as you change sweep time • Checks most digital logic circuitry, including ECL • High accuracy ten position vertical input attenuator • Flat response with smooth rolloff past 30 MHz • Built-in high and low pass filters • Maintains calibration accuracy over 105-130 VAC range • 20 calibrated sweeps — 0.2 μS/cm-0.5 S/cm.

### APPLICATIONS

Microprocessors system development . . . Analysis and troubleshooting of mini-computer and microprocessors . . . Computer terminals . . . Video character generators . . . Video games . . . Broadcast studio application.

Logic and digital design work and troubleshooting, including electronic organs, counters, calculators, phase-locked-loops, DMM's and synthesizers . . . Check the divider network of any system using TTL, DTL, RTL and most ECL logic . . . Measure propagation delays and phase shifts . . . Troubleshoot and maintain video recording systems and equipment . . . Set sync, video and color burst levels in video systems with extreme accuracy . . . Use A-B mode to compare amplifier input output waveforms and display algebraic difference as distortion curve.

### SPECIFICATIONS

VERTICAL AMPLIFIER (Channel A and Channel B.)

Deflection Factor: 5 mV/cm to 5 V/cm, ±3% in 10 ranges, each with fine adjustment.

Freq. Response: DC, DC-30 MHz (−3 dB); AC, 10 Hz-30 MHz (−3 dB).

Rise Time: 11.7 nS or less.

Overshoot: 3% or less.

Input Impedance: 1 MΩ ±2%, 22 pF (±3;F).

Tilt: Less than 5%.

Maximum Input Voltage: 300 V DC + AC peak or 600 V p-p.

Operating Modes: CH-A, CH-B, Dual, Add.

ALT 0.2 μS/cm-0.5 mS/cm.

CHOP 1 mS/cm-0.5 S/cm.

Chop Frequency: 200 kHz ±20%.

Signal Delay: Fixed.

CH B Polarity: NORM; INV.

SWEEP SYSTEM (Common to Channel A and Channel B.)

Type: Automatic and triggered

(NORM) Mode (X-Y operation) CH A = Y, CH B = X.

Sweep Time: 0.2μS/cm-0.5 S/cm ±3% in 20 calibrated steps in a 1-2-5 sequence with vernier adjustment.

Horizontal Position Control: Pull for 5X magnification.

Sweep Magnification: x5 (five times) ±5%.

Linearity: 3% or better.

TRIGGERING

Source: INT CH A, CH B and EXT; X1 and X.1.

Slope: Positive or negative, continuously variable level control; pull for AUTO.

Range: INT DC-5 MHz, .3 cm or less. 5 MHz-30 MHz, 1 cm or less.

EXT. DC-10 MHz, 100 mV p-p or better. DC-30 MHz, 500 mV p-p or better.

Coupling: AC, DC, LF reject, HF reject. (AC) 30 Hz — 30 MHz (LF reject) signals below 10 kHz are attenuated. (HF reject) signals higher than 30 kHz are attenuated.

Non-Distorted Maximum Amplitude: More than 40 mm at 30 MHz: more than 80 mm at 10 MHz.

HORIZONTAL AMPLIFIER (Input through Channel B vertical input).

Deflection Factor: 5 mV/cm to 5 V/cm, ±5%, in ten ranges, each with fine adjustment.

Freq. Response: DC-1 MHz (−3 dB).

Input Impedance: 1 megohm (nominal), shunted by 22 pF (±3 pF).

Input Protection: 300 V DC + AC peak, or 600 V p-p.

X-Y Operation: With SWEEP TIME CM switch in CH.B position, the CH.B input becomes the X input (horizontal) and the CH.B position control becomes the horizontal position control.

OTHER SPECIFICATIONS

Calibration: 0.5 V p-p ±1% square wave at kHz ±10%).

Intensity Modulation: More than ±5V. DC-5 MHz.

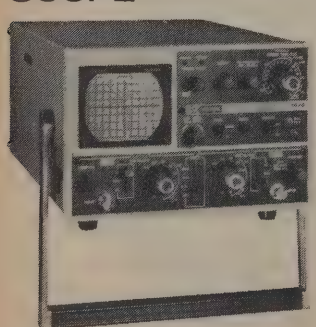
Probes: Two PR-36 probes supplied.

Power Requirements: 115/230 VAC. 50/60 Hz, 25 W.

Size (HxWxD): 18.4 x 25.3 x 36.9 cm (7⅜ x 10⅛ x 14¾").

Weight: 8.8 kg. (19.6 lbs.).

## NEW 15 MHz BATTERY PORTABLE DUAL-TRACE SCOPE



**Model 1432 / $750.00**

### FEATURES

• 15 MHz bandwidth with smooth roll-off; usable response extends beyond 30 MHz • mV/DIV. vertical sensitivity • Operates on 117 VAC, 234 VAC, 12 VDC or optional internal battery pack • Fully regulated high- and low-voltage supplies • Algebraic addition and subtraction of Channel A and B input signals • Nineteen calibrated sweep ranges cover 0.5 microsecond to 0.5 second • TTL Compatible Z-axis input • Compact size; measures only 5.5 x 8.25 x 14.3" • Includes two slim-body 10:1/direct probes and accessory tips • Built-in sync separators.

### SPECIFICATIONS

VERTICAL AMPLIFIER

Deflection Factor: 2mV/div. to 10V/div., ±5%, in 12 ranges, each with fine adjustment.

Frequency Response: DC, 15MHz (−3 dB); AC, 10 Hz-15 MHz (−3 dB).

Rise Time: 24nSec or less. Overshoot: 3% or less.

Input Impedance: 1 megohm shunted by 22 pF (±3 pF).

Non-Distorted Maximum Amplitude: More than 4 div. at 15 MHz.

Maximum Input Voltage: 300 V, DC + AC peak or 600 V p-p.

Operating Modes: Channel A only; Channel B only; A & B (dual); A + B (add); A − B (obtained by inverting CH B when in ADD mode).

Dual-Trace: Trace automatically chopped at all sweep times of 1 mSec/div. and slower; alternate mode automatically selected for all faster sweep times.

Chop Frequency: 200 kHz ±20%.

CH B Polarity: NORM; INV. Selected by mode switch.

Channel Separation: Better than 60 dB at 1 kHz.

SWEEP SYSTEM
(Common to Channel A and Channel B).

Type: Automatic and triggered (NORM).

Sweep Magnification: x5 (5 times) ±10%. Extends maximum sweep rate to 0.1 μS/div.

Sweep Time: 0.5 μS/div.-0.5 S/div. ±5% in 19 calibrated steps in a 1-2-5 sequence with vernier adjustment.

Linearity: 3% or better. 5% or better for 1 μS/div. and 0.5 μS/div. ranges.

TRIGGERING

Source: CH A, CH B, and EXT.

Automatic: Sweep is obtained without an input signal.

Normal: Sweep is obtained with a displayed signal of one division or more.

Slope: Sweep can be set to trigger on the positive- or negative-going slope of the trigger waveform.

TV Sync: Vertical and horizontal sync separator circuitry allows any portion of complex TV video waveform to be synchronized and expanded for viewing. TV-H (line) and TV-V (frame) sync switched automatically by SWEEP TIME/DIV switch. TV-V, 0.5 SEC/div. to 0.1 mSEC/div.; TV-H, 50 μSEC/div. to 0.5 μSEC/div.

Coupling: AC, 20 Hz-20 MHz.

Level: Continuously variable.

Tigger Sensitivity:
INT. NOR: 20 Hz-10 MHz/0.5 div. 20 Hz-15 MHz/1 div.
AUTO: 50 Hz-15 MHz/1 div.
EXT. NOR: 20 Hz-10 MHz/0.5 V pp 20 Hz-15 MHz/1 V pp
AUTO: 50 Hz-15 MHz/1 V pp

External Trigger Specs.: Max. Input Voltage, 50 V p-p or 25 V, DC + AC peak. Input Impedance, 100k (nominal). Input Capacitance, 35 pF (nominal).

HORIZONTAL AMPLIFIER

Input through Channel B vertical input.

Deflection Factor: 2 mV/div., to 10 mV/div., ±5%, in 12 ranges, each with fine adjustment.

Frequency Response: DC to 1 MHz (−3 dB); AC, 10 Hz to 1 MHz.

Input Impedance: 1 megohm (±5%), shunted by 22 pF (±3 pF).

Input Protection: 300 VDC + AC peak, or 600 V p-p.

X-Y Operation: With SWEEP TIME/DIV switch in CH B position, the CH B input becomes the X input (horizontal) and the CH B position control becomes the horizontal position control. Mode (X-Y operation) CH A = Y, CH B = X.

Z-AXIS INPUT

Sensitivity: TTL compatible.

Usable Frequency Range: DC to 1 MHz.

Input Impedance: 10k ohm ±20%.

Maximum Input Voltage: 30 V (DC + AC peak).

OTHER SPECIFICATIONS:

Operating Environment: +0° to +50°C.

Calibration: Internal 1 V p-p ±3% (square wave at 1 kHz ±5%).

CRT: 3" (approx. 1.5 KV) with P31 phosphor; full Mumetal shield.

Power Requirements: 117/234 50/60 Hz AC (selectable to 105-130 V and 210-260 V) or 11 to 15.5 VDC. Power consumption is 30 watts (AC). Optional battery pack available. (Minimum of 2 hours operation per charge.)

Size (Without Handle): (HxWxD) 14 x 21 x 36 cm (8.26 x 5.5 x 4.3").

Weight: 8.3 kg (18.3 lbs) with batteries.

Probes: Two PR-37 10:1/direct probes and accessory tips included.

Options: LC-132 protective carrying case **$25.00, BP-32 battery pack $50.00.**

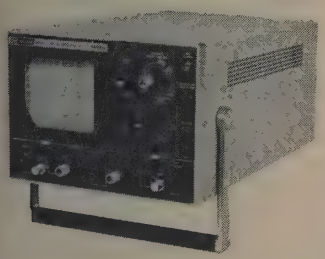
Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

## DUAL-TRACE 5" 15 MHz TRIGGERED SWEEP SCOPE . . . USABLE RESPONSE THROUGH 27 MHz



**Model 1472C/$750.00**
INCLUDING PROBES

### FEATURES

• Mode automatically shifts between CHOP and ALTERNATE as you change sweep time for fast set up • Bright Blue P31 phosphor • Flat in-band response with smooth rolloff past 15 MHz • Maintains calibration accuracy over 105-130 VAC range • Check most digital logic circuitry, including CMOS • Front-panel X-Y operation using matched vertical amps • Algebraic addition and subtraction • Differential input capability • 19 calibrated sweeps — .5 μsec/cm to .5 sec/cm • Sweep to .1 μsec/cm with 5x; 1.5 sec/cm with uncalibrated vernier • Monitor CB AM and SSB • Adjust color video to close tolerances in TV broadcast studies • TV sync separators.

### SPECIFICATIONS

VERTICAL AMPLIFIER

Deflection Factor: 0.01 V/cm to 20 V/cm, ±5%, in 11 ranges, each with fine adjustment.

Frequency Response: DC, DC-15 MHz (−3 dB); AC, 2 Hz-15 MHz (−3 dB).

Risetime: 24 nsec.

Input Impedance: 1 megohm (approx.) shunted by 27 pF (±3 pF).

Maximum Input Voltage: 300 V, DC + AC peak or 600 V p-p.

Operating Modes: Channel A only; Channel B only; Dual Trace (A and B) — trace automatically chopped at all sweep times of 1 msec/cm and slower, alternate mode automatically selected for all faster sweep times; A + B (single-trace algebraic sum of Channels A and B); A-B (single-trace algebraic difference of Channels A-B).

SWEEP

Auto and triggered. 0.5 μsec/cm to 0.5 sec/cm in 19 overlapping ranges.

Sweep Magnification: 5x at all speeds.

TRIGGERING

Source: CH A and CH B, 1 cm deflection minimum. EXT, 1 V p-p sensitivity.

Slope: Positive and negative, continuously variable level control; pull for AUTO.

Range: 20 Hz guaranteed (minimum 1 cm deflection as measured on CRT); 20 Hz-27 MHz typical.

TV Sync: Vertical and horizontal sync separator.

Low Pass Filters: TV sync separators function as 100 Hz-3 kHz (TV-V) and 100 Hz-1 MHz (TV-H) filters.

HORIZONTAL AMPLIFIER

(Input through Channel B vertical input).

Deflection Factor: 0.01 V/cm to 20 V/cm, ±5%, in 11 ranges, each with fine adjustment.

Frequency Response: DC-1 MHz (−3 dB).

Input Protection: 300 V, DC + AC peak, or 600 V p-p.

OTHER SPECIFICATIONS

Calibration Voltage: 1 kHz square wave.

Intensity (Z-Axis) Modulation: 30 V p-p minimum.

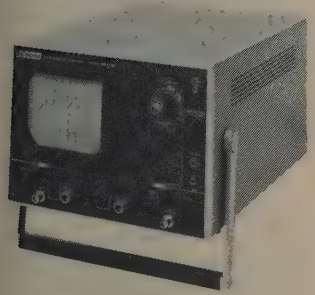
Probes: Two PR-34's supplied.

Power Required: 115/230 VAC, 50/60 Hz, 23 W; CSA-approved three-wire line cord.

Size (HxWxD): 18.4 x 25.3 x 36.9 cm (7⅜ x 10⅛ x 14¾").

Weight: 8.8 kg. (19.6 lbs.).

## DUAL-TRACE 5" 10 MHz TRIGGERED SWEEP SCOPE WITH TTL COMPATIBLE Z AXIS



**Model 1471B/$599.00**
INCLUDING PROBES

### FEATURES

• Mode automatically shifts between CHOP and ALTERNATE as you change sweep time for fast set-up • Bright blue P31 phosphor • 18 calibrated sweeps —1 μsec/cm to .5 sec/cm • Sweep to 200 nsec/cm with 5x magnification • Maintains calibration accuracy over 105-130 VAC range • Front panel X-Y operation using matched vertical amps • Input grounding switches • TV sync separators • Check most digital logic circuitry including CMOS • Character display applications using TTL Z-axis intensity modulation.

### SPECIFICATIONS

VERTICAL AMPLIFIER

Deflection Factor: 0.01 V/cm to 20 V/cm, ±5%, in 11 ranges.

Frequency Response: DC, DC-10 MHz (−3 dB); AC, 10 Hz-10 MHz (−3 dB).

Risetime: 35 nsec.

Overshoot: 3% or less at 100 kHz.

Input Impedance: 1 megohm (approx.) shunted by 25 pF (±3 pF).

Tilt: Less than 5%.

Maximum Input Voltage: 300 V, DC + AC peak or 600 V p-p.

Operating Modes: Channel A only; Channel B only; Channels A and B (dual).

Dual Trace: Trace automatically chopped at all sweep times of 1 msec/cm and slower, alternate mode automatically selected for all faster sweep times.

Chop Frequency: 200 kHz approx.

Channel Separation: Better than 60 dB at 1 kHz.

SWEEP SYSTEM

(Common to Chan. A and Chan. B.)

Type: Automatic and triggered; in automatic mode, sweep is obtained without input signal.

Sweep Time: 1 μsec/cm to 0.5 sec/cm (±5%) in 18 ranges, in 1-2-5 sequence.

Sweep Magnification: 5x at all speeds for maximum sweep speed of 200 nsec/cm.

Linearity: 3% or less.

TRIGGERING

Source: CH A and CH B; triggers at or less than 1 cm deflection. EXT 1 V p-p sensitivity.

Slope: Positive and negative, continuously variable level control; pull for AUTO.

Range: 20 Hz to 10 MHz min. (at or less than 1 cm deflection); triggers to 15 MHz.

TV Sync: Vertical and horizontal sync separator circuitry allows any portion of complex TV video waveform to be synchronized and expanded for viewing. TV-H (line) and TV-V (frame) sync switched automatically by SWEEP TIME/CM switch. TV-V, 0.5 sec/cm to 0.1 msec/cm. TV-H, 50 μsec/cm 1 μsec/cm.

Low Pass Filters: The TV sync separator circuits also function as 100 Hz-3 kHz (TV-V) and 100 Hz-1 MHz (TV-H) filters.

HORIZONTAL AMPLIFIER
(Input through Chan. B vertical input.)

Deflection Factor: 0.01 V/cm to 20 V/cm, ±5%, 11 ranges.

Frequency Response: DC-1 MHz (−3 dB).

Input Impedance: 1 megohm (nom.) shunted by 25 pF (±3 pF).

Input Protection: 300 V, DC + AC peak, or 600 V p-p.

X-Y Operation: With SWEEP TIME/CM switch in CH B position, the CH B input becomes the X input (horizontal) and the CH B position control becomes the horizontal position control.

OTHER SPECIFICATIONS

Calibration Voltage: Line frequency square wave, 1 V p-p (±5%).

Intensity (Z-Axis) Modulation: 5 V p-p nominal; 470 K nominal input resistance.

Probes: Two PR-31's supplied.

Power Required: 115/230 V, 50/60 Hz, 20 W; CSA-approved three-wire line cord.

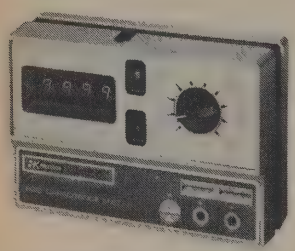
Size (HxWxD): 18.4 x 25.3 x 36.9 cm (7⅜ x 10⅛ x 14¾").

Weight: 8.8 kg. (19.6 lbs.).

# B&K PRECISION DYNASCAN CORPORATION / CAPACITANCE METER / OSCILLOSCOPES

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

## NEW PORTABLE DIGITAL CAPACITANCE METER



**Model 820 / $120.00**

### FEATURES

• Measures capacitance from 0.1 pF to 999,900 μF • Resolves to 0.1 pF • 10 ranges for accuracy and resolution • 4 digit easy-to-read LED display • 0.5% accuracy • Special lead insertion jacks or banana jacks • Fuse protected • Uses either rechargeable or disposable batteries • Overrange indication.

### APPLICATIONS

For capacitance measurement in lab or field, B&K-PRECISION introduces the new Model 820 Digital Capacitance Meter. The 820 is an economical multi-range capacitance meter that features digital accuracy and full portability.

Ten ranges cover from 0.1 pF to 999,900 μF with resolution to 0.1 pF. The capacitance of virtually any capacitor can be measured quickly and accurately with the 820. Because the accuracy of this unit greatly exceeds the tolerance of most capacitors, required values can be "hand selected." Matched capacitors can also be singled out for use in bridge circuits and other critical applications.

For production line applications, the 820 is an excellent means of pre-testing critical capacitors. It's so easy to use that untrained workers can be quickly instructed on proper operation. For incoming component sorting and selection, the front-panel lead insertion jacks offer fast in-out testing.

### SPECIFICATIONS

CAPACITANCE

Range: 10 selectable ranges with full scale value from 999.9 picofarads to 999.9 millifarads (reads from 0.1 pF to 999.9 millifarads).

Accuracy: 0.5% of full scale, ±1 digit to 100 μF; 1% of full scale, ±1 digit from 1 millifarad to 1 Farad.

Resolution: 0.1 pF.

Reading Time: 0.3 SEC up to 1000 μF increasing to 35 SEC max. at 1 Farad.

Overrange Indicator: (All Ranges) All bottom segments of the digits are "ON" when the capacitor value exceeds the value of the range selected.

GENERAL

Display: 4 digits LED display.

Front Panel Controls: 10-position range switch, zero adjust, ON-OFF switch.

Power Source: 4 standard "C" size cells operating from 4-6 volts, nicad, alkaline or zinc carbon, with provision for charger (Note: batteries and charger are not supplied).

Battery Life: 8 hours minimum.

Operating Temperature: 0°C to 50°C (32° to 100°F).

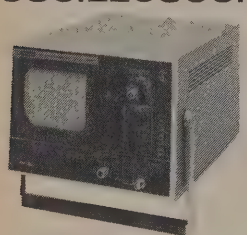
Dimension: 16 x 11 x 6 cm (6.4 x 4.4 x 2⅜").

Weight: 675 g. (1.51 lbs.) with batteries.

Accessories Included: Tilt stand, manual, spare fuse.

**Accessories Optional: BC-28 charger $9.00, BP-28 battery pack $20.00, LC-28 carrying case $7.50.**

## 10 MHz TRIGGERED SWEEP 5" OSCILLOSCOPE



**Model 1461 / $499.00**
INCLUDING PROBE

### FEATURES

• 18 sweep range selections • DC-10 mV/cm sensitivity • Fully regulated . . . Calibration is accurate from 105-130 V line • Automatic selection of horizontal or vertical TV signals • Built-in calibration signal • Triggered and automatic sweep • Built-in TV vertical and horizontal sync separation circuits.

This is one scope that's equally at home in an R&D lab or on a technician's bench. Top styling and performance form a blend uncommon in this price category.

The Model 1461 offers all the advantages of triggered sweep with automatic sync plus very high 10 mV/cm sensitivity. The eleven-position vertical attenuator is conveniently calibrated in 1-2-5 step sequence.

### SPECIFICATIONS

VERTICAL AMPLIFIER

Sensitivity: 10 mV/cm-20 V•cm ±5%, divided into 11 calibrated ranges, each with fine adjustment.

Frequency Response: DC, DC-10 MHz (3 dB); AC, 2 Hz-10 MHz (−3 dB).

Risetime: 35 nsec.

Overshoot and Ringing: 3% or less at 100 kHz square wave display.

Input Impedance: 1 megohm shunted by 22 pF (±3 pF).

Maximum Input Voltage: 300 VDC plus AC peak, or 600 V p-p.

SWEEP

Sweep System: Automatic and triggered.

Sweep Time: 1 μsec/cm-.5 sec/cm, ±5%, divided into 18 calibrated ranges (1-2-5 step sequence), each with fine adjustment.

Magnification: 5x at all speeds; increase maximum sweep to .2 μsec/cm.

Linearity: 5 sec/cm-2 μsec/cm ranges 3% or less; 1 μsec/cm 5% or less.

TRIGGERING

Source: Internal and external.

Slope: Positive or negative, continuously variable level control (pull for automatic triggering).

Range: 20 Hz-10 MHz (minimum 1.0 cm deflection on CRT screen).

TV SYNC: Vertical and horizontal sync separator circuit provided so that any portion of complex TV waveform can be syncrhonized and expanded for viewing. TV sync polarity is selected by Sync switch. TVH (line) and TVV (frame) sync switched automatically by SWEEP TIME/CM switch.

TVV (FRAME) = 0.5 sec/cm to 0.1 msec/cm, logic-increases brightness; low 1 μsec/cm.

HORIZONTAL AMPLIFIER

Sensitivity: 100 mV/cm.

Response: DC-800 kHz (−3 dB) 100.

Input Impedance: 100k ohms (nominal), shunted by 40 pF.

Maximum Input Voltage: 300 V (DC + AC Peak) or 600 V p-p.

X-Y Operation: Y (vertical) signal supplied to scope INPUT jack; X (horizontal) signal supplied to H INPUT jack.

1 V p-p square wave (±5%) at line frequency.

Intensity Modulation: 0-5 V p-p (TTL logic-compatible). High logic-increases brightness; low logic-decreases brightness. Input Resistance: 10 kΩ (nominal).

Power Requirements: 117 or 230 VAC, ±10%, 50/60 Hz, 20 watts. (3-wire line cord, CSA approved for oscilloscopes.) Calibration accuracy applies over full input voltage range.

Size (HxWxD): 18.4 x 25.3 x 36.9 cm (7⅜ x 10⅛ x 14¾").

Net Weight: 8 kg (17.3 lbs.).

PROBE (included)

Model No.: PR-31.

Attenuation: Combination 10:1 and direct.

Input Impedances: 10:1-10 megohms, 18 pF.

Connector: BNC.

Tip: Spring-loaded, hook-on tip.

## 3" SOLID STATE PORTABLE OSCILLOSCOPE

**Model 1403A / $228.00**

### FEATURES

DC to 5 MHz bandwidth, with direct-deflection input for waveforms to 450 MHz • Sharp, bright trace • DC amplifiers on both axes • New high-brightness CRT • All solid state • Weighs only 8.4 lbs.

### APPLICATIONS

The 1403A is ideal for many monitoring applications, freeing more expensive scopes from "menial" monitoring tasks. Just set the controls for the waveform being monitored and leave the rest to your tester. She'll appreciate the 1403A's sharp trace and stability. The 1403A takes up very little space on production line, classroom lab table or bench; its sturdy construction, bright display and portability make it ideal for use anywhere. This rugged "miniscope" has DC to 5 MHz bandwidth, DC amplifiers on both vertical and horizontal axes and direct-deflection terminals for waveforms up to 450 MHz. Model 1403A is completely solid state (except CRT), weighs just 8.4 lbs. and has a three-wire grounded AC cord. With test leads. Use optional PR-21 probe; all other probes with UHF to double-banana connector adapter.

### SPECIFICATIONS

VERTICAL AMPLIFIER

Sensitivity: 10 mV•div or better.

Response: DC, DC 5 MHz (−3 dB); AC, 2 Hz-5 MHz −3 dB).

Overshoot: 5% or less.

Maximum Input: 600 V peak-to-peak.

Input Impedance: 1 meg shunted by 30 pF.

Attenuator: 1, 1/10, 1/100 multiplier, ±5%.

Gain Control Range: Continuously variable range greater than 22 dB.

HORIZONTAL AMPLIFIER

Sensitivity: 300 mV/div or better.

Response: DC-250 kHz.

Input Impedance: 1 meg shunted by 30 pF.

SWEEP SYSTEM

Type: Recurrent.

Time Base Rangers: 10-100 Hz, 100-1000 Hz, 1-10 kHz, 10-100 kHz; continuously variable between ranges.

Sweep Linearity: ±5%.

Synchronization: Internal, negative.

Signal Required for Sync: (Internal) More than 1 division deflection on screen of CRT. (External) More than 2 V p-p.

GENERAL

Intensity Modulation: 25 V peak-to-peak.

Power Requirements: 117/234 VAC, 50-60 Hz, 15 W; three-wire grounded line cord.

Accessories Included: Leads, spare fuse, instructions.

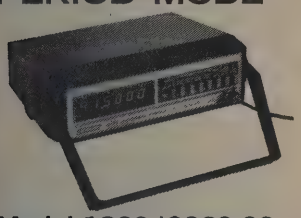
Size (HxWxD): 15 x 19 x 30 cm (6 x 7.25 x 12").

Net Weight: 3.8 kg. (8.4 lbs.).

# B+K PRECISION DYNASCAN CORPORATION / FREQUENCY COUNTERS / POWER SUPPLIES

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

## 80 MHz COUNTER WITH PERIOD MODE



**Model 1820/$260.00**

### FEATURES

• 5 Hz to 80 MHz reading guaranteed — 100 MHz typical • Period measurements from 5 Hz to 1 MHz • Period average, auto and manual positions • One PPM resolution • Totalizes to 999999 plus overflow • Elapsed time measurements from .01 to 9999.99 seconds plus overflow • One-megohm input resistance • Bright .43″ high LED readouts.

For frequency measurements, the 1820 reads to a typical top frequency of 100 MHz and reads signals as low as 5 Hz. By the using the period mode, accurate resolution of a 5 Hz signal is to 1 Hz. The 1820 is fully autoranging, with automatic decimal point position and MHz/kHz readout.

In the accumulate mode, "event counts" are displayed by totalizing pulses counted, up to 999.999. The 1820 also counts from .01 to 9999.99 seconds (2.777 hours) plus overrange.

### SPECIFICATIONS

FREQUENCY CHARACTERISTICS
Range: 5 Hz to 80 MHz.
Gate Time Auto: 10 ms (MHz reading) and 100 ms and 1 sec. (kHz reading).
Gate Time Manual: 1 sec. (kHz reading — 1 Hz resolution).
Accuracy: ±t.b. accuracy ±1 count.
Resolution: ±0.0001% (i.e. 1 PPM of a 6 digit scale).

PERIOD CHARACTERISTICS
Range: 5 Hz to 1 MHz.
Period Average Auto: 1 period average (ms), 10 and 100 period average (μs).
Period Average Manual: 100 period average (μs reading with 1 ns resolution).

TOTALIZE CHARACTERISTICS
Range: 5 Hz to 80 MHz.
Capacity: 0 to 999999 plus overflow.

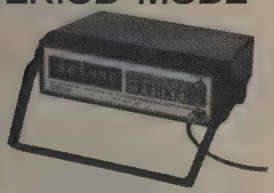
ELAPSED TIME
Range: .01 to 9999.99 sec. plus overrange.

INPUT CHARACTERISTICS
Impedance: 1 Megohm, 25 pF.
Sensitivity: 30 mV RMS, 5 Hz to 40 MHz; 50 mV maximum at 80 MHz.
Max. Input: 200 V (peak AC + DC) DC to 500 Hz, derate linearly to 30 V (peak AC + DC) at 80 MHz.
Attenuator: X10 switch selectable.

INTERNAL TIME BASE (25°C)
Type: 10 MHz Crystal Oscillator.
Setability: ±1 PPM (±1 Hz).
Stability: Less than ±0.001% (i.e. ±10 PPM) from 0°C to 50°C ambient.
Display: 6 digits .43″ high with overflow, kHz/μs, MHz/ms indicator, and leading zero blanking.

GENERAL
Power: 105 V to 130 V and 212 to 258 V, 50-60 Hz.
Size (HxWxD): 8.1 x 29 x 19 cm. (3.25 x 11.6 x 7.50″).
Weight: 2.55 kg (5 lbs.).

## 520 MHz COUNTER WITH PERIOD MODE



**Model 1850/$450.00**

### FEATURES

• 5 Hz to 520 MHz reading guaranteed • Gate time from 10 ms to 10 seconds • Full period measurement capability • 50 mV input sensitivity at 520 MHz • Operates from 115 or 230 VAC, or 12 VDC • Well protected input circuitry • Temperature compensated crystal oscillator (TCXO).

For engineers and technicians requiring accurate frequency measurement extending into the UHF range, the new Model 1850 will seem "made to order." The prescaled range covers 10 to 520 MHz while the normal range is from 5 Hz to 60 MHz. Autoranging is featured on both. Gate times from 10 ms to 10 seconds are automatically selected in the prescale mode, and 10 ms to 1 second in normal. For manual gate time selection, 1 second operation in normal and 10 seconds in prescale are selectable.

A high-accuracy TCXO (temperature compensated crystal oscillator) time base is standard.

For accurate very low-frequency measurements, the 1850 has period measurement capability, covering 5 Hz to 1 MHz.

### SPECIFICATIONS

FREQUENCY CHARACTERISTICS
Range: Normal — 5 Hz to 60 MHz.
Prescale: 10 MHz to 520 MHz; Function switch selects kHz or AUTO display reading.
Gate Time Auto: Normal — 10 ms, 100 ms and 1 sec.
Prescale: 10 ms and 100 ms, 10 sec.
Gate Time Manual: Normal — 1 sec.
Prescale: 10 sec.
Accuracy: ±0.0001% (i.e. 1 PPM of a 6 digit scale).

PERIOD CHARACTERISTICS
(Normal input only).
Range: 5 Hz to 1 MHz.
Period Average Auto: 1 period average (ms), 10 and 100 period average (μs).
Period Average Manual: 100 period average (μS reading with 1 ns resolution).

INPUT CHARACTERISTICS
Impedance: Normal — 1 Megohm, 25 pF.
Prescale: 50Ω with less than 2 V RMS input.

SENSITIVITY
Normal: 30 mV, 5 Hz to 40 MHz; 50 mV maximum at 60 MHz (5 Hz to 1 MHz in period).
Prescale: 50 mV RMS, 10 MHz to 520 MHz with 50Ω.

MAX. INPUT
Normal: 200 V (peak AC + DC) DC to 500 Hz, derating linearly to 30 V (peak AC + DC) at 60 MHz.
Prescale: 5 V RMS, 10 MHz to 520 MHz*

INTERNAL TIME BASE (25°C)
Type: TCXO (Temperature Compensated Crystal Oscillator) 10 MHz.
Stability: ±1 PPM max. 0°C to 50°C ambient.
Output: 10 MHz TTL level (rear panel BNC jack).
Display: 6 digits .43″ high with overflow kHz/μS, MHz/ms indicator and leading zero blanking.

GENERAL
Power: 105 to 130 V, and 212 to 258 V, 50-60 Hz, 11 to 16 VDC Automotive battery with accessory power cable (provided with unit).
Size (HxWxD): 8.1 x 29 x 19 cm. (3.25 x 11.6 x 7.50″).
Weight: 2.55 kg (5 lbs.).

## 30 MHz PORTABLE FREQUENCY COUNTER

**Model 1827 $120.00**

### FEATURES

• 30 MHz reading guaranteed, 50 MHz typical — COVERS ALL 40 CB CHANNELS • Full 6-digit display with range switch allows 8-digit accuracy • 1 Hz resolution — even at 30 MHz and beyond • Completely portable for use anywhere • Exclusive battery saver features auto-shutoff of display to reduce battery drain • Operates on AA size batteries, AC with optional charger/adapter or 12 VDC with optional power cord/adapter • Complete range of optional accessories for unequaled versatility • Easy to use.

Full autoranging provides direct frequency readout of the six most significant digits, or switch to the "1 second" position for 1 Hz resolution. Decimal point position and MHz/kHz indication are both automatic.

Battery saver feature electronically shuts off power to the LED display after 15 seconds of operation. DISPLAY button instantly restores the display for another 15 seconds. When on external power, DC or AC, the display remains on continuously. The 1827 can be powered from either an external 6.7 to 9.7 volts, 12 volts DC (for mobile operation) or 115 VAC with appropriate accessories.

### SPECIFICATIONS

FREQUENCY CHARACTERISTICS
Range: 100 Hz to 30 Hz (guaranteed); 50 MHz typical. Function switch selects kHz or AUTO display reading.
Gate Time: (Auto) 10 ms, 100 ms or 1 sec. (kHz reading). (Manual) 1 sec. (kHz reading, 1 Hz resol).
Accuracy: ±1 count.
Resolution: 1 PPM of a 6 digit scale.

INPUT CHARACTERISTICS
Impedance: 10kΩ min.
Sensitivity: 100 mV RMS: 200 kHz — 30 MHz 200 mV RMS: 100 Hz — 200 kHz.
Max. Input: 200 V (peak AC + DC) to 500 Hz; derate linearly to 25 V (peak AC + DC) at 30 MHz.

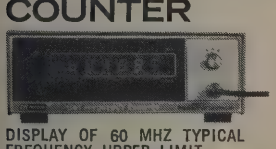
TIME BASE (25°C)
Type: 4.0 MHz Crystal Oscillator.
Setability: ±0.25 PPM (±1 Hz).
Temp. Stability: Better than ±0.001% (i.e. ±10 PPM) from 0-50°C ambient.
Display: Six .3″ high LED digits with overflow, LED kHz and MHz lights.

GENERAL
Power: 6 to 9 V ("AA" battery operation) or 6.7 to 9.7 VDC at external power jack.
Battery Life: Eight hours min. for normal usage pattern.
Battery Charging Time: 14-16 hours. Batteries are not required when operated on external power.
Size (HxWxD): 4 x 9.5 x 17 cm (1.75 x 3.75 x 6.6″).
Weight: Less than 0.45 kg (1 lb.) with batteries.

### ACCESSORIES

Model BP-27: Battery Pack, **$18.00,**
OC-52 Cable. Allows operation on external 6.7 to 9.7 volts DC, **$5.00.**
Model BP-27: Rechargeable Battery Pack, **$18.00.**
Model BC-27: Charger/AC Adapter, **$15.00.**
Model SA-10: R-F Signal Tap. Rated at 100 watts, **$12.00.**
Model LC-18: Carrying Case, **$7.50.**
Model MB-27: Mounting Bracket, **$4.50.**
Model SA-27: Pick-Up Antenna, **$6.00.**

## 40 MHz AUTORANGING COUNTER



DISPLAY OF 60 MHZ TYPICAL FREQUENCY UPPER LIMIT

**Model 1801/$200.00**

### FEATURES

• Automatic ranging 20 Hz-40 MHz guaranteed • Hz resolution • Six-digit solid-state readout with discrete reliable TTL logic • Suppression of leading digit for extra resolution above 1 MHz on 1 sec gate time • 10 MHz crystal time base for stability • User-convertible to external time base • Three automatic decimal point positions • Accepts wide input range with no level adjustment normally needed • Autoranging 20 Hz-40 MHz (typically 10 Hz-60 MHz, but may require larger input signal) • 10, 100 or 1000 msec gate times automatically selected for best accuracy and fastest reading •

### MODEL PR-25 PROBE

10:1 and 1:1 compensated counter probe (optional). **$20.00.**

### SPECIFICATIONS

FREQUENCY
Range: 20 Hz-40 MHz guaranteed; 10 Hz to over 60 MHz typical.
Auto Gate Time: 10 msec or 100 msec (MHz reading) or 1 sec (kHz reading), chosen automatically.

Manual Gate Time: 1 sec (kHz reading, 1 Hz resolution).

Accuracy: ± time base accuracy, ±1 count.

INPUT CHARACTERISTICS
Impedance: 1 meg/25 pF.
Sine Wave Sensitivity: 30 mV RMS (guaranteed); 15 mV RMS (typical).

Max. Input (peak AC + DC): 200 V to 500 Hz; linearity derated to 100 V at 1 kHz; 100 V, 1 kHz-5 MHz; linearly derated to 50 V at 40 MHz.

INTERNAL TIME BASE
(Ref. 25°C after 30 min. warmup)
Type: 10 MHz. Xtal oscillator.
Setability: ±0.1 PPM (±1 Hz).
Line Voltage Stability: Better than 1 PPM for ±10% line variation.
Temperature Stability: Better than ±0.001% (i.e., ±10 PPM), 0-50°C.
Max. Aging Rate: 10 PPM/year.

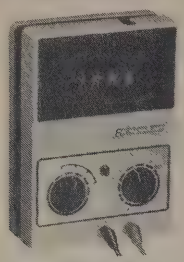
DISPLAY CHARACTERISTICS
Visual: 6 digits with overflow, kHz and MHz indicators.
Overflow: Flashing light.

GENERAL
Power Requirements: 105-130 V, 60 Hz, 25 W max.
Size (HxWxD): 8.3 x 22 x 26 cm (3.3 x 8.7 x 10.5″).
Weight: 2.5 kg (5.5 lbs.).

# B&K PRECISION DYNASCAN CORPORATION / DIGITAL MULTIMETERS

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

## 3½ DIGIT DMM WITH .5% ACCURACY



**Model 2810/$119.95**

### FEATURES

• 3½ digit easy to read LED display • 0.5% DC accuracy with autozeroing • 100 mV, .01Ω resolution • 10 ohm range and control to zero lead resistance • Selectable High-Low-power ohms on four ranges • Completely overload protected on all 29 ranges • 100% overrange reading to 2000 counts full scale • Protected against RF interference • Completely portable.

### THE MOST VERSATILE PORTABLE DMM WE'VE EVER OFFERED

While retaining the convenience of our popular user-oriented panel layout, we've designed into the B&K-PRECISION Model 2810 a combination of features uncommon in a portable digital VOM. Typical DC accuracy is 0.5% with a 3½ digit display. Autozeroing on all but the 10Ω range minimizes set-up time, while the 100% overranging capability reduces the need for frequent range changes.

The 10Ω range, with its .01Ω resolution, is ideal for locating a shorted winding in a transformer, motor or coil.

The high-/low-power ohms switch permits resistance measurements in solid-state circuitry without biasing semiconductor junctions. Unlike many electronic voltmeters, the 2810 can also be used in R-F energy fields. This includes use near business band, CB and amateur radio transmitters.

Like other B&K-PRECISION instruments, the 2810 is well protected against overloads.

### SPECIFICATIONS

AC-DC VOLTAGE
Ranges: ±100.0 mV, 1 V, 10 V, 100 V, 1000 V.
Input Impedance: 10 megohms.
Circuit Protection: ±1500 VDC or AC peak, all ranges.

Frequency Response: 50-1000 Hz; 50-400 Hz, 1000 V range.
Protection: ±1500 VDC or AC peak, all ranges (50 Hz-1 kHz).

DC AND AC CURRENT
Ranges: 1 mA, 10 mA, 100 mA, 1000 mA.
Circuit Protection: Diodes and externally accessible fuse, all ranges.
Nominal Voltage Drop (full scale): 200 mV; 750 mV on 1 amp range.
AC Frequency Response: 50-400 Hz.
Overrange: 100% to 1999.

RESISTANCE
Ranges: 10Ω, 100Ω, 1kΩ, 100kΩ, 10MΩ.
Protection: No component failure other than a fuse will result with application of +1000 VDC or −450 DC or 300 VAC RMS to input.

ACCURACY
Note: For all ranges add ±1 L.S.D.
DC Volts: ±0.5% of reading, ±0.1% of f.s., 1 V, 10 V, 100 V ranges; ±1.0% of reading, ±0.2% of f.s., 100 mV, 1000 V ranges.
DC Current: ±1% of reading, ±0.5% of f.s., 1 mA, 10 mA, 100 mA ranges; 1.5% of reading, ±0.5% of f.s., 1000 mA range.
AC Volts: ±1.0% of reading, ±0.25% of f.s., 1 V, 10 V, 100 V ranges; ±1.0% of readings, ±0.5% of f.s., 100 mV range; ±2.0% of reading, ±0.5% of f.s., 1000 V range.
AC Current: ±1.5% of reading, ±0.5% of f.s., 1 mA, 10 mA, 100 mA ranges: ±2.0% of reading, ±0.5% of f.s., 1000 mA range.
Resistance: ±1.0% of reading, ±0.25% of f.s., 1kΩ, 10kΩ, 100kΩ, and 1000kΩ ranges in High-Ω; ±1.5% of reading, ±0.5% of f.s., 10Ω, 100Ω, 1kΩ, 10kΩ, 1000kΩ ranges in low-Ω 1.5% of reading, ±0.5% of f.s., 10MΩ range.

GENERAL
Readout: 3½ digits, .3″ LED.
Overrange Indication: Display flashes 1999.
Polarity Indication: Automatic.
Operating Temperature Range: +15°C to +35°C; usable range at reduced accuracy: 0°C to 50°C.
Power: Four "C" size batteries — NiCad, alkaline or carbon-zinc, with provision for AC charger (Batteries and charger not supplied).
Battery Life: Better than 40 hours with alkaline batteries.
Size (HxWxD): 16 x 11 x 5 cm (6.4 x 4.4 x 2″).
Weight: 907 g. (2 lbs.).

## 3½ DIGIT PORTABLE DMM

**Model 2800/$99.95**

### FEATURES

• Reliable — fully overload protected • 3½ digit easy to read LED display • Completely portable — use it anywhere! • Auto zeroing • High/Low-power ohms for in-circuit accuracy • 1 mV, 1 μA, 0.1 ohm resolution • 10 meg input impedance, industry standard • Excellent temperature coefficient • Typical DC accuracy 1%.

Combines the features of our most popular DMM with a new 3½ digit readout capability. Other new features include an auto-zero circuit and improved overload protection. The 2800 features 22 scales that range as high as 1000 volts, DC or AC. Resolution is to 1 mV, 1 μA or 0.1 ohm. Input impedance is 10 megohms.

The 2800 has 100% overrange reading capability. This allows you to read 1999 on a scale normally limited to a maximum reading of 1000.

Alternating high-/low-power ohms ranges permit analysis of solid-state circuitry without biasing semiconductor junctions. Typical accuracy is ±19° on DC and ±1.5% AC.

### 2800, 2810 ACCESSORIES

Model BC-28: **$9.00.** AC adapter/battery charger; Model BP-28: **$20.** Rechargeable batteries; Model ES-28: 10 amp current shunt; Model LC-28: **$7.50.** Carrying Case: Model MS-28: **$3.00.** Wire tilt stand; Model PR-21: **$15.00.** Isolation/direct probe; Model PR-23: **$20.00.** RF demodulator probe; Model PR-28 High-voltage probe: **$25.00.** Model TP-28 Temperature probe **$60.00.**

### SPECIFICATIONS

AC-DC VOLTAGE
Ranges: ±0-1 V, 100 V, 1000 V.
Input Impedance: 10 megohms.
Circuit Protection: ±1000 VDC or AC RMS, all ranges.

Response: 50-400 Hz.

DC AND AC CURRENT
Ranges: 0-1 mA, 10 mA, 100 mA, 1000 mA.
Circuit Protection: Diodes and externally accessible fuse.

RESISTANCE
Ranges: 0-100Ω, 1kΩ, 10kΩ, 10MΩ. Alternate ranges are Hi and Lo power.
Protection: +1000 VDC, −450 VDC or 300 VAC RMS to input.

ACCURACY
Note: For all ranges add ±1 L.S.D.
DC Volts: ±1% of reading, ±0.25% of f.s. three lowest ranges; ±1.5% of reading, ±0.25% of f.s. 1000 V range.
DC Current: ±2.0% of reading, ±.5% of f.s. range, 1 mA, 10 mA, 100 mA ranges, ±2.5% of f.s., ±.5% of f.s., 1 A range.
AC Volts: ±1.5% of reading, ±.5% of f.s., 1 V, 10 V, 100 V ranges. ±2.5% of reading, ±.5% of f.s., 1000 V ranges.
AC Current: ±2.0% of reading, ±.5% of f.s., 1 mA, 10 mA, 100 mA ranges. ±3.0% of reading, ±.5% of f.s., 1 A range.
Resistance: ±1.5% of reading, ±.5% of f.s., ±1 LSD, 1000Ω, 1kΩ 10kΩ, 100kΩ and 1MΩ ranges. ±2% of reading, ±.5% of f.s., ±1 LSD, 10MΩ range.

GENERAL
Same as Model 2810 above.

## NEW 3½ DIGIT LAB DMM

**Model 2830 / $235.00**

### FEATURES

• Bright 3½ digit high-efficiency LED display • 0.5% DC accuracy • 100 μV, 100 nA, .01 ohm resolution • 100 mV AC and DC ranges • All ranges and functions are pushbutton selectable • Selectable high-/low-power ohms • Autozeroing • Completely overload protected • AC operation standard with DC power pack option • Easily installed optional battery pack • Built-in 10 amp current shunt • Protected against RF interference.

The new Model 2830 is well suited for all types of lab or bench operation. The bright 0.43″ high LED display is visible under virtually all types of lighting conditions and allows for fast, easy reading. With a basic DC accuracy of 0.5% and autozeroing on all ranges, the 2830 is accurate enough for most lab or servicing applications. For added efficiency, 100% overranging reduces the need for frequent range changes.

### OPTIONAL ACCESSORIES

**Model BP-30 rechargeable battery** pack. Installs in minutes with a screwdriver. Permits 8 hours of continuous use on one overnight recharging. Recharging does not interfere with the use of the 2830. **$50.00.**
**PR-21** direct/isolation probe. Has switchable 100k resistor to prevent capacitive loading when measuring DC in RF circuits. **$15.00.**
**PR-23** demodulator probe. 10 kHz-125 MHz ±2 db. **$20.00.**
**PR-28** high-voltage multiplier probe. Increases voltmeter range to 40,000 VDC. **$25.00.**
**LC-50** leatherette carrying case for protection of Model 2830 in field service or storage. Provides for storing manual and test leads. **$20.00.**
Model TP-28 Temperature probe **$60.00.**

### SPECIFICATIONS

AC-DC VOLTAGE
Ranges: ±100.0 mV, 1 V, 10 V, 100 V.
Input Impedance: 10 megohms.
Polarity Indication: Automatic, minus sign shown with plus sign implied.
Note: Average-responding circuitry calibrated to read RMS value of pure sine wave.
AC Frequency Response: 50-1000 Hz; 50-400 Hz, 1000 V range.
Protection: ±1000 VDC or AC peak, all ranges (50 Hz-1 kHz).
Overrange: 100% to 1999, except 1000 V range.

DC AND AC CURRENT
Ranges: 100μA, 1 mA, 10 mA, 100 mA, 10 A.
Circuit Protection: Diodes and externally accessible fuse, all ranges, except 10 A.
Nominal Voltage Drop (full scale): 200 mV, on 100 μA, 1 mA, 10 mA; 300 mV on 100 mA range; 1.9 V on 1 A and 10 A ranges.
AC Frequency Response: 50-1000 Hz.
Overrange: 100% to 1999.

RESISTANCE
Ranges: 10Ω, 100Ω, 1kΩ, 100kΩ, 1000kΩ, 10MΩ. High or low-power ohms selectable on 1kΩ, 10kΩ, 100kΩ, 1000kΩ, ranges.
Circuit Protection: No component failure other than a fuse will result with application of +1000 V DC or −450 V DC or 300 V AC RMS to input with ohms function selected. All ranges are protected against accidental direct connection to AC line (117 V nom.).
Polarity: Plus (+) jack is positive fo all ranges.
Overrange: 100% to 1999.

ACCURACY
Same as Model 2810 above.

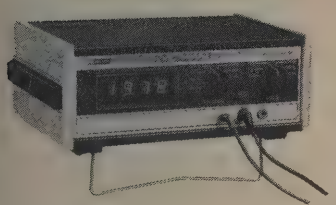
±0.5% of full scale, 100 mV range; ±2.0% of reading; ±0.5% of full scale, 1000 V range.
AC Current: ±1.5% of reading, ±0.5% of full scale, 1 mA, 10 mA, 100 mA ranges; ±2.0% of reading, ±0.5% of full scale, 100 mA, 1000 mA, 10 A, ranges.
Resistance: ±1.0% of reading, ±0.25% of full scale, 1kΩ, 10kΩ, 100kΩ, and 1000kΩ ranges in High-Ω; ±1.5% of reading, ±0.5% of full scale, 10Ω, 100Ω, 1kΩ, 10kΩ, 100kΩ, 1000kΩ ranges in low-Ω. 1.5% of reading, ±0.5% of full scale, 10MΩ range.

GENERAL
Readout: 3½ digits .43″ LED.
Overrange Indication: Display flashes 1999.
Polarity Indication: Automatic.
Operating Temperature Range: +15°C to +35°C; usable range at reduced accuracy; 0°C to 50°.
Settling Time: Typically 0.5 seconds.
Includes: 2 test leads, detachable line cord, 3 spare fuses, operating manual.
Power Requirements: 105-130 VAC, 230 VAC, 50/60 Hz. With three-wire detachable line cord. CSA listed. Optional BP-30 battery pack provides 8 hours (minimum) portable use on overnight recharging. **$50.00.**
Size (HxWxD): 8.1 x 29 x 19 cm (3.25 x 11.6 x 7.5″) including handle at rest position.
Weight: 1.5 kg (3 lbs.).

# B+K PRECISION DYNASCAN CORPORATION / VTVM MULTIMETERS

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

## 3½ DIGIT PORTABLE MULTIMETER



Model 283/$185.00

### FEATURES

• High intensity, reliability 3½ digit LED display for maximum readability • Selectable HI/LO ohms function allows in-circuit resistance measurement without forward biasing semiconductor junctions • Universal AC power supply • Easily installed optional battery pack • Large, bright non-blinking 7-segment digits • DC accuracy, 0.5% • Automatic polarity • Full overload protection on all ranges • 1 mV resolution.

### OPTIONAL ACCESSORIES

**Model BP-83: $50.00.** Rechargeable Battery Pack: Permits 8 hours of continuous use on one overnight recharging. **Model PR-21: $15.00.** Isolation/Direct Probe. **Model LC-83: $15.00.** Handsome leatherette case. **Model PR-23: $20.00.** Demodulator Probe. **Model PR-28: $25.00.** High Voltage Multiplier Probe (increases the voltmeter range to 40,000 VDC).

### SPECIFICATIONS

DC VOLTAGE (Auto Polarity)
Ranges: ±1.000, 10.00, 100.0 1000 V.
Maximum DC Input: 1500 VDC or DC plus AC peak.
Accuracy: 1, 10, 100 V range ±.5% of reading ±1 LSD, 1000 V ranges, ±1% of reading, ±1 LSD.
Polarity: Automatic.

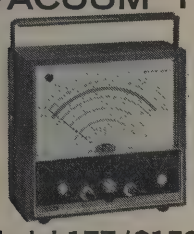
AC VOLTAGE
Ranges: ±0-1.000, 10.00, 100.0, 1000 RMS.
Maximum AC Input: 1500 V peak or 1500 VDC plus AC peak.
Accuracy and Response: 1 V, 10 V, 100 V range, ±1% of reading, ±1 LSD, 40-400 Hz; 1000 V range, ±1.5% of reading, ±1 LSD, 40-400 Hz.

AC-DC CURRENT
Ranges: 0-1.000, 10.00, 100.0, 1000 mA.
DC Accuracy: 1, 10, 100 mA ranges, ±1% of reading; ±1 LSD. 1000 mA range, ±1.5% of reading, ±1 LSD.
AC Accuracy: 1, 10, 100 mA ranges, ±1.5% of reading, ±1 LSD. 1000 mA range, ±2% of reading, ±1 LSD.
Frequency Response: 40-400 Hz.

RESISTANCE
Ranges: 0-100.0Ω; 1.000k, 10.00k, 100.0kΩ; 1.000, 10.0MΩ.
Accuracy: 1k to 1000k ranges in Hi ohms, ±1% of reading, ±1 LSD. 10MΩ range, and five lowest ranges in low ohms, ±2% of reading, ±1 LSD.

GENERAL
Display: 3½ digit, .41″ LED.
Accuracy Temperature Coefficient (15°C to 35°C): ±.25% of reading °C on DCV ranges; ±.05% °C, all other ranges.
Input Impedance: 10MΩ.
Overrange: 100%.
Overload Protection: Protected up to 1000 V on ohms ranges; to 3 A on current shunts; to 1500 V on voltage ranges.
Power: 105-125 VAC, 50-60 Hz; 230 VAC, 50-60 Hz, with 3-wire grounded detachable AC line cord and test leads.
Size (WxDxH): 23 x 18 x 19 cm (9 x 7 x 3.5″).
Weight: 2.7 kg. (3 lbs.).

## VACUUM TUBE VOLTMETER



Model 177/$150.00

### FEATURES

• Internal DC power supply for ohms ranges — no battery needed • 37 ranges, including dB and zero center scales.

The 177 includes the PR-43 DC/AC/Ohms probe with switch and ground lead. Low AC ranges have special calibrations. Features easy-to-read 7″ mirrored scale, DC polarity switch and 1% precision resistors in all critical circuits. See other meter probes on page 1497.

### SPECIFICATIONS

DC Volts: 0-.5, 1.5, 5, 15, 50, 150, 500, 1500.
AC Volts: RMS, 0-1.5, 5, 15, 50, 150, 500, 1500; peak-to-peak, 4, 14, 40, 140, 400, 1400, 4000; frequency response, ±1 dB, 40 Hz-3 MHz 600 ohm source, 5 V range).
Resistance: 0-1 K, 10 K, 100 K; 0-1, 10, 100, 1000 meg; 10 ohms center scale.
Input Resistance: 11 megs (1 meg in probe).
Accuracy: DC, ±3% f.s.; AC, ±5% f.s.
Power Required: 105-125 VAC, 50-60 Hz.
Size (HxWxD): 18 x 18 x 9 cm (7.1 x 7.25 x 3.6%).
Net Weight: 2.7 kg (6 lbs.).

## SOLID STATE ELECTRONIC MULTIMETER WITH HIGH-LOW POWER OHMS

FET Meter
Model 277/$130.00

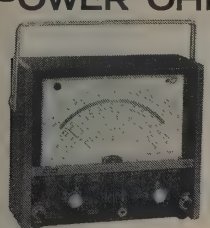
### FEATURES

• High and lower-power ohms ranges for transistor circuit test • 1 μA full scale current range for semiconductor leakage test • 15 meg input impedance • FET input • 25 ranges; overload protected • Checks its own batteries.

### SPECIFICATIONS

Multipliers: 1% precision type, frequency-compensated.
Meter: 4.5″; 50 μA movement, mirrored scale.
Protection: Meter and FET input fully overload protected; current and resistance circuits overload protected by fuse.
DC Volts: 0-.1, 3, 1, 3, 10, 30, 100, 300, 1000; zero-center capability on all ranges; accuracy, ±2% f.s.; input resistance, 15 megs.
AC Volts: RMS, 0-.1, .3, 1, 3, 10, 30, 100, 300, 1000; peak-to-peak, 0-.28, .88, 2.8, 8.8, 28, 88, 280, 880, 2800; accuracy, ±3% f.s.; input impedance, 10 megs shunted by 100 pF; frequency response, flat, 50 Hz-150 kHz.
DC Current: 0-1, 10, 100 μA; 0-1, 10, 30, 100, 300, 1000 mA; accuracy, ±3% f.s.
Resistance: Rx1, x10, x100, x1K, x1, meg, switch-selectable for 00K, x1 either .068 or 1.5 test volts; 10 ohms center-scale.
Decibles: 9 ranges from −20 to +60 dB; accuracy, ±3% f.s. (0 dB = 1 mW into 600 ohms).
Power Required: One 9 V type 2 V 6 battery and one 1.5 V "D" cell.
Size (HxWxD): 18 x 14.5 x 9.1 cm (7.25 x 5.8 x 3.6″).
(600 ohm source, 5 V range).
Net Weight: 907 g. (2 lbs.).

## SOLID STATE ELECTRONIC MULTIMETER WITH HIGH-LOW POWER OHMS



FET Meter
Model 290/$190.00

### FEATURES

• 75 ranges; ±1.5% VDC accuracy • High and low-power ohms ranges • 15 meg FET input • Fully overload protected • 50 μA full scale current range • Rx0.1 ohm range with 1 ohm scale.

### SPECIFICATIONS

DC VOLTS
10 Ranges: 0-50, 150, 500 mV; 1.5, 5, 15, 50, 150, 500, 1500 V.
Accuracy: ±1.5% f.s.
Input Resistance: 15 megs, including 100 K in PR-21 probe.
AC Rejection: Greater than 46 dB at 60 Hz.

AC VOLTS
10 RMS Ranges: 0-50, 150, 500 mV; 1.5, 5, 15, 50, 150, 500, 1500 V.
Peak-to-Peak Ranges: 0-140, 440 mV; 1.4, 4.4, 14, 140, 440, 1400, 4400 V.
Accuracy: ±3% f.s. at 60 Hz; ±5% on 500 V and 1500 V ranges.
Input Impedance: 15 megs shunted by 41 pF at input jacks.
Frequency Response: 50 mV-150 V ranges, ±0.5 dB, 20 Hz-500 kHz; ±3 dB, 5 Hz-750 kHz.

DC CURRENT
10 Ranges: 0-50, 150, 500 μA; 1.5, 5, 15, 50, 150, 500 mA; 1.5 A.
Accuracy: ±3% f.s., except ±4% on 1.5 A range.
Internal Voltage Drop: At input terminals, 50 mV on 50 mA range.

AC CURRENT
10 Ranges: 0-50, 150, 500 μA; 1.5, 5, 15, 50, 150, 500 mA; 1.5 A.
Accuracy: ±4% f.s. at 60 Hz; ±5% on 50 μA and 1.5 A ranges.
Frequency Response: ±0.5 dB, 20 Hz-5 kHz; ±3 dB, 7 Hz-16 kHz.
Internal Voltage Drop: At input terminals, 50 mV to 50 mA range.

RESISTANCE
8 Low-Power Ranges (33 mV source): Rx0.1, Rx1, Rx10, Rx100, Rx1 K, Rx10 K, Rx100 K, Rx1 meg.
Center Scale Reading: 1 ohm, Rx0.1; 10 ohms, Rx1 range.
Accuracy: ±3° of arc.

DECIBELS
10 Ranges: −40 to +66 dB.
Accuracy: ±3% f.s. (0 dB = 1 mW across 600 ohms).

GENERAL
Meter: 7″, with 6.63″ scale arc length; 100 μA movement, ±2%, 100°; mirrored scale.
Protection: Meter and FET input protected against overloads. Circuit overload protection by diodes and fuse; spark gaps for high voltage protection.
Power Required: 105-124 VAC, 50-60 Hz; also available for 240 VAC, 50-60 Hz. 3.9 W; three-wire grounded cord.
Size (HxWxD): 18 x 20 x 9 cm (7.25 x 8 x 3.6″).
Net Weight: 1:96 kg. (4.25 lbs.).

# B+K PRECISION DYNASCAN CORPORATION / COMPACT VOMS / POWER SUPPLIES

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

## COMPACT VOMS

### Model 115/$44.95

#### FEATURES

Unusual features include a 5 ohm mid-scale range for checking windings; and four DC current ranges to allow checks of thermocouples and oil burner controls. DC and AC voltage measurement extends to 1200 volts.

Test leads, and instructions are included; carrying case is optional. HV-12 high-voltage probe adapter is also optional and extends the 115 to 12k VDC.

#### SPECIFICATIONS

DC Volts: 0-60, 300, 1200 mV; 0-3, 12, 60, 300, 1200 V.
DC Current: 0-0.03, 0.06; 60, 600 mA.
DC Accuracy: ±3% full scale.
AC Volts: 0-6, 30, 60, 300, 600, 1200, ±4% full scale.
Resistance: 0-500, 50k, 500k, 5MΩ.
Meter: 30,000Ω VDC; 15,000Ω VAC.
Battery: 1.5 V "AA" battery; 15 V W-10 battery.
Size (HxWxD): 10.2 x 15 x 4.4 cm (6 x 4 x 1.75").
Weight: .45 kg. (.5 lb.).

### Model 110/$28.95

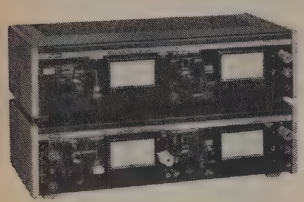
#### FEATURES

The 110's 10Ω mid-scale range allows accurate testing of coil and motor windings. Leakage resistances up to one megohm can also be measured. Test leads and detailed instructions included; LC-10 case is optional.

#### SPECIFICATIONS

DC Volts: 0-2.5, 10, 50, 250, 1000 V.
DC Current: 0.05, (250 mV), 25, 250 mA.
DC Accuracy: ±3% full scale.
AC Volts: 0-10, 50, 250, 500, 1000.
AC Accuracy: ±4% full scale.
Resistance: 0-1k, 100k, 1 M.
Meter: 20,000 VDC; 10,000 VAC.
Battery: 1.5 V "AA" battery.
Size (HxWxD): (5 x 3.5 x 1.5").
Weight: 35 kg. (.4 lb.).

## LABORATORY POWER SUPPLIES



### Model 1601/$240.00

#### FEATURES

• Isolated 0-50 VDC, continuously variable; 02 A in four ranges • Fully automatic shutdown, adjustable current limit • Perfect for solid state servicing.

#### SPECIFICATIONS

Input Voltage: 105-125 VAC, 60 Hz.
Output Voltage: 0-50 VDC, continuously variable; two ranges, 0-25 and 0-50 VDC.
Output Current: 02 A in four ranges — 0-50 mA, 0-0.2 A, 0-0.5 A, 0-2 A.
Load Regulation: Minimum, 0.05%; maximum, 0.1%; typical, 0.07%.
Line Regulation: 0.02% typical from 105 to 125 VAC with output of 50 VDC and 2 A.
Ripple: 5 mV peak-to-peak.
Temperature Coefficient: .012% of output voltage per °C.
Size (HxWxD): 9.8 x 35 x 25 cm (3.8 x 14.13 x 10").
Net Weight: 5 kg. (11 lbs.). Complete with leads and instruction manual.

### Model 1602/$260.00

#### FEATURES

• 0-400 VDC, 0-200 mA, continuously variable • 0 to — 100 VDC, 0-2 mA and 12.6/6.3 VAC at 3.5A • Fully automatic shutdown, adjustable current limit.

#### SPECIFICATIONS

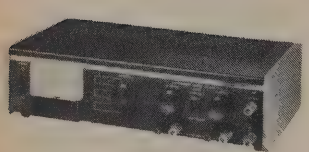
Input Voltage: 105-125 VAC, 60 Hz.

400 VDC SUPPLY
Output Voltage: 0-400 VDC, continuously variable.
Output Current: 0-200 mA.
Load Regulation: 0.1%.
Line Regulation: 0.1% for 105-125 VAC line.
Noise and Ripple: Less than 10 mV peak-to-peak.
Protection: 0-200 mA adjustable shutdown.

BIAS SUPPLY (100 VDC)
Output Voltage: 0 to —100 VDC continuously variable, floating.
Output Current: 0-2 mA.
Load Regulation: 1%.
Line Regulation: 1%.
Noise and Ripple: Less than 10 mV peak-to-peak.
Protection: Current-limiting resistance.

12.6 AND 6.3 VAC (NON-ADJUSTABLE)
Output Voltage: 12.6 or 6.3 VAC ±5% no-load, floating.
Output Current: 3.5 A continuous.
Protection: Thermal circuit breaker on front panel.
Size (HxWxD): 9.8 x 35 x 25 cm (3.88 x 14.13 x 10").
Net Weight: 5 kg. (11 lbs.).

## NEW TRI-OUTPUT POWER SUPPLY



### Model 1650 / $250.00

#### FEATURES

• Functions as three separate power supplies • 5 VDC, 5 A fixed output • Two separate 0 to 25 VDC outputs at 0.5 A • Fully automatic, current-limited overload protection • Unique tracking circuit allows automatic tracking of variable DC outputs • + and — terminals of each output are fully isolated, even when in automatic tracking mode • All three outputs may be connected in series or parallel for higher voltage or current requirements.

Our new Model 1650 tri-output power supply was designed for modern solid-state applications where both linear and digital circuits are encountered. In one package, this unit combines the features of a separate 5 VDC fixed-output supply and two 0-25 VDC variable supplies. The 5 volt output is rated at 5 amps, to satisfy power requirements of complex digital devices.

#### SPECIFICATIONS

Input Voltage: 105-125 VAC, 60 Hz.

OUTPUT VOLTAGES
5 Volt Supply: 5 Volts DC ±5%.
A Supply: 0 to 25 VDC.
B Supply: 0 to 25 VDC.

OUTPUT CURRENT
5 Volt Supply: 5 A max; A & B Supplies: 0.5 A current lim.

REGULATION
Load: 0.1% (25 mV) variation to full-load on 25 V supplies. 3% (150 mV) variation from 10 m.A. to 5 A change in load current on 5-volt supply.
Line: 0.2% (50 mV) for a line voltage change of 20-volts on 25 V supplies. 0.4% (20 mV) for a line voltage change of 20 volts on 5 V supply.

NOISE RIPPLE
All supplies: 5 mV RMS. (not applicable to "A" in track mode).

GENERAL
Current limiting: Limiting for each 0-25 V supply fixed slightly above rated current for short-circuit protection. The 0-5 V supply has automatic fold-back to 2.5 A short-circuit.

TRACKING
(0-25 V Supplies): "A" Supply Tracks "B" supply at a fixed or selected ratio. Applies whether the supplies are connected in series, back-to-back or are completely isolated.
Tracking Error: ±1% of rated voltage (±250 mV).
Size (HxWxD): 3.9 x 14.1 x 10 cm (3.88 x 14.13 x 10").
Weight: 22 lbs. CSA listed.

## MOBILE EQUIPMENT POWER SUPPLY

### Model 1640/$100.00

#### FEATURES

• Regulated adjustable output from 11-15 VDC, 0-3 A • Fully automatic overload protection, manual reset, 5 A surge limit • Perfect for servicing CB radios and all other 12 volt mobile equipment.

#### APPLICATIONS

Citizens Band transceivers . . . Auto tape decks . . . Auto radios . . . FM converters . . . Electronic ignitions.

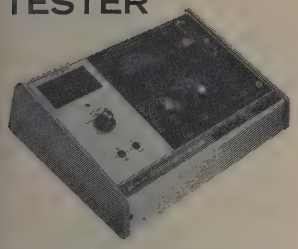
#### SPECIFICATIONS

Input Voltage: 117 VAC, 60 Hz.
Output Voltage: 11-15 VDC, continuously variable.
Output Current: 0-3 A continuous, 5 A surge limited.
Meter: Voltmeter-ammeter, pivot and jewel movement (illuminated). Metering function selected by switch.
Overload Indicator: LED glows after overload; turns off when overload is cleared.
Ripple: Less than 8 mV RMS; 0-3 A.
Load Regulation: Less than 0.8% voltage change from 0-3 A, 11 V to 15 V.
Line Regulation: Less than 0.8% voltage change at 3 A output ±10% line variation.
Short Circuit Protection: Voltage shutdown, manual reset. Surge current limited to 5 A maximum.
Size: (HxWxD): 7.8 x 25 x 22 cm (3⅛ x 10 x 8½").
Weight: 3.6 kg. (8 lbs.).

# B+K PRECISION / DYNASCAN CORPORATION / TRANSISTOR TESTERS

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

## LAB QUALITY SEMI-CONDUCTOR TESTER



**Model 530/$310.00**

### FEATURES

• Measures transistor beta or FET gm • Measures transistors cut-off frequency up to 1500 MHz • Non-destructive testing of transistor and diode breakdown voltages • Measures $I_{CES}$ and $I_{DSS}$ • Fast testing of transistors, FET's, and SCR's — in or out-of-circuit • Base diagrams are not required • No biasing information required • Identifies all leads of transistors and SCR's • Automatic identification of PNP/NPN types and N or P channel FET's.

### SPECIFICATIONS

IN-CIRCUIT TESTS

Good/Bad Test: For bipolar transistors, FET's and SCR's.

Identifies: All leads of bipolar transistors and SCR's, and gate lead of FET's. Also identifies device polarity by automatically indicating PNP, NPN, and P or N channel FET's.

OUT-OF-CIRCUIT TESTS

Measures: Transistor beta, gm, $f_t$, $I_{CES}$, $I_{DSS}$, $BV_{CES}$, and PIV.

Transistor Beta: Two Ic ranges (low power, 20-600; high power, 20-200).

gm: OF FET's

$f_t$: Three ranges (1-100 MHz; 50-750 MHz; 750-1500 MHz). $I_{CES}$ and $I_{DSS}$: From .5 μA to 5 mA. $BV_{CES}$ of transistors and PIV of diodes at 10 V (5 mA max.) or variable 10-100 V (100 μA max.).

Accuracy: Within 10% for β, gm, and $f_t$ tests.

INDICATORS

Audible tone for GOOD indication. Front panel switch provides tone defeat. LED Lamps identify device polarity, including NPN, PNP, or N or P channel FET's. Panel Indicator and Test Switch identifies all leads of transistors and SCR's and base lead of FET's.

Jacks and test leads are color coded.

Meters indicate other device parameters.

APPLIED TEST CURRENTS

Collector: 125 mA at 4% duty cycle.

Base: 250 mA at 4% duty cycle (HI drive); 1 mA at 4% duty cycle (low drive).

Test Repetition Rate: 10 per second.

Voltage for Leakage Test: Variable from 10-100 VDC.

High-power beta and gm Tests: Special 300 μS, 1% duty cycle current pulses enable testing at 2 amps without over-dissipation of device under test. Maximum beta (200) and maximum gm (400 millimhos) correspond to test current of 2 amps.

LIMITING IN-CIRCUIT SHUNT VALUES FOR IN-CIRCUIT GOOD/BAD TEST

Resistance: Down to 10Ω (HI drive). Down to 1.5kΩ (LO drive).

Capacitance: Up to 15 μF (HI drive). Up to 0.3 μF (LO drive).

GENERAL

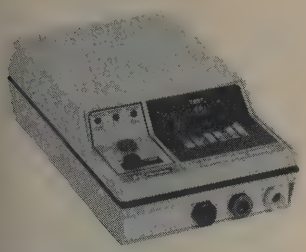
Color-coded Mini-lock clips for hands-free operation. Detailed instruction manual. Optional FP-5 Dynaflex three-lead, one-hand probe for easy in-circuit testing.

Power Required: 105-125 VAC, 60 Hz, 10 watts.

Size (HxWxD): 18 x 33 x 9 cm (7 x 13 x 3½″).

Net Weight: 2.3 kg. (5 lbs.).

## PORTABLE INDUSTRIAL TESTER



**Model 510/$97.00**

### FEATURES

• Fast GO/NO-GO in-circuit transistor testing • Fast and thorough GOOD/BAD out-of-circuit testing • Tests FET's and SCR's in-circuit or out-of-circuit • Connect any test clip to any component lead • Gives positive emitter-base-collector identification in LO drive — positive base identification in HI drive • Light-Emitting Diodes indicate NPN-OK or PNP-OK • Pocket-size — over 100 hours of testing from single set of "AA" cells • Digital stability — no adjustments; nothing to go out of calibration.

### SPECIFICATIONS

IN/OUT-OF-CIRCUIT TESTS

GOOD/BAD test for transistors, FET's and SCR's.

Identifies transistors as NPN or PNP.

FET as N-channel or P-channel.

Identifies FET gate lead.

Identifies all leads of transistors in LO drive; base lead in HI drive.

Identifies all leads of SCR.

APPLIED TEST CURRENTS

Base Drive: 250 mA (HI) or 1 mA (LO) at 2% duty cycle.

Collector Drive: 125 mA at 2% duty cycle.

Test Repetition Rate: 5 Hz.

IN-CIRCUIT SHUNT LIMITS FOR VALID GOOD/BAD TEST:

Resistance: Down to 10 ohms with HI drive; down to 1.5 K ohms with LO drive.

Capacitance: Up to 25 μF with HI drive; up to .3 μF with LO drive.

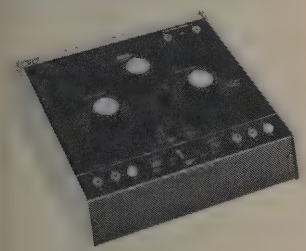
Power Requirements: 6 VDC from four "AA" cells, not supplied. Standby current, 4 mA; average testing current, 12 mA.

Accessories: Carrying Case and test leads supplied. Model FP-5 Dynaflex Probe (optional) may be used in place of test leads.

Size (HxWxD): 4.4 x 9.5 x 6.6 cm (1.75 x 3.75 x 6.6″).

Weight: 450 g. (1 lb.).

## SEMICONDUCTOR CURVE TRACER



**Model 501A/$198.00**

### FEATURES

• Display characteristic curves for all semiconductor devices on your scope • Built-in current limiting protects devices under test • Pinpoint bad devices in-circuit • Measure breakdown voltage non-destructively • Identify unknown devices.

### SPECIFICATIONS

COLLECTOR SWEEP

Range: 0-100 VDC peak at 100 mA maximum.

Polarity: NPN (N-Channel) or PNP (P-Channel).

Current Limiting: Automatic at approximately 130% of full scale for each vertical attenuator range.

STEP GENERATOR

11 Current Rangers: 1, 2, 5, 10, 20, 50 μA per step; .1, .2, .5, 1, 2 mA per step; ±3% constant-current steps.

5 Voltage Ranges: .05, .1, .2, .5, 1 V per step, ±4%; source resistance, 1 K.

Number of Steps: Six, continuous display.

Step Polarity: Same as Collector Sweep (NPN); inverted in VOLTS/STEP positions.

CALIBRATION

Source: ±.05 to 5 V p-p, ±3% accuracy.

Attenuator Range: 1, 2, 5, 10, mA per division vertically, ±3%.

GENERAL

Sockets: Two TO-5 type transistor sockets (right and left) with each pin (three per socket) paralleled by a banana jack or external cables. Slide switch selects right or left socket.

Output Terminals: Banana jacks for vertical, horizontal and ground outputs to oscilloscope.

Accessories Included: Cables to scope, mylar 10 x 10-division graticule, detailed instruction manual and FP-5 probe.

Power Requirements: 105-125 VAC, 50-60 Hz; also available for 230 VAC, 60 Hz. With three-wire cord.

Size (HxWxD): 10.2 x 25 x 24 cm (4 x 10 x 9.5″).

Net Weight: 1.35 kg. (3 lbs.).

## INDUSTRIAL TRANSISTOR TESTER

**Model 520B $175.00**

### FEATURES

• Now with HI/LO drive • Works in-circuit when others won't • Identifies all three transistor leads • Random lead connection • Audibly and visually indicates GOOD transistor • Automatic NPN/PNP determination • Positive Si/Ge identification • Tests diodes, SCR's, FET's, and Darlingtons.

### SPECIFICATIONS

IN-CIRCUIT TESTS

Good/Bad Test: For PNP and NPN transistors. FET's and SCR's.

Identifies: NPN or PNP.

OUT-OF-CIRCUIT TESTS

Good/Bad Test: For PNP and NPN transistors. FET's, SCR's, leakage and loss.

Identifies: NPN or PNP; silicon or germanium transistors.

Measures: Reverse leakage from 0.1 μA to 5 mA.

AUTOMATIC INDICATORS

Audible Tone for GOOD indication. LED Lamps identify NPN or PNP devices and Ge or Si types. Test Switch automatically identifies base or gate lead for good transistors or FET's.

Meter Scales: Readable from 0.1 μA to 5 mA for Ice leakage; calibrated for silicon and germanium power and signal transistor leakage limits.

APPLIED TEST CURRENTS

Collector: 250 mA at 5% duty cycle.

Base: 125 mA at 5% duty cycle.

Test Repetition Rate: 10 per second.

Leakage Test Reverse Voltage: 2.0 V.

LIMITING IN-CIRCUIT BASE-EMITTER SHUNT VALUES FOR VALID TESTS

Resistance: Greater than 10 ohms.

Capacitance: Less than 15 μF.

GENERAL

Accessories: Color-coded test leads with Mini-Lock clips; detailed instruction manual; optional FP-5 Dynaflex™ three-lead, one-hand probe for easy in-circuit testing available.

Power Required: 105-125 VAC, 50-60 Hz; also available for 230 VAC, 50-60 Hz.

Size (HxWxD): 20 x 17 x 8.9 cm (8 x 7 x 3.5″).

Net Weight: 2.27 kg. (5 lbs.).

# B&K PRECISION DYNASCAN CORPORATION / FUNCTION GENERATORS / SIGNAL GENERATORS

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

## NEW SWEEP / FUNCTION GENERATOR

**Model 3020 / $325.00**

### FEATURES

• Four instruments in one package — sweep generator, function generator, pulse generator, tone-burst generator • Covers 0.02 Hz-2 MHz • 1000:1 tuning range • Low-distortion high-accuracy outputs • Three-step attenuator plus vernier control • Internal linear and log sweeps • Tone-burst output is front-panel or externally programmable.

The new Model 3020 is the most versatile signal source ever offered by B&K-PRECISION. This one instrument can actually replace a function generator, sweep generator, pulse generator and tone-burst generator. Frequency coverage spans 0.02 Hz to 2 MHz in seven ranges, with each range providing linear 1000:1 frequency control. Operating frequency can be varied on each range by the front panel frequency control or the VCO external input.

### SPECIFICATIONS

FREQUENCY CHARACTERISTICS
Range: .02 Hz to 2 MHz in 7 ranges. (Each range provides 1000:1 frequency control.)
External Control (rear panel input): VCO range greater than 1000:1 (linear).
Accuracy: ±5%.
Stability: .05% (after 15 min.)
Functions: Sine, Triangle, Square, TTL Square Wave, Pulse, Tone Burst.
Square Wave: Variable amplitude and fixed TTL output.
Symmetry: 99% to 100 kHz.
Rise/Fall Time: <100 ns at maximum output.
TTL Square Wave Response: <25 ns rise/fall time (logic 0<0.4; logic 1>2.4 V).
Sine Wave: Variable amplitude.
Distortion: <1% 0.2 Hz to 100 kHz, <0.5% typical.
Amplitude Flatness. Better than ±0.3 dB to 2 MHz at maximum output amplitude.
Triangle Wave: Variable amplitude.
Linearity: 99% at 100 kHz.
Variable Symmetry: 40:1 range, independent of frequency or output waveform.
AM Modulation: 0-1.5 V p-p external signal provides 100% modulation; continuously variable. Capable of suppressed carrier operation.

SWEEP CHARACTERISTICS
Internal: Linear or log.
Sweep Rate: 0.5 Hz (2 SEC period) to 50 Hz (20 ms period).
Sweep Width: Variable from 10:1 to 1000:1.
Sweep Voltage Output: Proportional to sweep; at rear GCV connector.
External Sweep: Rear panel VCO input provided.

TONE-BURST CHARACTERISTICS
Burst Width: Adjustable from 5-90% of period of internal gating frequency. External gating, burst width determined by TTL gating pulse.
Repetition Rate: 0.5 Hz (2 SEC period), to 50 Hz (20 ms period) set by SWEEP RATE control.

OUTPUT
Amplitude: 20 V p-p open circuit; 10 V p-p into 50Ω.
Control: Continuously variable, >20 dB. Fixed attenuation, 0-40 dB in 3 steps. This, together with 30 dB variable, provides 60 dB total attenuation.
Impedance: 50Ω ±5%.
D.C. Offset: Continuously variable, maximum of ±10 V open circuit or ±5 V into 50Ω. (Maximum AC peak + VDC offset without clipping is ±20 V open circuit; ±10 V into Ω).

GENERAL
Rear Panel Jacks: (All phono) VCO (sweep) input, GCV voltage out (proportional to frequency), AM input, TTL output, tone-burst control external input.
Operating Environment: 0-50°C (Accuracy specified at 25°C ±5°C.)
Power Requirements: 105-130 VAC, 60 Hz, 22 W. Three-wire cord.
Size (HxWxD): 8.1 x 29 x 20 cm (3.2 x 11.3 x 5″) including handle at rest position.
Weight: 1.35 kg. (3.1 lbs.) CSA listed.

## NEW LOW DISTORTION FUNCTION GENERATOR

**Model 3010 / $175.00**

### FEATURES

• Generates sine, square and triangle waveforms • Variable amplitude and fixed TTL square-wave outputs • 0.1 Hz to 1 MHz in six ranges • Push button range and function selection • Typical sine wave distortion under 0.5% from 0.1 Hz to 100 kHz • Variable DC offset for engineering applications • VCO external input sweep-frequency tests.

B&K-PRECISION's new model 3010 function generator offers convenience and excellent waveform accuracy at an affordable price. Frequency coverage is unusually wide, spanning 0.1 Hz to 1 MHz in six ranges, with each range providing linear 100:1 frequency control.

The 3010 features a variable DC offset control which provides up ±5 VDC (into 600Ω) combined with the selected audio output frequency. Engineering applications for this feature are many and varied. For square-wave operation, the 3010 offers a fixed TTL output level and a variable amplitude output. Variable output square wave rise or fall time is 100 nanoseconds or less; TTL square wave rise/fall time is 25 nanoseconds or less. Square-wave symmetry at 100 kHz is a near-perfect 99%. The 3010 generates a near-perfect triangle-wave output by providing 99% linearity at 100 kHz. As a sine-wave generator, the 3010 is conservatively rated at less than 1% distortion from 0.1 Hz to 100 kHz; less than 0.5% is typical.

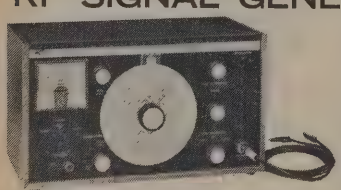
### SPECIFICATIONS

FREQUENCY CHARACTERISTICS
Range: 0.1 Hz to 1 MHz in six ranges. (Each range provides >100:1 frequency control.)
External Control (rear panel input): VCO ≥100:1 (linear) on any frequency range. (With dial setting at .1, a 0 to 5.5 V input ramp produces a frequency change of 100:1).
Accuracy: 5% of full scale on all ranges. (Calibrated at full scale).
Stability: 05% (after 15 min.).
Functions: Sine, Triangle, Square, TTL Square Wave.
Square Wave: Variable amplitude or fixed TTL output.
Symmetry: 99% to 100 kHz.
Rise/Fall Time: <100 ns at maximum output.
TTL Square-Wave Response: <25 ns rise/fall time (0 <.4 V: 1> 2.4 V).
Sine-Wave: Variable amplitude.
Distortion: <1% 0.1 Hz to 100 kHz; <0.5% typical.
Amplitude Flatness: <.3 dB to 1 MHz at maximum output amplitude.
Triangle Wave: Variable amplitude.
Linearity: 99% at 100 kHz.

OUTPUT
Amplitude: 20 V p-p open circuit 10 V p-p into 600Ω.
Control: Continuously variable, >30 dB range.
Impedance: 600Ω ±5%.
D.C. Offset: Continuously variable, maximum of ±10 V open circuit or ±5 V into 600Ω. (Maximum VAC + VDC offset without clipping is ±10 V open circuit; ±5 V into 600Ω).

GENERAL
Operating Environment: 0-50°C (accuracy specified at 25°C ±5°C).
Power Requirements: 105-130 VAC, 60 Hz, 8 W. Three-wire cord.
Size (HxWxD): 8.1 x 29 x 20 cm (3.2 x 11.3 x .5″) including handle at rest position.
Weight: 1.3 kg. (2.9 lbs.). CSA listed.

## SOLID STATE RF SIGNAL GENERATOR



**Model E200D / $275.00**

### FEATURES

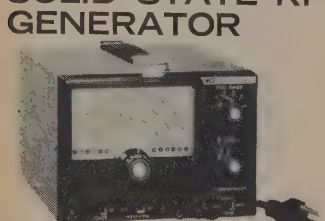
• 100 kHz to 216 MHz in 5 bands • Completely shieldeed RF output w/ modulation percent metering and variable monitored attenuation usable to less than 1 μV • Bult-in 100 kHz and 1 MHz crystal calibration system • Easy-setting 2-color 5″ anti-backlash vernier dial.

Features 100% silicon transistor circiutry and zener-regulated power supply for accuracy, stability and long life. Double shielding eliminates spurious radiation even at outputs of 1 μV. Internal crystal calibrator has accuracy of better than 0.1%. Has 200 μA d'Arsonval meter for accurate monitoring and setting of RF carrier and modulation levels.

### SPECIFICATIONS

Frequency Range: 100 kHz-54 MHz in 5 bands; 54-216 MHz on harmonics.
Accuracy: ±1.5% of highest frequency on any range used; better than 0.1% obtainable with crystal calibrator.
Output (calibrated into 50Ω load): 100,000 μV maximum.
Output Level Calibration Accuracy: ±1 dB to 54 MHz.
Attenuation: 6 individually shielded step attenuators with total attenuation capability of −96 dB. Outputs as low as 106 dB below 100,000 μV can be obtained with fine output level control and calibrated meter, which provides variable −10 dB to +2 dB output level indication (0 dB = 100,000 μV into 50Ω).
Modulation: 400 Hz, nominal. External sensitivity; 1 VRMS for 50% modulation.
Crystal Calibrator: 1 MHz ±.05% crystal oscillator. Bulit-in detector, amplifier and speaker provided for calibration.
Power Requirements: 110-130 VAC, 50-60 Hz; 6 W. Also available for 234 VAC, 50-60 Hz. Three-wire grounded line cord.
Size (HxWxD): 18 x 32 x 20 cm (7.25 x 12.75 x 8″).
Net Weight: 4.5 kg. (10 lbs.).

## SOLID STATE RF SIGNAL GENERATOR



**Model 2050 / $125.00**

### FEATURES

• 100 kHz to 30 MHz in 6 bands, with 1.5% accuracy • 3 Outputs: RF, modulated RF (400 Hz) and externally modulated RF • Positive anti-backlash dial drive • Zener-regulated power supply • 100% solid state • FET's for stability.

Rugged versatile, accurate RF signal generator is built to withstand the rigors of continuous industrial use, yet it's compact and light-weight — weighs only 5 lbs. Zener-regulated power supply is internally fuse-protected. Isolated RF output gives maximum protection against external voltage sources.

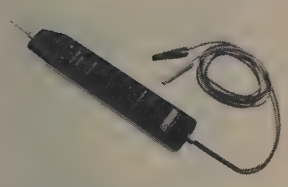
### SPECIFICATIONS

Frequency Ranges: 100 kHz to 30 MHz on 6 fundamental bands.
Accuracy: 1.5% of dial setting.
Output: 0.1 VRMS or better (20°C).
Attenuator: Combination HIGH-LOW switch, plus continuously variable RF OUTPUT control for approximately 20 dB change.
Modulation, Internal: 400 Hz; 40%, ±5%.
Modulation, External: 40 Hz to 10 kHz; modulating voltage input, 1.5 VRMS for 40% or better modulation.
Operating Temp. Range: 0-50°C.
Power Requirements: 117 VAC (also available for 230 VAC) 50-60 Hz; 2.8 W. three-wire grounded line cord.
Size (HxWxD): 15 x 19 x 25 cm (6.1 x 7.5 x 9.75″).
Net Weight: 2.2 kg. (5 lbs.).
Accessories: Supplied with shielded leads with insulated clip and banana plug; detailed instruction manual.

# B&K PRECISION DYNASCAN CORPORATION / PROBES / CABLES

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

## NEW 50 MHz DIGITAL PROBE



**Model DP-50 / $50.00**

### FEATURES

• Multi-family, compatible with TTL, DTL, RTL, HTL, CMOS, MOS and HiNIL • Displays DC to 50 MHz • Displays pulse presence and logic states • Memory mode to "freeze" pulse display • Pulse mode "stretches" short pulses • **2 megohm input impedance** • Input overload protected • Typically detects pulses to 10 ns.

### APPLICATIONS

Simplify and speed de-bugging of digital circuits . . . Analyze digital circuits for design changes . . . Trace a pulse throughout a circuit . . . Demonstrate logic state changes and digital circuit operation for classroom use . . . Microprocessor troubleshooting . . . Digital control circuit troubleshooting . . . MRO applications.

The new B&K-PRECISION DP-50 50 MHz digital probe simplifies the troubleshooting and analysis of digital circuits by clearly displaying in-circuit logic activity. The DP-50 is a multi-family device that is compatible with TTL, DTL, RTL, HTL, CMOS, MOS and high-noise immunity logic (HiNIL).

This compact instrument is easy to handle in tight spaces yet includes every important logic probe feature. Three bright LED indicators display pulse presence and high- and low-logic states. Unlike many logic probes, the DP-50 digital probe will continue to indicate pulse presence through its maximum frequency of 50 MHz. For high-speed or intermittent pulses, the DP-50 offers a MEMORY mode to "freeze" and store the pulse display.

### SPECIFICATIONS

INPUT CHARACTERISTICS
Maximum Input Frequency Displayed: 50 MHz.
Minimum Detectable Input Pulse Width: 20 ns (10 ns typical).
Duty Cycle: LED intensity is directly proportional to duty cycle observed, up to 50 MHz (and a 10 to 1 ratio).
Pulse Standard Mode: Will detect and stretch any input pulse.
Memory Mode: Will detect and latch any input pulse.

LOGIC THRESHOLDS
TTL-DTL: Logic One: 2.4 V; Logic Zero: 0.8 V.
CMOS: Logic One: 70% of supply voltage; Logic Zero: 30% of supply voltage.
Input Overload Protection: ±50 VDC.
**Input Impedance: 2 megohms in all modes.**

GENERAL
Power Requirements: 5 to 15 VDC (30 ma @ 5 VDC; 90 ma @ 15 VDC) protected to +20 VDC.
Reverse Polarity Protection: −50 VDC.
Operating Temperature: 0 −50°C.
Size (HxWxD): 16.25 x 3.12 x 1.9 cm.
Lead Length: 75 cm.
Weight: 98 g.

## HIGH-VOLTAGE MULTIPLIER PROBE

**Model PR-28 / $25.00**

### FEATURES

• Extends voltmeter range to rated 40,000 VDC • Accurate to ±2% • Safe one-hand testing • Use with any high-impedance voltmeter (10 megohm input or greater).

The PR-28 can be used with B&K-PRECISION Models 277, 280, 281, 282, 283, 290, 2800, 2810 and 2830 or with any other constant-impedance voltmeter to extend its range to 40k VDC.

### SPECIFICATIONS

Voltage Range: Usable to 40 kVDC and 20 kVAC (60 Hz); multiplies instrument range by 1000 (e.g., 40 V becomes 40,000 V); may be used with any instrument having a constant impedance of 10 megohms or greater.
Impedance: 600 ohms nominal.
Accuracy: ±2%, plus instrument accuracy.
Calibration: Internal; factory calibrated at 25 kV.
Frequency Range: DC-80 Hz; 20 kVAC max. at 60 Hz.
Size: (HxDia.xCord) 35.56 x 5.72 x 76.2 cm (14 x 2.25 x 30").
Weight: 199 g. (7 oz.).

### Carrying Case Model LC-32 / $6.00

Use this optional vinyl case to carry your PR-28 or HV-40 safely to any job.

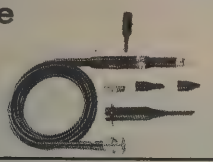
## HIGH-VOLTAGE 40 kVDC PROBES DIRECT-READING

**Model HV-44 / $35.00**

The HV-44 high-voltage probe meter offers extreme reliability and user safety. Voltage measurements up to 40,000 volts are performed accurately and quickly. The HV-44 is factory calibrated at 25 kV and should never need recalibration. Accuracy at 25 kV is ±2% and ±3% at full scale. The core magnet type meter is unaffected by common outside magnet fields and is highly shock resistant. The probe body is molded of high-impact ABS plastic for maximum insulation and lightest weight. The HV-44 will hold-up under the most active field service conditions, preventing down time and possible lost business. Supplied with two interchangeable tips: one conventional round needle type and one specially designed flat spring type for easy access to CRT anode. Model LC-32 vinyl carrying case is optional.

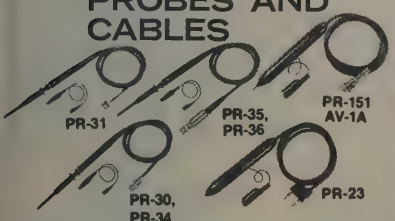
## Deluxe 10:1 / Direct Probe

### Model PR-37 / $38.50



The B&K-PRECISION Model PR-37 deluxe probe is designed for use with wideband oscilloscopes to 100 MHz. The PR-37 is a slimbody probe of precision lightweight construction. A three-position switch selects 10:1 or direct modes, or a reference position that grounds the tip through a 9M resistor. The 52" coaxial cable is extremely flexible. Accessories include with the PR-37 are a spring-loaded retractable tip cover, insulating tip, BNC tip adapter, IC tip and an insulated compensation capacitor adjustment tool. The PR-37 is available in both grey and red colors for instant identification of which channel a probe is connected. Order model PR-37G (grey) or PR-37R (red).

## PROBES AND CABLES



**Model PR-23 RF Detector/Demodulator Probe: $20.00.** An all purpose detector/demodulator probe usable with any electronic voltmeter (both analog and digital) or oscilloscope Models 1403, 1431, 1400, 1460, 1465, 1470, and 1472. Typical Freq. Res. ±2 dB 15 kHz to 125 MHz, within 6 dB at 250 MHz. With UHF connector; banana plug adap- and 1403 A.

**Model PR-30 Combination 10:1/Direct Probe: $26.00.** Input Z: Low-capacity, 10:1, 10 megohms/12 pF; direct, 1 megohm/120 pF. With spring-loaded clip-tip and UHF connector.

**Model PR-31 Combination 10:1/Direct Probe: $26.00.** Input Z: Low-capacity, 10:1, 10 megohms/12 pF; direct 1 megohm/120 pF. With spring-loaded clip-on probe tip and BNC connector.

**Model PR-34 10:1/Direct Low-Capacitance Probe: $31.00.** Designed to prevent ringing when used with extended bandwidth scopes such as the B&K-PRECISION Model 1472. Input Z: 10:1 10 megohms/18 pF; 1:1, 1 megohm, 120 pF. Max. Input: 500 Vp-p. With spring-loaded clip-on tip and UHF connector.

**Model PR-35 10:1/Direct Low-Capacitance Probe: $31.00.** Designed for use with 15 MHz scopes. Input Z: 10:1, 10 megohms/18 pF; 1:1, 1 megohm, 120 pF. Max. Input: 500 Vp-p. With spring-loaded clip-on tip and BNC connector.

**Model PR-36 10:1/Direct Low Capacitance Probe: $36.50.** Designed for scopes with bandwidth extending beyond 30 MHz. Input Z: 10:1, 10 megohms/18 pF; 1:1, 1 megohm, 120 pF. Input Voltage: 500 Vp-p. With spring-loaded clip-on tip and BNC connector.

**Model AV-1A RF Probe: $22.50.** Extends frequency range to 250 MHz. For use with Model 177 VTVM.

**Model AV-2B High-Voltage Probe: $25.00.** Extends DC voltage range to 50,000 VDC. For use with Model 177 VTVM.

**Model PR-21 Isolation/Direct Probe: $15.00.** Prevents capacitive loading and RF interference when measuring DC in RF circuits. Has switchable 100 K ohm isolating resistor. Termination in molded double banana plug.

**Model PR-25 10:1 and 1:1 Compensated Counter Probe: $20.00.** Reduce possibility of double counts when measuring square waves or digital steps, with Model 1801. Direct impedance 1 meg, shunted by 110pF; 10:1 impedance 10 meg, shunted by 10 pF. Frequency Response: 20 Hz to 60 MHz. BNC connector.

**Model PR-43 DC/AC/Ohms Probe: $17.00.** Exact replacement for probe supplied with Model 177 VTVM's.

**Model PR-151 Demodulator Probe: $17.00.** Use for viewing RF and IF modulation waveforms on scopes, and exact replacement for probe furnished with Model 415 Alignment Generator.

**Model TP-41 Terminated RF Cable: $15.00.** Exact replacement for cable furnished with B&K-PRECISION Model 415 Alignment Generator. With selectable terminations of 75 or 300 ohms.

**Model FP-5 "Dynaflex" Probe. $18.00.** Positive contact is assured by spring-loaded needle-sharp tips. Spacing of 3 tips, adjustable with one hand, from 1/32" to 5/8". Each tip is colored-coded. For Model 501A, Model 520B, Model 530 or Model 162 or with any VTVM, or VOM having banana jacks.

## INSTRUMENT CONNECTING CABLES

**Model CC-41: $7.50.** 36" RG/58 U with a BNC connector on each end.

**Model CC-42: $7.50.** 36" RG/58 U with BNC connector and UHF connector (PL-259).

**Model CC-43: $9.00.** 36" RG/58 U with BNC connector and banana plugs.

**Model CC-44: $8.00.** 36" RG/58 U with BNC connector and coaxial microphone connector.

**Model CC-45: $9.50.** 36" RG/58 U with BNC connector and Type N connector.

**Model CC-46: $7.50.** 36" RG/58 U with UHF connector (PL 259) on each end.

**Model CC-47: 06.00.** 36" zip cord with spade lugs and cigarette lighter plug.

**Model CC-48: $9.00.** 36" audio coax with 1/4" phone plug and dual banana plug.

**Model CC-49: $7.00.** 36" audio coax with phono plug to dual banana plugs.

**Model CC-50: $7.00.** 36" audio coax with 3.5 mm mini-phone plug to dual banana plug.

**Model CC-51: $7.00.** 36" audio coax with RCA phono plug to alligator clips.

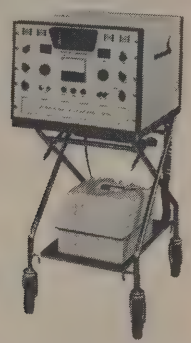
## AUTOMATIC CABLE HARNESS AND CONNECTOR TESTERS

### CABLEMASTER 400-C

**A field proven 400 circuit tester for in-plant use.**



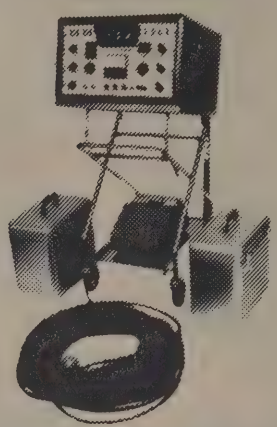
The Cablemaster Model 400-C is a 400 point sequential tester which measures continuity, insulation resistance and dielectric strength (hipot) quickly — accurately — enoconmically. It is ideal for use in receiving inspection, production, quality control, laboratories, field maintenance, operational sites and in a wide range of applications where complete and reliable cable or connector testing is desired with one compact unit. It is equipped with a removable mobile carrier. The 400-C sequences thru the 400 points at a rate of up to 120 steps per minute checking each point for the parameter under test.

**CHECK THESE OUTSTANDING FEATURES**

- Continuity to 59 ohms, and to 3 amps
- Insulation resistance to 5K meg variable voltage
- Dielectric strength (hipot) AC and DC to 3000 volt
- Simplified multiple circuit testing. (More than 2 ends to each wire)

### CABLEMASTER 400S

**For shipboard and aircraft checkout of installed cables**



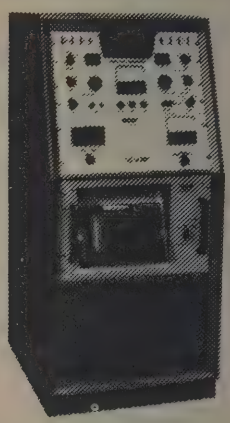
The Model 400-S Cablemaster is a modified Model 400-C, designed to test long, installed cables in ships, aircraft, launch facilities and nuclear plants where test points may be hundreds of feet apart. It contains a scanning feature for finding crossed wires which is used in making retrofits and troubleshooting new systems.

**OPTIONS**

- Printed record
- AC current monitor for actual current readings
- AC capacitance compensation
- Megohmmeter panel for exact resistance measurements
- Digital printout of measurement values

### CABLEMASTER 5000M

**A 5000 point programmable tester**



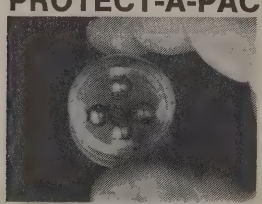
The Model 5000M is a Random Access 5000 Point Tester that is completely programmable for points, parameters, limits and accessories with a maximum test voltage of 1500 VAC/VDC. In hipot, it can perform any of the functions of the 400-C, including all the options. It can be reduced or increased in a number of points to meet needs of any type of testing.

- Low ohms analyzer for discrete low resistance values
- Digital readout of discrete values for each of the above accessories
- Rise time control for application of high voltage 220 volt units available

# IMPACT-O-GRAPH DIVISION
(213) 341-3000

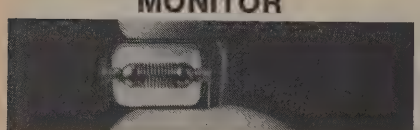
## SHOCK & VIBRATION INDICATORS ACCELEROMETERS & RECORDERS

### PROTECT-A-PAC



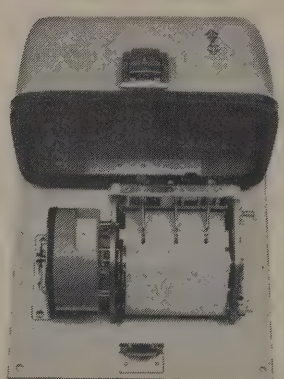
Miniature non-resettable accelerometer monitors shocks from all directions. Tells at a glance if excessive shock has been encountered. Available in ratings from 5g to 300g.

### INERTIAL THRESHOLD MONITOR



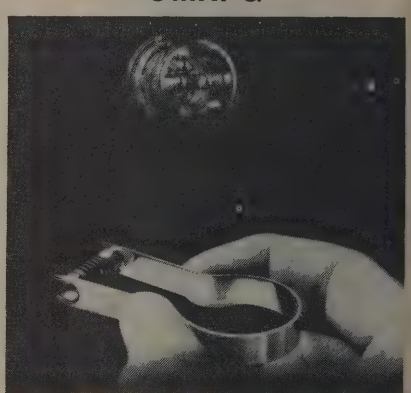
Shock-Fuse™ is a subminiature stick-on jolt indicator designed for OEM monitoring of products. Any impact above factory-set value permanently trips the unit to give visual proof of excessive shock exposure. Available in any shock level from 5g to 500g.

### IMPACT-O-GRAPH RECORDER



IMPACT-O-GRAPH recorders are available in sensitivities of 2g to 300g full scale deflection. Recording period of various models is from (1) one minute to (1) one year. Independent style record time, direction and magnitude of shocks in three separate axis. Self contained — no outside power source necessary. For sale or lease. Lightweight and compact.

### OMNI-G



**THE ONLY RESETTABLE ALL-DIRECTIONAL SHOCK INDICATOR**

- Low cost, compact accelerometer
- Easy to reset
- Monitors shocks from all directions
- Available in ratings from 2g to 500g
- Repeatable accuracy within 40% of rated value
- Can be recalibrated at nominal cost

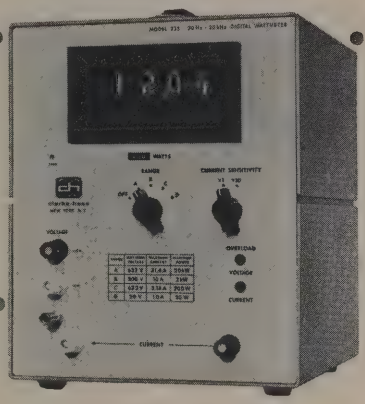
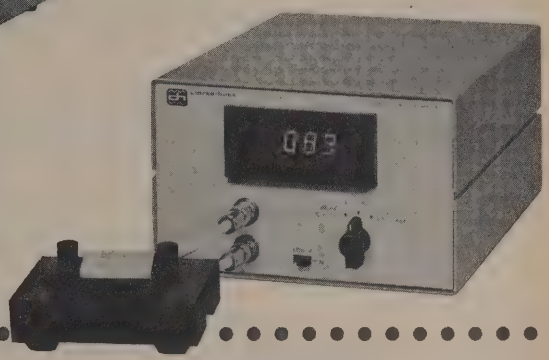
## Model 255
**VOLT-AMPERE-WATT METER**
**True RMS/d-c to 300 kHz/Waveshape Independent**
Accuracy: 0.6% in mid frequency range.
5.000A/500.0mA/50.00mA/5.000mA and 20.00V/200.0V/1000V
Twenty-four power combinations between 10.00 mW and 5000 W.
Power factor for "sinusoidal-like" waveshapes. (BCD outputs and/or remote programming of functions available as options.)
Price: $985.00



## Model 235
**WIDEBAND WATTMETER**
20Hz — 20 kHz; 2W — 20kW. Full scale up to 31 A/630 V. down to 100 mA/20 V. Accuracy 1%, any connection. Power Factors 0-1. Easy to connect and to read. BCD output available. Various range combinations available: 6 to 600 V, 10 mA to 31 Amperes.
Price: $2,495.00

## Model 273A
**DIGITAL ESR METER**
The industry standard for 100 kHz ESR measurements. The Model 273A measures Equivalent Series Resistance values from 0.1 milliohm to 20 ohms. Handles any type of capacitance with values from 5,000 pF up to 1 farad. In use by the world's leading capacitor users. The Model 273A allows production line monitoring in capacitor manufacture and 100% incoming inspection for capacitor users with critical loss requirements. BCD outputs standard.
Price: $875.00

Model 273A also measures internal impedance of *Batteries*, contact resistance of *Relays*, and the effective loss term in *Networks*.



# function generators

All function generators with sine, square, and triangular waveshapes, Tone Burst, Phase Lock Synchronization, Wide Range low distortion VCF and/or FM. All extend down to 1 mHz with "Low Frequency Expand Switch". All generators have sine wave distortions below 46 dB and extremely flat sine wave amplitude vs frequency characteristics. Most units sweep to twice the upper dial frequency. All generators have 50 ohm output, 60 dB of output range.

## Model 743
**TONE BURST, PHASE LOCK SYNC.**
Dial Controlled 1 Hz to 2 MHz. Low distortion FM or VCG. Price: $395.00

## Model 748
**DIAL CONTROLLED 1 Hz to 2 MHz.**
High quality, low distortion AM or suppressed carrier modulation or detection.
Price: $535.00

## Model 744
**TONE BURST, PHASE LOCK SYNC.**
Dial Controlled 3 Hz to 3 MHz. Balanced 600 ohm output. Price: $445.00

## Model 750
**DIAL CONTROLLED 1 Hz to 2 MHz.**
Internal ramp generator with sweep times from 1 msec to 200 seconds.
Price: $495.00

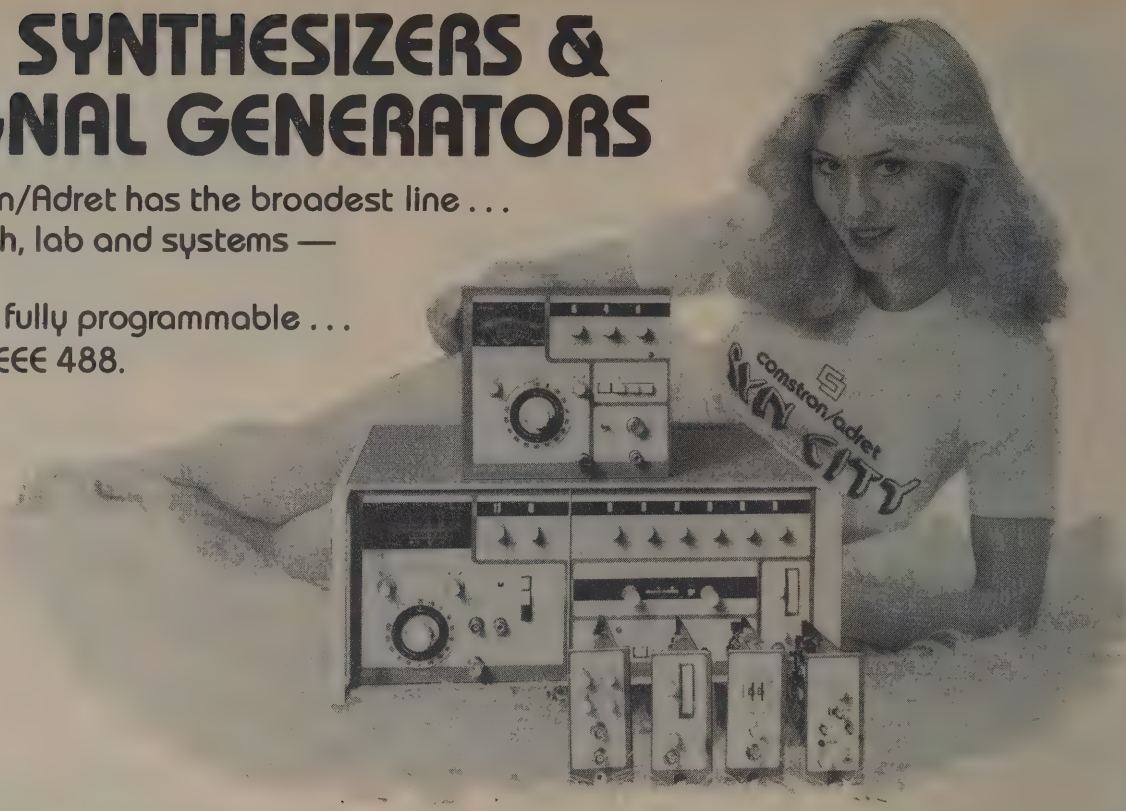
# SYNTHESIZERS & SIGNAL GENERATORS

Comstron/Adret has the broadest line . . .
for bench, lab and systems —

All units fully programmable . . .
BCD or IEEE 488.



**MODEL 6300 (with 6100 main frame)**
**FREQUENCY SYNTHESIZER • SIGNAL GENERATOR**
**300 Hz- 110 MHz**
Resolution: 1 Hz (0.01 Hz with plug-in 6504)
• Continuous frequency adjustment • Sweep with markers (with plug-in 6501A) • Output level: +20 dBm /50Ω
• Programmable attenuator: 150 dB dynamic range, 1 dB steps and verniers • AM/FM capability (with plug-in 6506)

**MODEL 6315 (with 6100 mainframe)**
**GENERATOR SYNTHESIZER**
**400 kHz - 600 MHz**
Resolution: 1 Hz (0.01 Hz with plug-in 6504)
• Continuous frequency adjustment • Sweep with markers (with plug-in 6501A) • Output level: +13 dBm /50Ω
• Programmable attenuator: 140 dB dynamic range, 0.1 dB steps and verniers
• AM, FM and PM capability (with plug-in 6506)

**MODEL 6316 (with 6100 mainframe)**
**GENERATOR SYNTHESIZER**
**400 kHz - 1.2 GHz**
Resolution: 2 Hz (.02 Hz with 6504 plug-in)
• Continuous frequency adjustment • Sweep with markers (with plug-in 6501A) • Output level: +3 dBm /50Ω
• Programmable attenuator: 140 dB dynamic range, 0.1 dB steps and verniers
• AM,|FM and PM capability (with 6506 plug-in)

**MODEL 6303 (with 6100 main frame)**
**PROGRAMMABLE SYNTHESIZED**
**SPECTRUM ANALYZER**
**DC - 110 MHz**
Resolution: 1 Hz • Impedance: 50Ω, 75Ω, 150Ω, 600Ω,
• Analysis bandwidth: 10 Hz/100 Hz
• Dynamic range: up to 120 dB
• Residual noise: 0.1 μV to 3μV

**MODEL 6301**
**LEVEL GENERATOR**
**FREQUENCY SYNTHESIZER**
**100 Hz - 120 MHz**
Resolution: 1 Hz • Two output channels (774 mVrms/75Ω)
• Output level flatness: ±0.025dB

Auxiliary Plug-ins (for 6100 main frame)

**6501A** Sweep with Markers
Provides internal and external sweep capabilities as well as markers.

**6502** Frequency Comparator
Measures the frequency difference between the synthesizer and an external frequency.

**6504** Resolution Extension
Provides extended resolution to 0.01 Hz (.02 Hz with 6316 RF plug-in) with full programmability.

**6506** Internal AM, FM and PM
Provides internal fixed frequency generators for sine or square wave modulation. Amplitude, frequency, and phase modulation can be selected.

**MODEL 3300**
**GENERATOR SYNTHESIZER/**
**FREQUENCY SYNTHESIZER**
**300 Hz - 60 MHz**
Resolution: 1 Hz • Continuous frequency adjustment
• Output level: + 20 dBm/50Ω (75Ω with option 020)
• Attenuator: 150 dB dynamic range, 10 dB steps and verniers
• AM/FM capability

**MODEL 3310**
**GENERATOR SYNTHESIZER/**
**FREQUENCY SYNTHESIZER**
**300 Hz - 60 MHz**
Resolution: 0.1 Hz • Output level: + 20 dBm/50Ω
(75Ω with option 020)
• Programmable attenuator: 100 dB dynamic range, 0.1 dB resolution

### MODEL 3100
### GENERATOR WITH WIRED OPTIONS
### 0.01 Hz - 200 kHz

Resolution: 0.01 Hz • Two 90° phase-shifted outputs • Waveforms: ~ and ⊓⊔ • Output level: 10 V peak • Impedance: 5Ω – 50Ω Options: • Programmable attenuator: 80 dB dynamic range, 0.1 dB resolution • Programmable phase-shifter: 0° to 359.9° with 0.1° resolution • Search function/Sweep with markers.

### Model 2230
### GENERATOR SYNTHESIZER for Telecommunications Applications
### 10 Hz - 1 MHz

Resolution: 1 Hz • Output level: +20 dBm • Programmable attenuator: dynamic range 90 dB, Resolution 0.01 dB; • Impedance: 5Ω, 50Ω, 75Ω, 600Ω • Balanced Output • Tracking frequency with 4 MHz offset • Level flatness ±.05 dB; • IEEE 488.

### MODEL 2430
### GENERATOR SYNTHESIZER for Telecommunications Applications
### 300 Hz - 18.6 MHz

Resolution: 1 Hz • Output level: +20 dBm • Programmable attenuator: 100 dB dynamic range, 0.1 dB resolution • Impedance: 5Ω, 75Ω, 150Ω, 600Ω • Level flatness: ±0.05 dB • Balanced Output • Tracking frequency with 24 MHz offset.

### MODEL 201
### GENERATOR SYNTHESIZER
### 0.1 Hz - 2 MHz

Resolution: 0.1 Hz • Continuous frequency adjustment • Output level: + 13 dBm /50Ω • Attenuator: 100 dB dynamic range, 1 dB resolution • AM/FM capability

### MODEL 201 SB
### FREQUENCY SYNTHESIZER
### 0.1 Hz - 2 MHz

Resolution: 0.1 Hz • Output level: 3 Vrms • Impedance: 1Ω, 50Ω, 75Ω, 600Ω • Output level flatness: ±0.02 dB • Attenuator: 50 dB dynamic range, 10 dB steps and verniers • Tracking frequency with 2 MHz offset.

### MODEL 1010
### FREQUENCY SYNTHESIZER
### Spin Wheeled Tuned
### 1.0 Hz - 10 MHz in 2 ranges

Resolution: 1Hz (to 100 kHz) 100 Hz (to 10 MHz) 5 digit synthesizer at the price of an ordinary oscillator . . . clean signals - leveled, displayed, high output power with crystal accuracy in a precision user oriented instrument. (Not programmable)

### MODEL 1013
### FREQUENCY SYNTHESIZER
### 0.1 Hz - 13 MHz in 5 ranges

Programmable, BCD or IEEE 488 5 digit synthesizer at the price of an ordinary oscillator . . . clean signals - leveled, displayed, high output power with crystal accuracy in a precision user oriented instrument.

### MODEL 1013A
### FREQUENCY SYNTHESIZER
### 0.1 Hz - 13 MHz in 5 ranges

This unit is the same as the Model 1013, but has the added feature of programmable attenuation: 90 dB dynamic range, 0.1 dB Resolution.

## Synthesized Metrology Instruments

### MODEL 4101
### SYNTHESIZED FREQUENCY STANDARD RECEIVER

Maintains time-standard accuracy on loss of power or signal for approximately 24 hours. Tuning frequency: 15 kHz to 200 kHz • Resolution: 20 Hz • Sensitivity: 5 μVrms • Standard frequencies: 1 MHz/5 MHz/10 MHz • Accuracy: $5 \times 10^{-10}$

### MODEL 4110
### FREQUENCY ERROR MULTIPLIER

Input frequencies: 10 MHz and submultiples (down to 1 MHz) • Multiplication rate up to 10,000 • Acquisition time: < 0.2 s Error Measurement: Resolution: $10^{-8}$ to $10^{-12}$

## OEM SYNTHESIZER

### MODEL 5104
### Programmable Compact OEM Synthesizer for Phase-Locked Sources
### 90 to 120 MHz

Resolution: 10 Hz; Phase Noise: −120 dB/Hz at 10 kHz from carrier.

### Synthesized Master Oscillators

4500 & 507: Master Oscillator for television transmitters
5130 : Master Oscillator for medium-wave transmitters
5104 : Master Oscillator for microwave sources
5102 : Master Oscillator for SSB Transmitters

The name to remember in synthesizers.

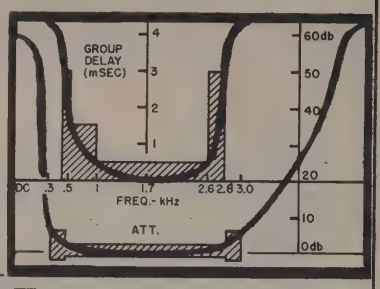
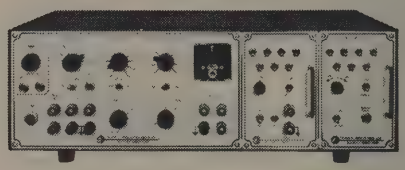
# COMSTRON·SEG TELEPHONE CHANNEL TEST AND SIMULATION EQUIPMENT

## STANDARD TELEPHONE DATA LINE SIMULATORS

- Simulates nominal worst case attenuation and delay per Bell, CCITT, and DCS Schedules.
- Simulates 3002, C1, C2, C4, and DCS-S1, S2, S3.
- Also available; C-Message Weighting, A Weighting, 3kHz Flat, and Tone Notches.



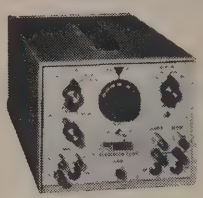
## PHASE JITTER SIMULATOR



FA-1564A

- Simulates normally encountered active telephone channel impairments such as phase jitter, phase hits, harmonic distortion, broadband and impulse noise and frequency translation
- Simulates phase jitter; 0 to 45° peak-to-peak; jitter frequencies, 20 to 300Hz
- Use for developing, testing and evaluating data-com equipment

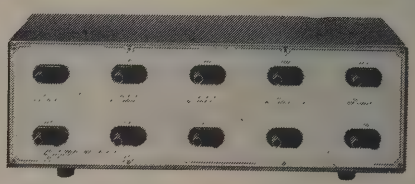
## TUNABLE BAND PASS AND BAND REJECT FILTER



AF-850A

- Telephone channel filter tunable from 35Hz to 3500Hz
- Use for notched noise measurements and waveform analysis; 3.5Hz and 35Hz bandwidth
- Fully compatible with telephone channel transmission measuring techniques and equipment
- 0dB, 10dB, 20dB, 30dB gain and by-pass functions
- Generates reference signal at Fc of notch and bandpass

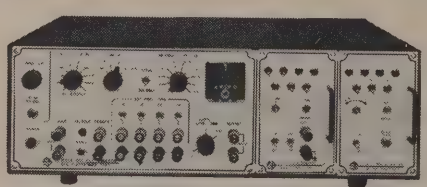
## TELEPHONE DATA LINE SIMULATOR



Model LSCC-( )

- Contains up to 5 data line simulators
- Industry standard telephone line simulator
- Simulates nominal worst case attenuation and delay, per Bell, CCITT, and DCS schedules
- Simulates 3002, C1, C2, C4 and DCS-S3
- Controlled out-of-band characteristics
- Also available: C-Message Weighting, F1A Weighting, Telephoto 1 and 2, etc.

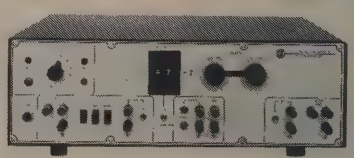
## DROPOUT SIMULATOR



FA-1955A

- Simulates data-channel dropout; adjustable duration from 1 ms to 10 seconds and depth from −3dB to greater than −50dB
- Simulates additive broadband and impulse noise, SFI tones and out-of-band signals
- Operates in band limited mode, with SEG Telephone Data Line Simulators, or in broadband metallic mode

## DIGITAL DELAY (ECHO) GENERATOR



FA-1755

- Simulates data channel delay and/or echo
- Delay to 100 ms* in 1 ms steps
- Stores 99 ms* of transient input data and continuously regenerates it for analysis or utilization as additional channel impairment
- Bandwidth 200Hz to 3.4kHz delay-corrected to 50usec
- Echo adjustable to 49dB in 1dB steps

*Up to 2 seconds available

Why buy?

# Rent or lease ...and save!

**Continental can deliver the right instrument at the right price — now!**

We have rental, lease and purchase plans to suit your needs: **Standard Rental Plan** — The standard rental term is for one month. After the first month, rentals are pro-rated daily for partial months. **Rental/Purchase Plan** — Continental offers a rental plan with an option to purchase the equipment. A substantial portion of your rental payment is credited towards the purchase of the equipment. **40 Month Scope Lease Program** — This plan is available for Tektronix Model 465, 475 and other oscilloscopes. Reasonable quantities of Tektronix scopes are available for immediate delivery. Check our local office for a current price. **Special Annual Agreements** — These agreements are based on either volume or long-term requirements and they provide for discounts that make renting even more attractive.

**PLUS**

**LATEST EQUIPMENT.** Your choice of hundreds of electronic instruments. All the latest models. From virtually every leading manufacturer.

**IMMEDIATE PRE-PAID DELIVERY.** Usually 24-48 hours, from any of our 10 regional centers located across the country. Pre-paid to 48 contiguous states.

**RELIABLE EQUIPMENT.** Continental's four complete calibration, repair, and maintenance laboratories assure you of receiving only fully tested, guaranteed instruments.

**GUARANTEED PERFORMANCE.** Should any Continental instrument ever fail, we'll immediately ship you a backup. And we'll pay the shipping charges.

# CURTIS

## ANALOG ELAPSED TIME INDICATORS

... Smallest size, lowest cost, AC or DC, any voltage

**How they work** — The patented Curtis Ampere Hour Meter is basically a mercury microcoulometer fabricated from precision bore, glass capillary tubing filled with two columns of mercury separated by a small electrolyte gap. Application of pure or pulsed DC signals to electrodes inserted in the mercury causes mercury at the anode to be electrochemically transferred across the gap to the cathode at a time rate proportional to the current. The gap moves along the tube length as a function of the current-time integral. A constant-current supply provides a precision timing device.

### TYPICAL APPLICATIONS

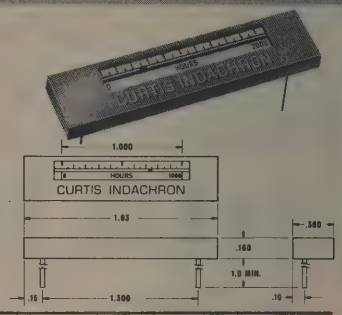
**Warranty** — Low-cost meters for warranty of equipment based on both actual usage, and calendar period.

**Reliability Engineering** — Provides mean-time-to-failure or sub-system replacement time without costly, unreliable logging.

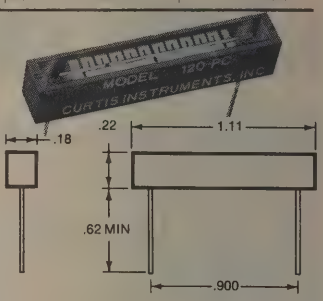
**Test Equipment Utilization & Calibration** — Provides calibration on actual hours of use with savings up to 50% compared to calendar-basis programs. Substantial savings in capital investments can be realized with accurate utilization data on test instruments, tools and equipment.

CURTIS INSTRUMENTS, INC.
200 Kisco Ave., Mt. Kisco, N.Y. 10549
(914) 666-2971 • TWX 710-571-2163

**L Series Curtis Indachron™**
Used on OEM equipment as a very low-cost means of validating warranties and for P.M. scheduling. Under $2.00 each in production quantities. AC and DC Models. Various time scales and electrical ratings. Can be mounted on printed circuit cards or direct to chassis with adhesive strips.



**120-PC Series**
Radial leads for installation directly on printed circuit cards for "mean-time-to-failure" or preventative maintenance scheduling. Can be instrumented from available DC voltages for any time scale by use of series resistor. Full scale of .65 inches = 4.16 milliamp-hours.

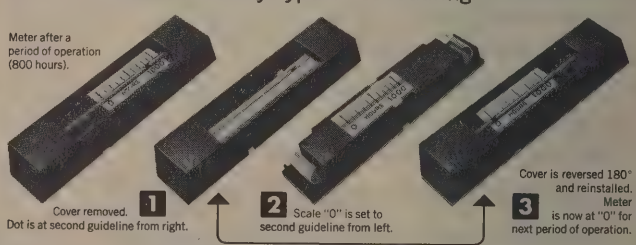


**620 PC, 620N Series, MIL Type**

The Curtis MIL type analog timers are made in two configurations. The 620N Series meet MS90386, and are now available in 5V and 15V, as well as 28V DC and 115V AC models. The 5V and 15V units directly answer the long felt need for an elapsed time meter than can be powered **directly** from voltages available within the box, precluding the necessity of special wiring for the ETI. The units also provide dramatic economies over the older electromechanical types. The 28V DC version provides for internal regulation over the complete aircraft power range, and the 115V AC device is truly insensitive to variation in line frequency.

The 620 PC Series meets the MS-3311 (AS) and was specifically designed for repairable modules and subassemblies, is very low cost and installs directly on PC boards.

**CP-3 Series**
New low cost monitor for P/M scheduling and other applications requiring a simple means of reset to zero in the field. AC or DC. Scales for any type of scheduling.



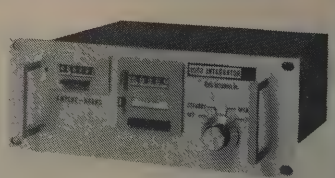
Meter after a period of operation (800 hours).
Cover removed. Dot is at second guideline from right.
1
2
Scale "0" is set to second guideline from left.
3
Cover is reversed 180° and reinstalled. Meter is now at "0" for next period of operation.

**ANALOG COUNTERS**
When operated by well defined pulses such as digital logic signals, any Curtis INDACHRON™ can be calibrated to provide direct indication of accumulated number of pulses with virtually any full scale reading. They can be used to count the number of lines, copies, characters, or other operating functions of computer peripherals, office or communication equipment.

# 1002 D.C. INTEGRATOR

The Curtis Model 1002 Integrator is a highly reliable, precision integration and control system for ampere hour applications in battery, solar energy and process control including the plating processes involving precious metals such as gold and silver. The 1002 maintains a guaranteed accuracy of ±1.0% over the full specified current or voltage range. Available in A.C. and D.C. powered models.

The Model 1002 can be configured with any of four counter options, consisting of six digit counters and a five digit predetermined counter. Single channel models are available in a half rack or full rack package and dual channel models are enclosed in a full rack package.
A related Integrator, the Model 1003, is available for bipolar D.C. integration.
Write for full specifications.



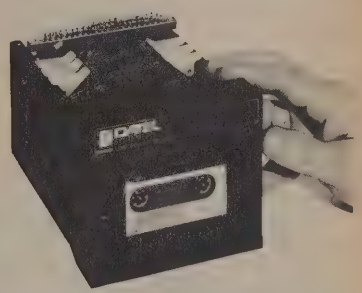
# DATEL

## INSTRUMENTS AND SYSTEMS

This section covers Datel's unique instrument and subsystem products. These products are innovative applications of Datel's A/D-D/A Data Converters. These products keep Datel in close touch with users needs and the high performance systems (DAS-256, SineTrac, etc.) are a natural outgrowth of Datel's application experience. Datel has specialized in the following instruments and systems: Micropowered analog data loggers using incremental digital cassette recorders, thermal and alphanumeric printers, digital panel meters and, in Section 2000 of EEM, computer A/D-D/A analog peripherals and high performance A/D-D/A analog data systems.

**Cassette and Printing Data Loggers**

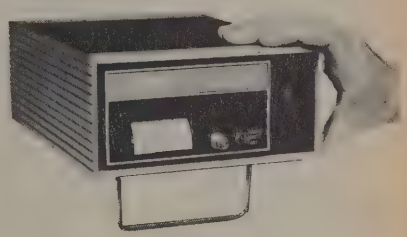
Micropowered stepping motor digital cassette transports offer battery operated portable recorders for field and remoted unattended applications. Straight digital recorders (ICT Series) and mixed digital/16 channel analog recorders (LPS-16 Series) may be played back directly to computers and TTY/CRT terminals. A weatherproof, 64-channel logger (Model DL-2) and companion reader (DL-2R) records unattended one year or more using internal batteries. ICT, LPS and DL-2 systems record 120,000 to 220,000 analog or digital samples per cassette. A 10-channel laboratory data logger (Model PDL-10) uses Datel's thermal printer and a 4½ digit DVM display in a 16 pound, one-hand portable housing.



**Digital Printers**

Datel pioneered the complete Digital Panel Printer, Model DPP-7, in 1975. Thermal printing eliminates messy ink ribbons and the DPP-7 prints highly readable 7-segment digits. The miniature panel mount DPP-7 is complete with an internal BCD full parallel interface and choice of internal power supply. The DPP-7 directly accepts data output from most Digital Panel Meters and BCD counters.

Answering the demand for very inexpensive (from $425) alphanumeric printers, Datel offers the 40-column AIP-40 with choice of parallel or serial interfaces. The AIP-40 is a complete stand-alone table-top printer which directly connects to serial interface mini- and microcomputers. It is an ideal program development printer, industrial data logger output, or point-of-sale printer.



**Digital Panel Meters and Voltage Calibrator**

Datel's leadership in Digital Panel Meters (DPM's) has resulted in today's product line of very low cost (from $29 in 100's) 3½ and 4½ digit DPM's. These display-only models operate from +5 Vdc or 115/230 VAC power and the Liquid-Crystal Display models need only 3 mA from a 9V transistor battery! Half-inch LED displays are used and all models are autozeroed. The 3½ digit models offer many input features for a wide range of applications. These include balanced differential inputs, 5 pA bias currents, and ratiometric operation for scaling. PC board pads have been left for voltage dividers, current shunts and offset pots for milliammeter and ohmmeter applications.

Datel also offers a very compact Digital Voltage Calibrator, model DVC-8500. This ±19.999 Volt dc calibrator is ideal for A/D-D/A and V/F converters, DPM's, op amps and data acquisition systems.

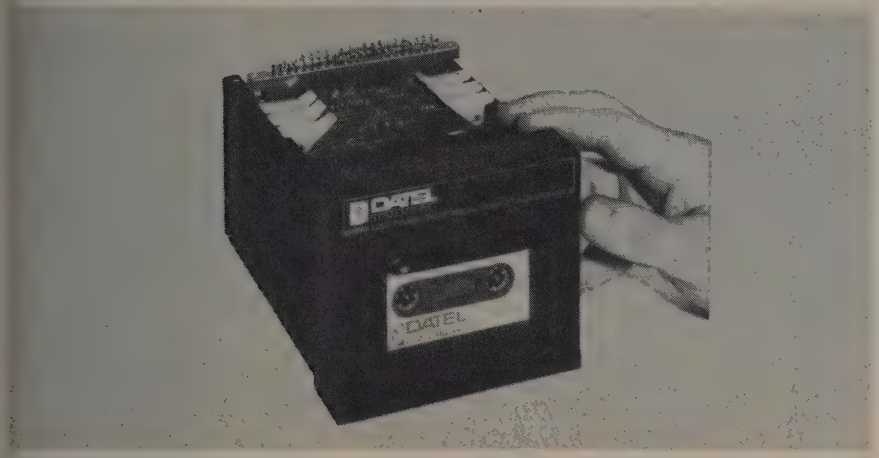
# MODEL LPS-16 DATA LOGGER
# LOW POWER CASSETTE DATA ACQUISITION AND LOGGING SYSTEM



## FEATURES

- Sixteen Channel Analog Input
- Digital Input for Timing Information
- 12 Bit A/D Resolution
- 12VDC Battery Operated
- 900 Milliwatts Maximum Power Consumption
- C/MOS Logic Throughout
- True Incremental Recording
- Certified Phillips Cassette
- 2.2 Million Bit Capacity
- Total Weight 2 Lbs.
- Cassette Reader for Computer Entry

Datel Systems announces a new approach to the Data Logging system, a complete *Data Logging system in a Module*, occupying only 134 cubic inches weighing less than 2 lbs. and operating from a single 12VDC source requiring only 900 milliwatts when recording and microwatts during standby.

In incremental recording, the cassette tape moves only when information is presented. This conserves power in portable operation, and no tape is wasted because data is uniformly recorded in precise tape increments. Further, the length of time a cassette can be left unattended can be accurately predicted from the data rate, the number of bits, and the tape length.

Applications include oceanography, pollution monitoring, meteorology, seismology, or other remote data logging requirements. It is also ideal for other scientific and technical data acquisition uses both in the laboratory and in the field.

A cassette reader is available which allows the user to transcribe the digital data on the cassette to computer compatible media. These readers may be interfaced to produce IBM ½" tape or to teletype, data terminals, acoustic coupler, or directly into a digital computer.

## ORDERING INFORMATION

**LPS-16**

**NUMBER OF BITS & CODING**
- 8B = 8 Binary Bits
- 10B = 10 Binary Bits
- 12B = 12 Binary Bits

**FULL SCALE ANALOG INPUT**
- 1 = 0V to −5V
- 2 = ±5V, inverted analog
- 3 = 0 to +5V
- 4 = ±5V, conventional

**A/D OUTPUT FORMAT**
- A = Straight Binary, Unipolar Input
- B = Offset Binary, Bipolar Input
- C = 2's Complement, Bipolar Input

**FILE LENGTH**
- 00 = None
- 01 = 1 Word
- 02 = 2 Words
- 04 = 4 Words
- 08 = 8 Words
- 16 = 16 Words
- 32 = 32 Words
- 64 = 64 Words
- 99 = Externally controlled file length

**EXAMPLE:**

LPS-16- 12B 4 B 32
- 12B: 12 Binary Bits
- 4: ±5V Conventional
- B: Offset Binary
- 32: 32 Words

| MODEL | PRICE (1-9) |
|---|---|

## DATA LOGGERS/LPR-16

# LPR-16 CASSETTE TAPE READER/INTERFACE FOR MODEL LPS-16 DATA LOGGER

### FEATURES

- Digital Tape Cassette Reader for the 16-channel battery-powered LPS-16 Data Logger
- Full parallel interface to minicomputer or mainframe processor
- Teletypewriter/RS-232-C serial I/O interface
- Selectable I/O loading and logic coding for complete data buss compatibility
- Complete "handshaking" computer controls and flags for "on-line" external control
- Tape-to-Tape Interface for ½" 7/9 track tape transports
- Open collector parallel interface can be multiplexed with order I/O devices sharing common data buss

### ORDERING GUIDE

**LPR-16**

**INTERFACE OPTIONS**
1 = Full Parallel TTL Computer Interface
2 = Teletypewriter/RS-232C serial Interface
3 = Options 1 and 2
4 = Incremental ½" 7/9 Track Tape Interface
5 = Options 1 and 4

**POWER SUPPLY**
A = 115VAC*
E = 230VAC*
J = 100VAC*
*47 to 63 Hz

**INPUT LOADING**
0 = Parallel Interface not supplied
1 = 1 TTL Load
2 = 1KΩ pullup to +5V
3 = 330Ω pullup to +5V and 470Ω pulldown to gnd.
(Input loading applies to parallel interface only).

**OUTPUT LOADING**
0 = Parallel Interface not supplied
1 = Open collector 7406
2 = 1KΩ pullup to +5V
3 = 330Ω pullup to +5V and 470Ω pulldown to gnd.
(Output loading applies to parallel interface only)
+5 Volts must be supplied from the external device.

**SERIAL INTERFACE TYPE**
**(For Serial Interface only)**
R = RS-232-C
T = Teletypewriter
(This selects an internal jumper which floats the TTY power supply)
B = Both TTY and RS-232-C Interfaces. Power supply will be grounded for both versions.
X = Serial Interface not supplied

**NUMBER OF A/D WORDS PER FILE**
**(For Serial Interface only)**
01 = 1 16 = 16
02 = 2 32 = 32
04 = 4 64 = 64
08 = 8 99 = Serial Interface not supplied.
(Programmed by PC jumpers)

**BAUD RATE**
**(For Serial Interface only)**
A = 75 F = 1200
B = 110 G = 2400
C = 150 H = 4800
D = 300 J = 9600
E = 600 X = Serial Interface not supplied
(Programmed via PC jumpers)

**PRICES (Single Quantity)**

LPR-16-1 Full Parallel Interface .....$1995
LPR-16-2 TTY/RS-232-C Interface ...$2295
LPR-16-3 Interfaces 1 and 2 .....$2395
LPR-16-4 Incremental ½" Tape Interface .....$2295*
LPR-16-5 Interfaces 1 and 4 .....$2395
*Interface only to a user-supplied Kennedy 1600/360 off-line transport.

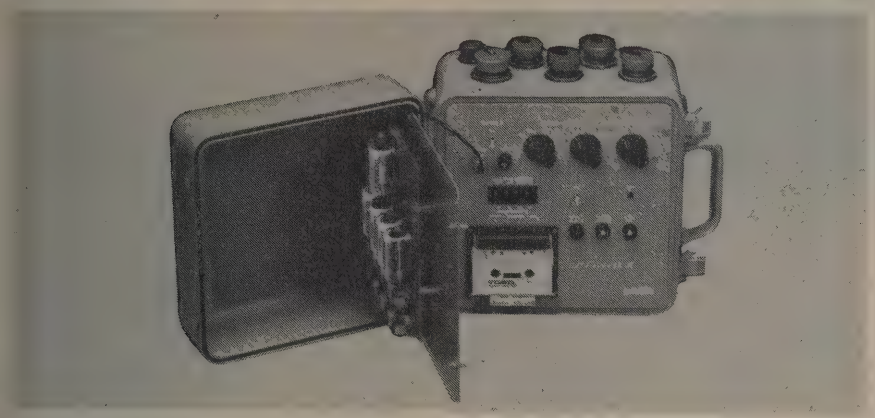
# DATA LOGGERS/DATA LOGGER 2

## DATA LOGGER 2: A NEW INSTRUMENT FOR FIELD DATA LOGGING



Scientists and industrial researchers have long required a battery-powered, portable multichannel analog recording system for long term unattended data logging of slowly varying signals. The power and long-term requirements have been particularly difficult to achieve in a portable commercial instrument. Many applications in meteorology, pollution monitoring, oceanography, biomedicine, geophysics and natural resource exploration require an instrument which can literally be left in the field to run on its own batteries, recording slowly changing data unattended for up to a year.

### SYSTEM DESCRIPTION

Datel System's new Data Logger 2 provides the missing link needed for a remote analog recorder with an output system compatible with most computer systems. Using this system, up to 64 analog inputs derived from physical variables can be displayed or printed out on a computer with the date and time of each measurement. Up to 120,000 separate measurements or samples can be recorded using a single digital magnetic tape cassette. By using a suitable computer program, each input can be displayed—identifying the physical quantity being measured—and properly offset and scaled to the correct engineering units.

In this way the Data Logger 2 system and computer will print out the day, hours, minutes and seconds, and then the actual measurement (i.e. temperature in degrees F, wind speed in miles per hour, etc.). Connected to a set of sensors, the sealed Data Logger 2 makes an ideal weather station, geophysical monitor, or oceanographic buoy data acquisition and recording system.

The complete Data Logger 2 system consists of three separate instruments: the Data Logger, the Tester, and the Reader/Interface. The Logger is the data acquisition and write-only digital cassette recording system. It runs from its own internal battery and makes scans of up to 64 channels at preselected intervals from 1 second to 30 hours. The Logger is housed in a rugged weatherproof metal case and weighs 20 pounds (9,1 Kg). Analog inputs are connected through sealed I/O connectors on the case. A typical data recording system consists of one Tester, one Reader/Interface, and several Loggers deployed for data collection at different locations. The tester is taken to the field to test and calibrate each Logger during set-up; completed digital cassettes are taken back to the laboratory for playback on the Reader/Interface.

### DATA LOGGER 2 TESTER

The Tester is used to calibrate the Logger and to test all its functions before it is committed to long-term unattended recording. The tester checks all controls of the Logger, the battery status (voltage and current), Logger power drain, and tape heads. Simulated data generated on the Tester can be recorded on the Logger. The Tester will also display actual data or the simulated data on the Tester's LED readouts. In addition the Tester performs a complete self-check of all its own switches, displays, and batteries. The Tester is housed in a portable weatherproof case identical to that of the Logger.

### READER/INTERFACE AND INTERFACE OPTIONS

The Reader/Interface for the Data Logger 2 system is a complete computer front end for playing back the digital cassettes recorded on the Logger. The Reader can be operated from front panel controls or can be remotely controlled on-line by a minicomputer, mainframe processor or other I/O device. Front panel displays allow the operator to manually step through a recording to find a sample on a particular date and time. Front panel binary and decimal LED's will display this date and time in addition to the raw binary data for that sample on a selected channel.

### FEATURES

- 64 channel cassette digital tape data acquisition system in a sealed weatherproof, high reliability ruggedized metal case
- One year lithium battery supply
- −10°C to +60°C operating temperature range
- +10mV, ±5mV or ±5V, 0 to +5V Volt input ranges, 100 megohm impedance, 100dB CMR differential configuration
- 6mW standby power CMOS design, 1 watt power while scanning, +12VDC power
- 1 second to 30 hour selectable scan rates
- From $4999.

### KEY SPECS: DATA LOGGER 2

| | |
|---|---|
| No. Channels | Up to 64 |

# DATA LOGGERS/DATA LOGGER 2

## DATA LOGGER 2 READER

By suitable computer programming an automatic search for a particular sample can be conducted.

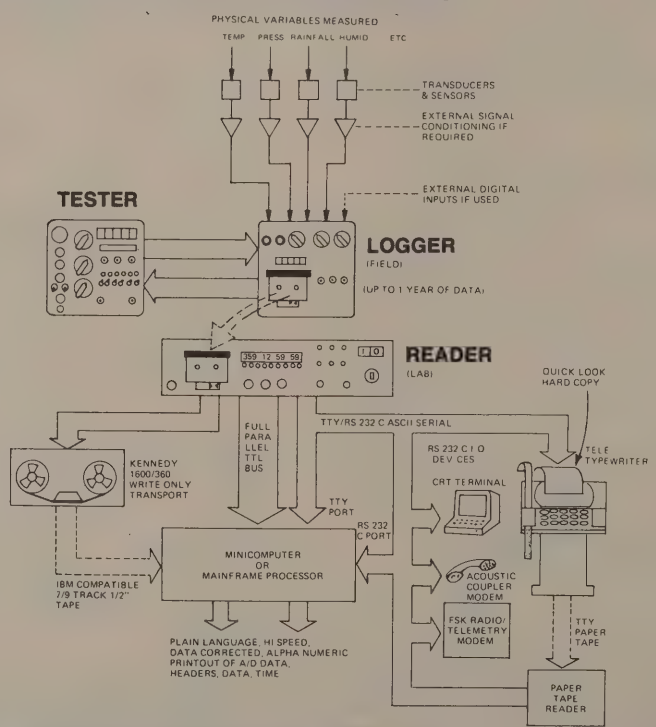
The Reader is available with one of these interface types. A full parallel interface provides buffered TTL binary data at ranges up to 100 samples per second with the cassette tape moving continuously. This interface provides the highest output rate and may be used to load a computer memory in interrupt mode or block transfer (direct memory access).

The second interface is full serial (2 wire) to connect to teletypewriters and RS-232-C I/O devices such as CRT terminals and high speed printers in ASCII format. The teletypewriter (TTY) output provides a simple way to connect to a computer which has a TTY port. The teletypewriter can be used off-line to prepare paper tapes of the raw data and to get a "quick look" at the data. Feeding the paper tape back to the computer on-line will then produce a plain language print out with suitable programming. The RS-232-C outputs may also operate an acoustic coupler modem for telephone transmission or frequency-shift keying of a radio link. The TTY/RS-232-C serial interfaces are programmable from 75 to 9600 baud rates to accommodate different output devices and transmission lines.

The third Reader interface connects to a Kennedy 1600 incremental ½" magnetic tape transport. Tapes prepared using this transport may be played back at high speed on any 7/9-track mainframe processor tape deck. This tape-to-tape interface provides simplified no-wiring data entry to a computer and user retention of the data on a high speed tape medium.

Various user configurations of the Data Logger 2 system are shown in the "Data Logger 2 System Configurations" diagram.

## DATA LOGGER 2 SYSTEM CONFIGURATIONS



## LOGGER OPERATION

The Logger and Reader both employ Datel Systems' low power stepper-motor incremental cassette tape transport. This transport features very fast power turn-on permitting the transport to be normally off except during actual recording. Extensive use of fast turn-on circuits using MOS devices allows the Logger to operate for a year or longer (depending on sample rate) using only 5 D cell Lithium batteries mounted inside the front cover. While recording, the tape transport and data acquisition electronics are powered up for only 11 seconds maximum to record all 64 channels. The system then turns off except for a CMOS crystal-controlled clock circuit which initiates the next scan at the time determined by the manually selected scan rate. During each scan the data and time are automatically recorded on the cassette tape. A battery monitor will record if the battery voltage falls too low.

The Logger is rated for a year or more of operation at moderate sample rates over an operating temperature range of −10°C to +60°C. External inputs may be used to record 36 bit parallel digital data on command or to make an analog scan on external command.

Both high and low level analog inputs are accepted with unipolar, bipolar, or two's complement coding on the 12 bit A/D converter. The high level ranges are −5V to +5V or 0 to +5V; low level ranges are 0 to +10mV or −5mV to +5mV with 8 bit accuracy. The low level inputs are differential with 100 megohm input impedance, ±5V common mode range, and 100dB common mode rejection out to 100 Hz. Basic high level accuracy is ±.04% of full scale ±½ LSB with a temperature coefficient of ±12ppm/°C.

During recording the Logger draws a maximum 100mA of current from its 12V Lithium batteries; between scans only the crystal clock is running, drawing just 1mA maximum. A variety of power options may be used with Data Logger 2 including external AC, or +12VDC. In addition the internal battery holders may be rewired to accept rechargeable D cell nickel cadmium batteries or other types of D cells.

## DATA LOGGER 2 ORDERING GUIDE

AVAILABLE UNDER GSA CONTRACT
NO. GS-00S-29002

**DL-2**

**Channel Configuration**

A = 32 High Level
B = 32 Low Level
C = 32 High Level and 32 Low Level
D = 64 High Level
E = 64 Low Level

**Input Ranges & Coding**

Note:
High Level (HL) Inputs are single-ended
Low Level (LL) Inputs are differential

1 = Bipolar (offset binary) (not useable if TTY, RS-232-C output is used)
LL: −5mV to +5mV and/or
HL: −5V to +5V
2 = Bipolar (2's complement)
LL: −5mV to +5mV and/or
HL: −5V to +5V
3 = Unipolar (straight binary)
LL: 0 to +10mV and/or
HL: 0 to +5V
4 = Special Low Level Range (contact factory)

Notes: 1 Coding types 1, 2, & 3 *cannot* be intermixed.
2 Coding must be specified at time of order.
3 High level and low level channels may be ordered in the same unit, but all coding must be the same.
4 Low level 0 to +5mV is not offered.

**Internal Power Supplies**

A* = (10) internal D-cell battery holders installed and internal 115VAC/60Hz supply
E* = (10) internal D-cell battery holders installed and internal 220 VAC/50Hz supply
J* = (10) internal D-cell battery holders installed and internal 100VAC/60Hz supply
} Add $175. for AC supply
X = External battery connector and (10) internal D-cell holders installed. No internal AC power supply furnished.

**HOUSING, CONNECTORS, & BATTERY TRAY**

Leave Blank = Included
1 = Not Included

**DATA LOGGER 2 PRICES (SINGLE QUANTITY)**

| | | WITH HOUSING | WITHOUT HOUSING |
|---|---|---|---|
| DL-2A | (32HL) | $4999. | $3999. |
| DL-2B | (32LL) | $5295. | $4295. |
| DL-2C | (32HL & 32LL) | $6199. | $5199. |
| DL-2D | (64HL) | $5999. | $4999. |
| DL-2E | (64LL) | $6495. | $5495. |

**DL-2T1** Tester with 13-bit D/A calibrator . . . . . $4995.00
**DL-2T2** Tester less D/A calibrator . . . . . $4495.00

*Batteries are not included, please order separately below.

Low temperature operation (−40°C to +60°C) available on special order, contact Datel.

## DATA LOGGER 2 READER ORDERING GUIDE

**DL-2R**

**Interface Options**

1 = Full parallel computer interface
2 = TTY/RS-232C serial interface
4 = 7 or 9 track ½" incremental mag tape interface

**Power Supply**

A = 115VAC, 60Hz
E = 230VAC, 50Hz
J = 100VAC, 60Hz
(Power consumption, 65 watts max., either version)

**Input Loading**
**(For full parallel interface)**

0 = No parallel interface
1 = 1 TTL load
2 = 1K ohm pullup to +5V
3 = 330 ohm pullup to +5V and 470 ohm pulldown to ground

**Output Loading**
**(For full parallel interface)**

0 = No parallel interface
1 = Open collector 7406
2 = 1K ohm pullup to +5V
3 = 330 ohm pullup to +5V and 470 ohm pulldown to ground
*+5V must be supplied from external device

**Baud Rate**
**(TTY/RS-232 interface)**

A = 75
B = 110
C = 150
D = 300

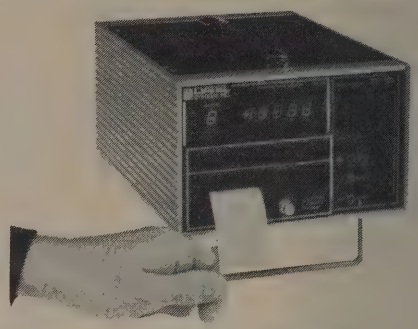
# DATA LOGGERS/PDL-10

Meeting the demand for a high performance laboratory-grade printing data recorder, Datel's model PDL-10 Printing Data Logger accepts up to 10 floating analog input voltages and automatically prints them out at preselected intervals. The PDL-10 digitizes all selected inputs to 4½ digit accuracy, displays and prints them out as decimal voltages on a very compact inkless thermal printer. Analog inputs are accepted over ±199.99mV, ±1.9999V and ±19.999 Volt front-panel selected voltage ranges and are printed out every second with the channel number at preselected scan intervals.



## SPECIFICATIONS

### ANALOG INPUT

**Number of Channels** ..... 10

**Configuration**
3-Wire differential inputs, transformer-isolated using a mechanical relay multiplexer.

**Input Voltage Ranges**
Choice of 3 DC ranges:
±.19999V; ±1.9999V; ±19.999V
preselected by ten front panel slide switches for each channel.

**Overvoltage**
Input is diode-protected for up to ±100V maximum continuous.

**Common Mode rejection**
108dB, DC to 60Hz with 1000Ω maximum input unbalance.

**Common Mode Voltage Range**
±20 volts maximum to signal guard. ±300 volts maximum to AC power ground.

**Input Impedance** (±20V input max)
(Differential) ..... 500 Megohms minimum.
(To Signal Guard) ..... 100 Megohms minimum.

**Input Bias Current**
500pA typ., 8nA maximum

### PERFORMANCE

**Accuracy @ +25°C**
Within ±0.01% when calibrated due to all effects except temperature drift.

**Temperature Drift**
ZERO: ±1μV/°C GAIN: 20ppm/°C

**Operating Temperature Range**
0°C to +45°C

**Storage Temperature Range**
−25°C to +85°C

**Sampling Rate**
Pre-selected channels are advanced, displayed and printed one channel per second.

**Scan Intervals**
Intervals from 00 to 99 seconds or minutes

### DISPLAYS

**Input**
A digital panel meter (DPM) displays the analog input voltage.

**Channel**
A single 0.43" (11 mm) red LED digit indicates channel 0 through 9.

**Printing Method**
Seven segment digits are formed on thermal paper using a thick-film resistor matrix printhead requiring no ink, hammers or ribbons.

**Printer Digits**
7-segment 0 to 9 digits 0.155" (4 mm) high. Spacing between printed lines: 0.2 inch (5 mm).

**Line Capacity**
Approximately 9000 lines.

**Printout Format**
Printout format is 9± .1.9.9.9.9 with the leading digit indicating channel number. Three lines are skipped between scans.

**Printing Paper**
Using heat sensitive thermal printing paper, 1.75"W (44,5 mm) and supplied in rolls 150 feet (45 mm) long.

### FRONT PANEL CONTROLS

**Channel Select and Input Range**
(Ten 4-position slide switches) ".2V, 2V, 20V and SKIP".

**Scan Interval**
(Two decade thumbwheel switch) Sets the time interval between scan starts from 00 to 99 seconds or minutes.

**Minutes/Seconds**
(2 position toggle switch) Determines whether the Scan is set for minutes or seconds.

**No Print/Run/Reset & Start**
(Three position toggle switch) In NO PRINT, the instrument scans and displays but does not print. In RUN the instrument scans, displays and prints out.

In RESET & START, the scan timer is reset and starts timing. One scan is printed out one second from switch release.

**One Channel/Scan**
(Two position toggle switch) The ONE CHANNEL position prevents the multiplexer relay for the selected channel from disconnecting with each scan. In the SCAN position, normal relay cycling, display and printout occur. Channel 0 (="10") cannot be skipped in "scan".

**Paper quantity**
A lever indicates relative quantity of paper remaining.

### REAR PANEL INPUT CONNECTIONS

Analog input voltages are connected using screwdriver barrier terminal strips. (30 terminals).

### POWER SUPPLY

Choice of 115 or 230 VAC ±5, 10, 15 or 20 volts at 50 or 60 Hz only. Power consumption (all models) 30 watts, typical.

### PHYSICAL DIMENSIONS

**Mounting**
Bench-top mounting with tilt-up stand and mar-proof plastic feet. Users can remove the feet and stand for optional ½-rack mounting.

**Outline Dimensions**
5.25"H × 8.5"W × 12"D (133 × 216 × 305 mm)

**Weight**
16.5 pounds (7,5 Kg)

## ORDERING GUIDE

## MICROPOWER CASSETTE TRANSPORTS

## ICT-WZ Series Micro-Powered Digital Cassette Recorder

### FEATURES

- ▶ **Simple, reliable capstan/pinch roller stepping motor drive**
- ▶ **Ultra-low power (700 milliwatts while writing) using CMOS electronics**
- ▶ **High data capacity: Up to 2.2 million bits per 300 foot cassette**
- ▶ **Ideal for +12VDC battery portable digital data recorders**
- ▶ **Reader Systems available to interface most computer terminals, RS-232-C CRT displays, modems and teleprinters (TTY)**

### DESCRIPTION

These unique data recorders and reader systems offer a new concept to the instrument designer—miniature, removable ultra-low power, digital data storage. Using a Philips data tape cassette, low power incremental stepping motor and CMOS electronics, these recorders are ideal for portable-battery-powered data collection instruments.

Reader/interface systems which are separate from the data recorder provide several output forms (full parallel, TTY/RS-232-C ASCII, 1/2" mag. tape) to adapt to different computers and printout devices.

With very fast power turn-on, the tape moves only when actually recording data or creating a gap. At all other times when not recording data, the transport and power-multiplexed electronics remain turned off to save tape and batteries.

Complete Cassette Data Logging Systems from Datel are available to record up to 16 or 64 analog channels (refer to Datel Models LPS-16 and DL-2). Applications include oceanographic buoys and submersible probes, portable air and water quality environmental monitors, traffic and noise loggers, natural resources exploration, vehicular testing, seismic and geophysical measurements, RF field strength and transmission loggers, unmanned weather stations and biomedical loggers.

A dual-track complementary NRZ (CNRZ) method is used for high noise immunity and self-clocking on playback. Using separate 1's and 0's tracks and very small gaps, one cassette can hold up to 2.2 million bits, or 120,000 A/D samples.

All electronics for the ICT systems are mounted in an optional PC card cage which attaches to the rear of the transport.

Optional +5V power version available (ICT-W5Z)

### SIMPLIFIED ICT-WZ COMPLEMENTARY NRZ MODEL SELECTION

Four systems should be selected ranging from transport to full system.

| Model Number | Description | Input Type | Price |
|---|---|---|---|
| **ICT-WZ1 (Transport System)** | Transport Mechanism Only | Direct input to Write-head windings and 4-phase stepper motor windings. | **$359.00** |
| **ICT—WZ1B2A (Unformatted Serial System)** | Transport, Card Cage, Write Step Card | CMOS logic inputs, unformatted full serial Write Step requires external write clock timing but codes write-head signals to complementary NRZ coding. | **$695.00** |
| **ICT-WZ1B2A-3942**<br>**ICT-WZ2B2A-3950** | Transport less Cage, with Write Step mounted to transport by standoffs. | Same as above | **$595.00 (less EOT/BOT)**<br>**$625.00 (with EOT/BOT)** |
| **ICT-WZ1B2B (16-Bit Parallel System)** | Transport, Card Cage, Write Step and Formatter Cards. | Accepts full parallel or serial 8 to 16 bits CMOS data and formats in files of selectable word length. Parallel inputs are stored. Files are jumper-selected to any length. | **$900.00** |

Contact Datel for optional analog input (A/D Converter) to the ICT-WZ system.
Prices and specifications subject to change without notice.
Use Models LPR-16 or ICT-RZ2 as readers.

### DIGITAL CASSETTE TRANSPORT SPECIFICATIONS
**(Typical over −10°C to +60°C unless noted)**

| | MODEL ICT-WZ COMPLEMENTARY NRZ FORMAT |
|---|---|
| **GENERAL** | |
| **Recording Medium** | Philips tape cassette, certified for digital operation |
| **Number of Tracks** | Two half-width tracks, recorded simultaneously |
| **Recording Direction** | One direction only |
| **TAPE MOTION** | |
| **Nominal Tape Speed** | 0.163 in./sec. (4, 13mm/sec) at 100 steps/sec |
| **Bit Density** | 615 bit per inch (615 FRPI) 24 bits per mm |
| **Bit Writing Rate and Motor Step Rate** | 100 bits/second, asynchronous |
| **DATA CHARACTERISTICS USING DATEL'S ELECTRONICS** | |
| **Recording Format** | 2-track serial complementary NRZ. 1's on Track 1. 0's on Track 2 |
| **Character Record Length** | 8, 10, 12, 14 or 16 bit characters or words |
| **File or Block Length** | Files consisting of 1, 2, 4, 8, 16, 32 or 64 characters or words per block or any length |
| **Gaps** | 3-bit intercharacter, or inter-word gaps added before each character. 12-bit end-of-file gap written after each file |
| **Gap Stepping Rate** | 100 steps/sec |
| **Time to Generate Full Gap Length** | 0.12 sec |
| **DATA CAPACITY** | |
| | (Assuming 64 8-bit characters per file, and 282 feet (86 m) usable recording area) |
| **Block or Files per Cassette** | 3200 files |
| **Time per File (not including gaps)** | 6.4 seconds |
| **Time to Fill a Cassette (continuous running at max. step rate)** | 5.8 hours |
| **Playback Speed, typical** | 1700 bits/sec (LPR-16 Reader, 2.75 ips) |
| **PHYSICAL** | |
| **Weight** | 1.25 pounds (0.567 kilogram) |
| **Dimensions (Transport alone)** | 3.91" High x 4.5" Wide x 3.36" Deep (99,3 x 114,3 x 106,7 mm) |
| **Maximum Depth Behind Mounting Panel** | 1.94" (49,3 mm) from panel front surface |
| **Temperature Range (Operating and Storage)** | −10°C to +60°C standard |
| **Power Consumption (Auxiliary Cards and EOT/BOT Detector)** | 120 microwatts each (+12VDC @ 10 microamps). The EOT/BOT Lamp and detector consume 900 mW (+12VDC @ 75 mA) |
| **Power Consumption** (Transport & Tapehead only) | 700 mW typ @ 100 steps/sec (+12VDC @ 60 mA) |

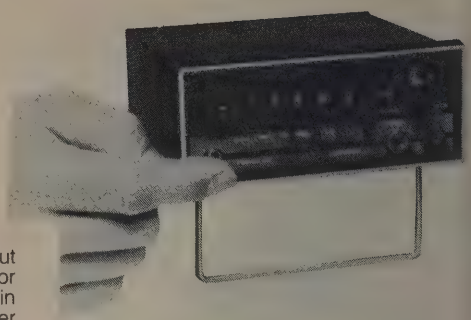
# 0.005% MINIATURE DIGITAL VOLTAGE CALIBRATOR

## FEATURES

- ±19.999 Volts Isolated Bipolar Output @ 25mA
- 1mV Settability With ±1.5mV Continuous Vernier, 100μV Graduations
- Accuracy ±1mV of Setting With Low ±20μV/°C Drift
- Miniature Aluminum Case Includes Bench-Top Stand or Can Be Panel-Mounted
- Low Cost $450.00



## GENERAL DESCRIPTION

A digital voltage calibrator small enough for bench-top use or panel-mounting is available from Datel Systems and fulfills many laboratory and portable applications. Datel's model DVC-8500 Calibrator offers full 4½ digit resolution (1mV steps) with a +19.999 Volt bipolar output. Up to 25mA output current may be drawn at the +1mV rated accuracy. This short-circuit proof output may be continuously varied within +1.5mV for precise vernier control. The ±20μV/°C drift specification applies over the 0°C to +50°C operating temperature range.

The DVC-8500 uses easy-to-operate digital lever switches to set the output voltage. Front panel banana jacks simplify the connection to calibration circuits while rear panel sense feedback inputs insure output accuracy.

An overload LED lamp is lit when output loading exceeds 25mA. The rear connector accommodates either standard dual 36-pin gold-plated PC board connectors or solder or crimp lugs using 4-40 hardware. The +10V reference is derived from an oven-stabilized zener diode and is brought out at the rear connector for voltage-tracing of external circuits.

The DVC-8500 is powered by a choice of 100, 115, or 230 VAC +10%, 47 to 440 Hz at 5 watts typical. The black-anodized extruded aluminum housing provides excellent shielding to electrical noise and a regulated power supply provides excellent stability and performance.

## MODEL NUMBER DVC-8500

| AC POWER SUPPLY |
|---|
| A = 115VAC |
| E = 230VAC |
| J = 100VAC |
| *±10%, 47 to 440Hz |

## PRICE (1-9)

DVC-8500 ..... $450.00

Panel-Mounting Kit,
P/N 38-A-3022-1 ..... $ 10.00
(Consists of (2) U-Straps, rear PC-board connector, and hardware. Rubber feet and tilt-stand bale supplied for bench-top use are screwed to case bottom and must be removed before panel mounting).

## SPECIFICATIONS:

**(Typical between +20°C to +30°C at steady ambient temperature after 5 minute warm-up)**

### VOLTAGE OUTPUT

Output Voltage Range . 0 to +19.999 Volts DC or 0 to −19.999 Volts DC, lever switch selected.
Output Current Range . 0 to ±25mA to rated voltage output accuracy.
Output Overload ..... Greater than ±25mA will illuminate front panel LED overload lamp. Output is current limited (continuous short-circuit proof) to ±70mA at any voltage up to ±20VDC.
Output Impedance: .... Less than 10 milliohms.

### PERFORMANCE

Accuracy @ +25°C ... Within ±1mV of setting when calibrated (equivalent to ±0.0005% of Full Scale) Due to all effects except temperature drift.
Resolution ..... ±1mV increments and ±1.5mV Vernier with 100-V graduations.
Temperature Drift ..... Within ±20μV/°C
Operating Temperature Range ..... 0°C to +50°C
Output Noise ..... 25μV p-p, wideband
Reference Source ..... 6.4V oven-stabilized zener diode

### FRONT PANEL

Output Selector Switches ..... Six lever-operated, detented switches
Output Vernier ..... Rotary potentiometer, range ±1.5mV of selected output. Graduated in 100μV divisions.

### INPUT/OUTPUT CONNECTIONS

Front Panel ..... Voltage output and output common available from two (2) gold plated brass deep banana jacks.
Rear Panel ..... PCB Connectors sense in VOUT.

### POWER SUPPLY

Power Required ..... Choice of 100, 115, or 230 VAC, ±10% 47 to 440 Hz, 10 watts. 3-prong U.S. captive line cord installed. Ground wire connected to case, but transformer isolated ±300VDC from output common.

### MECHANICAL DIMENSIONS

Case ..... 5.56″W × 2.11″H × 5.78″D(141,2 × 53, 6 × 146, 8mm)
Bezel ..... 5.86″W × 2.25″H × 0.50″THK (148,7 × 57.0 × 12,7 mm)
Weight ..... 2.25 pounds (1,0 Kg)

**MOUNTING** ..... Choice of bench-top mounting or panel mounting through a cutout measuring 2.16″H × 5.59″W (54,8 × 142,1 mm) and secured by 2 U-Straps. See ordering guide for optional panel-mount kit.

# DIGITAL PANEL PRINTER/DPP-7

## 7-COLUMN THERMAL PANEL PRINTER

### FEATURES

- 3 Lines/Second OEM-Reliable Thermal Printer using only 2 moving parts.
- Includes All Electronics for BCD Inputs with Input Storage Register
- 6 Numeric Columns and Sign
- Selectable Leading Zero Blanking
- Positive or Negative True TTL/DTL Inputs
- +5VDC Power (2.3 lbs) or AC (4.2 lbs)
- $475.00 Single Quantity
- Last Line Visible Immediately After Printing
- 2.3 Lb. Panel-Mounting Featherweight

Imagine a low cost 7-column panel-mounting printer just slightly larger than most digital panel meters. Imagine this lightweight, high-reliability digital panel printer installed in your instrument or system front panel. And imagine an ink-less, non-impact thermal printing method with only two moving parts which will last for years.

This is Datel's miniature 3 line per second DPP-7 thermal panel printer. A no-nonsense, simple to apply, OEM-designed digital output device that weighs in at only 2.3 pounds (1,1 Kg). OEM features are designed in to the DPP-7 such as selectable leading zero blanking, selectable positive or negative true coding inputs and choice of ±5VDC or AC line power. Full parallel TTL input BCD electronics are included as standard.

Other OEM design features include a selection of printout formats, manual print and advance front panel switch, and a low-paper switch output. A unique mounting technique uses an aluminum housing which attaches directly through a front panel cutout. This housing permanently holds the electronics, although the mechanical assembly can be completely removed for paper replacement using a single front panel thumbscrew. As the mechanical assembly is removed, it disconnects from the internal electronics PC board connectors, so that no lethal power voltages are exposed during paper reloading. However, the external PC board connectors at the rear of the case remain connected to the internal electronics.

The housing supports the weight of the mechanical assembly and is mounted on a front panel through a 4.50″ × 2.72″ cutout and secured by four screws. Three DPP-7 panel printers can conveniently be mounted across a 19″ × 3½″ high rack mount panel.

OEM pricing makes the DPP-7 ideal for instrument products. Comparable impact parallel printers with BCD decoding and drive electronics usually list for more than the DDP-7.

Standard 1¾″ wide thermographic papers are used in handy 150 foot rolls giving about 9,000 lines per roll with 5 lines per inch. The 7-segment digits are .155″ high with left-of-digit decimal points selectable at each digit. Seven column printing formats include sign and six digits or 2-channel (ident) digits, sign and 4 data digits. Other 7 column decimal formats are also available.

The DPP-7 Digital Panel Printer extends back 6.2″ from the front surface of the mounting panel (8.62″ for the AC powered versions), including space allowance for the two 30-conductor PC board connectors or AC fuses.

Three universal AC line voltages (100, 115, and 230 VAC) will power the DPP-7 Printer as well as +5VDC at 20 watts average (8 Amps peak).

The DPP-7 is ruggedly built, using a simple, but sophisticated mechanical design which is optimized for heavy duty OEM applications. A proprietary printhead character coating allows the head to be conservatively rated at 3 million lines.

Type 2: .9.9±.9.9.9.9
Type 3: .9±.9.9.9.9.9

(See other formats in ordering guide. Hexadecimal printout is available but will not allow blanked columns)

**Decimal digit format:**
7-segment 0 to 9 digits .155" (4 mm) high with 10° slant and selectable left decimal point.

**Printing method:**
Thick film thermal print head, black characters on white paper (using 3M Type 161 paper)

**Printer paper:**
1.75" wide × 150 feet long, (44,5 mm × 45 m), 3M-type 161 thermal paper roll with the thermal surface facing away from the center of the roll.

**Paper advance:**
Via linear solenoid and one-direction rotary clutch. Paper tears off cleanly by lifting against the paper slot top edge.

### PERFORMANCE:

Max. printing rate: 3 lines per second
Print and paper advance cycle: 330 milliseconds
Line spacing: 0.2 inch (5 mm)
Line density: 5 lines per inch
Line capacity per paper roll: approx. 9,000 lines
Minimum print head life: 3 million lines
Average print pulse on-time 25 mSec. (height varied by temperature feedback)

### INPUTS

DTL/TTL compatible, selectable positive or negative true, level sensitive. TTLLS low power Schottky logic used on all inputs.

**Logic Levels:**

| | | |
|---|---|---|
| Positive true: | +2.0V≤"1"≤+5.0V | |
| | 0V≤"0"≤+0.5V | Note TTLLS |
| Negative true: | 0V≤"1"≤+0.5V | logic levels |
| | +2.0V≤"0"≤+5.0V | |

Note:Pullup resistors to +5V may be optionally removed on all inputs and outputs.

**Data: (24 lines)**
Full parallel BCD (1-2-4-8), selectable positive or negative true, 1 TTLLS load plus 10 K ohm pullup to +5V. May be used with Form A (normally open) or Form B (normally closed) switch closure inputs. Level sensitive (rise-time non-critical). Data is stored

**Change Data Polarity: (Pin C1-B11)**
Selects input polarity of data, decimal points and ±sign simultaneously.
LOW = positive true coding
HIGH = negative true coding
6 TTLLS loads, pus 1 K ohm pullup to +5V, level sensitive

**Print and Advance Command: (Pin C1-B14)**
Level sensitive for Form A or Form B contact closure, selectable positive or negative true.
1 TTLLS load plus 10K ohm pullup to +5V.

Pulse Width: 1 microsecond to 200 mSec (data must be valid 1 μsec. after leading edge and 500 nSec. before the print command).

Maximum print command rate: 3 per second.

Paper advance automatically occurs after digit printing. Holding print command TRUE longer than the busy output is true (200 to 330 mSec, typ) causes continuous 3 lines/sec. printing.

**Change Print Polarity: (Pin C1-B7)**
HIGH = negative true coding
LOW = positive true coding
1 TTLLS load, plus 10K ohm pullup to +5V, level sensitive

**Leading Zero Suppress: (Pin C1-B4)** blanks all leading zero's to the left of decimal point except a zero just left of the decimal point
HIGH = Leading 0's blanked
LOW = full print (no suppression)
2 Low Power TTL loads, plus 10K ohm pullup to +5V, level sensitive.
Note: Will not suppress if any characters are blanks.

**Minus Sign: (Pin C1-B1)**
Selectable positive or negative true using data level select input.
1 TTLLS load, plus 10K ohm pullup to +5V, level sensitive.

**Plus Sign: (Pin C1-A5)**
(Selectable positive or negative true using change data polarity input). (Minus sign must also be printed since it is used as the horizontal portion of the plus sign).
1 TTLLS load, plus 10K ohm pullup to +5V, level sensitive.
Note: Printing "plus" sign only results in vertical portion of plus sign. See above. Usable as 100% overrange digit.

**Blanked Character:**
Created by loading 1-1-1-1 in a given column. Can be hard-wired. Not available for hexadecimal models.

**Decimal Points: (6 lines)**
1 TTLLS load, plus 10K ohm pullup to +5V, level sensitive
(Selectable positive or negative true using change data polarity inputs).

**No-Print Paper Advance: (Pin C1-A3)**
Ground this line 70±5 mSec. to advance one line. Hold to ground for continuous advance at 6.7 lines per second.
1 TTLLS load plus 10K ohm pullup to +5V.

**No Print Paper Advance:**
May also be created by loading the illegal BCD character 1-1-1-1 in all decimal locations, and disabling all decimal points and ± signs, then initiating a print/advance command.

**Test: (Pin C2-B6)** (Not available on hexadecimal models)
LOW = ±.8.8.8.8.8.8 printout when print/advance command is given.
1 TTLLS load, plus 10K ohm pullup to +5V, level sensitive.

**Change Busy Polarity: (Pin C1-A2)**
HIGH = positive true busy out
LOW = negative true busy out
1 TTLLS load, plus 10K ohm pullup to +5V, level sensitive.

# DIGITAL PANEL PRINTER/DPP-7

## SPECIFICATIONS (CONTINUED)

### OUTPUTS

**DTL/TTL compatible**

Positive true: 0V≤"0"≤+0.4V
+2.4V≤"1"≤+5.0V

Negative true: +2.4V≤"0"≤+5.0V
0V≤"1"≤+0.4V

**Busy: (Pin C2-B12)** (Open collector TTL 7438 with 1K ohm pullup to +5V)

Remains TRUE during print and advance cycle (approximately 200 to 330 milliseconds). Data inputs may be changed 500 nSec. after transition to TRUE. Next print command can be enabled when busy goes FALSE. Selectable positive or negative true. 10 TTL loads.

**Out of Paper: (Pin C2-B4)**
Switch opening via mechanical pawl when approx. 6′ (2m) of paper are left on roll.

### TEMPERATURE RANGES

**Operating:** 0 to +40°C (to +50°C at derated speed)

**Storage:** −25°C to +85°C (Paper darkens above +60°C)

Active printhead temperature sensor is employed to maintain proper print head temperature at all ambient temperatures and during warmup.

### POWER SUPPLY—DC VERSION

**Model DPP-7D (+5V):**
**Voltage:**
+5 ±.5VDC Printhead Section 10 Amps peak @ 10% to 100% duty cycle depending on line rate and printout. 5 to 20 mS 10 Amp pulses occur several times per second in standby. A regulated power supply is recommended, using 16 gauge wire or larger not to exceed 10 ft. (3m.)

**Voltage:**
+5 ±.25 VDC Logic Section 300 mA typical, logic spikes 50 mV max. Separate PC board connection.

**Connections:** Two recessed ¼″ spade terminals.

**Fuses:** ¼″ dia. × 1¼″ long, SLO-BLO (+5V) 10A, (+12V) 4A, (+28V) 2A

### POWER SUPPLY—AC VERSION:

105-125 VAC, 47-440Hz @ 40 watts max (10 watts, typ standby)

**Optional:**
205-240 VAC, 47-440Hz @ 40 watts max (10 watts, typ standby)

**Optional:**
90-110 VAC, 47-440Hz @ 40 watts max (10 watts, typ standby)

**AC Fuse:** ¼″ × 1¼″ Buss MDL or equivalent ½ A, SLO-BLO, 115VAC, ¼A, SLO-BLO, 230VAC.

*Note:* Case is isolated from 5V ground and AC line. A separate spade terminal is included to ground case.

+5V, 200mA max. logic power out available with AC version.

Optional dual-winding 115/230 VAC model available (see ordering)

### WEIGHT (WITH HOUSING AND FULL PAPER ROLL)

| | | |
|---|---|---|
| 5 Volt Version: | 2.3 lbs. | (1,1Kg) |
| AC Version: | 4.2 lbs. | (1,9Kg) |

### DIMENSIONS

Front panel mounting cutout:
4.50″ WIDE × 2.72″ HIGH (115 mm × 69 mm)

Front panel Bezel dimensions:
5.25″ WIDE × 2.82″ HIGH (134 mm × 72 mm)

Depth behind front surface of mounting panel including clearance for rear PC connectors and fuses:

| | |
|---|---|
| 5V Version: | 6.2″ (158 mm) |
| AC 12V, 28V Version: | 8.7″ (221 mm) |

# MODEL AIP-40 Alphanumeric Impact Printer

## FEATURES

- ▶ 40-column, 5 x 7 dot matrix printer prints 64 ASCII characters
- ▶ Printing rate up to 50 characters per second or 1.25 lines per second
- ▶ Choice of 8-bit parallel or optional serial TTY/RS-232-C interfaces
- ▶ Parallel Printer is directly compatible with 8080 or 6800 microprocessor Peripheral Interface Devices
- ▶ Serial Printers include choice of speeds (110 to 9600 Baud), 20 mA TTY loop or EIA RS-232-C signals, 10 or 11 bit formats, self test, parity detection
- ▶ Serial Printers include 120 or 200 character Buffers
- ▶ Choice of 100, 115 or 230 VAC, 50/60 Hz power input

## GENERAL DESCRIPTION

Datel's model AIP-40 is a complete stand-alone Alphanumeric Impact Printer for teleprinter use with mini- and microcomputers and as a print-only 40-column teletypewriter. It includes a printhead, paper feed mechanism, choice of electronics and power supply.

The AIP-40 prints the standard 64-character ASCII set consisting of upper case letters, numerals, punctuation and spaces. Lower case letters from the computer are printed as upper case. Characters are formed within a 5 x 7 35-dot matrix area with logic controlled optional printing of 10 x 7 double-width characters corresponding to a 20-column line. The double-width characters offer greater emphasis to printed output and may be used like a color ribbon control

Both 8-bit parallel and full serial interfaces are offered on the AIP-40. The 8-bit parallel interface is asynchronous and offers the lowest cost. It may be connected by the user to many microprocessor systems and to most mini-computers. The serial interfaces have somewhat higher cost but offer simpler wiring to the teletypewriter (TTY) or EIA RS-232-C peripheral module offered by most computer manufacturers.

## PERFORMANCE

The AIP-40 features excellent speed and reliable, low maintenance operation for terminal and development applications. Average printing rate is 50 characters per second corresponding to 1.25 lines per second. Serial interfaces type 2 and 3 can sustain a continuous 300 BAUD printing rate. An impact mechanism is used for printing on the AIP-40. Characters are formed using a vertical column of seven print wires and solenoids which are rapidly impacted through a ribbon onto conventional adding machine paper. A single AC synchronous motor controls printhead motion, paper advance, ribbon feed and automatic ribbon reversing. The mechanism life is rated at 400 million characters (10 million lines).

Each AIP-40 is a complete stand-alone printer for table-top or bench-top mounting and includes a choice of interface electronics. A triple-voltage power transformer accepts 100, 115 or 230 VAC, ±10% at 50 or 60 Hz. Users may rewire the transformer in the field to any of these voltages. Recalibration of the character rate clock will also be needed. Systems manufacturers may order a distribution of AIP-40 Printers with complete confidence that field changes can be made quickly at any time.

## INPUT INTERFACES

The AIP-40 Printer is available with an 8-bit parallel input interface or several full serial interfaces The 8-bit parallel asynchronous input is ideal for simple connection to microprocessor data sources such as 8080 and 6800 based microcomputers. The parallel interface may also be used with parallel I/O ports offered by most minicomputer manufacturers. The parallel input offers the lowest cost model, but may require some simple wiring and controller electronics fabricated by the user, depending on the computer used. The AIP-40 is directly compatible to the Intel 8255 and Motorola 6820 Peripheral Interface devices.

The full serial interfaces offer the simplest method of interconnection to computers at slightly higher cost. The serial interfaces require a serial peripheral driver (teletypewriter port) in the computer using ASCII data coding and RS-232-C or teletypewriter (TTY) 20mA current loop electrical characteristics. Such serial peripheral drivers are offered as standard card modules by most computer manufacturers and are included in complete microcomputer boards such as Intel's SBC-80/10/20. All serial AIP-40 printers may be jumper-programmed to accept standard data rates from 110 to 9600 BAUD. For users requiring a remote slave printer, the 20mA TTY loop may be operated hundreds of feet away from the computer over voice-grade telephone wires.

The first serial interface (type 2) includes TTY-RS-232-C input and a 120-character serial buffer which can store 3 full lines of printout. This interface requires that the computer not exceed the average printing rate. The second serial interface (type 3) includes a 5-line, 200-character input buffer and prints single and double width characters by program control of each character. This interface also supplies the RS-232-C handshake signals, "Request to Send" and "Data Terminal Ready". These two signals prevent the computer from supplying data faster than the printer can accept it. These signals also free the CPU and serial peripheral from excessive duty cycle devoted only to the printer. This is done by allowing bursts of data up to 9600 BAUD rate triggered by an interrupt generated from the "Request to Send" line.

The third serial interface (type 4) contains the features of type 2 and 3 serial interfaces and offers fast paper feed plus automatic detection of ASCII carriage return (CR) and line feed (LF) characters to initiate printing.
This option also adds a separate line feed motor offering line advance without printing at a 5 line/per second rate for fast separation of printed records.

This option also adds a separate line feed motor offering line advance without printing at a 5 line/per second rate for fast separation of printed records.

## QUICK SPECIFICATIONS

**Characters Printed** ..... 64-character upper case subset of the ASCII code
**Printing Method** ..... Impact ink-ribbon 5 x 7 dot matrix.
**Number of Columns** ..... 40 characters (40 columns) per line. This reduces to 20 characters for double-width printing
**Printout Sizes** ..... Line length: 3.33 inches (84,6 mm)
Character size: .077 in. wide x .112 in. high
**Printer Paper** ..... Roll paper adding machine type
Width: 3.875 inches (98,5mm). Contains 170 feet (51,8 m) Capacity: Approx. 12,240 lines

**PERFORMANCE**
**Average Throughput Rate** ..... 1.25 lines per second (800 milliseconds per line) @ 60 Hz power (50 characters/second)

**PARALLEL INTERFACE INPUTS**
**Data** .....
**Data Ground** .....
**Character Width** .....
**Last Character** .....
**Ready / Ready**

**OUTPUTS**
**Acknowledge** .....

**SERIAL INTERFACE**
**Data Format** ..... 10 or 11 bits transmit one character.
**Data Rates** ..... Crystal-controlled Baud rates:
110 1200
150 2400
300 4800
600 9600

**PHYSICAL-ENVIRONMENTAL**
**Outline Dimensions** ..... 13.50 inches wide x 13.25 inches deep x 7.12 inches high

# ULTRA-LOW COST DIGITAL PANEL METERS
## DM-3100/DM-4100 SERIES

For higher accuracy and resolution the DM-4100's will measure 100 microvolt increments in their 4½ digit displays. They are ideal for low cost, dedicated DVM applications. They too are auto zeroed and can be operated ratiometrically.

**DM-3100L**
Lowest Cost: From $29 in 100's
Large 0.5" LED displays
Short Depth, front access case
Autozeroing, Ratiometric (opt.)
Differential Balanced Inputs

**DM-3100N**
Lowest Cost: From $29 in 100's
Large 0.5" LED displays
Low Profile, minimum panel area case
Autozeroing, Ratiometric
User-wired offset and scaling
Differential, Balanced Inputs

**DM-3100X**
Ultra low power: 9VDC @ 3mA or 5VDC @ 6mA
Power voltage range 4 to 15 Volts DC
Short Depth, Front Access case
Autozeroing, Ratiometric
Differential, Balanced inputs

**DM-4100L**
Lowest Cost for dedicated DVM applications: $59 in 100's
Large 0.5" LED displays
Short Depth front access case
System Controls for automatic test equipment
Autozeroing

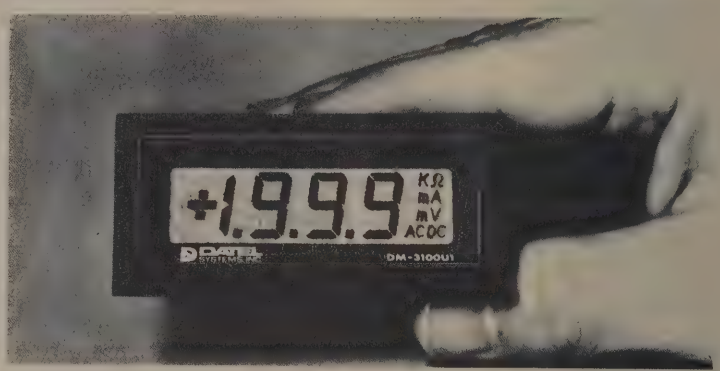
**DM-4100N**
Lowest Cost for dedicated DVM applications: $59 in 100's
Low profile, minimum panel area case
Autozeroing

**DM-3100U1**
Ultra-low power: 9VDC @ 3mA
Power Voltage Range: 4V to 15V
Low Profile, minimum panel area case
Autozeroing, Ratiometric
Differential, Balanced Inputs
Descriptor Labels: mA, mV, Ω, AC, DC

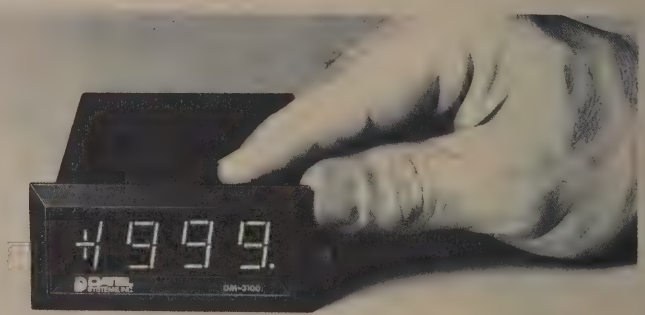
**DM-3100U2, U3**
AC or DC powered
DC Power Range: 9V to 15V
Autozeroing, Ratiometric
Differential, Balanced Inputs
Descriptor Labels: mA, mV, KΩ, AC, DC

**DM-4100N**

**DM-3100X**



**DM-3100U1**



**DM-3100N**

# SPECIFICATIONS

(Typical @ +25°C unless noted)

## ANALOG INPUT

**Configuration**
True, balanced differential bipolar (3½ digit models) or single-ended bipolar (4½ digit models).

**Full Scale Input Range**
−1.999Vdc to +1.999Vdc (3½ digit models)
−1.9999Vdc to +1.9999Vdc (4½ digit models)

**Optional Ranges***
±199.9mVdc to ±1000Vdc

**Ammeter Ranges (optional*)**
±19.99 microamps to ±1.999 Amps

**Ohmmeter Ranges (optional*)**
0 to 199.9 ohms up to 0 to 19.99 megohms

**Input Offset (optional*)**
+1.9Vdc to −5Vdc referred to 5V ground

***NOTE:** The optional ranges require installation of extra components by the user inside the DPM. This is also available on special order in OEM quantities from Datel.

**Input Bias Current**
5pA typical, 50pA maximum

**Displayed Accuracy @ +25°C**
Adjustable to ±0.02% of Reading, ±2 count (4½ digit models)
Adjustable to ±0.1% of Reading, ±1 count (3½ digit models)

**Resolution**
1mV (3½ digit models)
100μV (4½ digit models)

**Temperature Drift of Gain**
Within ±50ppm of Reading/°C typ.
Within ±100ppm of Reading/°C max.

**Temperature Drift of Zero**
Autozeroed, ±1 count over 0 to +50°C

**Input Impedance**
100 Megohms, minimum

**Input Overvoltage**
±250 Volts dc, 155 VRMS continuous max.
±300 Volts intermittent max.
(Resistor and diode clamp protected)

**Common Mode Rejection**
80dB, DC to 60Hz, 1 Kilohm unbalance (3½ digit models)

**Common Mode Voltage Range**
(3½ digit models)
Within +Vs −.5V and −Vs +1V
Where +Vs is the positive rail (A/D or +5V PWR. IN) and −Vs is the negative rail (EXT. REF. LO or 9V PWR. COM.)

**Warm-up Time (LED Models)**
Within 10 minutes

**Reference**
**(DM-3100 Models)**
Internal, referred to the negative rail (−Vs). External user-supplied Reference optional for ratiometric operation.

**External Ref. Range**
Must be within the common mode range.

**Ramp-up Time**
**(Integration Period)**
83.3mS

## DISPLAY

**Number of Digits**
3 decimal digits and most significant "1" digit (3½ digit models).
4 decimal digits and most significant "1" digit (4½ digit models).

**Decimal Points**
Selectable decimal points are included for scale multipliers

**Display Type**
Red, light-emitting diode (LED) self-illuminated. (Models DM-3100L, -3100N, -4100L, -4100N) Field effect, sealed liquid crystal displays (LCD) requiring external illumination. Black digits against a light background. (Models DM-3100X, DM-3100U1, DM-3100U2, U3)

**Display Height**
0.5 inches (12,7 mm) All models except: 0.3 inches (7,6 mm): DM-4100N models.

**Overscale**
Inputs exceeding the full scale range cause the display to blink (4½ digit models). On 3½ digit models, the display blanks, leaving a "1" MSD and sign.

**Autopolarity**
A polarity sign is automatically displayed for bipolar inputs, and may also be blanked.

**Sampling Rate**
Factory set at 3 conversions per second. May be rewired up to 20 conversions/second.

**Electrical Unit Descriptors**
**(Model DM-3100U1, U2, U3 only)**
kΩ
mA
mV
ACDC
This field of function labels is positioned to the right of the decimal digits. Individual unit descriptors may be selected for display (see I/O connections, below).

## I/O CONNECTIONS

**ANALOG HI INPUT**
**ANALOG LO INPUT**
**Models: All**
For 3½ digit models, differential input voltages are connected between these inputs. A bias current path to POWER COMMON or ANALOG RETURN from both these inputs must be externally provided. External circuits must constrain these inputs to be within the common mode voltage range.
For DM-4100N, Analog LO IN is connected internally to POWER COMMON. 4100L must conn. to PWR. COM externallv.

**ANALOG RETURN**
**Models: All 3½ digit models**
This pin may be used as a low-noise bias current return for some floating inputs. If not possible, inputs may be referenced to POWER COMMON (except in 9V power configuration). Analog Return is approx. −2.8Vdc below plus Vs. and can sink 30mA to −Vs.

DO NOT connect Analog Return to +5V or +9V power. Analog Return may be connected to 5V PWR. COM. (NOT −Vs!) For single-ended input.

**REFERENCE IN/OUT**
**Models: All DM-3100's**
Normally, REF. IN and REF. OUT should be jumpered together. An external floating source referred to EXT. REF. "LO" may be substituted for ratiometric operation, 3½ digits. Model DM-4100L, N: An ext. ref. returned to Power Common may be used ratiometrically. See pg. 20.

**BUSY/$\overline{\text{DONE}}$ OUT**
**Model DM-4100L**
**Model DM-4100N**
This output is logic "HI" during A/D conversion and logic "LO" when conversion is complete. It may be used in automatic equipment to prevent changing the input voltage during conversion.

**OVERSCALE OUT**
**UNDERSCALE OUT**
**Model DM-4100L**
**Model DM-4100N**
A logic "HI" on either output indicates an out of range input for autoranging applications.

**DECIMAL POINTS**
**Model DM-3100N**
**Model DM-4100N**
On these models only, connect selected pin to DECIMAL POINT COMMON.

DATEL SYSTEMS, INC.
1020 TURNPIKE STREET / CANTON, MASSACHUSETTS 02021
TELEPHONE: (617) 828-8000 / TWX: 710-348-0135 / TELEX: 924461
WASHINGTON, D.C. (301) 840-9490,1 / HOUSTON (713) 932-1130,2 / DALLAS (214) 256-4444 /
SANTA ANA, CALIFORNIA (714) 835-2751 / LA EXCHANGE (213) 933-7256 / SUNNYVALE, CALIFORNIA (408) 733-2424

**DECIMAL POINT COMMON**
**Model DM-3100L**
**Model DM-3100X**
**Model DM-3100U1, U2, U3**
**Model DM-4100L**
On these models, connect this pin to the selected decimal point pin.

**DISPLAY ENABLE**
**Model DM-3100L**
**Model DM-3100N**
**Model DM-4100N**
**Model DM-4100L**
Connect to +5Vdc power to illuminate display. Disconnect to blank display, but keep A/D converter cycling.

**RUN/$\overline{\text{HOLD}}$ IN**
**Model DM-4100L**
**Model DM-4100N**
A TTL "HI" or open pin enables continuous sampling. TTL "LO" or ground will hold and display the last sample for temporary single sample storage or to copy down a reading.

**DISPLAY TEST**
**Model DM-3100L**
**Model DM-3100N**
**Model DM-3100X**
**Model DM-4100L,N**
On DM-3100's, connect this input to +5Vdc to light all display segments. On DM-4100's, ground this input.

**$\overline{\text{POLARITY ENABLE}}$**
**Model DM-3100L**
**Model DM-3100N**
**Model DM-4100N**
**Model DM-4100L**
Ground this input to automatically display a minus sign for negative inputs.

**HORIZ. POLARITY IN**
**HORIZ. POLARITY OUT**
**Model DM-3100X**
**Model DM-3100U1**
**Model DM-3100U2, U3**
Normally these inputs are jumpered together to continuously illuminate the horizontal portion of the polarity sign. Omit the jumper for applications not requiring sign display.

**VERT. POLARITY IN**
**VERT. POLARITY OUT**
**Model DM-3100X**
**Model DM-3100U1**
**Model DM-3100U2, U3**
Jumper these inputs when HORIZ. POL. is jumpered for automatic sign display with bipolar inputs. For reverse sensing applications, VERT. POL. OUT may be jumpered to HORIZ. POL. IN (no other connections). This will display a minus sign with positive inputs and no sign (implied positive) with negative inputs.

**OHMS LO**
**All 3½ digit models**
This connection is used in the ohmmeter configuration, otherwise do not use. See applications.

**BACKPLANE OUT**
**Model DM-3100X**
**Model DM-3100U1**
**Model DM-3100U2, U3**
Connect all unused Polarity, Decimal Points and Descriptors to Backplane Out.

**DESCRIPTORS**
**Model DM-3100U1**
**Model DM-3100U2, U3**
Electrical units are displayed by connecting to the Descriptor Common. Descriptors displayed are as follows:

| | | |
|---|---|---|
| "mA" | (pin A3) - "m" | portion only |
| "kΩ" | (pin A4) - "k" | portion only |
| "KΩ" | (pin A5) - "Ω" | portion only |
| "mA" | (pin A6) - "A" | portion only |
| "mV" | (pin A7) - "V" | portion only |
| "DC" | (pin A8) | |
| "AC" | (pin A9) | |
| "mV" | (pin A10 - "m" | portion only |

**IMPORTANT NOTE:** The descriptors display labels only. They do not select functions. The DM-3100U1 and DM-3100U2 do not directly measure ohms, mA, AC, etc. without first adding user-installed internal or external components.

**POWER CONNECTIONS**
**A/D POWER IN**
**Model DM-3100X**
**Model DM-3100U1, U2, U3**
Connect this pin to the positive leg of the power supply voltage.

**5V DC/DC POWER IN**
**Model DM-3100X**
**Model DM-3100U1**
Connect this pin to +5V if a single 5 Volt supply is used. This will generate negative voltage for analog circuits. Do not use this pin for 9V power.

**5V POWER COMMON**
**MODELS: ALL**
Use only for 5V power configuration. This pin may be used as a bias current return path for some inputs, if it is connected to an external power source.

**9V POWER COMMON**
**Model DM-3100X**
**Model DM-3100U1, U2, U3**
This pin is connected to the internal negative supply rail. Use only as the negative supply leg for 9V power configuration.

**AC POWER (DM-3100U2, U3)**
**115V (U2), 230V (U3) ±10%,**
**47 to 440 Hz, Isolation 300 Vrms**

**POWER REQUIREMENTS**
**MODELS DM-3100X and DM-3100U1**
**5V Single Supply Configuration:**
**Input Pins:** +5V to A/D PWR IN and to 5V DC/DC PWR IN. Ground 5V DC/DC GND.
**Supply Range:** +4Vdc to +8Vdc
**Current @ 5V:** 6mA typ., 10mA max.
**Regulation:** Use a bypass capacitor to attenuate external noise.

**9V Single Supply Configuration U1,2,3:**
**Input Pins:** +9V to A/D PWR IN No Conn. to DC/DC PWR IN. Gnd to 9V PWR. COM.
**NOTE:** 33μF bypass caps internally supplied.
**Supply Range:** +9Vdc to +15Vdc (A 9V alkaline battery is recommended)
**Current @ 9V:** 3mA typ. 6mA max.
**Current @ 15V:** 7mA typ., 12mA max.
**Regulation:** Use a bypass capacitor to attenuate external noise.

**POWER REQUIREMENTS**
**MODELS DM-3100L, DM-3100N, DM-4100L, DM-4100N**
External +5 ±0.25Vdc regulated required at 190mA typical, 250mA max. (3½ digits) or 350mA typical, 400mA max. (4½ digits). Logic spikes must not exceed 50mV. Power current varies rapidly so that unregulated supplies cannot be used.

**Calibration**
A multiturn screwdriver pot adjusts the full scale reading (gain). Zero is automatic (autozeroing). Suggested recalibration in stable conditions is 90 days.

**PHYSICAL-ENVIRONMENTAL**
**Low Profile Case**
**Outline Dimensions**
2.53"W x 3.25"D x 0.94"H (64,3 x 82,5 x 23,8 mm)
**Cutout Dimensions**
2.562"W x 0.97"H min. (65,1 x 24,6 mm)
**Mounting Method**
Through a front panel cutout secured by brackets and two removable side case screws. Panel thickness up to 0.62" (15,9 mm). See mounting diagram.

**Short-Depth Case**
(Interchangeable with other Datel cases)
**Outline Dimensions**
3.00"W x 2.15"D x 1.76"H (76,2 x 54,6 x 44,7 mm)
**Cutout Dimensions**
1.812"H x 3.062"W (46,0 x 77,8 mm)
**Mounting Method**
Through a front panel cutout secured by (4) 4-40 front access screws which are concealed by the bezel. See mounting diagram.

**Weight**
Approx. 5 ounces (142g)
**Connector**
Double-sided, edgeboard PC type, solder tab, gold-plated fingers.
**Mounting Position**
Any
**Operating Temperature Range**
0 to +50°C
**Storage Temperature Range**
−25°C to +85°C
**Altitude**
0 to 15,000 feet (4900m)
**Relative Humidity**
20% to 80% non-condensing

# Data Precision...

## The Best Choice in Portable, Bench and Systems Multimeters.

**Here is our outstanding selection of multimeters—each model optimized for a particular class of applications. These quality instruments are developed by Data Precision, the company that led the industry with pioneering advances that reduced the size, circuit complexity and cost of digital instruments—and improved performance and reliability.**

**Your work demands performance. And our selection of quality DMMs includes the model or models to match your requirements.**

### MODEL 175
### Portable, 3½ Digit DMM
### $189.00

With a basic DC accuracy of ±0.1% input ±1 l.s.d., guaranteed for a full year, and 100μV resolution, the Model 175 is unsurpassed for accuracy and sensitivity.

Battery and line operated and truly portable, it measures: DC Volts from ±100μV to ±1000V... AC Volts from 100μV to 500V (30Hz to 50kHz)... DC Current from ±0.1μA to ±2A... AC Current from 0.1μA to 2A (30Hz to 50kHz)... Resistance from 100mΩ to 20MΩ in two modes (Hi excitation 2.5V and Lo excitation 300mV).

The Model 175 also features autopolarity, automatic zero, 100% overrange, big, bright 0.43" LED display. It comes equipped with both rechargeable NiCd battery module and battery charger/line adaptor.

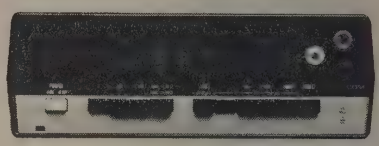
Size: 5½"W x 1¾"H x 3½"D
13.97 x 4.45 x 8.89 cm

### MODEL 1750
### 3½ Digit Bench/Portable DMM with Extra Functions & Ranges, dBm, True RMS, Hi/Lo Ohms, ±0.1% Accuracy
### $279.00

Our new Model 1750 is a 3½-digit, extra-function multimeter featuring dBm, True RMS, and Hi/Lo Resistance measurement.

Designed for high-precision applications, it offers 36 extra ranges and 6 extra functions, with 0.1% basic DC accuracy, as well as 100μV sensitivity, 10A measuring range, full overload protection, 100% overrange, and automatic zero. And the 1750 is readily converted to complete portability.

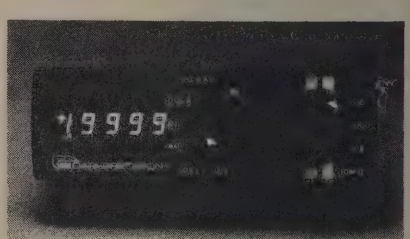
It measures DCV from ±100μV to ±1000V... ACV from 100μV to 1000V True RMS (frequency response: 20Hz to 20kHz)... DC Current from ±100 nanoAmps to ±10A True RMS... AC Current from 100 nanoAmps to 2A (frequency response: 20Hz to 20kHz) ...10A range, 20Hz to 1kHz... Hi/Lo excitation Resistance, 100 milliohms to 20 megohms... and dBm direct reading, −60dBm to +20dBm.



### MODEL 1350
### 3½ Digit DMM
### 0.1% Accuracy
### $169.00

This new bench-operated 3½-digit multimeter is a full-function instrument with a 0.1% basic accuracy. It measures DC Volts from ±100μV to ±1200V... AC Volts from 100μV to a full 1000V RMS... Resistance independently in both high (2.3V) and low (300mV) excitation, from 100mΩ to 20MΩ... and both DC and AC Current from 0.1μA to 2A.

The Model 1350 is fully protected in all modes, and features an extra-bright 0.43" LED display. It makes use of Data Precision's patented Tri-Phasic™ technology and Isopolar™ and Ratiohmic™ measurement techniques. The 1350 comes with built-in carrying case and tilt stand, test leads, and spare fuse.

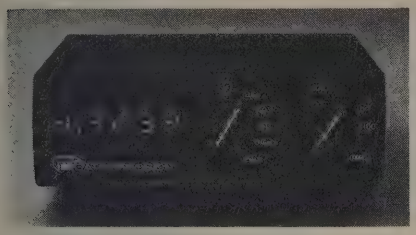


### MODEL 245
### Portable, 4½ Digit DMM
### $295.00

Ideal for field use, the Model 245 is a rugged, truly miniature, lab-quality, 5-function instrument featuring a basic DC accuracy of ±0.05% of input ±1 l.s.d., .005% resolution, 100% overranging. It comes equipped with both rechargeable battery pack and charger/line adaptor.

Model 245 measures ACV 100μV to 500V RMS, DCV ±100μV to 1000V, Resistance 100 milliohms to 20 Megohms, AC and DC Current 1 microamp to 2 Amps. AC voltage/current frequency response, 30Hz to 50kHz.

Size: 5½"W x 1¾"H x 3½"D
13.97 x 4.45 x 8.89 cm

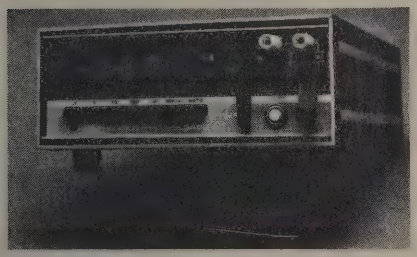


## MODEL 248
## Portable, 4½ Digit DMM With 10μV Resolution and True RMS
## $295.00

This high-resolution instrument measures Resistance from 100mΩ to 20MΩ, DC Volts from ±10μV to ±1KV, True RMS AC Volts from 10μV to 500V, both DC Current and True RMS AC Current from 10 nanoAmps to 2A.

The Model 248 features sensitivity of 10μV. Basic DC accuracy is ±0.05% of input, ±1 l.s.d., guaranteed for a full year, 100% overrange, overload protection, large LED display. It comes complete with both rechargeable NiCd battery module and battery charger/line adaptor, with 6 hours of in-spec operation before requiring recharge.

Size: 5½"W x 1¾"H x 3½"D
13.97 x 4.45 x 8.89 cm



## MODEL 3400
## System/Lab 4½ Digit Multimeter
## $795.00

The Model 3400 is the world's most accurate systems/lab 4½-digit multimeter. It is a fully programmable system multimeter, as well as a highly versatile stand-alone, autoranging instrument. Remote triggering will allow 12 conversions per second.

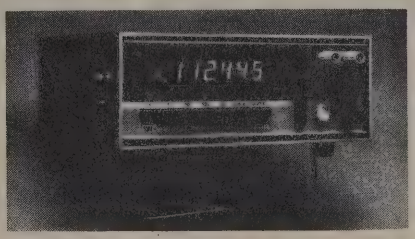
The 3400 offers 100% overranging and a basic DCV accuracy of ±0.007% of input ±1 l.s.d. for 6 months. It measures from ±10 microvolts to ±1000 VDC, ACV from 10 microvolts to 750V, Resistance from 10 milliohms to 20 Megohms, and AC/DC and DC/DC voltage ratio.

Also available with IEEE STD 488 interface unit Model 3410.

## MODEL 3400R
## With True RMS
## $895.00

**The same specifications and features as Model 3400, but with TRUE RMS AC Volts. $895.00.**

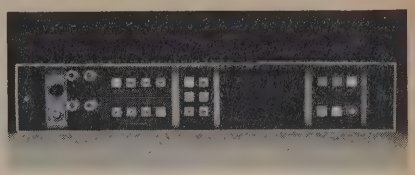
Also available with IEEE STD 488 interface unit Model 3410.



## MODEL 3500
## 5½ Digit Precision DMM
## $995.00

The Model 3500 is a full function, auto-ranging DMM with 6 month basic accuracy of ±0.007% of input, ±0.001% f.s. ±1 l.s.d. Remote ranging and trigger, 20% overrange and ½-inch planar display.

- DCV ±1μV to ±1000 volts. AC 1 μV to 700 volts. 30Hz to 100kHz.
- Resistance 1 milliohm to 12 Megohms.
- 1000 MΩ Input Impedance through 10 VDC. 2 and 4 wire Ratiohmic™ Resistance Measurement.
- DC/DC and AC/DC Ratio.
- BCD output and voltage ratio included at no extra cost.



## MODEL 7500
## 5½ Digit Programmable Systems Multimeter
## From $2995.00

Model 7500 is a 5½ digit multi-speed instrument that will perform a full conversion *1000 times per second!* It's completely programmable in function, range, mode, timing, and conversion speeds. DCV accuracy is ±0.007% of input ±0.001% range ±1 l.s.d. for 6 months. Sensitivity is 1μV DC and AC and 1mΩ. DCV and ACV measurement is from 1μV to 1000V. A true universal ratiometer, Model 7500 enables the user to choose both the numerator and denominator independently, and every measurement—DC Volts, AC Volts, and Resistance—can be made on a ratio basis to any other, if desired.

Model 7500 provides for full incorporation into any computer-based, high-speed, multi-channel automatic test or data acquisition system. In addition, a broad range of standard options, including built-in microprocessor-controlled IEEE 488 BUS or RS232/TTY Output is available.

**For complete information on these and other Data Precision instruments, or a demonstration, contact your local Data Precision representative or Data Precision Corporation, Audubon Road, Wakefield, MA. 01880 USA (617) 246-1600. TELEX (0650) 949341.**

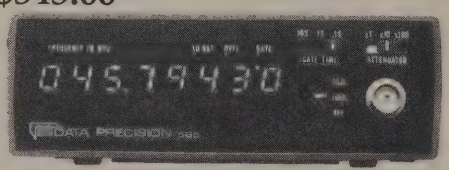
# The Best Choice in Portable and Bench Counters.

**Our counters are the result of meticulous product planning, progressive engineering, and detail-conscious quality control. We've anticipated your needs and built the instruments to meet them, optimizing each model for a particular class of applications. The end product is quality you can count on at cost-effective prices.**

**Check these specifications for the quality counter that meets your requirements best.**

## MODEL 585
## Portable, 250 MHz, 8 Digit Frequency Counter
## $345.00



A completely portable—battery and line operated—8 digit frequency counter, it will measure frequency from 10Hz to 250MHz, always reading directly in MHz, with correctly positioned decimal point. Resolution 0.1Hz. It also has excellent sinewave sensitivity (10mVRMS to 50MHz, 50mVRMS to 250MHz). Other features: dual Input Impedance (50Ω/1MΩ), a 3-position Attenuator, 3 gate times, 0.1, 1, 10 sec. and bright 0.3" LED display for optimum reliability. Includes NiCd Module, Charger, and Carrying Case. Optional antenna and other accessories.

Size: 5½"W x 1¾"H x 3½"D
13.97 x 4.45 x 8.89 cm.

## MODEL 5740
## 100MHz, 7 Digit Multifunction Counter
## $295.00

The Model 5740 measures Frequency, Period, Period Average, Total Events and Elapsed Time.

The Model 5740 measures: Sinewaves, Square Waves, Pulses, Pulse Pairs, Complex Waves • Frequency: 5 Hz to 100 MHz; 10 ms/100 ms/1 sec./10 sec. gate times, resolution to 0.1 Hz • Period: ½ microsecond to 0.2 sec. • Period Average: 10, 100 and 1000 periods • Total Events: 0 to 9,999,999 (unlimited with "overflow" indicator) • Elapsed Time: 0 to 99,999.99 sec. (27.8 hrs) • Sensitivity to 10mV.

**For complete information on these and other Data Precision instruments or a demonstration, contact your local Data Precision representative or Data Precision Corporation, Audubon Road, Wakefield, MA. 01880 USA (617) 246-1600. TELEX (0650) 949341.**

# SERIES 305
## SUPER PERFORMANCE PHASEMETERS AND GAIN/PHASE METERS*

**305 Series Phasemeters** provide the highest available accuracy, along with many operational features. Designed for the calibration laboratory, the design engineer's bench, the production line and automatic test systems, the 305 is the most widely accepted phasemeter in industrial, and governmental organizations. **

### FEATURES
- No hands 86 dB dynamic range
- Automatic or programmable operation and calibration
- Highest accuracy — to 0.03°
- Repeatability better than 0.01°
- Rejects harmonics and noise
- Wide frequency range — 1 Hz to 11 MHz
- IEEE 488 Bus Compatibility

### FLEXIBILITY THROUGH PLUG-IN CONCEPT
The plug-in concept of the 305 offers a wide selection of characteristics. Three standard mainframes and nine plug-ins are complemented by a variety of options, such as programmability, high speed and autocalibration. Special modifications are also available. In addition, modular construction throughout provides maintainability at both component and P.C. card levels for ease and speed of servicing.

### WIDE FREQUENCY RANGE
The basic mainframe provides a direct frequency coverage of 2 Hz to 700 kHz with high accuracy. By the use of frequency converting plug-ins such as the 305-PA-3005, standard units can handle frequencies up to 11 MHz. Special units can be provided for higher frequency.

### NO HANDS OPERATION
The Series 305 Phasemeters require no controls or adjustments by the operator. These units are also equipped with several significant automatic features. These include automatic selection of angle range, automatic sensing of leading or lagging angle, automatic selection of the output time constants, and automatic setting of AC gains.

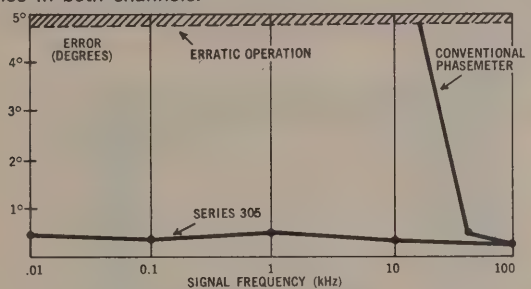
### HIGHEST ACCURACY
Accuracy to better than ±0.03° is attained with precision mainframes and carefully designed plug-ins. Mainframes exhibit precise zero crossing detection, angle-to-DC conversion linearity to approximately ±0.01° and outstanding DC stability. Plug-ins are designed for accurate conversion of sine wave (also square wave) inputs to square waves through carefully controlled amplifier circuitry, use of gain autoranging, and harmonic filters where necessary.

### INSENSITIVITY TO INPUT LEVEL
Series 305 plug-ins are available with a guaranteed accuracy of better than ±0.05° even with independent input level variations of 60 dB. Typical accuracy can approach ±0.03° as shown on the following page.

### NON-AMBIGUOUS ANGLE READINGS
Two phase angle ranges in the 305 eliminate the ambiguity or "dead zone" error inherent in all other phasemeters (usually at 0°/360° or −180°/+180°). An automatic system switches to the 0°/360° range for angles near 180° and to the −180°/+180° range for angles near 0°. Unique guard bands prevent dead zones near switching points.

### REPEATABILITY, STABILITY, AUTOCALIBRATE
Repeatability of the 305 is better than ±0.005°; temperature coefficient is ±0.001°/°C; and DC output drift is better than ±0.05° over any 30 day period. The autocalibrate feature eliminates virtually all DC errors in digital panel readout and BCD rear panel outputs.

### NOISE IMMUNITY
Unique patented circuitry minimizes noise errors and makes possible accurate phase measurements under noise levels where other phasemeters become completely useless. The accompanying curve compares the phase error of the model 305 with that of a conventional phasemeter with broad band noise in both channels.



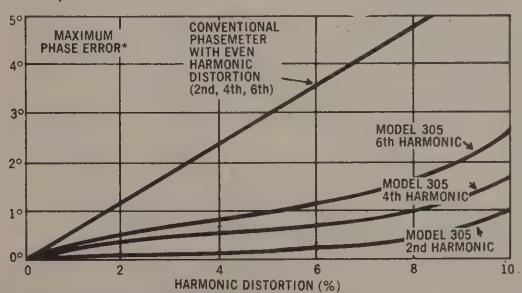
PHASE READING ERROR VS SIGNAL FREQ. FOR GAUSSIAN NOISE (FLAT TO 5 MHz) IN BOTH CHANNELS FOR S/N = 10

### PROGRAMMABLE OPERATION
Standard mainframes are provided with rear connections for overriding the automatic time constant and angle range selectors by relay contact closures. Options are available for full compatibility with IEEE 488 Interface Bus and for control by DTL and TTL logic.

### DIGITAL READOUT
In addition to analog DC output, standard mainframes are available with up to 5 digit panel readouts (i.e., 0.00° to ±180.00° and 0.00° to +360.00°) and BCD outputs for each digit. Autocalibrate feature eliminates virtually all meter drift and scaling errors.

### RAPID PHASE NULLING
For production testing of filters and other networks, an additional analog deviation-panel meter (305D) provides an easy means of adjusting a test angle to any accurate value. Presetting can be done in seconds without any other equipment. The precision digital panel meter monitors actual test angle continuously.

### ABILITY TO REDUCE HARMONICS
The 305 is designed to reduce significantly the errors due to even harmonic distortion without the use of filters. The accompanying curve compares the error due to even harmonic distortion (maximized for worst case harmonic angle) on conventional phasemeters and on the model 305. (Odd harmonics in-phase with fundamental contribute no error.)



COMPARISON OF ERRORS DUE TO EVEN HARMONIC DISTORTION
(* For worst case phase relationship between harmonic and fundamental)

*Manufactured under U.S. Pat. No. 3,725,781
**For extensive application information, write for availability of "Applications Handbook of Precision Phase Measurement."

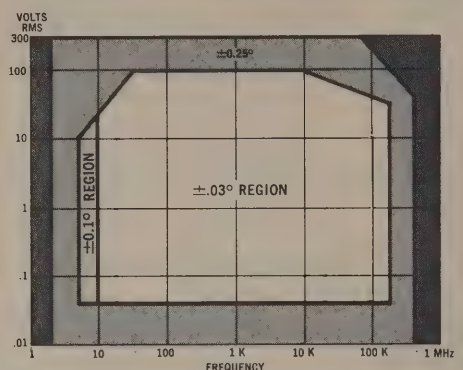
# SERIES 305
## SUPER PERFORMANCE PLUG-INS

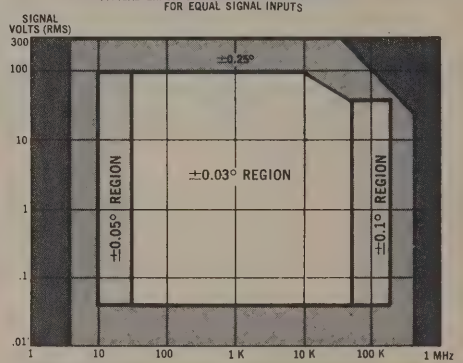
The variety of plug-ins available provides unlimited flexibility for the Series 305 Phasemeters in meeting many phase measurement problems. In addition to an expanding line of standard plug-ins, custom units can be designed for special needs.

### 305-PA-3001 AUTORANGING PLUG-IN

This plug-in features high accuracy over a broad range of input levels and frequencies. Autoranging of gain in each channel assures high accuracy (±0.05° guaranteed) over a dynamic range of 60 dB (50 mV to 50 V rms) for independent levels of inputs, with a useful range of 90 dB (10 mV to 300 V rms). This plug-in covers the range from 2 Hz to 700 kHz, with its highest accuracy in the 50 Hz to 50 kHz range. The curves shown illustrate typical accuracies as a function of level and frequency. The 305-PA-3001 also features compatibility with Tektronix probes and includes front panel lamps to indicate when either input signal is below 50 mV or above 50 V rms.



TYPICAL ERROR CONTOURS FOR 305 w/305-PA-3001 FOR EQUAL SIGNAL INPUTS



TYPICAL ERROR CONTOURS FOR 305 w/305-PA-3001 FOR UNEQUAL INPUTS — REF. 0.3 VOLTS RMS

While the above accuracies apply to sine wave inputs, this instrument can also be used for square wave and amplitude modulated signals.

### 305-PA-3002 SINGLE RANGE PLUG-IN

The 305-PA-3002 is similar to the model 305-PA-3001 except that it does not include autoranging or limit indicator lamps. For sine wave inputs the standard unit is designed for guaranteed ±0.05° accuracy (typically ±0.03°) over independent signal levels of 50 mV to 500 mV rms, with a slight reduction in accuracy from 10 mV to 3 V rms. Other level ranges can be supplied on special order; Tektronix probes can be used for high input levels. This plug-in is useful for sine wave, square wave and amplitude modulated signals.

### 305-PA-3005 HIGH FREQUENCY PLUG-IN

This high frequency plug-in is designed for high accuracy to 11 MHz. Using a self tracking oscillator, the input signals are converted to 40 kHz for precision measurement by the mainframe. Input attenuators (50 ohms) are provided with 10 dB steps, to cover a range of 1 mV to 3 V rms in either channel. Front panel lamps indicate when input levels are out of range or when level controls are improperly set. The self tracking oscillator can be controlled by channel A signal or by a third independent signal.

### 305-PA-3007 PROGRAMMABLE AND AUTORANGING PLUG-IN

This programmable plug-in features all of the characteristics of the model 305-PA-3001. In addition it includes increased input gain to achieve operation down to 1 mV rms. The unit can be operated either in an automatic or programmable mode. Without rear connections, the plug-in operates automatically as a 305-PA-3001; however, by utilizing rear connectors, the internal autoranging can be overridden and additional internal gain can also be inserted. Programming is available by DTL and TTL logic.

### 305-PA-3008 SINGLE FREQUENCY PLUG-IN

The 305-PA-3008 is a special purpose plug-in designed for precision calibration of 50 Hz, 60 Hz and 400 Hz power line equipment such as wattmeters, phase detectors and watt hour meters. This instrument can measure phase difference between two voltages, two currents or between a voltage and a current. The unit covers a voltage range of 25 V to 250 V rms and a current range of 0.1 to 5 A rms. The basic plug-in covers the frequency range of 50 Hz to 500 Hz. Plug-in filters, available for 50 Hz, 60 Hz and 400 Hz, assure reduction of second harmonic by at least 40 dB and higher harmonics by at least 50 dB. A front panel zero control provides adjustment for high accuracy (±0.1°) at any single frequency.

### 305-PA-3009 WIDE BAND NETWORK ANALYZER PLUG-IN (GAIN/PHASE/AMPLITUDE)

This plug-in measures the voltage amplitude of each signal input (in volts or dBV, selectable by operator), the phase difference between inputs, and the amplitude ratio of inputs. Featuring autoranging of gain in both channels, it requires no manual setting of gains for any measurement. Simultaneous DC outputs on mainframe are proportional to all four fuctions. A front panel switch selects the measuring mode for digital panel readout — channel A voltage, channel B voltage, phase difference, or amplitude ratio. Lamps on the front panel of the plug-in indicate the proper decade multiplier. The 305-PA-3009A is designed for extending the low frequency range.

### 305-PA-3010 SPECIAL PURPOSE PLUG-IN

This plug-in is typical of special purpose plug-ins which can be supplied to meet unique problems. Having high input impedance, it is equipped with closely matched low pass filters to pass 125 Hz signals while rejecting 400 Hz signals, solving problems in many types of servo control systems. Similar units can be readily designed for other special voltage and frequency applications.

### 305-PA-3015 PROGRAMMABLE PLUG-IN

Intended for use in automatic test systems, this plug-in has two selectable filters for harmonic rejection and selectable gains to handle inputs from 50 mV to 50 V rms. Filter (or filter out) selection as well as gain switching is accomplished by contact closures across terminals on the rear of the main frame.

## PRECISION TRANSFORMER ISOLATION NETWORKS

Dranetz TR 3100 series networks are available for input voltage isolation with minimum phase error and flat gain response. For use with balanced or signal ended sources, these units are equipped with internal preamplifiers to produce outputs in the 30 mV to 3 V rms range (for use with 305 Series Phasemeters) for input levels from 50 mV to 500 V rms. These transformer units are packaged for direct plug-in into the input BNC's of the phasemeter, and draw B+ power from the front panel accessory connector of the phasemeter plug-in. Size: 2¾" x 2¾" x 2". Input: banana jack. Output: BNC.

| Model TR— | Zin | Com. Mode Rej: >60 dB for frequency | Range for ±0.1° typical shift | Range for ±0.3° typical shift | Gain ±2% |
|---|---|---|---|---|---|
| 3101 | 1 megΩ 70 pF | Below 1 kHz | 20-400 V rms 50 Hz-20 kHz | 5-400 V rms 10 Hz-25 kHz | x 0.01 |
| 3102 | 100 kΩ 70 pF | Below 10 kHz | 2-40 V rms 50 Hz-20 kHz | 0.5-40 V rms 10 Hz-25 kHz | x 0.1 |
| 3103 | 10 kΩ 70 pF | Below 25 kHz | 0.2-4 V rms 50 Hz-20 kHz | 0.05-4 V rms 10 Hz-25 kHz | x 1.0 |

# SERIES 305

## SUPER PERFORMANCE PHASEMETERS

## MAINFRAME SPECIFICATIONS

**Frequency Range:** 2 Hz to 11 MHz (see plug-in data)

**Angle Ranges:** 0.00° to ±180.00° or 0.00° to +360.00° manually or automatically selected. End-of-range measurement errors are prevented by 15° automatic guard zones.

**Analog Output**
**Range:** −1.8000 to +3.6000 Vdc corresponding to measured angle; 10.0 mVdc per degree
**Accuracy:** See plug-in specifications
**Output Impedance:** 100 ohms
**DC Resolution:** Infinite
**Linearity:** Approx. ±0.01°
**Repeatability:** Better than ±0.005°
**Time Constants:** Automatically selected; 10 ms for frequency >5 kHz, 50 ms >500 Hz, 350 ms >50 Hz, 700 ms >2 Hz (Note: 4.6 time constants to respond to better than 99% of step change).
**Warm-up Drift:** Approx. 0.05° after first minute.
**Long Term Drift:** Typically less than ±0.05° per month
**Temp. Coefficient:** Approx. ±0.001°/°C
**Recommended Output Devices:** Recorders, DVM's, A-D Converters, Printers
**Self Check:** Front panel switches; dc outputs correspond to −180.00°, 0.00°, +180.00° and +360.00°
**Error Rejection:** False triggers due to high frequency noise are locked out for signal to noise ratios better than 10:1. Errors and fluctuations due to waveform dissymmetry or low frequency noise reduced by at least 10 to 1.
**Harmonic Rejection:** Worst case errors due to even harmonic distortion reduced by approximately 5:1 without filters. Odd harmonics in-phase with fundamental contribute no error.
**Operator Adjustments:** None.

**Operating Temp. Range:** 0° to +50°C
**Grounding:** Independent grounds for signal, chassis, and power line. (For safety, chassis and power line grounds connected at factory.)
**Remote Programmability (standard on all mainframes):** By rear connector pins. Override by contact closure of automatic time constant selection and angle range. Factory installed wiring from rear connector to plug-in for use with programmable plug-ins.
**Modular Construction:** Circuits on removable plug-in cards, extenders supplied for ease in servicing.
**Size:** 3½" high, 16" deep, 19" rack/portable package; shipping 22½" x 22½" x 6½".
**Weight:** 20 lbs. (9 kg.); shipping 30 lbs. (14 kg.).
**Power:** 115/230 V, 50-400 Hz, <0.75 A (specify voltage and frequency when ordering).
**Plug-In Accommodation:** Accepts 305-PA-( ) plug-ins. Mainframes and plug-ins are interchangeable.

### ANGLE PRESENTATION

| | Model 305 | Model 305B | Model 305C | Model 305D |
|---|---|---|---|---|
| **DIGITAL** | | | | |
| Display | None | 4 digit plus sign | 5 digit plus sign | |
| Angle Ranges | Not Applicable | 0.0° to ±180.0° and 0.0° to +360.0° | 0.00° to ±180.00° and 0.00° to +360.00° | |
| Resolution | NA | 0.1° | 0.01° | |
| BCD Output | None | BCD coded (1248), 4 lines per digit plus polarity line; TTL/DTL compatible (<0.8 V to > +2.4 V dc). Read and hold on command, and data ready features available on rear connector. | | |
| Warm-up Time | NA | 30 minutes (1 minute with option 107) | | |
| Zero & FS Controls | NA | Front panel for FS & 0 (no adjustments with option 107) | | |
| **ANALOG** | | | | |
| DC Output | 10.0 mV/°; 0.0000 V to 3.6000 V and −1.8000 V to +1.8000 V corresponding to 0.00° to 360.00° and −180.00° to +180.00°; infinite resolution. | | | |
| DC Offset | None | | Continuously adjustable angle offset. Analog panel meter and DC output indicate deviation from offset. | |

### OPTIONS

#101 Rear connectors for signal and reference inputs, BNC[4]
#102 Full mainframe programmability; includes self check, angle range and time constant selection, DTL and TTL compatible.
#103 High speed analog output response. Time to respond to within 99% of step change: 1 ms for frequency >5 kHz, 10 ms >500 Hz, 100 ms >50 Hz, 1 second >5 Hz. (Temp. stability ±0.01°/°C)
(Opt. 103 not available with Opt. 107 or Mod. 14 below.)
#105 Remote zero control.
#107 Automatic calibration checks and automatically readjusts digital readout and BCD output circuits to reduce readout errors to ±0.02°. This option available only on 305C.
#110 Full compatibility with IEEE 488 Interface Bus. (Requires options 102 and 305-PA-3007 Plug-In.) This option available only on 305C.
Mod. 14 Higher accuracy below 12 Hz. Available only on 305B, 305C, and 305D.

## COMBINED PLUG-IN AND MAINFRAME SPECIFICATIONS

| MODEL | FREQUENCY RANGE | INPUT LEVELS (independent) | INPUT Z | ACCURACY[2] WITH INDEPENDENT LEVELS UNLESS OTHERWISE INDICATED<br>Analog output accuracy: As specified below.<br>Digital phase accuracy: For model 305C, same as analog accuracy. For model 305B, add ±0.15° digital readout error to analog accuracy specified. |
|---|---|---|---|---|
| 305-PA-3001 Auto Ranging Plug-in | 2 Hz to 700 kHz | 10 mV to 300 V rms up to 10 kHz and to 50 V rms up to 700 kHz; can be extended to 40 kV rms with Tektronix probes. Each channel has automatic gain ranging, and lamps which indicate when level is below 50 mV and above 50 V rms. | 1 megohm shunted with 40 pF | ±0.05°, 50 mV to 50 V rms from 50 Hz to 50 kHz; typically ±0.03°, 50 mV to 50 V rms from 50 Hz to 50 kHz, ±0.05° to 10 Hz, ±0.1° to 250 kHz, and ±0.25° at other levels to 500 kHz. |
| 305-PA-3002 Single Range Plug-in | 2 Hz to 700 kHz | 10 mV to 3 V rms[1]; can be extended to 3 kV rms with Tektronix probes. Other ranges available on request. | 1 megohm shunted with 40 pF | ±0.05°, 50 mV to 500 mV rms from 50 Hz to 50 kHz; typically ±0.03°, 50 mV to 500 mV rms from 50 Hz to 50 kHz, ±0.05° to 10 Hz, ±0.1° to 250 kHz, and ±0.25° at other levels to 500 kHz. |
| 305-PA-3005 High Frequency Plug-in | 200 kHz to 11 MHz | 1 mV to 3 V rms; manual level controls in 10 dB steps. Lamps indicate when inputs are out of range or when level controls are improperly set. | 50 ohms | Broadband with equal inputs above 10 mV rms: ±0.4° from 200 kHz to 4 MHz; ±1° from 4 MHz to 11 MHz.<br>With independent levels above 10 mV rms: ±1° up to 4 MHz and ±2° up to 11 MHz.<br>Single frequency — above 10 mV rms: ±0.3° at any frequency from 200 kHz to 11 MHz at any fixed levels. |
| 305-PA-3007 Programmable and Auto-Ranging Plug-in | 2 Hz to 700 kHz | Autoranging: similar to levels of 305-PA-3001. Programmable: overrides autoranging; extends low levels to 1 mV rms; DTL, TTL logic; program connector in rear of mainframe. | 1 megohm shunted with 40 pF | Same as 305-PA-3001 for levels above 10 mV rms; typically ±0.35° from 50 Hz to 50 kHz for levels below 10 mV rms. |
| 305-PA-3008 Power Freq. Plug-in | 50-500 Hz without filters. 50 Hz, 60 Hz and 400 Hz L.P. filters available[3] | 25 V to 250 V rms; 0.1 A to 5 A rms. Inputs are transformer isolated. | 100 k ohm (voltage) 0.02 Ω max. (current) | At any single frequency, with filter set: ±0.1°, 25 V to 250 V rms, or 0.1 A to 5 A rms. |
| 305-PA-3009 Network Analyzer (Gain/Phase/ Amplitude) | 5 Hz to 700 kHz (Note: 305-PA-3009A operates to 1 Hz with 305 mod. 14) | 10 mV to 40 V rms. Each channel has automatic gain ranging. Direct reading of phase angle, amplitude ratio and level of each input. Compatible with Tektronix probes. | 1 megohm shunted with 40 pF | Phase: ±0.1° from 40 mV to 40 V rms from 50 Hz to 50 kHz; typically ±0.25° at all other levels from 5 Hz to 500 kHz.<br>Voltage Amplitude: above 40 mV (channel A or B): ±2% reading ±0.03% FS, 50 Hz to 50 kHz; ±5% reading ±0.03% FS, 100 kHz to 500 kHz.[5]<br>Ratio: ±0.5 dB, 50 Hz to 50 kHz; ±1 dB, 50 kHz to 500 kHz.[5] |
| 305-PA-3010 Special Purpose Plug-in (with filter) | For use at 125 ±10 Hz; matched filters in both channels reject higher frequencies | 500 mV to 5 V rms. Other ranges available on request. | 1 megohm shunted with 40 pF | ±0.1°, 500 mV to 5V rms; ±0.25°, 100 mV to 500 mV rms. |
| 305-PA-3015 Selectable Filter Plug-in | 5 Hz to 500 kHz without filters; uses 2 of type 305-PA-3008-( ) filters[3]; filter selection programmable | Ranges of 50-500 mV rms, 0.5 to 5 V rms, and 5-50 V rms selectable by remote contact closures. | 1 megohm shunted with 40 pF | With filters, ±0.1° at fixed frequencies over all levels; without filters ±0.1° from 50 Hz to 50 kHz at all levels (typically ±0.03°), typically ±.25°, 5 Hz to 500 kHz. |

[1] Can be provided for other voltage levels.
[2] For sinusoidal signal; can be used for square wave inputs over limited frequency range; can be used for amplitude modulated signals up to 97% modulation, depending upon model, level and frequency.
[3] 50 Hz filter, P/N 305-PA-3008-50; 60 Hz filter, P/N 305-PA-3008-60; 400 Hz filter, P/N 305-PA-3008-400. (Other frequencies available on request.)
[4] Available for use with 305-PA-3001, -3002, -3007 and -3010. Specify when ordering plug-in.
[5] For higher accuracy below 50 Hz, specify Model 305-PA-3009A.

# SERIES 606

## POWER LINE DISTURBANCE ANALYZER/RECORDER

- For 115/230/460 V rms, 1 and 3 phase systems.
- Monitors, classifies, times and prints out line disturbances.
- Immediate and day-end printouts.
- Operates on command or disturbance — no wasted paper.
- For portable or permanent installation.
- 4 hour internal carry over power.

The 606 is designed specifically for monitoring power lines connected to computers, process control systems, hospital equipment and data communications devices, which are particularly susceptible to line transients, level changes or other disturbances. Using a digital microprocessor, the 606 classifies each disturbance into IMPULSE, CYCLE-TO-CYCLE CHANGE or SLOW RMS CHANGE. When preset thresholds are exceeded, the instrument prints out time, classification, magnitude, duration and channel designation. Data is also accumulated for overflow and day-end printout. The instrument is designed for unattended monitoring in a permanent installation or for temporary use at more than one site.

### SPECIFICATIONS

**Input Voltage Ranges:** 115, 230, 460 V rms ±50%, all transformer isolated, Zin > 100 kΩ

**Number of Inputs:** Model 606-1, 1 input; Model 606-3, 3 inputs (3φ or separate circuits)

**Test Modes:**

**AVG+ or AVG−:** Increase or decrease in steady state rms, averaged over 10 sec

**SURGE or SAG:** Increase or decrease in cycle-to-cycle rms value

**IMPULSE:** 0-peak value of impulse (excluding line voltage waveform) having duration 0.5-800 μsec. Optional Adaptors (see below) measure strength, polarity and direction.

**ACCUMULATED COUNT:** Summation of disturbance data in memory (includes time, HI AVERAGE, LO AVERAGE, HI SURGE and number of HITS, LO SAG and number of HITS, HI IMPULSE and number of HITS)

**Printing Modes:**

**AVG+ or AVG−:** Prints time, AVG+ or AVG−, rms VALUE, CHAN., when exceeding threshold of 3, 5, 10, 15 V rms*

**SURGE or SAG:** Prints time, SURGE or SAG, rms VALUE, CHAN. and duration (cycles) when exceeding threshold of 3, 5, 10, 15 V rms*

**IMPULSE:** Prints time, IMPULSE, 0-pk VALUE (excluding line voltage) and CHAN, when exceeding 0-pk threshold of 50, 100, 200, 400 V. See below for additional information printed when Impulse Analysis Adaptors are used.

**SUPPLY DOWN or UP:** Prints POWER OFF or POWER ON and TIME

**STORED DISTURBANCES:** Stores data on disturbances during printing. Prints out when printer clears

**ACCUMULATED COUNT** (Short Term): Overflow of data entering printer. Prints out automatically

**DAILY ACCUMULATED COUNT:** End-of-day print out. Prints number of day and ACCUMULATED COUNT

**TEST:** Prints time and ACCUMULATED COUNT

**RESET:** Prints time and ACCUMULATED COUNT, resets memory

**PRINT OFF:** Prints PRINT OFF and TIME, disables printer, all data goes into accumulator for delayed summary printout

**Accuracy:**

**AVG+ or AVG−:** At 60 Hz (sine wave signal), ±1% of reading ±1% of nominal input

**SURGE or SAG:** At 60 Hz (sine wave signal), ±1% of reading ±1% of nominal input

**IMPULSE:** ±5% of reading ±1% of maximum impulse calibrated with a positive going, 10 μsec, half sinewave impulse. 6 dB bandwidth with half sinewave impulses: 800 μsec to 0.5 μsec

**Clock:** Indicates real time in hours, minutes, seconds, crystal controlled. During power off, operates on internal batteries (4 hours). Clock resets from front panel buttons

**Printer:** 18 character, alpha-numeric, thermal, paper 2¼" wide, prints 1 line/sec

**Supply Power:** 90 to 140 V rms, 45-450 Hz, 1φ, 1.0 A maximum (also DC operation 120-170 V maximum).

**Case:** Portable, removable cover with carrying handle.

**Size (with cover):** 11" H x 7" W x 9½" D; shipping 11" x 14" x 18".

**Weight:** 16 lbs. (7 kg.); shipping 24 lbs. (11 kg.).

**Options:** Opt. 101 (606-3 only), freq. disturbances; Opt. 102, 115/230 V supply power (switch selectable), 45-65 Hz; Opt. 103 (606-3, Opt. 101 only), monitors 400 Hz power lines; Opt. 104, external event indication; Opt. 105, enables use of Impulse Analysis Adaptors; MR15 Rack Mount Series, 19" rack plate and dust cover.

**Model K103 Test Kit:** Includes disturbance generator designed to verify operation of Series 606. Also includes a card puller, an extender card, and a set of programmed memories for assisting in calibration and troubleshooting.

**Model 910 Uninterruptible Power Supply:** For complete operation of 606 during power shutdown up to 2 hours. Fully protected from impulses to 1600 Volts, sags and surges of 50%, and total power interruptions.

**Input (under normal conditions):** 115/230 V rms nominal (switch selectable), 45-65 Hz, 1φ, 1.0 A maximum.

**Output:** 120 to 170 Volts, DC, 1.0 A.

**Recharging Time:** 18 hours.

**Size:** Portable carrying case same size as 606.

**Weight:** 35 pounds (16 kg.).

*These values for 115 V input; multiply by x2 or x4 for 230 V rms or 460 V rms.

# SERIES 606-PA-( )

## IMPULSE ANALYSIS ADAPTORS FOR SERIES 606

Impulse Analysis Adaptors supplement the analytical capabilities of the Series 606 Power Line Disturbance Analyzers by providing recorded measurements of **impulse strength,** i.e., the integral of impulse voltage with respect to time. The **strength** indicates the potential of the disturbance to damage or interfere with **sensitive** electronic equipment. Two of the four models in the Series also provide indication of the Polarity and Direction, i.e., from source to load or vice versa. These data are conveyed to the associated Model 606 (equipped with Option 105), for printing in conjunction with the information provided by the Model 606 itself.

### SPECIFICATIONS

**Function**

**606-PA-6001** Single-phase, 50/60 Hz; measures Strength only.

**606-PA-6002** Three-phase, 50/60 Hz; measures Strength only.

**606-PA-6003** Single-phase, 50/60 Hz; measures Strength, Polarity and Direction. Includes one current probe.

**606-PA-6004** Three-phase, 50/60 Hz; measures Strength, Polarity and Direction. Includes three current probes.

**Printed Information**

**Strength:** Separates IMPULSE disturbances into six ranges of Strength. Prints appropriate range, i.e., >.001 V-SEC.

**Polarity:** Prints + or −.

**Direction:** Prints SRCE or LOAD.

**Input Voltage Ranges:** Same as Series 606.

**Input Current Ranges:** (Only applies to -6003 and -6004).

Max. at power-line frequency (47-63 Hz): 100 A. rms

Max. Impulse: 1000 A. Peak at 1 msec

Min. for Direction determination: 1 A. for at least 0.2 μsec

**Current Probe Insertion Impedance:** 0.4 mΩ at 50 Hz.

**Steady State Power Requirements:** Single-phase Adaptors operate from power supply of associated Model 606. Three-phase Adaptors contain a separate power supply which requires 90 to 140 Vrms, 45 to 65 Hz, 1φ, at 0.25 A. nominal.

**Option 102:** Available on -6002 and -6004 to permit operation from 180 to 280 Vrms, or 90 to 140 Vrms (switch-selectable), 45-65 Hz, 1φ.

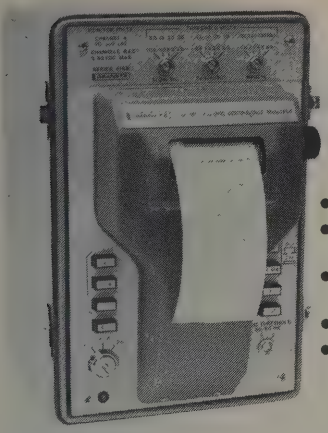
# SERIES 616

## DC/AC VOLTAGE DISTURBANCE ANALYZER



- Field troubleshooting
- Power supply analysis and testing
- Testing power conditioning equipment
- Monitoring battery voltages
- Simultaneous monitoring of AC and DC voltages

The Series 616 is a highly portable easy-to-connect analyzer for recording voltage disturbances on three channels: one AC and two DC. The Series 616 combines the outstanding features and operating techniques of the Series 606 (described on previous page) to record IMPULSES, SAGS and SURGES, and SLOW AVERAGE variations, when they occur, in an easy-to-interpret alphanumeric printout. The instrument is ideal for pinpointing the effects of AC input line disturbances on the DC outputs of power supplies in computers, communication equipment, and medical apparatus. Two models, the Model 616A for 4 to 25 VDC and the Model 616B for 8 to 50 VDC, are available.

### SPECIFICATIONS

**Input Voltage Ranges:*** Channel A, 40 to 250 Vrms, 45 to 65 Hz; Channels B&C, ±4 to 25 VDC.

**Test Modes**

**Impulse:** Peak voltage of impulse after removing steady-state AC or DC voltage level. Impulse durations range from 0.5 to 800 μsec.

**Sag/Surge:** Sudden changes in steady-state voltage. Measurement interval equals one cycle of Channel A signal.

**Slow Average:** Slow changes in steady-state voltage. Measurement time constant is approximately 5 seconds.

**Accumulated Count:** Summation of disturbance data in memory (includes the number and worst case values of each type of disturbance on each channel since the beginning of the day).

**Printing Modes**

**Impulse:** Prints time, IMPULSE, 0-pk. value (excluding steady-state) and channel, when exceeding 0-pk. thresholds of 0.5, 1.0, 2.0 and 4.0 V* for DC channels, and thresholds of 50, 100, 200, 400 V* for AC channel.

**Sag/Surge:** Prints time, SURGE or SAG, voltage, duration (cycles) and channel when exceeding thresholds of 0.3, 0.5, 1.0, 1.5 V* for DC channels, and thresholds of 3, 5, 10, 15 Vrms* for AC channels.

**Slow Average:** Prints time, AVG+ or AVG−, voltage, and channel when exceeding thresholds of 0.3, 0.5, 1.0, 1.5 V* for DC channels, and thresholds of 3, 5, 10, 15 Vrms* for AC channel.

**Supply Power:** 90 to 140 Vrms, 45 to 65 Hz, 1φ, 1.0 A. maximum (also DC operation from 120 to 170 V).

**Options:** Opt. 101, frequency disturbances on channel A; Opt. 102, 115/230 V supply power (switch-selectable), 45 to 65 Hz; Opt. 104, external event indication; MR15 Rack Mount Series, 19″ rack plate and dust cover.

**Model 604A-PA-1001:** Adapts the Model K103 (described on previous page) for troubleshooting and calibration of the Series 616.

*These values are for Model 616A. Multiply by 2 for Model 616B.

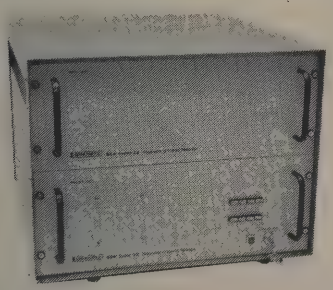
# SER SYSTEM 22

## SEQUENCE OF EVENTS RECORDER



### FEATURES

- One millisecond resolution
- Alphanumeric input descriptions
- Ongoing self-diagnostics
- Freestanding printer and panel-mounted printer/keyboard/display packages available
- Portable or permanent installation
- Field expandable to 1024 inputs

### APPLICATIONS

- Document plant start up sequences
- Plant performance analysis
- Test sequence controllers
- Protective relay event recording
- Interface into computer or supervisory control system
- Test solid state relay systems

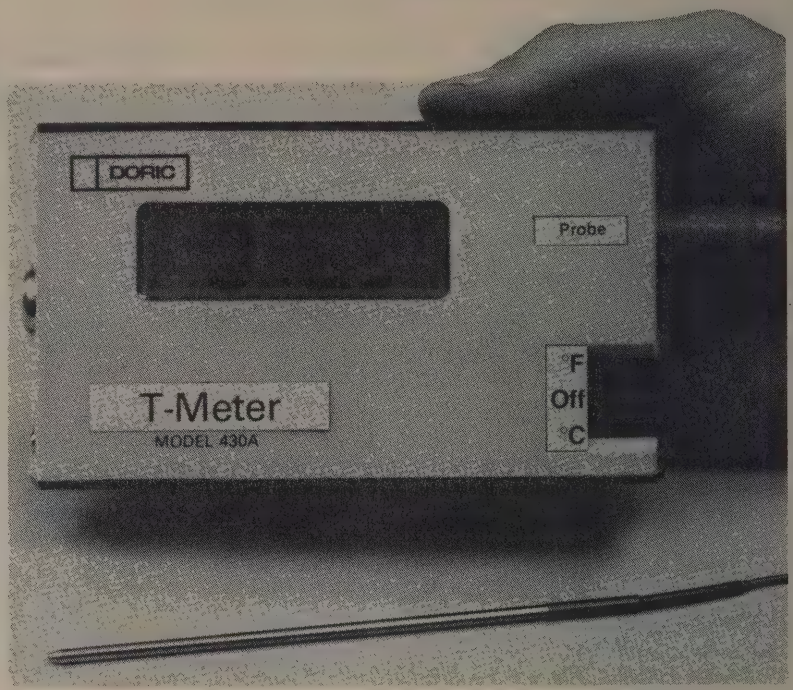
# HAND-HELD DIGITAL TEMPERATURE AND CAPACITANCE METERS

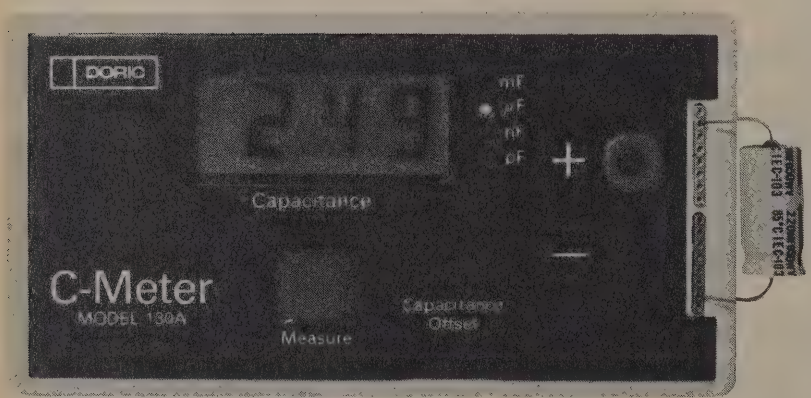
Hand-held and portable—

## The Model 130A C-meter and Model 430A T-meter



## T-Meter

Hand-held, rugged and portable, the Model 430A T-Meter measures temperatures from −100°C to 200°C with 0.5°C accuracy over the range of −55°C to 125°C. Using a 0.6 inch liquid crystal display, it reads either Celsius or Fahrenheit at the flip of a switch. The display includes low battery and faulty probe indicators. The T-Meter uses four size "N" cells which will last more than 1500 hours. Probes are available for the T-Meter with standard accuracy (0.5°C) or high accuracy (0.1°C). The T-Meter can be operated in −20°C to 50°C environments.



## C-Meter

Handy, precise, and highly versatile, just insert or connect the capacitor, press the button and the 130A C-Meter automatically displays the capacitance in 10 ranges to 200,000 microfarads, with a maximum resolution of 0.1 picofarads. Small and portable, the C-Meter operates on four AA batteries, for over a year of normal use. A large 3½ digit liquid crystal display with variable decimal points makes the C-Meter easy to read, as the capacitance range is indicated by a high brightness LED. The C-Meter comes complete with accessory clips for all capacitor sizes.

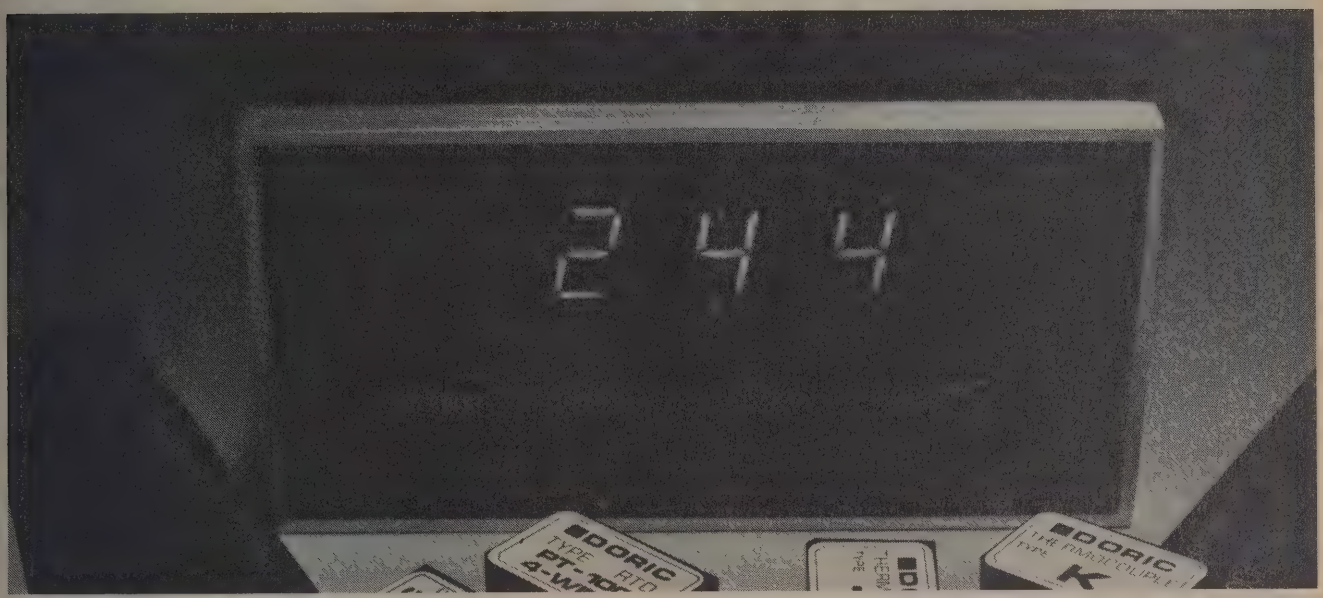
DIGITAL INDICATORS FOR TEMPERATURE
VOLTAGE AND CURRENT

DORIC

## Low cost, accurate, modular — The 400A Series Trendicators for temperature, voltage and current measurement.



The 400A series measures any of nine thermocouple types and temperature ranges, four voltage ranges, two RTD ranges or two current transmitter ranges. And offers you the most change ever in the history of digital indicators.

By changing plug-in modules you are able to change the basic 400A from one thermocouple range to another. Or from a thermocouple indicator to a current, RTD, or voltage indicator. And it can give you temperature resolution to ±0.1° current to ±0.01%, and voltage readings to ±1μV to make any process more efficient.

The 400A works in the toughest, noisiest environments without the downtime common to other indicators. With over 20,000 in the field, it has a failure rate of less than 1%. A record unmatched by any other indicators.

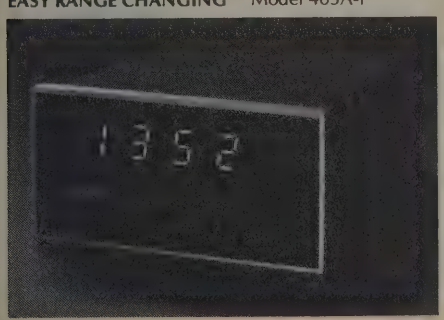
A portable model with battery pack and carrying case is available. With an optional calibration potentiometer it can be used as a transfer standard for calibrating other indicators.

The 400A offers a choice of panel mounting or rack mounting with optional adapter plate. Or a bench model with tilt stand. Field installable BCD is also available as an option.

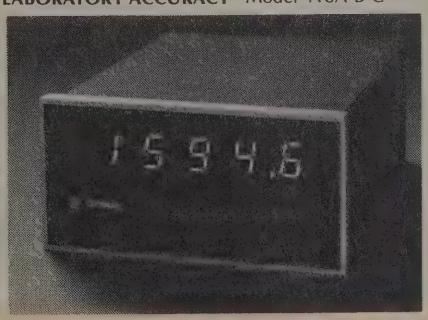
**SUMMARY OF AVAILABLE MODELS**

400A: Single function, 1° (0.1%, 10μV) resolution
402A: Same as 400A with built-in 5-point selector
403A: Switchable J, K, T, R, S, B thermocouple inputs, 1° resolution
405A: 10-input pushbutton selector for Trendicators
408A: Switchable FeCon(DIN), CuCon(DIN), K(NBS), E(NBS) thermocouples; platinum RTD and 1000 mV ranges; 1° (1 mV) resolution
409A: 10-input RTD selector for Trendicators
410A: 0.1° (0.01%, 1μV) resolution version of 400A
412A: 0.1° resolution version of 403A
418A: 0.1° (100 μV) resolution version of 408A

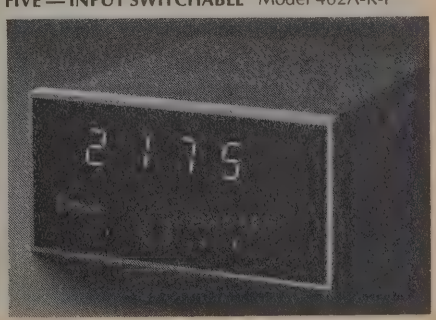
**EASY RANGE CHANGING** Model 403A-F



**LABORATORY ACCURACY** Model 410A-B-C



**FIVE — INPUT SWITCHABLE** Model 402A-K-F



DORIC

# DIGITAL PRESSURE INDICATORS TEMPERATURE STANDARDS AND DATA LOGGERS

**For measuring pressure, load, torque or any strain —**

## The Series 420 Digital Transducer Indicators

The 420 Digital Transducer indicator is a precision instrument for displaying output signals from strain gauges. The Model 420 can be used to monitor thrust, torque, pressure, force, weight and other physical phenomena, directly in engineering units.

The Model 420P comes complete with a built in strain gauge type pressure transducer, for measuring pressure in seven ranges up to 5000 psig. Just connect the pressure source to the 420P, plug it in and read the pressure indication.

## For Digital Temperature Standards

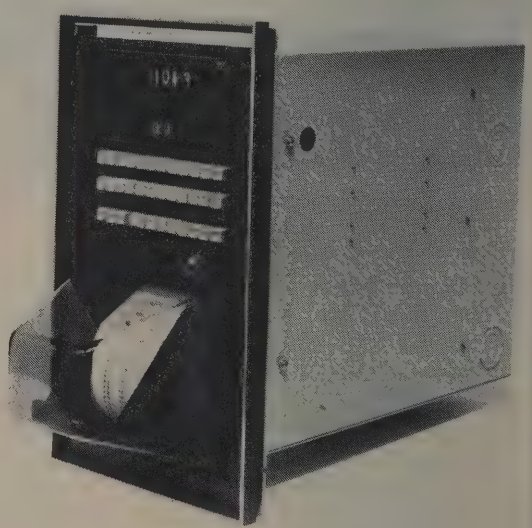
Doric offers three complete temperature measurement calibration systems. Each system includes the indicator, sensor, interconnection and system calibration. Their importance is growing with the demands for greater process efficiency, product quality and lower pollution.

DS-100-T5A

**For the ultimate in data acquisition —**

## Digitrend 200, 220, and 240 data loggers and process monitors.

Doric has years of experience in the designing and manufacturing of data loggers. With over 2000 of them at work around the world, Doric multi-point monitoring systems have become the recognized standards of the industry.



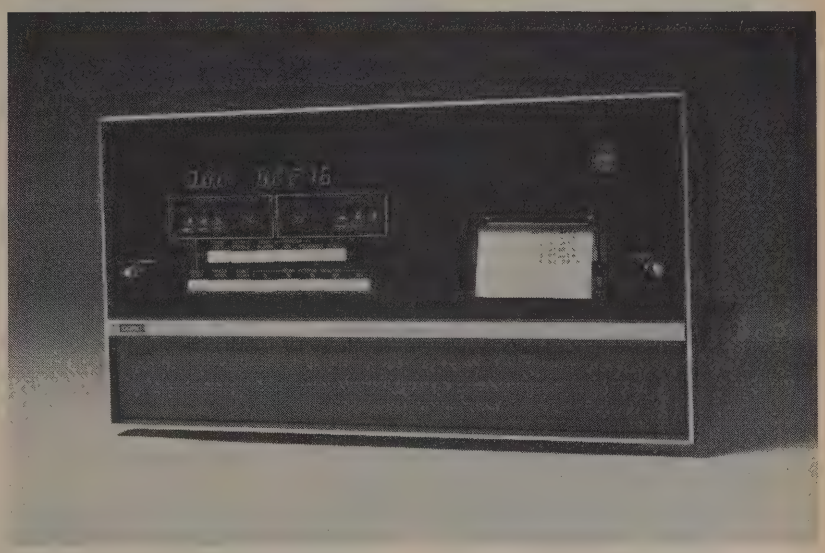
**Rugged and durable —**

## The Digitrend 200 Data Logger

The 200 is a digital multipoint, single-function data logger. It scans, logs and alarms low-level outputs from the thermocouples, millivolts, volts, current transmitters and RTDs. With digital display and output on strip printer. Guarded differential inputs, filtering, dual slope integration, auto-zero and optical coupler isolation allow the rugged 200 to operate in virtually any industrial environment. Options include digital clock and multiple selective alarms.

**More sophisticated with micro processor power —**

# The Digitrend 220 Data Logger



The Digitrend 220 was designed simply to uncomplicate your life. It measures inputs from all thermocouple types, current transmitters, RTDs, millivolts or volts. It can be used as a single-function unit or a multi-function scan-alarm-data logger. A simple pushbutton keyboard that allows you to program alarm limits and functions, point by point or randomly, is tucked away behind a front panel swing-down door. The 220 makes a perfect computer front end, and can give 1$\mu$V or 0.1° resolution at up to 20 points/sec. It can be randomly accessed by calculator or computer with output on strip printer, mag tape, teleprinter or modem.

Other features like autorange, remote digitizing and remote data access are available.

**Total command performance —**

# The Digitrend 240 Process Monitor.

It helps you monitor your process in the most exceptional way. Because it's a lot more than a simple data logger, we call it a process monitor. It gives you big computerized performance — without the need of a computer — on-line the day you receive it. Without months of software program de-bugging.

Built around a proven microprocessor, the Digitrend 240 continuously scans your process for you. When it detects and double checks a point that has gone off-limits it activates an alarm. Only then need you become involved. That's what monitoring by exception is all about.

All it takes to operate a 240 system is a few simple commands (about 30 minutes of operator training). For anything from the basic 20 point/80 alarm setpoint system to the full 1000 channel/4000 setpoint maximum.

You can mix up to 32 factory-programmed and custom functions — including thermocouples, RTDs, millivolts, current transmitters and volts — to fit your own specific requirements. And when you add the wide choice of outputs and options available with the 240, you have the most exceptional cost/performance process monitor available today.

# Ectron CORPORATION

- Differential DC Amplifiers
- Strain Gage Signal Conditioners
- Thermocouple Signal Conditioners
- Signal Conditioning Systems
- Data Acquisition Systems
- Thermocouple/MV Calibrators

## MODEL 314

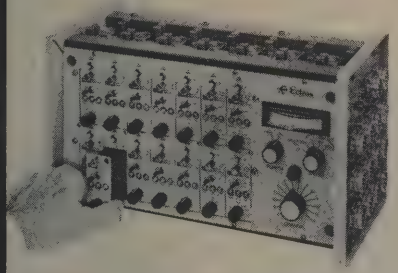
Miniature airborne amplifier occupies less than one cubic inch. Contains differential amplifier, strain gage excitation and power supply to operate from 28V dc. 20 kHz Bandwidth. Price $450. (Bulletin 2007)

## 400 ENVIRONMENTAL SERIES

- 100G Shock
- −25 to +71°C
- 0.5 μV/°C Stability
- Small Size 1"w X 2"h X 3"d
- Bridge Excitation and Balance
- Thermocouple Conditioning
- RFI protection
- 120 db CMR • 100V CMV
- Rack or Stud Mounting
- 12 or 28 V dc Power • 8 oz's.
- From $430 (Bulletin 2001)

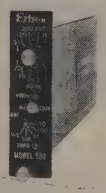
## 4000 SERIES, SIGNAL CONDITIONING SYSTEMS

The typical 4000 series system shown below is designed for Airborne or Vehicular service involving moderately high G forces. It includes 14 stable 400 series amplifiers, a monitor meter and monitor selection switch, individual CAL switches, bridge excitation, bridge balance and conditioning.



Other 4000 series systems are designed for operation during shocks up to 100 G's. Features available in these systems include integral VCO's, FET Calibration, Channel ID signals, Rechargeable Battery Pack and others. (See Bulletin 2010)

## 500 ECONOMY SERIES



- 1μV/°C
- 114 dB CMR
- Gains X.01 to X2500
- 16 Amps per 3.5" high rack
- 80 kHz bandwidth
- Filtered output
- 10 ma, 100 ma, dual outputs
- Bridge Bal., Completion, CAL
- From $180 (Bulletin 2004)

MODEL 540 — Four-channel amplifier for multi-channel data systems such as Model 6000 at right. From $500 (Bulletin 2004)

## 600 INDUSTRIAL SERIES

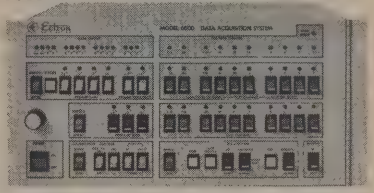
- Strain Gage Conditioning
- Thermocouple Conditioning
- Thermocouple Linearization
- Reference Junctions
- Multifunction Amplifiers
- Bridge Excitation and Bipolar Cal.
- Expanded Scale Operation
- .5 μV/°C Zero Stability
- 120 dB CMR and 300V CMV
- 12V dc, 28V dc or 115V ac power
- From $370 (Bulletin 2005)

## 700 WIDEBAND SERIES

- 100 kHz Bandwidth
- Manual or Programmable Gain
- Digital Storage
- Local Readout
- 1μV/°C Zero Stability
- .003%/°C Gain T.C.
- .01% Gain Accuracy
- 300V CMV • 126 dB CMR
- 3-pole filters • Dual outputs
- From $405 manual gain
- From $805 programmable gain (Bulletin 2003)

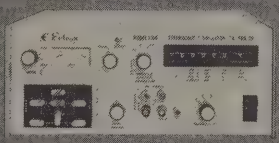
## 6000 SERIES HIGH SPEED DATA ACQUISITION SYSTEM

All 6000 Series Systems combine per channel low level amplifiers/signal conditioners with a high level multiplexer, a programmable post amplifier and a 14 bit A-D converter to provide complete multichannel high speed signal processing. Outstanding performance is provided by the chopper stabilized design and anti-aliasing filters. The systems are capable of scan rates to 100,000 channels per second.



- CMV 300V (higher on special order)
- CMR 120 dB with 1K unbalanced
- 0.5 μV zero stability
- 0.01% gain stability
- 3rd order filter, each channel, plug in
- Sequential or random access
- 100kHz throughput rate
- 64 channels per 8.75" high enclosure (Bulletin 2008)

## MODEL 1100 THERMOCOUPLE SIMULATOR CALIBRATOR



### CALIBRATES . . .

- Digital Thermometers
- Temperature Recorders
- Thermocouple Transmitters

**SIMPLE**
Just dial the temperature (C or F) (or program remotely)

**ACCURATE**
Voltage output conforms to NBS 125 within 0.1°

**UNIQUE**
Outputs on thermocouple alloys or copper

**VERSATILE**
It's a DC Voltage Standard and a Differential Voltmeter, too!

## SOLID-STATE DIGITAL POWER LINE MONITOR

**SPECIFICATIONS COMMON TO ALL UNITS**

**OPERATING RANGE:**
Voltage: 85-145V (When power input is parallel
Suffix A - 170-270V with the measurement input)
Measurement input is 0-300V (When applying a fixed power input voltage)

**VOLTAGE ACCURACY:** Voltage — ±.5% f.s. ±1 Digit
**SAMPLE RATE:** Voltage — 30m sec. - 600m sec.
**DIGITAL DISPLAYS:** LED — .43" high
**SIZE:** 4.75" W x 3.25" H x 3.50" L
Panel cut out required 4.125" x 3.125"

The Power Line Monitor is a solid-state digital meter that was designed to satisfy the requirements for a digital readout device combining the functions normally provided by two distinct conventional line monitoring panel meters.

This digital meter has the unique two-fold capability of monitoring line voltage and line frequency fluctuations through visual presentation as well as by optional digital digit outputs for remote interface.

The unit was designed and built for ruggedness and durability, the LED's Display and the solid-state component will assume a long life operation.

The Power Line Monitor is suited ideally for use with power generation equipment, computerized measuring systems, control panel installations, and in instrumentation laboratories where power sources must be monitored for measuring test equipment accuracies.

| MODELS | FREQUENCY RANGE | FREQUENCY ACCURACY | | SAMPLE RATE FREQUENCY |
|---|---|---|---|---|
| LM 150 | —— | — | | — |
| LM 160 | 42 - 999 Hz. | ± 1 Hz. | | 1 sec. |
| LM 1400 | 42 - 999 Hz. | ± 1 Hz. | | 1 sec. |
| LM 1600 | 42.0 - 99.9 Hz. | ±.1 Hz. | | 10 sec. |
| LM 1600-1 | 42.0 - 99.9 Hz. or 42 - 999 Hz. | ±.1 Hz. or ± 1 Hz. | Crystal Con-trolled | 10 sec. or 1 sec. |

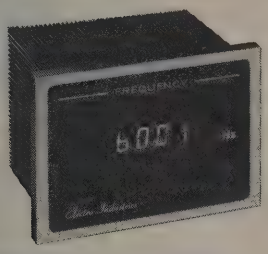
## SOLID-STATE DIGITAL FREQUENCY MONITOR



**SPECIFICATIONS COMMON TO ALL UNITS**
**INPUT VOLTAGE RANGE:** 2 - 300V.
**FREQUENCY ACCURACY:** ±1 Digit over operating temperature range
**SAMPLE RATE:** 1 second
**DIGITAL DISPLAY:** LED — .43" high
**SIZE:** 4.75" W x 3.25" H x 3.50" L

The Solid State Digital Frequency Monitor was designed to satisfy the requirements for high resolution and fast updating when measuring low frequency.

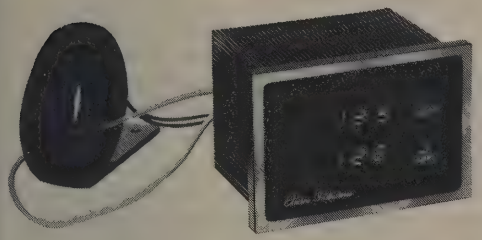
The fast updating feature is achieved through a unique phase lock loop scheme. In addition, this technique allows the unit to reject noise on the incoming signal. The accuracy of this unit is controlled by a crystal with maximum aging factor of 20 PPM.

This feature enables the unit to be free from calibration requirements.

The Frequency Monitor is ideally suited for use in monitoring Power Line frequencies and for general low frequency monitoring.

| MODELS | FREQUENCY RANGE | FREQUENCY RESOLUTION |
|---|---|---|
| LF 60 | 5.00 - 99.99 Hz. | .01 Hz. |
| LF 400 | 50.0 - 999.9 Hz. | .1 Hz. |
| LF 1000 | 5 - 9999 Hz. | 1. Hz. |

## SOLID-STATE DIGITAL VOLTS AMPERES MONITOR



Electro Industries Solid State Digital Volts/Amps Monitor is designed to satisfy the requirements for digital readout devices, combining the functions normally provided by two distinct conventional panel meters.

The unit features a better visual presentation, as well as an optional digital-digit output for remote interfacing. Combining both functions on a single meter provides a space saving panel.

The unit is built for ruggedness and durability. It is a 100% solid state unit with no moving parts to wear or break which makes it extremely resistant to shock and vibration. The LED's and LSI components will assure a long life operation.

The current sensor that is supplied with each unit is a highly accurate device that was designed to meet the total accuracy of the current measurements.

The Digital Volts/Amps Monitor is ideally suited for use with power generation equipment. Together with our Digital Frequency Monitor, the LF series provides a complete monitoring system for generators and control panels.

**SPECIFICATI NS COMMON TO ALL MODELS**

**VOLTAGE RANGE:** 0 - 300V
Suffix G — 0 - 600V
**ACCURACY:** Voltage: ±.5% F.S. ±1 digit
Current: ± 1% F.S. ±1 digit
(total accuracy when using Electro Ind. current transformer)
**AMBIENT TEMPERATURE:** Operating: 0 - 50°C
Storage: −55°C - +85°C

**FREQUENCY RANGE:** 47 - 440 Hz.
**SAMPLE RATE:** 100 - 600m sec.
**POWER REQUIREMENTS:** 115V ±25% 5VA max.
Suffix A — 230V ±25% 5VA max.
**SIZE:** 4.75" W x 3.25 " H x 3.50" L. Panel cut out required 4.125" x 3.125"
**TEMPERATURE ACCURACY:** 100 ppm/°C

# EMICO HIGH TORK PRECISION METERS

## PRODUCED IN VOLUME AT COMPETITIVE PRICES

EMICO is your dependable VOLUME source for 100% American-made AC and DC meters for a wide range of applications in the electronics, automotive, appliance, test equipment and process industries. Select any standard model or have EMICO design and engineer a meter to your exact requirements, including a custom dial face with special scale, trademark, name or colors. Send for a complete catalog of standard models or mail drawings and specifications for a prompt quotation on a custom meter.

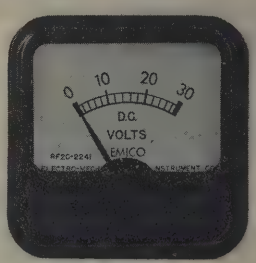
### PANEL METERS WITH METAL OR PLASTIC BEZELS

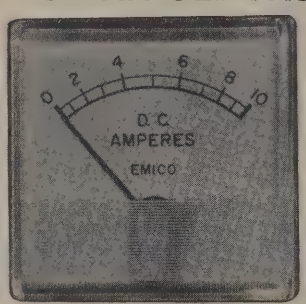
**Plastic Bezel Meter**
Model 42—2 5/16" square
Model 44—2 13/16" square

**Metal Bezel Meter**
Model 72—2 1/4" square
Model 74—2 3/4" square

Featuring the unique EMICO High-Tork movement, these versatile meters are available as AC or DC ammeters, voltmeters and milliammeters. All AC meters have 5% accuracy; DC meters available with 3% or 5% accuracy. These meters can be mounted into a 2 1-16" diameter panel hole.



## THE CHARGE INDICATOR WITH A MODERN LOOK BUT AN OLD-FASHIONED PRICE



**Plastic Face Meters**

**50 Series all approximately 2 3/8" square**

The eye-catching appearance, durability, and low price tag have made these meters especially popular. The one shown above (Model 53) is ideal for battery charger applications. Features attractive, clear molded plastic bezel and easy-to-read scale that can be customized. Specific models available as DC ammeters, voltmeters and milliammeters with 3% or 5% accuracy. AC model accurate to 5% of full scale.

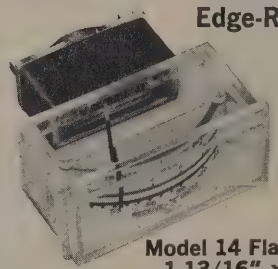
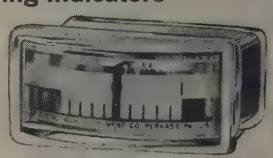
## THE LOW-COST EMICO EDGE ...ON SALES APPEAL

**Edge-Reading Indicators**





**Model 12 Curved Front 1 1/4" x 9/16"**

**Model 14 Flat Front 1-13/16" x 3/4"**

You can design added sales appeal into your product with the EMICO edge—either curved-front Model 12 or flat-front Model 14. Both compact edge-reading indicators have clear molded plastic cases for easy readability. Primarily current indicators, they are available in virtually any range up to a sweep of 100 milliamperes DC. Basic DC milliammeter movement easily converts to voltmeter with eternal resistor and to AC with external rectifier. Includes zero adjustment. Specify preference for zero-left, zero-center, or zero-right. Dial face can be customized for vertical or horizontal installation.

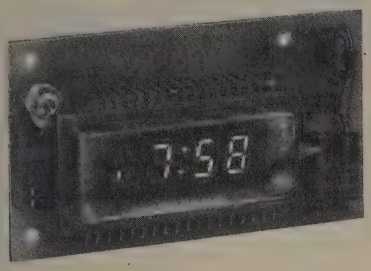
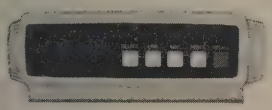
# CLOCKS & MONITORS new from EMICO

PRECISION-PLUS



**CLOCK MODULE**—Displays time and activates alarm circuit at pre-set moment.

Supplied with or without case, this highly accurate 24-hour digital clock can be a timer/controller or an alarm clock (10 ma. maximum drive current). It can also be set to display time in minutes and seconds. Includes "fast set" and "slow set." Has capability for snooze alarm. DC or AC operation. Low cost in OEM quantities.

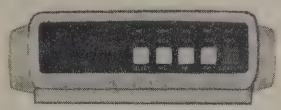


**TIME MONITOR**
Digital clock that also measures elapsed time independently

Operates on DC. Time elapsed counter reads in minutes and seconds to 59:59, then in hours and minutes to 99:59. Display and indicator lights change in intensity depending upon environment.

**TACH/EVENT COUNTER**
Measures RPM or events and signals when an adjustable pre-set standard is exceeded.

Continuously, accurately shows RPM's to nearest hundred. Includes memory for preset standard that can be reset at the push of two buttons.

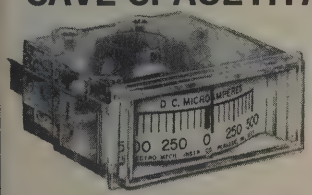


**FOUR-FUNCTION COMPUTER**
Determines relationship between two variables.

Keeps totals of both variables. Also computes accumulated average and displays total usage of both variables. Operates on DC. Example: miles per gallon computer.

For complete information on any or all of these products, send for detailed product bulletins, today.

# ACCURATE EASY-READ METERS SAVE SPACE... AND COSTS



Model 13-F Flat-Front

Model 13 Curved-Front

## Edge-Reading Meters

Two attractively designed meters that offer excellent readability. You have the choice of either the curved-front Model 13, or the flat-front Model 13-F. Both are 1-13/16" x ¾" and have clear molded plastic cases for easy illumination. Available as 0-500 microampes DC meter, as well as DC or AC ammeter, milliammeter and voltmeter. Either 3% or 5% accuracy depending on range. AC meters have 5% accuracy rating. Standard quick disconnect-type terminal fits ¼" x .032" connector . . . screw-type also available. Can be supplied with zero-left, zero-center, or zero-right. Vertical or horizontal installation. Dial face can be customized.

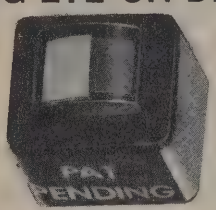
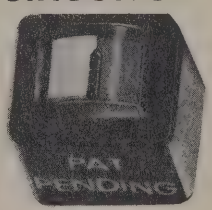
EMICO PRECISION-PLUS

# TINY INDICATORS KEEP A BIG EYE ON D.C. CIRCUITS



Flag



Pointer

## Model 802—approx. ½" square

Rugged, dependable, and extra low in cost, these micro-miniature circuit indicators:

- **Monitor on-off conditions**
- **Indicate battery-charge conditions**
- **Indicate circuit-operating conditions**

Less than 2 milliwatts required to move flag or pointer. Overload capacity is 15 times current rating without burn-out or calibration shift. All models are packaged in a high-impact, clear plastic case and are available either with wire leads or plug-in jacks for ease of installation.

**Send for detailed product bulletin, today.**

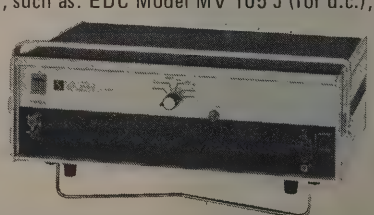
## 10 AMP CURRENT CALIBRATOR (Source) AC and DC Amperes, Auxiliary Instrument, Model 3200 (See Bulletin 27)

This auxiliary instrument operates from the output of a stable, accurate AC or DC Voltage Calibrator, such as: EDC Model MV 105 J (for d.c.), and EDC Model AC 1000 D/B (for a.c.).

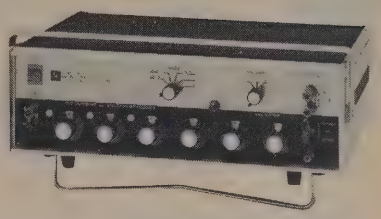


| | |
|---|---|
| Ranges (ac & dc) | 10 A, 1 A, 100 mA, 10 mA, and 1 mA |
| Accuracy: (dc) | ±(0.025% of setting + 0.0025% of range) |
| (ac) | ±(0.035% of setting + 0.0035% of range) |
| Voltage Compliance | 2V (min) to 5V (max). |
| Price | $1350.00 |

## DC CURRENT AND VOLTAGE STANDARD — MODEL CR 103 J (Bulletin 31)

Short-circuit and open-circuit protected. 30 second warm-up. Automatic zero.

| | Current Mode | Voltage Mode |
|---|---|---|
| **DC Ranges** | ±110 mA<br>± 11 mA | ±11 V<br>±1V<br>±110 mV |
| **Resolution (1 ppm)** | 100 nA<br>10 nA | 10 μV<br>1 μV<br>0.1 μV |
| **Compliance** | 100 V | 50 mA |
| **Accuracy** | ±0.005% of setting | ±0.003% of setting |



Price $1595

## AC VOLTAGE STANDARD — MODEL AC 1000 D/B (Bulletin 41)

Completely solid state. Highly stable. 60 second warm-up. Low output impedance.

| | |
|---|---|
| **Vac rms ranges** | 1000 V, 1 V, 100 mV, 10 mV |
| **Accuracy** | 0.025% |
| **Burden** | 50 VA (2A max.) |
| **Frequency Range** | 50 Hz to 5 kHz |

5 internal frequencies 50 Hz, 60 Hz, 400 Hz, 1 kHz plus optional frequency and unlimited number of frequencies attained by use of external oscillator via front panel terminals.

| | |
|---|---|
| **Distortion** | .5% |
| **Weight** | 45 lbs. |
| **Price** | $3795 |

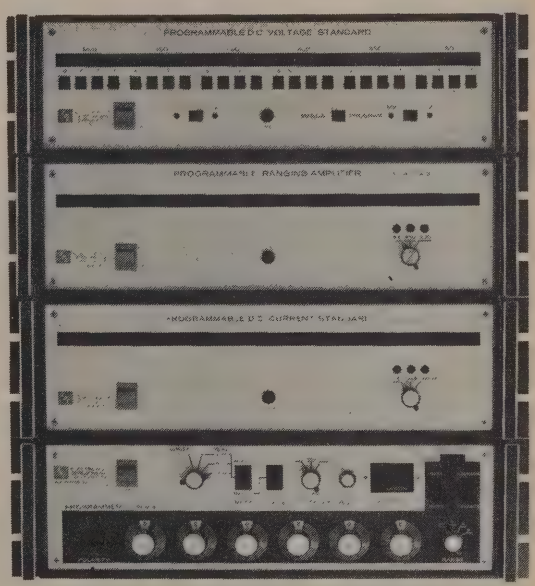
**Option** Model IC-15 — Meter increment calibration — Bulletin 42

## DIGITALLY PROGRAMMABLE STANDARD MODEL 501 J (Bulletins 51 through 55)

**Switching and settling time:** 50 μs
**Formats:** BCD, ASCII, BINARY, or IEEE 488
Certification N B S traceability

**Complete specifications:** Bulletins 51, 52, 53, 54, 55
**Complete Prices:** Bulletin 6

| | MAIN FRAME Model (501 J) See Bulletin 51 | 100 mV RANGE Option: D See Bulletin 51 | AMPLIFIER RA-3 See Bulletin 54 | DC CURRENT PCS-1 See Bulletin 53 |
|---|---|---|---|---|
| **Output d.c.** | 10.0000 Vdc | 100.000 mV | 100 & 200 V | 10 & 100 mA |
| **Resolution** | 100μV (10ppm) | 1μV(10ppm) | 1 & 2mV(10ppm) | 0.1 & 100 mA |
| **w/Opt. B** | 10μV(1ppm) | 0.1μV(1ppm) | 100 & 200μV | 0.01 & 0.1μA |
| **Accuracy** | ±0.005% | ±0.005% | ±0.01% | 0.01% |
| **Noise** | 0.0005% | 0.0005% | 0.0005% | 0.0005% |
| **Compliance** | 50mA | in to 400Ω load | 15mA | 100V |
| **Prices** | $1675 | $185 | $985 | $1395 |



### OPTIONS (Factory installed) (See Bulletin 51).

**B— Additional Resolution** — (see "Resolution, w/Opt. B" above).
**C— Ready Signal** — output signal indicating "ready" state.
**D— 100mV Range** — (See "100mV Range" above) (See Opt. D, above).
**J— Bipolar Operation** — Programmable polarity control.
**L— Binary format** — Accepts straight binary program.

### ACCESSORIES (May be field installed) (See Bulletin 51).

**MR-1** Memory register or buffer storage.
**MR-2** Serial-to-parallel converter, w/storage.
**AK-1** Negative programming logic.
**AM-1** Front panel display and control (for BCD).
**AM-2** Front panel display and control (for BINARY).
**IS-40** Opto-Isolation.
**KT-488** IEEE 488 interface (Kit) See Bulletins 51 & 55.)

### AUXILIARY INSTRUMENTS

Separate chassis, plug-in to main frame. No modifications

**RCM-4 Programmer.** (See Bulletin 52) Manually programmed. Automatically sequenced. Up to 40 addresses. Selectable triggering: Manual, automatic or external. Price:
**PCS-1 Programmable DC Current.** (See above) (See Bulletin 53)
**RA-3 Programmable Amplifier.** (See above) (See Bulletin 54)

**Electronic Development Corp.** 11 Hamlin Street, Boston, MA 02127 (617) 268-9696

All EDC instruments are traceable to the U.S. National Bureau of Standards. Certification supplied with each instrument / All instruments are available under GSA Contract / Export prices slightly higher / Line (Mains) power: 115 Vac, 60 or 400 Hz, or 220 Vac, 50 Hz / Instruments available for no-charge evaluation. # SERIES 3600 FIXED RANGE • NOISE GENERATOR CARDS

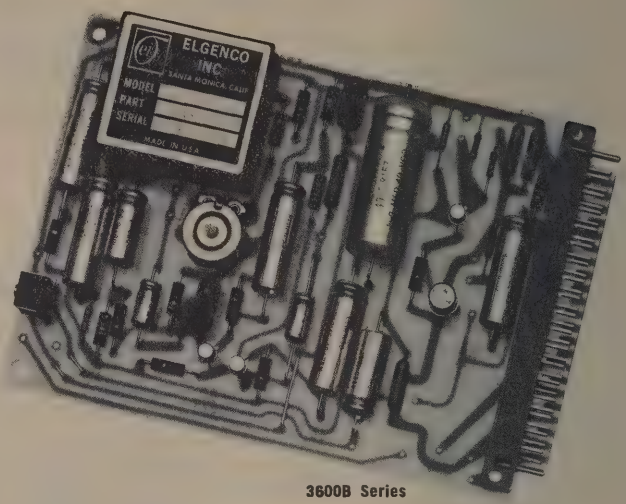
3600A Series



3600B Series

## SPECIFICATIONS

**FREQUENCY RANGE:** The frequency band may be any combination of the listed low and high frequencies.

**Lower Frequency:** 10, 20, 50, or 200 Hz, 5 kHz.

**Upper Frequency:** 20, 50, 100, 200, or 500 kHz; 1, 2, 3, or 5 mHz.

**SPECTRAL UNIFORMITY:** Spectral uniformities are available as:

| Upper Frequency | Spectral Uniformity |
|---|---|
| 20 kHz to 500 kHz | ±0.5, ±1.0, ±2.0 or ±3.0db |
| 1 mHz to 3 mHz | ±1.0, ±2.0, or ±3.0db |
| 5 mHz | ±2.0 or ±3.0db |

As a rule of thumb, the roll off above the specified upper frequency gives a 3db point about twice the specified upper frequency. Roll off above 3db point approaches 12db per octave.

**OUTPUT IMPEDANCE:**

20 kHz to 500 kHz units .....600 ohms
1 to 5 mHz units .....200 ohms

**POWER REQUIREMENTS:**

| | 3600A Series or 3600B Series | Low Current Option 3600A or 3600B | 3600C Series |
|---|---|---|---|
| Power supply voltage required ..... | −30 VDC ±1% | −30 VDC ±1% | −24 VDC ±1% |
| Approximate current.. | 50 ma | 30 ma | 37 ma |
| Open ckt. output level | 0 to 3.0 VRMS | 0 to 1.5 VRMS | 0 to 2.2 VRMS |

**Note:** The 3600B series units are the same as the 3600A series except the 3600B series have a test point and Elco 00-7023-035-000-001 connector mounted on the PCB.

The 3600A and 3600C units mate with a Cinch 250-22-30-170, Elco 00-6007-022-940-022 connector or equivalent.

**SPECIFICATIONS COMMON TO ALL UNITS:**

**Amplitude Probability Distribution:** Gaussian.

**Peak to RMS Capability:** Minimum dynamic ranges 3.5 to 1 at specified maximum level. Increases with lower output levels.

**Maximum Load:** 900 ohms minus output impedance.

**Operating Temperature Range:** 0 to 50°C.

**Size:** 4½ x 6½ x ⅞ inches.

**Weight:** 7 oz.

**PRICING:** (See price list on facing page)

**Base Price:** 3600A, 3600C and 3600A or C with reduced current option (specify on order).

**Base price plus $20.00:** 3600B or 3600B with reduced current option (specify on order).

**OPTIONS:**

Other than specified frequency; add $10.00 each per frequency per board.

Steel shield plate, ¼-inch off conductor side of PCB; add $12.50 each.

Other than specified output impedance, add $10.00 each.

To operate on other power supply voltages, voltage difference must be 30-volts for 3600A or 3600B and 24-volts for 3600C. Specify on order; "Decoupled option for operation on_____power supply," and add to price as:

| Quantity Per Order | Add Each | Quantity Per Order | Add Each |
|---|---|---|---|
| 1 | $17.00 | 25-49 | $3.00 |
| 2 | 12.00 | 50-99 | 2.50 |
| 3 | 9.00 | 100-249 | 2.30 |
| 4 | 7.50 | 250-499 | 2.10 |
| 5-9 | 6.00 | 500 up | 2.00 |

**DISCOUNT:** Quantity discounts apply as:

| Quantity | Discount | Quality | Discount |
|---|---|---|---|
| 1-4 | List | 20-49 | 13% |
| 5-9 | 5% | 50-99 | 17% |
| 10-19 | 10% | 100 | 20% |

# MODEL 3609A POWER SUPPLY CARD

**Size:** 4½" x 6½" x 2 1/16".

**Input:** 115/230 volts ± 10/20 volts, 50 to 1000 Hz.

Supplies power for up to 2 noise generator cards or up to 4 noise generator cards with reduced current option. Price: **$105.00**

**MATING CONNECTOR:** Mating Elco Connector; Elgenco, Inc. part numbers 7521-1122, for 3600A, 3600C and 3609A is available at $7.85 each.

# SERIES 1600 • ENCAPSULATED NOISE SOURCE MODULES • 10Hz TO 5MHz

## SPECIFICATIONS IN RECOMMENDED CIRCUIT:

The 1600 series provide a low level wide band output. A portion of this wide band is specified to a certain flatness; uniformity. The 3 or 5 millivolt output is for the whole band extending to 5 mHz. Specifications are for 25°C unless specified otherwise.

**SPECTRAL DENSITY UNIFORMITY:** Available with uniformity to ±½db, ±1db, ±2db, or ±3db and many frequency ranges within 10 Hz to 5 mHz. See price list for complete list of standards.

**SPECTRAL DENSITY:** Approximately 2 $\mu v/\sqrt{\text{Hz}}$ .

**RMS OUTPUT LEVEL:** 1602A series 3 mv; 1603A, 1606A, and 1607A series 5 mv.

**OUTPUT IMPEDANCE:** Approx 20 ohms.

**AMPLITUDE PROBABILITY DISTRIBUTION:** Gaussian.

**OPERATING TEMPERATURE RANGE:** 0 to 50°C.

**POWER REQUIREMENTS:** −30 volts dc ±1% at approximately 3.5 ma. **Note:** external passive components are required to properly install unit.

**MOUNTING:** .032" Printed Circuit Leads.

**Size:** 11/16" H x 1 51/64" W x 1 37/64" D.

**WEIGHT:** Approx 1.5 oz.

**NOTE:** A SERIES TO OPERATE ON −30VDC
C SERIES TO OPERATE ON −24VDC, PRICE SAME AS (A) SERIES

TO EXTEND 3607A LOW FREQUENCY ADD AS FOLLOWS:

200 Hz add $30.00 — 20 Hz add $60.00
50 Hz add $40.00 — 10 Hz add $95.00

# MODELS 602A-200/602A-1390/603A • ALL SOLID STATE NOISE GENERATORS 5 Hz TO 5 MHz

## SPECIFICATIONS:

**These specs are unique to the Series 602A-200, 602A-1390, 603A introduced on this page.**

**FREQUENCY RANGES:** 5 Hz to 20 kHz, 5 Hz to 500 kHz, 5 Hz to 5 mHz.

**AMPLITUDE PROBABILITY DISTRIBUTION:** Gaussian.

**OUTPUT SPECTRUM:**

| Accuracy | 602A-1390 | 602A-200 | 603A |
|---|---|---|---|
| 20 Hz to 20 kHz | ±1 db | ±1 db | — |
| 20 Hz to 500 kHz | ±3 db | ±2.5 db | — |
| 500 kHz to 5 mHz | ±8 db | ±5 db | — |
| 10 Hz to 500 kHz | — | — | ±1 db |
| 500 kHz to 5 mHz | — | — | ±3 db |

**RMS OUTPUT LEVEL:** (Minimum value of maximum open circuit output).

| | | | |
|---|---|---|---|
| 20 kHz range | 3 volts | 3 volts | 3 volts |
| 500 kHz range | 2 volts | 2.5 volts | 3 volts |
| 5 mHz range | 1 volt | 2.0 volts | 3 volts |

**OUTPUT IMPEDANCE:**

| | | | |
|---|---|---|---|
| | 900 ohms ±10% | 200 ohms ±10% | 200 ohms ±10% |

**MAXIMUM LOAD:** (on direct output)

| | | | |
|---|---|---|---|
| | no limit | 700 ohms | 700 ohms |

**OUTPUT STEP ATTENUATOR:** Five positions: X1.0, X0.1, X.01, X.001, and X.0001; calibrated to work into open circuit. Accuracy:

| | | | |
|---|---|---|---|
| to 100 kHz | ±3% | ±3% | — |
| to 500 kHz | — | — | ±3% |
| to 5 mHz | ±10% | ±10% | ±5% |
| Output Impedance | 200 ohms | 200 ohms | 200 ohms |
| | — | ±1% | ±1% |

**SPECTRAL DENSITY:** Approximate spectral density (mv $\sqrt{}$ Hz ) for 1 volt RMS output.

| | | | |
|---|---|---|---|
| 20 kHz band | 5.0 | 5.0 | 5.0 |
| 500 kHz band | 1.2 | 1.2 | 1.2 |
| 5 mHz band | 0.6 | 0.4 | 0.4 |

**PRICE**

| | | | |
|---|---|---|---|
| | $735.00 | $840.00 | $995.00 |

## SPECIFICATIONS • ALSO COMMON TO SERIES 624A

**These specs are common to the Series 602A-200, 602A-1390, 603A introduced on this page and the Series 624A on facing page.**

**DYNAMIC RANGE:** 3.5 to 1 peak to RMS at 3 volts RMS open circuit; 5 to 1 at 2.1 volts RMS. Dynamic range is inversly proportional to output level as set by front panel amplitude control.

**OUTPUT METER:** Rectifier type meter circuit reads proportional to average value, calibrated to read RMS value of Gaussian Noise; 0-5 volts RMS scale.

**OPERATING TEMPERATURE RANGE:** 0 to 50°C.

**POWER SUPPLY:** Built-in highly regulated dc supply.

**POWER REQUIREMENTS:** 115/230 volts ±10/20 volts, 50 to 1,000 Hertz ac; approximately 5 watts. A rechargeable battery option is available. Battery is recharged by operating unit on ac line.

**DIMENSIONS:** 5¼" high x 8⅝" wide x 11" deep.

**RACK MOUNT:** A rack mounting adapter kit is available for rack mounting two units side by side. Also available is a rack mounting adapter kit for rack mounting one unit. One or two units use 5¼" x 19" of rack panel space with adapter kit. Full rack width cabinet option for one unit is available. Size of unit with this option is 5¼" high x 17" wide x 11" deep and comes with rack mounting hardware.

**SHIPPING WEIGHT:** Approximately 12 lbs.

**OPTIONS AVAILABLE:** Full rack width cabinet with mounting hardware option; rechargeable battery option; BNC output terminal on rear panel option.

**ACCESSORIES AVAILABLE:** Dual adapter kit and rack mounting hardware; single unit adapter kit with rack mounting hardware and front and rear dummy panels; rechargeable battery adapter kit.

# OPTIONS & ACCESSORIES FOR MODELS 602A/603A/610A & SERIES 624A

Adapter kit, single unit rack mounting (mounts one unit in rack, includes blank panel to make dual unit) Part No. 8804-0002 ..... $130.00

Adapter kit, dual unit and rack mounting hardware (mounts two units side by side) Part No. 8804-0001 ..... $25.00

Full rack width cabinet and rack mounting hardware option....add $100.00

Pink filters, Part No. 8890-0015 ..... $105.00

Rechargeable battery option .....add $350.00

Rechargeable battery kit ..... $360.00

# SERIES 624A FIXED RANGE • ALL SOLID STATE NOISE GENERATORS

## SPECIFICATIONS • ALSO SEE FACING PAGE

**FREQUENCY RANGES:** See price list for a partial list of frequency ranges available.

**RMS OUTPUT LEVEL:** (Minimum value of maximum open circuit output) 3 volts.

**OUTPUT IMPEDANCE:** 200 ohms ±10%.

**MAXIMUM LOAD:** (on direct output) 700 ohms.

**OUTPUT STEP ATTENUATOR:** Five positions: X1.0, X0.1, X.01, X.001, and X.0001; calibrated to work into open circuit.

**Accuracy:** ±3%
**Output Impedance:** 200 ohms

**SPECTRAL DENSITY:** Approximate spectral density (mv$\sqrt{\text{Hz}}$) for 1 volt RMS output.

| Accuracy | mv | Accuracy | mv |
|---|---|---|---|
| 20 kHz band | 5.0 | 200 kHz band | 1.6 |
| 50 kHz band | 3.1 | 500 kHz band | 1.0 |
| 100 kHz band | 2.2 | | |

**AMPLITUDE PROBABILITY DISTRIBUTION:** Gaussian.

## SPECIFICATIONS FOR SERIES 624A

| | | |
|---|---|---|

DEPT. EM • HURRICANE, UTAH 84737 • (801) 635-4954

# MODEL 610A • ALL SOLID STATE NOISE GENERATOR • 5Hz TO 5MHz

## SPECIFICATIONS

**FREQUENCY RANGES:** Eight ranges selectably by front panel switch; 5 Hz to 2 kHz, 5 Hz to 5 kHz, 5 Hz to 20 kHz, 5 Hz to 50 kHz, 5 Hz to 200 kHz, 5 Hz to 500 kHz, 5 Hz to 2 mHz, and 5 Hz to 5 mHz.

**OUTPUT SPECTRUM:** Uniform to ±0.5 db from 10 Hz to 500 kHz and ±2.0 db from 500 kHz to 5 mHz.

**OUTPUT LEVEL:** 0 to 1 volt RMS, adjustable by front panel amplitude control. A dynamic range of 5 to 1 peak to RMS value is provided.

**OUTPUT STEP ATTENUATOR:** Five positions; X1.0, X0.1, X.01, X.001, X.0001. Accuracy ±0.1 db to 500 kHz; ±0.25 db to 5 mHz.

**SPECTRAL DENSITY:** Approximate spectral density for 1 volt RMS output.

| Band | volts/√ Hz | Band | volts/√ Hz |
|---|---|---|---|
| 2 kHz | $1.75 \times 10^{-2}$ | 200 kHz | $1.75 \times 10^{-3}$ |
| 5 kHz | $1.1 \times 10^{-2}$ | 500 kHz | $1.1 \times 10^{-3}$ |
| 20 kHz | $5.5 \times 10^{-3}$ | 2 mHz | $5.5 \times 10^{-4}$ |
| 50 kHz | $3.5 \times 10^{-3}$ | 5 mHz | $3 \times 10^{-4}$ |

**AMPLITUDE PROBABILITY DISTRIBUTION:** Symmetrical Gaussian Distribution all ranges.

**OUTPUT METER:** Meter reads 0 to 1 volt RMS. Accuracy ±2% of full scale to 2 mHz; ±5% to 5 mHz.

**MAXIMUM LOAD:** 500 ohms on direct output.

**OUTPUT IMPEDANCE:** Approximately 50 ohms direct output. Step attenuated output 50 ohms ±1%.

**POWER SUPPLY:** Built-in highly regulated dc supply.

**POWER REQUIREMENTS:** 115/230 volts ±10/20 volts, 50 to 1,000 Hertz ac; approximately 7 watts. A rechargeable power option is available. Battery is recharged by operating unit on ac line.

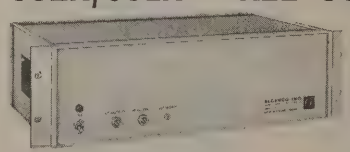
**DIMENSIONS:** 5¼" high x 8⅝" wide x 11" deep.

**RACK MOUNT:** A rack mounting adapter kit is available for rack mounting two units side by side. Also available is a rack mounting adapter kit for rack mounting one unit. One or two units use 5¼" x 19" of rack panel space with adapter kit. Full rack width cabinet option for one unit is available. Size of unit with this option is 5¼" high x 17" wide x 11" deep and comes with rack mounting hardware.

**SHIPPING WEIGHT:** Approximately 14 lbs.

**PRICE: $1935.00**

# MODELS 632A/631A • ALL SOLID STATE NOISE GENERATOR



**Model 632A** Dual Output DC to 400 Hz and 5 Hz to 40 kHz ..... **$3,955**

## LOW FREQUENCY OUTPUT

**AMPLITUDE PROBABILITY DISTRIBUTION:** Gaussian ±1.0%.
**OUTPUT SPECTRUM:** Uniform ±0.1 db from DC to 350 Hz.

**MAXIMUM OUTPUT:** 1.0 volts rms. A dynamic range of 5 to 1 peak to rms value is provided.

**MAXIMUM SPECTRAL DENSITY:** Approx. $1.5 \times 10^{-3}$ volts²/Hz.

**OUTPUT MEAN:** Less than 5 mv.

**OUTPUT IMPEDANCE:** Approximately 1,000 ohms.

## HIGH FREQUENCY OUTPUT

**AMPLITUDE PROBABILITY DISTRIBUTION:** Gaussian ±2%.

**OUTPUT SPECTRUM:** Uniform ±0.5 db from 10 to 35,000 Hz.

**MAXIMUM OUTPUT:** 1.0 volts rms. A dynamic range of 5 to 1 peak to rms values is provided.

**MAXIMUM SPECTRAL DENSITY:** Approx. $2 \times 10^{-5}$ volts²/Hz.

**OUTPUT MEAN:** Less than 1 mv.

**OUTPUT IMPEDANCE:** Approximately 100 ohms.

**NOISE REGULATOR:** rms output level continuously stabilized against a reference voltage.

**OVERLOAD INDICATOR:** Panel overload indicator lights when input noise level to regulator is out of regulation range.

**POWER:** 115/230 volts ±10/20 volts, 50 to 1,000 Hertz ac.

**DIMENSIONS:** 5¼" high x 17" wide x 11" deep. 19" wide with rack mounting flanges mounted (supplied).

**Model 631A** 5 Hz to 40 kHz ..... **$2,525**

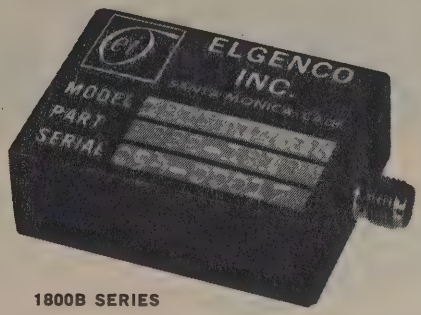
# SERIES 1800 • NOISE SOURCE MODULES • 10KHz TO 100MHz

1800A SERIES



1800B SERIES

## SPECIFICATIONS

The 1800 Series provides a low level wide band output. A portion of this band is specified to a certain flatness; uniformity. The approximate 6 mv open circuit output is for the whole band. The 1800B Series modules are the same as the 1800A series except the output is via a SMA connector. Specifications are for 25°C unless specified otherwise.

**SPECTRAL DENSITY UNIFORMITY:** Available with uniformity of ±0.5 db, ±1 db, ±2 db, ±3 db and ±4 db for many frequency ranges between lower frequencies of 10 kHz and 2 mHz and upper frequencies of 20 mHz, 30 mHz, 45 mHz, 50 mHz, 70 mHz, 80 mHz and 100 mHz.

**SPECTRAL DENSITY:** Approximately 0.3 $\mu$V per root Hz into 50 ohms.

**RMS OUTPUT LEVEL:** Approximately 3 mv rms into 50 ohms; 6 mv rms open circuit.

**OUTPUT IMPEDANCE:** Approximately 50 ohms.

**AMPLITUDE PROBABILITY DISTRIBUTION:** Gaussian.

**OPERATING TEMPERATURE RANGE:** 0 to 50°C.

**POWER REQUIREMENTS:** Model 1815, −15 VDC; Model 1818, −18 VDC; Model 1820, −20 VDC; Model 1822, −22 VDC; Model 1824, −24 VDC (well regulated power is required); current approximately 25 ma. Note: No external components are needed to properly install unit.

**MOUNTING:** .032" printed circuit leads.

**SIZE:** 1.60 x 1.30 x 0.65 inches.

**WEIGHT:** Approximately 1 oz.

**PRICING:**
**Base Price:** 1818A.
**Base Price plus $15.00:** 1818B.
**Base Price plus $20.00:** 1815A, 1820A, 1822A and 1824A.
**Base Price plus $35.00:** 1815B, 1820B, 1822B and 1824B.

## SERIES 1800 PRICES

| Model No. | Frequency Band | Price |
|---|---|---|
| 1818A-31427 | 10 kHz to 20 mHz, ±3 db | $229.00 |
| -21427 | 10 kHz to 20 mHz, ±2 db | $259.00 |
| -11427 | 10 kHz to 20 mHz, ±1 db | $369.00 |
| -51427 | 10 kHz to 20 mHz, ±0.5 db | $489.00 |
| 1818A-31437 | 10 kHz to 30 mHz, ±3 db | $239.00 |
| -21437 | 10 kHz to 30 mHz, ±2 db | $269.00 |
| -11437 | 10 kHz to 30 mHz, ±1 db | $389.00 |
| -51437 | 10 kHz to 30 mHz, ±0.5 db | $529.00 |
| 1818A-31447 | 10 kHz to 45 mHz, ±3 db | $269.00 |
| -21447 | 10 kHz to 45 mHz, ±2 db | $319.00 |
| -11447 | 10 kHz to 45 mHz, ±1 db | $489.00 |
| -51447 | 10 kHz to 45 mHz, ±0.5 db | $669.00 |
| 1818A-31457 | 10 kHz to 50 mHz, ±3 db | $319.00 |
| -21457 | 10 kHz to 50 mHz, ±2 db | $389.00 |
| -11457 | 10 kHz to 50 mHz, ±1 db | $539.00 |
| -51457 | 10 kHz to 50 mHz, ±0.5 db | $789.00 |
| 1818A-41477 | 10 kHz to 70 mHz, ±4 db | $319.00 |
| -31477 | 10 kHz to 70 mHz, ±3 db | $339.00 |
| -21477 | 10 kHz to 70 mHz, ±2 db | $409.00 |
| -11477 | 10 kHz to 70 mHz, ±1 db | $589.00 |
| 1818A-41487 | 10 kHz to 80 mHz, ±4 db | $339.00 |
| -31487 | 10 kHz to 80 mHz, ±3 db | $359.00 |
| -21487 | 10 kHz to 80 mHz, ±2 db | $439.00 |
| -11487 | 10 kHz to 80 mHz, ±1 db | $639.00 |
| 1818A-41418 | 10 kHz to 100 mHz, ±4 db | $369.00 |
| -31418 | 10 kHz to 100 mHz, ±3 db | $389.00 |
| -21418 | 10 kHz to 100 mHz, ±2 db | $489.00 |
| -11418 | 10 kHz to 100 mHz, ±1 db* | $779.00 |

Note: 1815 Series not available in 80 mHz and 100 mHz units.

| Model No. | Frequency Band | Price |
|---|---|---|
| 1818A-32627 | 2 mHz to 20 mHz, ±3 db | $179.00 |
| -22627 | 2 mHz to 20 mHz, ±2 db | $209.00 |
| -12627 | 2 mHz to 20 mHz, ±1 db | $319.00 |
| -52627 | 2 mHz to 20 mHz, ±0.5 db | $389.00 |
| 1818A-32637 | 2 mHz to 30 mHz, ±3 db | $189.00 |
| -22637 | 2 mHz to 30 mHz, ±2 db | $219.00 |
| -12637 | 2 mHz to 30 mHz, ±1 db | $339.00 |
| -52637 | 2 mHz to 30 mHz, ±0.5 db | $439.00 |
| 1818A-32647 | 2 mHz to 45 mHz, ±3 db | $219.00 |
| -22647 | 2 mHz to 45 mHz, ±2 db | $269.00 |
| -12647 | 2 mHz to 45 mHz, ±1 db | $439.00 |
| -52647 | 2 mHz to 45 mHz, ±0.5 db | $569.00 |
| 1818A-32657 | 2 mHz to 50 mHz, ±3 db | $269.00 |
| -22657 | 2 mHz to 50 mHz, ±2 db | $339.00 |
| -12657 | 2 mHz to 50 mHz, ±1 db | $489.00 |
| -52657 | 2 mHz to 50 mHz, ±0.5 db | $689.00 |
| 1818A-42677 | 2 mHz to 70 mHz, ±4 db | $269.00 |
| -32677 | 2 mHz to 70 mHz, ±3 db | $289.00 |
| -22677 | 2 mHz to 70 mHz, ±2 db | $359.00 |
| -12677 | 2 mHz to 70 mHz, ±1 db | $539.00 |
| 1818A-42687 | 2 mHz to 80 mHz, ±4 db | $289.00 |
| -32687 | 2 mHz to 80 mHz, ±3 db | $309.00 |
| -22687 | 2 mHz to 80 mHz, ±2 db | $389.00 |
| -12687 | 2 mHz to 80 mHz, ±1 db | $589.00 |
| 1818A-42618 | 2 mHz to 100 mHz, ±4 db | $319.00 |
| -32618 | 2 mHz to 100 mHz, ±3 db | $339.00 |
| -22618 | 2 mHz to 100 mHz, ±2 db | $439.00 |
| -12618 | 2 mHz to 100 mHz, ±1 db* | $729.00 |

*Available 1800B Series only.

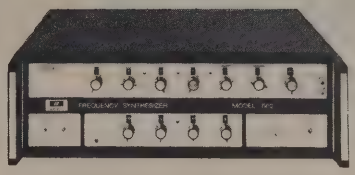
# SIGNAL SOURCES FROM EXACT

From periods as low as 11.4 years to frequencies as high as 20 MHz, Exact supplies a complete line of analog and digitally synthesized function generators and frequency synthesizers.



## FUNCTION GENERATORS

**SERIES 500 and 510**
5 MHz and 11 MHz Function Generators featuring gate, trigger, sweep.
Model 508 – 5 decade log sweep.
Model 519 – AM/FM

**SERIES 7200**
20 MHz Function Generators Provides features necessary for precision laboratory use. Pulse modes, sweep, gate, burst. 30 V P-P output.

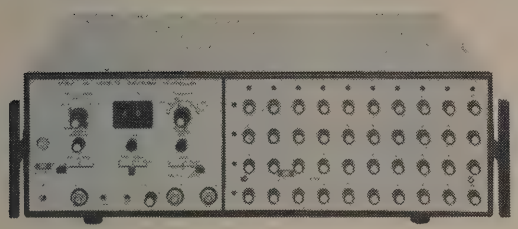
**SERIES 117/119/121**
Sine, square, triangle, ramp, pulse and sweep.
02 Hz to 2.2 MHz 20 Volts P-P.

**MODEL 605**
Programmable Waveform Generator. Remote programming of frequency, amplitude, waveform and mode. IEEE 488 option.

## SYNTHESIZERS

**SERIES 800**
20 MHz Frequency Synthesizers featuring 10 PPM stability, constant dial resolution, optional BCD or ASCII programming and all plug-in card construction. Output up to +26 dBm into 50 Ohms.

## DEDICATED SPECIAL PURPOSE GENERATORS



**COMPLEX WAVEFORM SYNTHESIZER**
**MODEL 202/20**
Build your own waveform from 40 descrete steps.

**MATERIALS TESTING GENERATORS**
**MODEL 340**
Periods from 1 mSec. to 99,900 Hrs. Plug-in expandable for dual rate and variable phase waveforms. Remote programmable.

**VARIABLE PHASE GENERATOR**
**MODEL 337**
Set phase lead angle with .2° resolution from 0° to 360°.

**MODEL 336**
Dual rate, adjustable breakpoint, adjustable hold time.

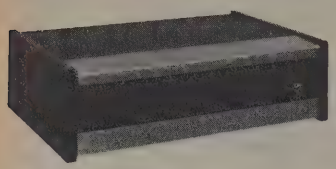
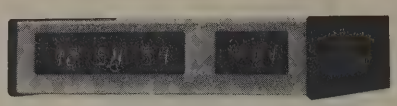
# ESE DIGITALS



## DIGITAL CLOCK ES 112/124 ($139)

ES 112 (12 hr.) and ES 124 (24 hr.) are solid state, six digit clocks. Three simple controls make setting to the precise second easy: Fast Advance, Slow Advance, Hold. Can drive Jumbo Slaves.
**Dimensions:** 2½" High x 8" Wide x 5-5/8" Deep
**Case:** Etched Aluminum
**Electrical:** 117V AC 50/60 Hz 10W max.
**Options:** B C D J K L P Q R S W

Do you need a contact closure one or more times during the hour? Many ESE clocks can be equipped to generate a time pulse. Contact factory for pricing.



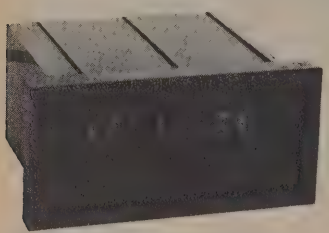
## DIGITAL CLOCK THERMOMETER ES 142/144 ($241)

ES 142 (12 hr.) and ES 144 (24 hr.) are MOS, solid state digital clock/thermometers. Displays 6 digits of time (hours, minutes, seconds) and 3 digits of temperature (-50°F to +150°F or -45°C to +66°C) in planar, gas discharge displays .55" high. Temperature sensor on 25 ft. cable included; attaches to rear-mounted connector.

ES 240 Digital thermometer is available as separate unit, calibrated for °F or °C.
**Dimensions:** 2½" High x 10" Wide x 6" Deep
**Electrical:** 12W max. 117V AC 60 Hz
**Options:** B C D J K P R S W

## SIX DIGIT CLOCK TIMER ES 500 ($160)

ES 500 is a 12 hour clock or timer with 5 front-mounted controls: Start, Stop, Reset, Fast Advance, Slow Advance. Will run continuously to 12:59:59. Advances to 1:00:00 and continues as clock unless stopped or advanced. After use as a timer, time of day must be re-established. Can drive Jumbo Slaves.
**Dimensions:** 2½" High x 8" Wide x 5-5/8" Deep
**Case:** Etched Aluminum
**Electrical:** 117V AC 60 Hz 12W max.
**Options:** B C D J K P Q R S W



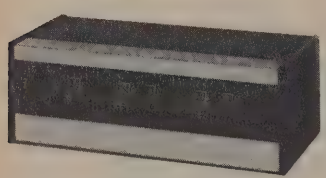
## CONSOLE MOUNT CLOCKS AND TIMERS, 70 SERIES

All units have access to control inputs on rear-mounted connector. Displays are .3" red LED's.

**ES 172 Six Digit, 12 Hour Clock ($134.00):** Three setting controls—Fast Advance, Slow Advance, and Hold. Four line multiplexed BCD's present on the rear connector. Options are C, D, J, M and V.
**ES 174 Six Digit, 24 Hour Clock** ($134.00): Otherwise identical to the ES 172.
**ES 370 Four-Digit, One Hundred Minute Up/Down Timer** ($171.00): Six controls—Count Up, Count Down, Stop, Minutes Advance, Seconds Advance, Reset. Options are B, C, D, J, M and V.
**ES 371 Up/Down Timer** ($267.00): Similar to the ES 370 except with Leverwheel Preset capability for faster setting of the desired time. Option D is an ingegral, separately mounted part of this unit. Options are C, J, and V.

**ES 570 Four Digit, Sixty or 100 Minute Timer** ($134.00): Select 60 or 100 minute mode on rear connector. Start, Stop and Reset controls. Runs continuously unless stopped. Reset will return all displays to zero. Unit will run if reset while running or will stay at zero if reset when stopped. Options are B, C, D, J, M and V.
**ES 572 Six Digit, 12 Hour Clock or Timer** ($160.00): Five controls—Start, Stop, Reset, Fast Advance, Slow Advance. Will run continuously to 12:59:59. Advances to 1:00:00 and continues as clock unless stopped or advanced. After use as a timer, time of day must be re-established using Fast Advance, Slow Advance and Stop Controls. Options are C, D, J, M and V.
**ES 574** ($160.00): A 24 hour version of ES 572.

**Dimensions:** 2.16" High x 4.5" Wide x 4.13" Deep
**Electrical:** 117V AC, 60 Hz



## JUMBO CLOCKS AND TIMERS, 80 SERIES

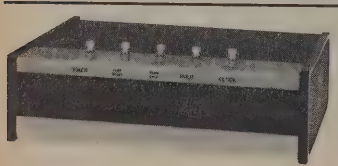
Displays are 1" planar gas discharge.

**ES 182 Six Digit, 12 Hour Clock** ($230.00): Three rear-mounted setting controls—Fast Advance, Slow Advance and Hold. Options are B, C, D, J, P, Q, R, S, and W. When option Q, panel mount, is specified digits will be separated by colons.
**ES 184 Six Digit, 24 Hour Clock** ($230.00): Otherwise identical to the ES 182.
**ES 380 Four Digit, 100 Minute Up/Down Timer** ($267.00): Displays minutes and seconds, with rear-mounted connector to allow remote wiring of six momentary SPST controls—Count Up, Count Down, Stop, Minutes Advance, Seconds Advance and Reset. Other features similar to ES 300. Options are B, C, D, J, N, P, Q, S, T, W, Y, and Z.
**ES 381 Up/Down Timer** :$353.00): Similar to ES 380, except that leverwheel preset is used instead of pushbutton preset. Option D is supplied as part of this unit. Options are B, C, J, N, P, Q, S, T, W Y, and Z.

**ES 580 Four Digit, 60 Minute Timer** ($193.00): Displays minutes and seconds. Rear connector allows remote wiring of three momentary SPST controls—Start, Stop and Reset. Runs continuously unless stopped. Reset returns all displays to zero; and timer will continue to run from zero if reset while running. Options are B, C, D, J, P, Q, S, T, and W.
**ES 582 Six Digit, 12 Hour Clock or Timer** ($267.00): Five control inputs (SPST momentary) brought to rear connector—Start, Stop, Reset, Fast Advance and Slow Advance. After use as a timer, time of day must be re-established using Fast Advance, Slow Advance and Stop controls. Options are B, C, D, J, P, Q, S, and W.

80 Series slaves are also compatible with other ESE clocks and timers: ES 112/124, 300, 301, 302, 400, 510, and 500.

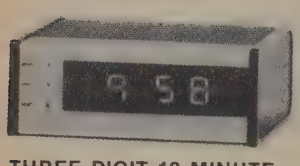
**Dimensions:** 4.45" High x 10.38" Wide x 6.58" Deep
**Electrical:** 117V AC, 60 Hz



## ES 512/524 FOUR DIGIT CLOCK TIMER WITH MEMORY ($200)

Combination four digit 12 or 24 hour clock and 60 minute timer with memory, allowing the user to set the clock to the correct time of day, switch to timer mode, then switch back to time of day by pushing one button; time of day will be correctly displayed, in hours and minutes.

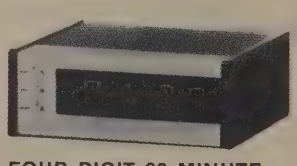
**Electrical:** 117V AC, 60 Hz, 8 watts Max.
**Mechanical:** 8" Wide x 2-3/4" High x 5-5/8" Deep.
**Case:** Etched Aluminum.
**Display:** Four digits of .55" Planar Gas Discharge Display.
**Options:** B, C, D, J, P, Q, R & W.



## THREE DIGIT 10 MINUTE TIMER ES 400 ($105)

The ES 400 has three controls—Start, Stop, Reset. Runs continuously unless stopped. Reset returns display to all zeros. Can be reset while running or stopped. If reset while running, timer will continue to run. Can drive Jumbo Slaves.

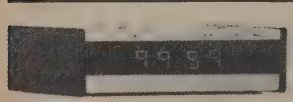
**Dimensions:** 2½" High x 6" Wide x 5-5/8" Deep
**Case:** Etched Aluminum
**Electrical:** 117V AC 60 Hz 8W max.
**Options:** B D J K P Q R S T W



## FOUR DIGIT 60 MINUTE TIMER ES 510 ($134)

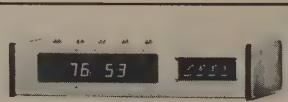
ES 510 is a four digit, sixty minute timer (59:59) with Start, Stop and Reset controls (Single pole, momentary, push-button). Runs continuously unless stopped. Reset returns display to all zeros. Can reset while running or stopped. Can drive Jumbo Slaves.

**Dimensions:** 2½" High x 6" Wide x 5-5/8" Deep
**Case:** Etched Aluminum
**Electrical:** 117V AC 60 Hz 10W max.
**Options:** B D J K P Q R S T W



## ES 300 ($180)

## ES 301 ($198)



## ES 302 ($254)

## 100 MINUTE UP/DOWN TIMERS

ES 300 is a four digit, one hundred minute timer (99:59) with six controls: Count Up, Count Down, Stop, Minutes Advance, Seconds Advance, Reset. Controls are single pole, momentary, push-button switches. When "Stop" control is pressed the four digit display is held. Counting direction (up or down) can be changed or time can be reset for zero without stopping the count. It will continue to register elapsed time beyond the zero setting unless stopped. The ES 300 can drive Jumbo Slaves.

**Dimensions:** 2½" High x 8" Wide x 5-5/8" Deep
**Electrical:** 117V AC 60 Hz 10W max.
**Options:** B D J K P Q R S W Y Z

The ES-302 is similar to the ES 300, except that planar gas discharge displays are used in the ES 301-302. Display height is .55".
All the ES 300 features are included in the ES 301. Additionally, with the ES 302, the user can preset times much faster than with the ES 300 or ES 301, because lever-wheel type switches are used for the preset feature. The ES 301-302 can drive Jumbo Slaves.

**Dimensions:** ES 301: 2½" High x 8" Wide x 6" Deep
ES 302: 2½" High x 10" Wide x 6" Deep
**Electrical:** 117V AC 60 Hz, 7 W max.
**Options:** 301—B D J K N P Q R S T W Y Z
302—B D J K N P R S T W Y Z

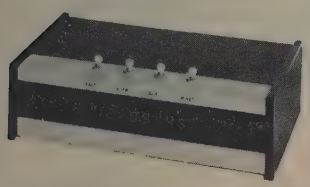
# Perfect Timing

## PROGRAMMER/ COMPARATORS 750 SERIES

For flexibility and economy with up to ten events ESE has designed the 750 Series of Programmer/Comparators. Rugged thumbwheel programmers coupled with an ESE clock or timer to provide single pole form A contact closure (1 Amp contact rating) for the length of time program matches display. All this on a 3½" high 19" relay rack mounting panel. Power required: 117V AC 60 Hz; 220V AC 50 Hz may be specified.

If required control function involves a count other than timing, these products can be adapted to your needs.

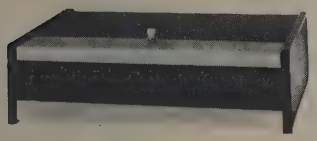
**Thumbwheel Comparator Systems:**
**ES 750**—ES 112 and one 6 Digit Program
**ES 751**—ES 124 and one 6 Digit Program
**ES 752**—ES 500 and one 6 Digit Program
**ES 753**—ES 112 and two 4 Digit Programs
**ES 754**—ES 124 and two 4 Digit Programs
**ES 755**—ES 500 and two 4 Digit Programs
**ES 756**—ES 510 and one 4 Digit Program
**ES 757**— ES 300 and one 4 Digit Program
**ES 758**—ES 510 and two 4 Digit Programs
**ES 759**—ES 300 and two 4 Digit Programs



## ES 1296 ($150)

For Off-Air taping, or operating tape recorders when nobody is there, ESE has created **ES 1296**. Presets up to 96 hrs. ahead.
**ES 1296** is a six digit, twelve hour clock with LED displays and a programmable, 300 watt, 117V AC outlet on the rear.
Once the rear outlet is activated, it will remain on for 66 minutes, unless manually terminated, or an optional Record Duration switch is set to a different time interval. This Record Duration option allows the user to select one of four time intervals for recording. These four time intervals are either 16, 33, 66 and 138 minutes, or 33, 66, 138 and 250 minutes. Price $25.00.

An additional option is Sequential Turn-on, for those machines that require Power, Play, Record in sequence, for proper operation. This option costs $25.00.



## ES-251 ($250)

**ES 251 SMPTE Time Code Reader** ES 251 is a six digit SMPTE Time Code Reader displaying Hours, Minutes and Seconds. Receives the standard SMPTE Time Code through rear mounted BNC connector, converts it into six digits of clock time. Source of the code is normally a SMPTE time code generator but the unit will read the time code directly from a tape machine running at playback speed. This unit produces an extremely accurate time of day display when driven from a time code generator which is locked to a color sub-carrier frequency. The momentary hold switch allows holding of time on display. Releasing hold switch updates display to correct time.

The input code is AC coupled to two stages of amplification and level shifting to obtain a ground reference. The input circuit requires between 1 and 20 volts peak to peak of input signal and presents an input impedance of 50 Kohm. **ES 251** is a CMOS design which operates from a single power supply.
**Dimensions:** Aluminum Case 2¾" High x 8" Wide x 5-5/8" Deep.
**Electrical:** 117V AC 50/60 Hz 6W Max.
**Options:** BJPQW

**ES 252 SMPTE Time Code Reader:** Exactly like **ES 251**, but displays Minutes, Seconds and Frames.

## MASTER CLOCKS

**ES 160** ($750.00): Mounted in a 5¼" relay rack panel and chassis, displays six digits of time information on large, easy to read .3" LED displays, in 12 or 24 hour format, as specified. **ES 160** has its own internal timebase, with three second per month accuracy. Its standard output is serial BCD, CMOS compatible, and can drive 20 **ES 161, 166, 168** or **171** Remote Displays without buffering. All inputs and outputs are through rear-mounted connectors.
**Dimensions:** 5¼" High x 19" Wide x 15" Deep
**Electrical:** 117V AC 50/60 Hz.
**Options:** B (CMOS Compatible), J, One PPS Output, Relay Closure on hour and half hour, Battery/Charger (ES 163) Impulse Driver (ES 162), External Timebase-1, 5 or 10 MHz.
**ES 160/1** ($900.00): One second per month version of **ES 160**
**ES 190** ($900.00): The ultimate in accuracy! A digital clock, similar to **ES 160**, with special circuits for receiving and decoding a 1000 Hz tone at the start of each minute. The decoder output resets the seconds' counters in the clock each minute except the first minute of every hour, when a 1500 Hz tone occurs. These tones are transmitted by Radio Station WWV, with an oscillator accuracy of $\pm 1$ part in $10^{11}$ **ES 190** has an antenna and internal WWV receiver with audio-output. Its crystal timebase is accurate to $\pm 1.7$ seconds per day, used when WWV is not received. A battery and charger (ES 163) is available to protect against power interruptions. Displays are .3" red LED's. Serial output drives **ES 161, 166, 168** or **171** Slaves.
**Dimensions:** 5¼" High x 19" Wide x 15" Deep
**Electrical:** 117V AC 50/60 Hz
**Options:** B (CMOS compatible), J, One PPS Output, Relay Closure on hour and ½ hour, Battery/Charger (ES 163)
**ES192/194** ($275.00): The most economical Masters, **ES 192** (12 Hr) and **ES 194** (24 Hr) are constructed using **ES 112** or **ES 124** digital clocks and adding the **ES 167** Serial Time Code Generator to provide the output needed to drive Remote Serial Displays **ES 161, ES 166, ES 168** and **ES 171**. 60 Hz timebase is derived from the power line. Displays are .6" incandescent type.
**Dimensions:** 2½" High x 8" Wide x 5-5/8" Deep.
**Electrical:** 117V AC 60 Hz
**Options:** BCDJLPQR, Time Pulse Outputs, Battery and Charger, Impulse Driver. Unit mounted on a 3½" High panel when certain options are specified.
**ES 196** ($650.00): Time and Temperature Master—Basically the same as **ES 192**, with gas discharge displays, panel mounting and separate serial BCD outputs for time and temperature. Displays either 12 or 24 hours and °F or °C, as specified.
**Dimensions:** 3½" High x 19" Wide x 8" Deep
**Electrical:** 117V AC 60 Hz
**Options:** BCDJR, Time Pulse Outputs, Battery/Charger.

## ACCESSORIES

**ES 161 Remote Digital Display** ($140.00): Designed to function with any ESE Master Clock, decodes serial time data and displays six digits of clock time on large .55" Gas Discharge Displays, in either 12 or 24 hour format as specified.
**Dimensions:** 8" Wide x 2½" High x 6" Deep.
**Electrical:** 117V AC 50/60 Hz.
**Options:** JPQW.
**ES 162 Impulse Driver** ($170.00): Plugs into the **ES 160** chassis, can drive 20 Impulse Clocks. Designed so that, if power fails, impulse always comes on with the same polarity when power is restored. Drives minute or second clocks as specified.
**ES 163 Battery and Charger** ($140.00): Plugs into the **ES 160** or **ES** 190 chassis. Fast charge, 12 hours continuous use. When operating on battery, displays are automatically blanked and may be viewed by actuating Display button on the front panel.
**ES 164 Remote Digital Impulse Display** ($170.00): Similar to the **ES 161** except that the **ES 164** derives its count command from the **ES 162** Impulse Driver, or any impulse clock drive circuits already installed. Choice of 12 or 24 hour display and available either as desk top unit or panel mounted.
**Dimensions:** 8" Wide x 2½" High x 6" Deep.
**Electrical:** 117V AC 50/60 Hz.
**Options:** BJPQW.
**ES 166 Jumbo 1" Clock Display** ($215.00): Features six digits of one inch high planar gas discharge displays in 12 or 24 hour format as specified. Receives serial time code input from any ESE Master Clock or serial time code generator.
**Dimensions:** 10½" Wide x 4½" High x 6½" Deep.
**Electrical:** 117V AC 50/60 Hz.
**Options:** JPQW. If Q is ordered digits are separated by colons.
**ES 167 Serial Time Code Generator** ($125.00): Offers a low cost answer to a master timing system. An integral part of **ES 160, 190, 192/194** and **196** Master Clocks, this unit can be added to many other ESE products, including **ES 112, 124, 182, 184, 500, 582, 750, 751, 752, 753, 754, 755,** and all **780** Series Time Programmers. The **ES 167** fits inside the case so that no extra space is needed. Drives 20 **ES 161, 166, 168** or **171** Remote Displays. **ES 167** provides CMOS compatible serial BCD output and operates from the logic supply voltage.
**ES 168 Remote Electromagnetic Display** ($388.00): 4" HEIGHT! Used wherever large size at low cost is essential. Receives the serial time code from any ESE Master Clock, displays the time on four bright, yellow-green digits in 12 or 24 hour format as specified. Designed to mount on wall or ceiling. When time changes, audible "click" is heard
**Dimensions:** 6" High x 16½" Wide x 6" Deep.
**Electrical:** 117V AC 50/60 Hz.
**Options:** JW
**ES 169 Temperature Slave** ($125.00): Receives serial BCD temperature code from **ES 196**, displays it on .55" Gas Discharge Displays.
**Dimensions:** 8" Wide x 2½" High x 6" Deep.
**Electrical:** 117V AC 50/60 Hz.
**Options:** JPQW.
**ES 171 Console Mount Display** ($134.00): Newest of the 70 series console mount clocks and timers, **ES 171** receives the serial time code generated by any ESE Master Clock, or any ESE product containing the **ES 167** serial time code generator, and displays it on bright red .3" LED's.
**Dimensions:** 2¼" High x 4½" Wide x 4" Deep.
**Case:** High Impact Black Plastic.
**Electrical:** 117V AC 50/60 Hz.
**Options:** JW.

## RAM TIME PROGRAMMERS 780 SERIES

The ES 780 Series Programmers provide 32 events (expandable to 96) in 5¼ inches of rack space. Ten minutes is all that is required to install, set the clock and program 32 events. Bright .3" LED displays and all controls are on the front panel, outputs and battery test are on the rear. ES 167 Serial Time Code Outputs can be specified as an option. Line frequency time base with backup crystal time base, 72 hour battery/battery charger are standard. External time base can be used. 60 Hz is preferred, others may require additional internal circuitry.

**Eight Digits of Programming Capability:**
**ES 780**—10 Days, 10 Outputs, Hours, Minutes, Seconds
**ES 781**—100 Days, Hours, Minutes, Seconds
**ES 782**—16 Outputs, Hours, Minutes, Seconds
**Six Digits of Programming Capability:**
**ES 783**—Hours, Minutes, Seconds
**ES 784**—100 Days, Hours, Minutes
**ES 785**—100 Days, Minutes, Seconds
**ES 786**—16 Outputs, Hours, Minutes
**ES 787**—16 Outputs, Minutes, Seconds
**Four Digits of Programming Capability:**
**ES 788**—Hours, Minutes
**ES 789**—Minutes, Seconds

ES 782, 786, and 787 have 16 isolated outputs. Any of the 32 events can be programmed to activate any of the 16 outputs. ES 780 has 10 outputs. The other units have a single output.
ES 784, 786, and 788 have a one minute contact closure. The others have a one second contact closure.
**Displays:**
REAL TIME: An eight digit display when day selection is required as on the ES 781, 784, 785, seven digits for ES 780, and six digits for the others.
NEXT EVENT: A two digit display of next event number.
NEXT EVENT TIME: An eight digit display when ES 780, 781, or 782 is specified, a six digit display when ES 783, 784, 785, 786, or 787 is specified, and a four digit display when ES 788 or 789 is specified.
**Dimensions:** 5¼" high x 19" wide x 10" deep.
**Weight:** Approx. 20 lbs. varying with model number.
**Front Panel:** Brushed, etched, anodized aluminum.

## OPTIONS

**Please Note: Some combinations of options are not compatible. Consult factory if in doubt.**

**B BCD Output**
**C Crystal Timebase:** A $\pm .002\%$ crystal is employed in an oscillator for those applications requiring independence from the power line frequency. Trimmer included for greater accuracy.
**D Remote Connector, 6' Cable and Control Switch Set:** This option consists of a rear-mounted connector wired for all control functions, a mating connector, wired to six feet of cable, the other end of which is connected to control switches which are mounted on a 1/8" anodized satin finish aluminum plate suitable for mounting on most surfaces.
**L .55" Planar Gas Discharge Display**
**M Front-mounted pushbutton controls:** available on 70 Series except for ES 371.
**N Available on ES 301, 302, 380, 381.** Provides a change in count direction from down to up at zero when the unit has been counting down from a preset time.
**P 19" Front Panel,** 3½" high.
**Q 9" Front Panel,** 3½" high.
**R Remote Connector**
**S Slave/Remote Display:** User must specify option B (BCD Output) on master when ordering a slave.
**T Tenths of Seconds**
**V DC Operation** (Includes crystal timebase)
**W Three Wire Cord**
**Y Relay Closure at Zero:** Available on ES 300, 301, 302, 380 and 381 only.
**Z Relay Contact Closure and Stop at Zero:** Available on ES 300, 301, 302, 380 and 381 only.

## 3½ DIGIT VOLTMETERS

### 8020A

- 26 ranges, 7 functions
- New conductance function
- Extensive overload protection
- LCD readout, 200-hour battery life
- Complete with 9V battery and leads

Many features set the new 8020A apart as a truly exceptional DMM. Twenty-six ranges and 7 functions include measuring capability up to 1000V dc, 750V ac, 2A ac/dc, 20 MΩ, and hi/lo ohms for in-circuit resistance and diode test capability. Unique conductance function allows resistance and leakage measurements up to 10,000 MΩ, a must for circuit board and component testing. Readout is in Siemens (S).

### 8920A, 8921A

These broadband True RMS DVM's read the True RMS values of non-sinusoidal inputs. AC and AC+DC are measured over a frequency range of 10 Hz to 20 MHz with 0.5% mid-band accuracy. Ranging is fully automatic or manual, spanning 7 decades for voltages from 180 μV to 700V. Readout is in voltage or dB. In dB mode, any input voltage may be selected as a reference for future readings in dB.

Twelve user-selectable impedances are referenced to 0 dBm, 1 mW: 50Ω, 75Ω, 93Ω, 110Ω, 124Ω, 135Ω, 150Ω, 300Ω, 600Ω, 900Ω, 1000Ω and 1200Ω. BNC input, Model 8920A; banana jack input, Model 8921A. Logarithmic analog output is optional on the 8920A. Frequency counter output is optional on both the 8920A and 8921A.

### 8000A

- 26 ranges of ac/dc voltage, current and resistance in basic DMM
- Calibrate X-Ray Tubes with mAs option
- Full scale 2Ω and 20Ω ranges with Lo Ohms option
- Optional current to 20A
- Analog meter option for peaking/dipping measurements

Versatile 8000A family of DMM's offers a wide range of measurement capability. Basic 8000A is 5 functions and 26 ranges for ac/dc volts, current, and resistance. Model 8000A-05 extends current capability to 20A. Lo Ohms option 8000A-06 features added resolution to 0.001Ω in two added low-end ranges. Model 8000A/MAS adds a mA-sec function for direct calibration of x-ray tubes in 5 ranges to 200 μA sec. Analog DMM 8000A/MTR includes a front panel meter for peaking and dipping measurements. Rechargeable NiCad batteries and digital output are available for most models.

### 8030A

- Measures ac/dc volts, ac/dc current, resistance
- True RMS on all ac functions
- Diode test, in-circuit resistance measurements
- Overload protection on all functions

Handheld 8030A features True RMS conversion technique for high accuracy in the presence of noise or when measuring distorted waveforms. One range for diode test and 5 ranges for each of the other functions. Field-durable, shock-resistant mechanical design incorporates disposable alkaline batteries with choice of 100V, 115V, or 230V ac battery eliminator/charger. Optional rechargeable NiCad battery pack.

## 4½-DIGIT VOLTMETERS

### 8040A

The 8040A 5-function DMM features the capabilities of more sophisticated bench multimeters while retaining the size of a handheld VOM. A total of 26 ranges provides 5 each for ac/dc volts and ac/dc current and 6 for resistance. For optimum accuracy on ac measurements, True RMS conversion is used. Ranging is switch selectable as well as automatic. The 8040A uses disposable alkaline batteries and includes a battery eliminator for ac line operation.

### 8600A

The 8600A includes a 4½-digit LED readout featuring five ranges of dc volts, five ranges of ac volts, five ranges of dc current, five ranges of ac current, and six ranges of resistance. Autorange and autozero are standard. Options include rechargeable batteries and isolated data output.

### 8200A

The 8200A four range dc DVM easily expands into a 400 readings per second systems multimeter by installing a family of plug-in options. Standard features of the basic instrument include 60% overrange, switched filter for assured broadband noise rejection, all push button selection, autoranging, polarity selection and display, and full guarding.

### 8125A

The Model 8125A is a compact, militarized 4½-digit DMM designed to meet MIL-T-28800B, Type II, Class 2, Style A requirements for rugged field applications, where reliability and long-term accuracy are essential.

### SPECIFICATIONS AND OPTIONS

(1) 10 mV and 100 mV optional. (2) Optional. (3) Disposable battery with battery eliminator standard.

## 5½-DIGIT VOLTMETERS

### 8502A, 8500A

The bus-structured 8502A DMM provides equal benefits to the systems designer and to the bench top user. Measurement performance is the same for bench use as well as when programmed as part of a sophisticated measurement system.

The 8502A offers five ranges of dc with a resolution of ±1 μV and ±1200V maximum. Mid-range basic dc accuracy is 6 ppm for 30 days at 23°C ±5°C. The DMM includes autoranging, dc/dc ratio, pushbutton dc and ohms zero, and a unique offset feature which allows measurement of deviations from any stored value. Measured values may be scaled by a prestored factor or may be both scaled and offset at the same time. High/low limits may be stored for pass-fail operation. Peak memories save minimum and maximum readout values. Calibration memory option allows recalibration of the DMM from the front panel in about 10 minutes.

The 8500A is similar to the 8502A except it does not have as extensive front panel control. All other 8502A capabilities apply to the 8500A when controlled remotely. The 8500A should be considered when needs are primarily for systems applications.

### 8810A, 8800A

The 8810A is a configurable, precision, 5½-digit DMM based upon a lab quality dc voltage mainframe. It is similar to the popular 8800A DMM with the addition of a new plug-in True RMS ac option plus plug-in convenience for average-responding ac, resistance, and data output options which can be specified at time of purchase or added in the field at any time.

The 8810A and 8800A feature 15 ranges including five dc, four ac, and six resistance. Isolated 4-terminal ohms measurements are provided on all ranges. Dual-slope integration, full guarding, and complete power line isolation assure superior noise rejection without sacrificing measurement speed. All functions and ranges are fully protected against accidental overloads. These compact DMM's measure just 3.5 by 9 by 12 inches.

### 8375A

The 8375A 5½-digit multimeter combines highly accurate measurement of dc volts, True RMS ac volts, and resistance with a unique self-test feature that permits a rapid check of all measurement functions. A powerful set of field-installable systems options include data output, remote control, and external dc reference.

## 8400A

The 8400A's outstanding accuracy is complemented by versatile functional capabilities. DC voltages are measured on five ranges with resolution to 1 microvolt. Overrange is 20% on all ranges except on the ±1000V range. 1100V can be applied to any voltage range without damaging the unit.

The basic DVM accepts a family of rugged plug-in option cards for ac volts, resistance, dc/dc ratio, True RMS volts, data output and remote control.

## 8300A

The 8300A offers five full decades of digits plus a 6th digit for 20% overrange. Its mainframe will accept options in any sequence for expansion from a bench DVM into a bench or systems multimeter.

The basic instrument offers 3 ranges of dc voltage measuring capability including autorange, autopolarity, and switchable active filtering.

## 80T-150 TEMPERATURE PROBE

- Converts dc voltmeters and stripchart recorders to thermometers
- Wide temperature range — 50°C to +150°C or −58°F to +302°F
- Reads out directly in degrees, (1 mV dc/°)
- 350V standoff allows measurement in live electrical circuits
- Fast responding, low thermal mass

**Accuracy** (including 0.25% DMM error): ±1°C (1.8°F) 0°C to 100°C.
**Input R** ≤ 1 MΩ preferred, to 100 kΩ with additional error.
**Power** Internal disposable battery, 1000 hours continuous.

## 80K-40 GENERAL PURPOSE HIGH VOLTAGE PROBE

The 80K-40 is a handheld probe for general purpose HV measurements up to 40 kV. Accuracy and stability of the 1000:1 division ratio is ensured by special metal film resistors having matched temperature coefficients. This unique probe offers an unusually high input impedance to minimize loading of the circuit under test.

**(80 K-40) Voltage Range** 1 kV to 40 kV
**Input Resistance** 1000 MΩ
**Division Ratio** 1000:1
**Overall Accuracy** 20 kV to 30 kV ±2% (Calibrated 1% at 25 kV).
**Upper Limit** Changes Linearly from 2% at 30 kV to 4% at 40 kV.

## 80J-10 CURRENT SHUNT

The 80J-10 is for use with any sensitive ac or dc voltmeter having ¾-inch spaced banana jack input connectors. Up to 10A may be measured continuously, 20A for up to 1 minute.

**Output** 100 mV at 10A.
**Accuracy** (18°C to 28°C) ±0.25% from dc to 10 kHz, rising typically to 1 dB at 100 kHz.

## 80I-600 AC CLAMP-ON CURRENT TRANSFORMER

The 80I-600 is designed to extend the ac current measuring capabilities of DMM's up to 600 amperes by use of a 1000:1 division ratio. A clamp-on transformer design allows measurements to be made without breaking the circuit under test.

**Range** 2A - 600A.
**Frequency Response** 30 Hz - 1 kHz.
**Accuracy** ±3%.
**Division Ratio** 1000:1.

## TemPak TEMPERATURE MEASUREMENT SYSTEM

Configurable to suit your needs, TemPak monitors thermocouple inputs on the 2190A and RTD inputs on the 2180A. Microprocessor-aided control lets you read plus or minus temperature differences from preset nominal value and store maximum and minimum readings for later recall. Optional analog and data output drives recorder and printer, respectively. Modular units stack and latch for ease in transporting, and convenient operation.

### 2190A

Two versions of the 2190A cover seven thermocouple types. Internal switch selects desired type. Bright LED display. Power consumption 8W.

### 2180A

Selects and measures the temperature from any one of six types of RTD's via internal switch.

### SPECIFICATIONS

| MODEL | 2190A | 2180A |
|---|---|---|
| Type of Temperature Sensor | Thermocouple | RTD |
| Temperature Range (Dependent on Sensor Type) | −422°F to +4480°F<br>−202°C to +2457°C | −380°F to +1424°F |
| Thermocouple/RTD Types | J, K, T, C, R or<br>J, K, E, S, R | 385 Pt-DIN, 390 Pt, 3902 Pt, 392 Pt, 100Ω DIN NI, 120Ω Ni, resistance (0-1000Ω) |
| Number of Thermocouple/RTD Types | 7 total (5 each version of 2190A) | 6 |
| Accuracy[1] (Max. Error Including Conformity Due to Resolution and Computational Errors) | <0.19 to <0.60°C depending on type | <0.061 to <0.249°C depending on type and range |

(1) 90 days

### OPTIONS

**21X0A-002**
Isolated analog voltage output proportional to temperature plus RS-232C and parallel ASCII digital output.

**21X0A-006**
Enables thermometer to read plus and minus temperature differences, store maximums and minimums. Provides out-of-limit alarm indications and outputs.

### ACCESSORIES

**Y2002**
Alarms output module with 4 independent comparators for signaling up to 4 stages of out-of-limit conditions. Includes output relays.

**Y2001**
Thermocouple selector lets you choose any one of up to 10 thermocouples to be read on the 2190A, 5 of one type and 5 of another.

**Y2009**
Rechargeable battery pack supplies ±12V dc to 2180A and 2190A for up to 5 hours continuous operation.

**Y2000**
RTD selector operates with the 2180A to select 10 RTD's. Similar to Y2001.

**Y2003**
Calibrator and battery pack provides stable low voltage source for calibration of less accurate thermocouple thermometers, analog and digital.

## 2160A/2170A SERIES

The 2160A and 2170A series thermometers complement a broad temperature measurement capability offering unique performance and features to the user. Temperature resolution of 1° and 0.2° is available in either panel mount or portable bench models. Panel mounted versions conform to DIN standards for harsh industrial environments.

### 2160A/2170A

Panel mounted 4-digit 1°F/C or 0.2°F/C, respectively, thermocouple thermometers capable of resolving over the temperature span of any of eight thermocouple types.

### 2165A/2175A

Portable single-point instruments housed in rugged bench mount cases. Can be equipped with rechargeable batteries for complete portability.

### 2166A/2176A

Bench type instruments with the capability of monitoring up to ten thermocouples of the same type. Ten-position front panel rotary switch selects thermocouple channel. Powered from line or external 12 volts dc.

### 2168A

A portable, single-point instrument capable of accepting any one of eight thermocouple types as an input.

### SPECIFICATIONS

| MODEL | 2160A SERIES | 2170A SERIES |
|---|---|---|
| Type of Temperature Sensor | Thermocouple | Thermocouple |
| Temperature Range (Dependent on Thermocouple Type) | −328° to 3999°F<br>−200° to 2328°C | −99.8° to 999.8°F<br>−99.8° to 999.8°C |
| Resolution and Repeatability | 1°F or C | 0.2°F or C |
| Thermocouple Types | J, K, T, E, R, S, B, C | J, K, T, E |

### OPTIONS AND ACCESSORIES

**2161A**
Panel mount, multipoint switch unit for use with 2160A and 2170A.

**2162A**
Panel mount digital comparator, compatible with 2160A and 2170A. Selects limits or on/off control.

**-01** Rechargeable battery pack for 2165A and 2175A.
**-02** Field installable BCD output for 2160A and 2170A.
**-04** Field installable analog output for 2160A and 2170A.
**Y2004** Rechargeable battery pack for 2166A, 2168A, 2178A.

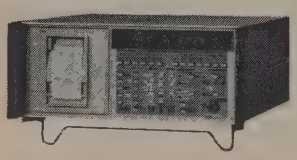
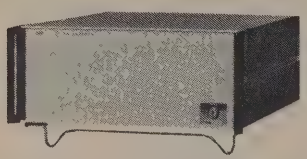
FLUKE

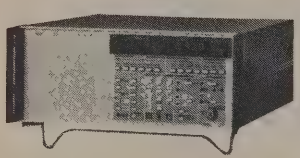
# DATA LOGGERS



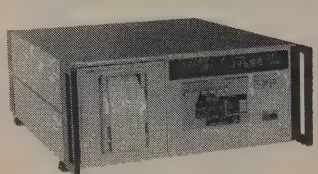
2240B



2242B



2241B



2200A

There are four basic models of Fluke data loggers: the 2240B, 2241B, 2242B, and 2200A. They are complete modular systems ready to operate when delivered. All you do is connect your sensors and select the front panel operating parameters. All physical quantities can be measured and logged that can be represented by a proportional voltage or current. Signal inputs can be from thermocouples, RTD's, thermistors, and current transmitters. Digital inputs can also be accommodated. The data loggers are configured to your particular application using standard data logger mainframes and plug-in modules.

## FEATURES

- Complete interactive keyboard programming of range, function, skip and limits
- Resolution to 1 μV and 0.1°
- Scan 1 to 1000 points, up to 60 in one mainframe
- Mix voltages, thermocouples, and thermocouple types on adjacent channels
- Multiple scan modes: continuous limits monitoring, dual interval scan, delayed interval scan, and monitoring selected channels
- Keyboard-selectable scan interval 1 sec to 24 hours
- Displays date, time, data, polarity, channel number, and function
- Selectable scanning rates (3 or 15 channels per second)
- Thermocouple conditioning
- Complete program list printout
- Alarms output
- Six digits "fixed" data
- Digital inputs
- Field expandable
- Reference voltages for self-check
- Switch-selectable output formats
- Clock: days, hours, minutes, seconds
- Most popular data communications and data terminal equipment are compatible

## 2240B

The 2240B provides full programming capability and utilization of all data logger options. The 2240B has a capacity of 60 channels in the mainframe and the ability to monitor up to 1000 channels using additional scanner chassis. An on-board printer and front panel display are standard. Remote programming is accessible through Option -17.

## 2241B

The 2241B offers the same capabilities as the 2240B except the on-board printer is not included in the instrument.

## 2242B

The 2242B is identical to the 2240B in capability, but is intended solely for remote programming applications. It has an entirely blank front panel with all connections to the remote programming point made via the rear panel. Option -17 is required for remote operation.

## 2200A

The 2200A provides control and basic front panel programming for systems not requiring maximum flexibility or frequent reprogramming. System cost is minimum with capability to log up to 60 channels in the mainframe or up to 100 channels using a separate scanner chassis. Range, function, and channel skip can be programmed for 10 individual channels or in blocks of 10 to 100 channels.

## DATA LOGGER INPUT OPTIONS

| Inputs | Ranges | Input Options[1] |
|---|---|---|
| DC Voltage | 40V, 4V, 0.4V, 0.04V | -07 Solder pin connector |
| Current Transmitters | 1 to 5 mA<br>4 to 20 mA<br>10 to 50 mA | -28 Current transmitter connector<br>-29 Current transmitter connector<br>-30 Current transmitter connector |
| Thermocouples | Thermocouple types J, K, E, T, R, S, B, C, D (W3) or G | -08 Isothermal connector |
| RTD's | 385 Pt, 390 Pt, 3902 Pt, 392 Pt, 100Ω Ni, 120Ω Ni, resistance | -03 RTD connector[2] |

(1) In addition to options listed, one scanner and one a/d converter (not listed) are required to establish a functioning data logger system. Ask for the Data Logger data sheet for complete details.

(2) Requires RTD Scanner Chassis.

NOTE: Output interface options are available that are compatible with TTY, RS-232-C, most calculators Facit tape perforators, Kennedy magnetic tape, and other equipment.

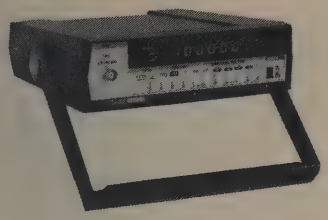
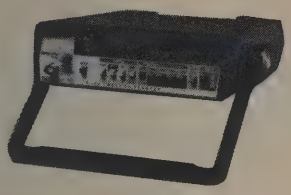
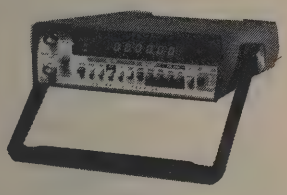
# COUNTERS



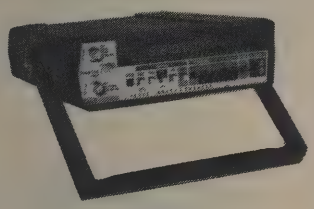
1900A



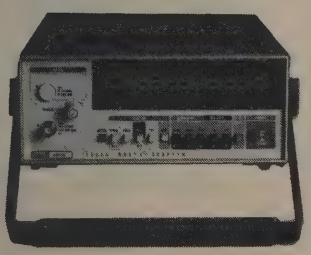
1910A



1911A



1912A



1925A

1920A

## MULTICOUNTERS

The 1910A, 1911A, 1912A, and 1900A comprise a family of distinctive counters offering precise, rapid measurement of frequency, period, and total number of events.

Full autoranging is supplemented by selectable 4-range manual operation. Autoreset resets the counter every time you select a new range or function so you do not have to wait for a second reading. The first one is always correct. Automatic clean dropout on the 1911A and 1912A channel B input gives you instant indication in the form of zero readout whenever the signal level falls below the sensitivity threshold of the counter so that you do not get erroneous readings. Wide choice of timebases include standard 0.5 ppm per month standard, optional timebases with improved aging rates and temperature stabilities, and external input for your own 10.00 MHz standard.

Input signal conditioning on the 1910 series include trigger level and attenuator controls for full control over the dynamic signal input range and more accurate readings in the presence of noise.

All four counters employ optional rechargeable batteries for field service or any off-line operation with up to 4 hours minimum operating time between charges.

### 1900A

The 1900A is the lowest cost multicounter in the Fluke counter family, but with performance to match the more expensive units. A selectable 1 MHz low-pass filter provides input signal conditioning for accurate low frequency measurements in noisy environments. A selectable 10:1 attenuator is included in the input controls.

### 1910A

This single-channel counter features operation to 125 MHz for frequency measurements and 2 MHz for period. Basic sensitivity is 15 mV rms.

### 1911A, 1912A

These dual-channel counters offer channel A frequency coverage to 125 MHz and channel B prescaled coverage to 250 MHz, 1911A, and 520 MHz, 1912A. The 1911A and 1912A include 50-ohm input from 50 MHz to 250 MHz and 50 MHz to 520 MHz, respectively, for proper matching in your rf application.

### 1925A

The 1925A is a ruggedized, portable counter intended for operation under severe RFI/EMI conditions. Special features include 9-digit readout, shielded power supply, optional ovenized timebase, clock inputs and outputs, standard data output, and sturdy metal case.

### 1920A

Frequency measurement from 5 Hz to 520 MHz with optional prescaling to 1000 and 1250 MHz make the 1920A ideal for bench or field measurements in the VHF television, 900 MHz telecommunications, and beacon bands. Frequency measurement of rf bursts permit rapid checks of transmitter operating frequencies. Resolution Multiplier option provides high resolution measurement of audio and low frequency signals from 10 Hz to 10 kHz.

## UNIVERSAL COUNTER-TIMERS

### 1953A

The 1953 is designed for bench or systems with a wide array of options that let you select exactly the capability you need to solve your specific measurement problems.

The basic instrument features frequency, frequency ratio, period, period averaging, time interval, and totalize. There are six choices of gate times, period averages, and time interval resolution. Trigger-level controls for channels A and B allow user to select a preset trigger level (0V dc) or to vary the level at which the input signal triggers the counter. Signal conditioning controls for each channel permit selection of positive or negative slope triggering, ac or dc coupling, and X1 or X10 attentuation. Dual input channels are direct coupled with 30 mV sensitivity.

Optional 50-ohm prescalers extend frequency measurement capability from 0 to 125 MHz (std.) to 520, 1000, or 1250 MHz. Systems users can choose from three remote programming options, two of the fast parallel controlled type and one using the IEEE-488 interface.

### 1952B

The 1952B is similar to the 1953A. It features the same measurement functions, and trigger level and input signal conditioning controls. Frequency measurement range is 0 to 80 MHz with basic 50 mV sensitivity. A highly stable temperature-compensated crystal oscillator (TCXO) with 8-digit display is available as an option.

## SIGNAL SOURCES

Fluke signal generators incorporate advanced microprocessor techniques which greatly reduce their size while increasing their overall capability, flexibility, and range of application. Cumbersome front panel knobs have been replaced by a universal calculator keyboard enabling free-form entry of volts, millivolts, dBm, Hz, kHz, and MHz. Frequencies and levels can be stored and recalled for repetitive testing. Ranges are set automatically for best resolution and programmable limits prevent damage to unit under test.

Fluke synthesizers employ the indirect approach to frequency synthesis and exhibit exceptional accuracy, stability, spectral purity, and resolution.

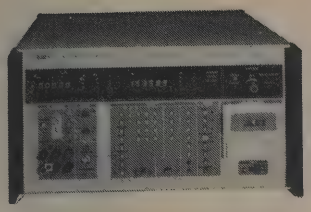
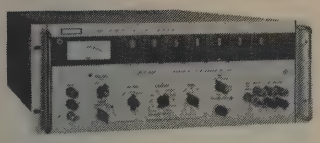
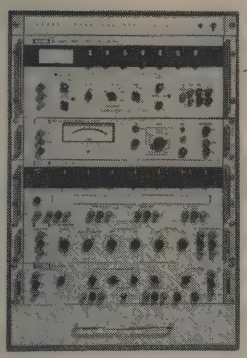
# CALIBRATORS AND STANDARDS



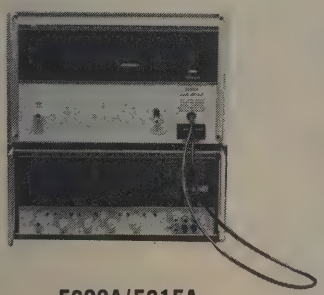
5101A



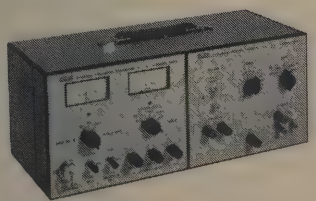
335A



7105A



5200A/5215A



540B

## MULTIFUNCTION CALIBRATORS

### 5100A, 5101A

The 5100 Series microprocessor-based calibrators have built-in computational power designed to increase the accuracy and throughput for any calibration operation. DC volts, ac volts, current, and resistance functions permit a wide range of meter calibration — from single-function panel meters to autoranging DMM's with up to 4½-digits of resolution.

You enter data via a calculator-type keyboard in the same format encountered in the manufacturer's cal procedure. The calibrator computes the error of the unit under test in % or dB. Then it indicates whether the unit passed or failed and amount of error.

The 5101A employs a built-in cassette tape deck to store calibration or test programs and perform them under microprocessor control. The recorded procedures are those you write yourself.

You can choose either IEEE or RS-232 interfaces for full systems applications. Printer accessories Y8005 (IEEE interface) and Y8006 (RS232C interface) provide a hardcopy printout of the programmed test procedure.

### 515A

This precision calibrator is ideal for on-site calibrations requiring dc voltage, ac voltage, and resistance standards in a compact portable unit. Weighs just 13 lbs. including rechargeable battery pack. Checks many voltmeter functions including zero offset, a-d linearity, absolute accuracy, frequency response, residual noise, and linearity.

### 760A

The 760A Meter Calibrator combines direct percent-error readout with single range operation for each function including ac/dc volts, ac/dc current, and resistance. Accuracy figures are % of setting so that they apply over the entire voltage or current range. The unit is guaranteed to remain within specifications for 1 year.

## DC VOLTAGE CALIBRATORS

### 335A, 335D

The 335 Series DC Voltage Standard/Null Detectors combine the functions of a precision dc voltage standard with those of a differential voltmeter and high-impedance null detector. Output voltage to 1111V is available in three ranges with 1 $\mu$V, 10 $\mu$V, and 100 $\mu$V resolution.

### 332B, 332D

The 332 Series are precision dc voltage calibrators with output in seven decades to 1111V at 50 mA. Outstanding regulation, and adjustable overcurrent and overvoltage protection make these instruments well suited for day-to-day use on the production line or in the laboratory.

### 341A, 343A

The 341A, 343A DC Voltage Calibrators offer 6-digit (10 $\mu$V) resolution with 50 ppm accuracy (341A) and 7-digit (1 $\mu$V) resolution with 20 ppm accuracy (343A). Combined ripple and noise is $<$ 50 $\mu$V for the 343A. Calibrators include adjustable overcurrent protection and remote sense terminals.

### 7105A

The 7105A comprises a self-contained dc calibration system consisting of those Fluke dc standards-type instruments that are normally required to set up a laboratory. The system is self calibrating and achieves accuracies equal to those found in standards laboratories. A typical system includes the Fluke 335A, 845AR, 750A, 720A, and 721A.

## DC VOLTAGE/CURRENT CALIBRATORS

### 3330B

The 3330B combines high dc accuracy with the programmability required by automated test systems. The unit can be operated manually or remotely programmed for voltage outputs to ±1111V and current outputs to 111 mA.

### 382A

The 382A provides 2-range voltage outputs to 50V and 4 ranges of current to 2A. Output voltage and current limits may be preset. Remote control is standard.

## AC CALIBRATORS

### 5200A/5215A

The 5200A/5215A comprise a precision ac source suitable for the calibration laboratory or production line. Frequencies to 1.2 MHz and voltages to 1000V are available. Output current limit can be preset. Calibration error is read directly from the unit when calibrating voltmeters.

### 5205A

The 5205A is a dc coupled, programmable, inverting power amplifier with a fixed gain of 100. It extends the range of the 5200A to 1200V or can be used independently for a wide range of waveforms from dc to 120 kHz.

## STANDARDS

### 540B

The 540B Thermal Transfer Standard is designed for precise measurement and calibration of ac voltage and current. Voltage range is 0.25 to 1000V rms ac, 5 Hz to 1 MHz. Basic accuracy is ±0.01% without calibration curves or correction tables.

### 731B

The 731B DC Reference Standard provides a variety of precision voltages with standard cell accuracy. Ideal as a working transfer standard from standard cells. Optional rechargeable battery.

### 510A

The 510A AC Reference Standard is a precision ac voltage source which provides an accurate 10V ac reference. Choose any one of eight standard frequencies from 50 Hz to 100 kHz.

(1) Includes 0.002% differential voltmeter and high Z null detector in same unit.
(2) Reduced accuracy at higher frequencies
(3) Operation to 1200V using companion model 5215A power amp.
(4) Calibrates voltmeters and dc calibrators (self-calibrating).

## VOLTAGE DIVIDERS, NULL DETECTOR

### 720A, 750A

The 720A Kelvin-Varley Divider is a high-resolution primary ratio standard with absolute linearity of 0.1 ppm and self calibration capability. Ratio range is 0 to 1.1 in 7 decades, 0.1 ppm resolution. The 750A Reference Divider is a precision stable voltage divider for calibration of precision dc voltmeters, dc calibrators, etc. Accuracy is 10 ppm for 1 year. Has switched input taps from 1100V to 1.1V, switched output from 1100V to 0.1V. Output voltages are directly transferred from the standard cell.

### 845AB, 721A

The 845AB Null Detector is designed for extremely high input impedance and isolation, 100 MΩ and $10^{12}$Ω, respectively. It is operable from the line or rechargeable batteries (standard). The 721A Lead Compensator equalizes the voltage drop across two resistive dividers connected in parallel for calibration to eliminate the effects of contact and lead resistance.

## AUTOMATED CALIBRATION SYSTEMS

Fluke Terminal/10 Automated Calibration Systems satisfy the need for increased volume in precision measurements in a cost-effective manner. Time-share concept permits a main computer to control a number of satellite meter and oscilloscope stations plus other time-shared terminals.

Operator follows step-wise procedures displayed on a CRT. Blinking messages, LED prompters, and audio signals complement basic instructions. Complete software covers operation and maintenance at the system and calibration station levels.

The 7505C Meter Calibration Station provides stimulus and measurement capability for calibration of VOM's, VTVM's, DMM's, precision DVM's, sources, calibrators, and passive devices.

The 7510B Oscilloscope Calibration Station is optimized for calibration of oscilloscopes and plug-ins plus related instruments such as electronic counters.

## PROGRAMMABLE POWER SOURCES

Designed specifically for automatic test systems, the 4200 series offers speed, accuracy, low programming noise, true current limiting, isolated control logic, ac or dc external reference, and full digital control.

### OPTIONS

**4200A-03** External Reference
**4210A-07** 100 μV Resolution (4210A only)
**4210A-09** Multistrobe Logic
**4250A-06** Programmable Current Limit

| Ripple | RMS | 1 mV | 0.1 mV |
| | Peak-to-Peak | 5 mV | 1 mV |

## LOGIC TESTERS

Fluke Logic Testers provide the highest performance at reasonable cost. Hundreds of our testers are presently in service throughout the world.

The 3000 Series has made notable contributions to the field. They have established a new price/performance class. They cost significantly less to program and they yield superior diagnostic speed and test confidence. They incorporate notable improvements in the key areas of tester technology: programmability, programming means, interfacing, drive/receive electronics, diagnostic tools, and even power supplies.

### FIRST PROGRAMMING

Most testers require a difficult and time consuming approach to creating input stimuli, requiring the programmer to painstakingly develop each test word, bit-by-bit. The 3000 Series simplify programming by providing a large array of stimulus signals with various duty cycles and relative frequencies to exercise all but the most complex circuits. Where specific test words are required, the 3040A provides this capability also.

### PROGRAMMING MEANS

Programming and editing are done on-line by pushbutton. Assemblers, compilers, and tapes are eliminated.

### INTERFACING

A standard test adapter interfaces a card family connector to the tester's zero insertion force mating connector.

### DRIVE/RECEIVE ELECTRONICS

They are level programmable and tri-state for handling bidirectional buses.

### AUTOMATED DIAGNOSIS

In each 3000 Series tester, all I/O pins are tested and automatic go-no-go results are displayed. Both comparative board-to-board state testing and signature testing are used, plus a dozen other aids.

### POWER SUPPLIES

Board power is provided by multiple fixed and programmable supplies.

### PROGRAM STORAGE

The program and pass/fail signature data are stored on inexpensive magnetic media. The 3040A uses floppy disks, while the 3010A and 3020A use a small magnetic stripped "credit card." Program loading involves simply inserting the card and pressing the ENTER switch.

## 3040A

The 3040A is a general purpose digital logic board tester with advanced high speed functional testing and diagnosis capability . . . unsurpassed in the industry. The tester features new programming capabilities, AUTOTRACK guided clip and probe diagnostics and new built-in features that enable testing of microprocessor boards at full data and clock rates. Programming time, the highest cost associated with most digital testers, is reduced to a minimum by unique system architecture that allows the user to combine specific programmer-defined test vectors with machine-generated algorithms. Circuit board descriptions for AUTOTRACK are entered and stored on floppy disk via the companion 3041A programming station.

## 3020A

The 3020A Logic Tester provides test and diagnosis of all but the most complex digital boards at a fraction of the cost of conventional software-driven systems. Programs are entered through a calculator-like programming panel and stored on 3010-compatible magnetic credit cards. Over a dozen diagnostic aids speed trouble-shooting of complex faults.

## 3010A

Designed for low cost production and field service, the 3010 Logic Tester provides many of the features of the 3020A at a lower cost benchtop/rack mount configuration. It is quite efficient as a programming unit for boards of moderate complexity, even though it does not include the full I/O display, override switches, and stop-on-fail capability which reduces 3020A programming time on complex boards. The unit's test and test length capabilities are identical.

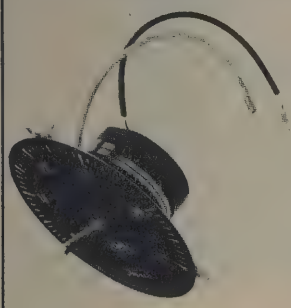
# Faria Meter Corporation

19 FARIA LANE, UNCASVILLE, CONNECTICUT 06382
(203) 848-9271

## THE COUNTRY'S LARGEST MANUFACTURER OF AMMETERS & 250 METERS

## GREATER READABILITY & QUALITY



WITH THE LOWEST PRICED 250° MOVEMENT MADE IN THE COUNTRY!

. . . 40% More Magnetic Strength
. . . Friction Free Taut Band
. . . Greater Torque
. . . Custom Dials
. . . Available As Bare Movements Or As Panel Meters Shown Below

### AUTOMOTIVE STYLED PANEL METERS

. . . Internal Lighting
. . . Hermetically Sealed
. . . Blank Internal Circuit Boards Available
. . . In Panel or Top Of Panel Mounting

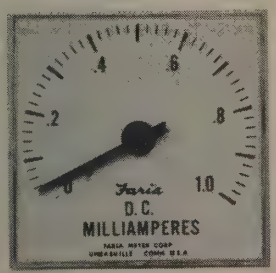
3" METER

4" METER

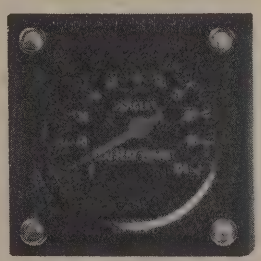
ALSO 2" & 5" (NOT SHOWN)

### COMMERCIAL PANEL METERS

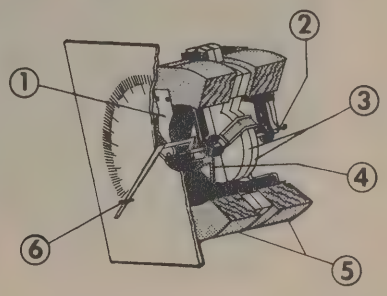
. . . 2½ TIMES the Scale Length of Ordinary Meters
. . . Priced in the Same Range as 90° Instructions
. . . Features Contemporary Styling



ASA 2½" METER



MILITARY-AIRCRAFT METER



1. Tension member assures constant band tension while absorbing shock and vibration to prevent band breakage.

2. Strong taut-band eliminates friction and will withstand heavy shock and vibration without damage.

3. Pole piece design assures uniform flux density from 0 to 250° deflection for better tracking.

4. Unique balance weight design assures proper balance even after heavy shock and vibration. No weight wires to shift as on other meters.

5. Large berrium ferrite magnet provides 40% more flux density than other "core magnet" designs for better torque.

6. Movement is suppressed slightly against stop peg to eliminate zero adjust. Pointer is always at zero in any position.

Field proven in the most rugged automotive and snowmobile OEM applications, this high performance 250° meter movement is featured in all the case styles shown at left. Write or call for data sheets and prices today!

**ALSO 2 INCH MOVING MAGNET METERS, AMMETERS AND GAUGES**

## MEGOHMMETERS

1020-C

Freed can supply a complete range of insulation resistance measuring equipment with fixed and variable d.c. test voltages from 5 to 2500 volts. Insulation and leakage measurements can be made on transformers, motors, cables, electronic assemblies and components, dielectric materials, electrical appliances and tools, capacitors and resistors.

| Type | Resistance Range | Test Voltage | Accuracy | Power Requirements | Size and Weight | Price |

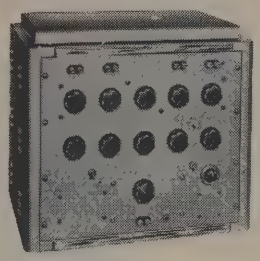
# FREED TRANSFORMER CO., INC.

## INCREMENTAL INDUCTANCE BRIDGES

Direct in-line readings of inductance and conductance of iron core component at audio frequencies with or without super-imposed direct current. The bridge uses the Owens circuit with provisions for measuring the series or parallel inductance and conductance of the unknown inductor; five precision resistance and capacitance decades are provided to indicate these values. "Q" or storage factor can be measured as the product of the inductive reactance and the conductance.



1110-C

| Type | Inductance Range | Conductance Range | Frequency Range | D.C. Current | Accuracy | Dimensions and Weight | Price |
|---|---|---|---|---|---|---|---|
| 1110-C | 1111.1 h to 1 mh 5 decades<br>1.1 h to 1 μh 2 decades | 0.015 μmho—100 mho<br>"Q" = 600 max @ 100 cycles | 20 cycles to 10KC | up to 2 amperes | ±0.5% to 5 KC<br>±2% to 10 KC | 21¾" x 17½" x 15¼"<br>50 lbs. | 765.00 |

| 1185 | 111.1 h to 100 μh 5 decades<br>0.11 h to 0.1 μh 2 decades | 0.15 μmho—1000 mho<br>"Q" = 600 max @ 100 cycles | 20 cycles to 10 KC | up to 30 amperes | ±1% to 5 KC<br>±3% to 10 KC | 21¾" x 33¼" x 15¼"<br>100 lbs. | 1535.00 |

## NULL DETECTOR

Sensitive null detector for bridge measurements, with self contained selective filters to limit the amplifier characteristics at various bridge measuring frequencies.

1140-B

| Type | Sensitivity | Frequency Range | Filter | Power Requirements | Dimensions and Weight | Price |
|---|---|---|---|---|---|---|
| 1140-B | 10μ volts @ 1 KC<br>for 15% meter deflection<br>filter in | 20 to 20,000 cycles | Fixed<br>60, 400, 1000 cycles<br>Adjustable ±5% of center<br>Other frequencies available | 105-125 volts<br>50-60 cycles | Cabinet<br>12" x 8½" x 10"—18 lbs.<br>Rack—19" x 6" x 10" | 305.00 |

## D.C. SUPPLY

A constant voltage transformer regulated current source designed for use with the Freed Incremental Inductance Bridges. Solid state bridge rectification, L-C filters and low internal impedance provides good current regulation with a minimum of circuit complexity.

| Type | Current Ranges | Voltage Ranges | Regulation | Power Requirement | Dimensions and Weight | Price |
|---|---|---|---|---|---|---|
| 1170-A | 4 ranges, 0-5, 25, 100 and 1000 milliamperes | Maximum no load voltage<br>1000 Ma, 270V, 100 Ma, 270V<br>25 Ma, 85 V, 5 Ma, 48 V | ± 1% for line variation<br>105-125 V | 105-125 volts<br>60 cycles | 19" x 10½" x 13½"<br>66 lbs. | 410.00 |

## DECADE CAPACITORS

The Freed series of Decade Capacitors cover a wide range of values and can be supplied as individual decades from 0.0001 PF. per step to 1 mf. per step or in various combinations of assembled decade boxes. All capacitors are non-inductively wound and heat treated for stability.

## MODEL 36-4

**NEW IMPROVED VERSION OF OUR FAMOUS SYSTEM DPM**

- Instrumentation input
- Adjustable conversion rate
- External trigger
- Gas discharge display
- Compact case

### SPECIFICATIONS

| | |
|---|---|
| **INPUTS** | |
| FULL SCALE RANGES | IMPEDANCE |
| ±199.9 mV, differential | 1000 megohms |
| ±1.999 V, differential | 1000 megohms |
| ±19.99 V, single ended | 10 megohms |
| BIAS CURRENT | 10 pA max. at 25°C |
| COMMON MODE VOLTAGE | ±2.0 V DC |
| COMMON MODE REJECTION | > 70 dB, 50 to 60 Hz |
| NORMAL MODE REJECTION | 30 dB at 60 Hz |
| **PERFORMANCE** | |
| ACCURACY | ±0.05% rdg ±1 digit |
| STABILITY | 80 ppm/°C rdg, typ. |
| ZERO DRIFT | Auto zero (1 μV/°C) |
| CONVERSION RATE | 3 per second (internal control)<br>0 to 16 per second, ext. trigger |
| **DISPLAY** | |
| TYPE | Seven segment gas discharge, .55 in. |
| OVERRANGE INDICATION | 3 LSD's blank |
| DECIMAL POINTS | Programmable |
| POLARITY | Automatic + and − indication |
| **DIGITAL OUTPUTS** | |
| DATA FORMAT | 8421 BCD, parallel, latched |
| FANOUT | 1 std TTL load |
| POLARITY | Logical 1 = positive input |
| OVERRANGE | Logical 1 = overload |
| DATA READY | Logical 1 = converter busy |
| **CONTROLS AND INTERFACE** | |
| HOLD | Ground or logical 0 freezes data |
| EXTERNAL TRIGGER | Logical 0 pulse initates update |
| **POWER** | 100, 117, 220 or 237 V ±10% 50 to 440 Hz at 3.5 watts nom. |
| **PHYSICAL** | |
| OPERATING TEMPERATURE | 0 to 60°C |
| STORAGE TEMPERATURE | −25 to 70°C |
| RELATIVE HUMIDITY | To 95%, non-condensing |
| SIZE | 2.25H x 3.75W x 2.82D |

## MODEL 37

**3½ AND 3¾ DIGITS**

- Gas discharge or LED display
- Isolated BCD output option
- Floating input
- 4-20 mA transducer option
- Event counter/voltmeter option

### SPECIFICATIONS

| | |
|---|---|
| **INPUTS** | |
| FULL SCALE RANGES | IMPEDANCE |
| ±199.9 mV, ±399.9 mV | 100 megohms |

# THE BEST VALUE IN OSCILLOSCOPES COMES IN MANY MODELS.

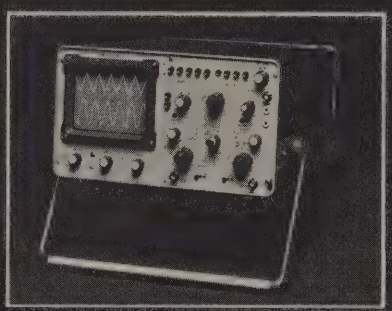
When you choose a Gould oscilloscope—regardless of the model—you get reliability, versatile performance and a modest price tag. All of which adds up to true value. Over the years, Gould has earned a well-deserved reputation for building reliable instruments. Prompt, efficient service is available through a worldwide network of service centers. And all Gould oscilloscopes carry a full two-year warranty covering all parts and labor exclusive of fuses, calibration and minor maintenance. Look to Gould for your best value in oscilloscopes.

For more information contact Gould, Instruments Division, 3631 Perkins Ave., Cleveland, OH 44114. In Europe contact Gould Advance Ltd., Roebuck Rd., Hainault, Essex, CB10 1EJ England.

For brochure call toll-free (800) 325-6400, Ext. 77. In Missouri: (800) 342-6600.

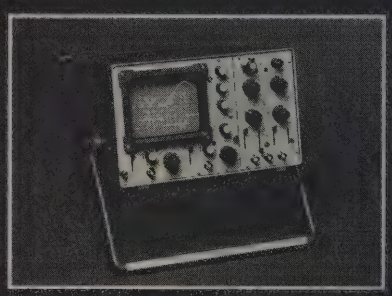
**Gould OS 245A**

- DC to 10 MHz
- Dual trace
- 4 inch CRT
- 5 mV/div sensitivity
- Only 11 pounds



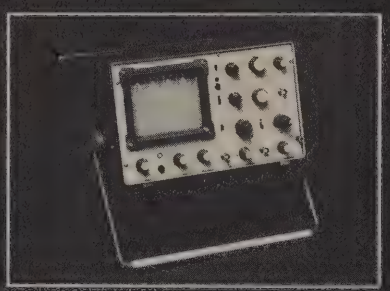
**Gould OS 1100**

- DC to 30 MHz
- Dual trace
- 1 mV/div sensitivity
- Delayed timebase
- Channel Sum and Difference



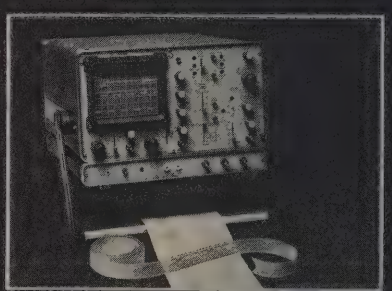
**Gould OS 3300 B**

- DC to 50 MHz
- Dual trace
- Two independent timebases
- Mixed sweep
- 1 mV/div sensitivity
- Channel Sum and Difference



**Gould OS 260**

- DC to 15 MHz
- True dual beam
- High brightness CRT
- 2 mV/div sensitivity
- Single Sweep
- Switched X—YY



**Gould OS 4000**

- DC to 10 MHz—dual trace—digital storage (RAM)—no deterioration of stored trace—pre-trigger viewing—output to analog and digital recorders—simultaneous stored and real time viewing.

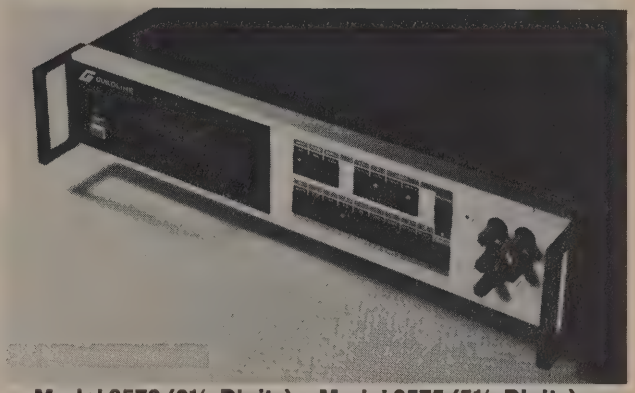
GOULD

# MODERN ELECTRONIC METROLOGY FROM GUILDLINE

## The "INTELLIGENT" DVM

| MEASUREMENT | *PLUS* |
|---|---|
| dc voltage | offset |
| ac voltage | multiplication |
| resistance | ratio |
| 1μV sensitivity | limits |
| auto and manual ranging | percentage deviation |
| scale length, 3½ digits to 6½ digits | max, min, peak-to-peak |
| hidden decades | temperature |
| 396 readings/s at 3½ digits | statistics |
| 51 readings/s at 5½ digits | *all* under time control |

*with* 4 systems interfaces: bcd, binary, RS 232, IEEE/IEC



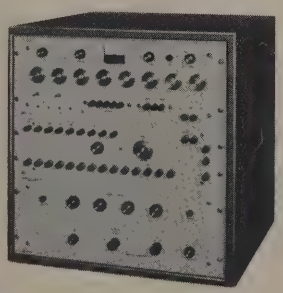
**Model 9576 (6½ Digits) Model 9575 (5½ Digits)** With these microprocessor voltmeters, instruments that process their measurements to give a wealth of useful data, there's a button to solve your problem—at your fingertips.

**Model 9577 7½ Digit Precision Digital Voltmeter**—For bench and system use via programmable BCD or IEEE 488-Interface

**SPECIFICATIONS:**

| | |
|---|---|
| **DC VOLTAGE:** | 1 μv to 1000 volts (for systems use 0.01 μv to 1000 volts)<br>accuracy: 10 volt range, 24 hours, 23°C±1°C to <4ppm |
| **RESISTANCE** | 1mΩ to 14 megohms<br>Accuracy: 10Ω range, 24 hours, 23°C±1°C to <25ppm |
| **AC VOLTAGE TRUE RMS** | 1 μv to 750 volts (1.1kv peak)<br>accuracy: 10 volt range, 24 hours 23°C±1°C,<br>40Hz to 10kHz to <0.06% |
| **RATIO** | DC/DC AC/DC<br>Reference 1 to 11 volts |

**Model 9936 Potentiometer System**—a complete voltage measuring system to 1500 volts, the 9936 comprises a two range DCC Potentiometer for measurements to 2 volts, an electronic null detector, a constant current source, and a volt ratio box to extend the range to 1500 volts. This compact, integrated package offers accuracies previously achievable only by the best standards laboratories employing a cumbersome array of equipment.



**Model 9154D Transvolt®** A self-powered inter-laboratory traveling standard which is usable almost immediately after arrival at destination. The re-chargeable batteries will power the Transvolt off-line for up to one full week at an ambient temperature of 20°C. A single panel meter serves to indicate heater cycle, battery state-of-charge and over-temperature control activation. A rugged fiberglass Transit Case —Model 91541—is available for unattended shipment by common carrier.

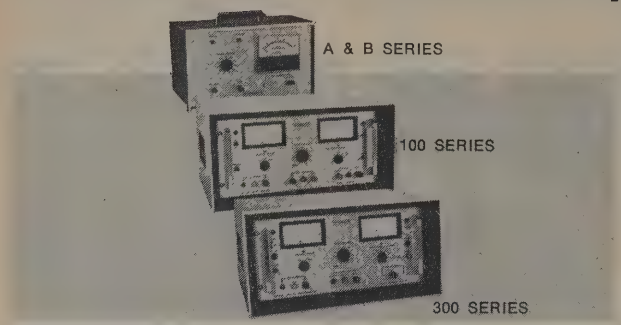
HIPOTRONICS

# AC/DC Hipot & Insulation Testers



**Non-destructive units for production or laboratory use. . . . In ranges up to 10 kV AC and to 25 kV DC.**

- Reset button and failure indicator
- Recalibration facilities
- Guard circuit for grounded and ungrounded operation
- Front panel re-entrant test lead connections
- AC/DC function indicator lights
- Zero start interlock compels operator to start tests at zero volts
- Gravity operated shorting solenoid with discharge resistor
- Audible failure signal

## AC/DC Hipot Testers & Megohmmeters (300 Series)

Six versatile models are designed in A and B versions to meet the requirements of AC Hipot Testing, DC Hipot Testing and Resistance Measurement. The range capability for current and resistance reading varies according to the model number and selected version.

Every unit contains an overload circuit with continuously adjustable sensitivity from 50 μA to 5 mA allowing non-destructive testing of insulation and dielectrics.

### Features

- Dual range output connected kV meter with calibrated set point for megohmmeter readings clearly marked

### Specifications

**Input:** 115 V AC, 60 Hz, 1 Amp max. **Size & Weight:** 21″Wx19″Dx10″H; approx. 50 lbs. **Meters:** 2% full scale accuracy, 4½″ meter. **Current Meter Ranges: A Series** — Ranges of 0-50/500/5000 μA, dc, 0-5 mA AC, 1 to 1000 megohms in 2 ranges. **B Series** — Ranges of 0-0.5/5/50/500/5000 μA, 0-5 mA AC, 1 to 100,000 megohms in 4 ranges.

| Model | Output Voltage (kV) AC | Output Voltage (kV) DC | Current Meter Range AC | Current Meter Range DC | Megohm Ranges |
|---|---|---|---|---|---|
| H301A | 1.0 | 1.5 | 0-5 mA | 0-50/500/5000 μA | 2 |
| H301B | 1.0 | 1.5 | 0-5 mA | 0-0.5/5/50/500/5000 μA | 4 |
| H303A | 2.5 | 3.0 | 0-5 mA | 0-50/500/5000 μA | 2 |
| H303B | 2.5 | 3.0 | 0-5 mA | 0-0.5/5/50/500/5000 μA | 4 |
| H306A | 5.0 | 6.0 | 0-5 mA | 0-50/500/5000 μA | 2 |
| H306B | 5.0 | 6.0 | 0-5 mA | 0-0.5/5/50/500/5000 μA | 4 |

## AC/DC Hipot Testers (100 Series)

The H100 Series consists of eight models subdivided into four subseries — H103, H106, H115, H125 — based on output voltage range. Each subseries is available in two versions, standard (H) or deluxe (HD) based on the number of ranges provided for current readings.

All units are constructed with a standard 19″ panel and enclosed in an attractive bench top cabinet. A ground lead and a shielded test lead is included with each unit.

### Features

- Overload circuit with continuously adjustable overload sensitivity from 50 μA to 5 mA permitting safe, non-destructive testing
- kV meter recalibration facility
- Output control continuously adjustable from zero to max.
- Front panel re-entrant test lead connections
- AC/DC function indicator lights
- Gravity operated output shorting solenoid with discharge resistor
- Audible failure signal

### Specifications

**Input:** 115 V AC, 60 Hz, 5 Amps max. **Size & Weight:** 21″Wx19″Dx10″H; approx. 60 lbs. **Meter:** 2% full scale accuracy. 4½″ meter.

| Model | Output Voltage (kV) AC | Output Voltage (kV) DC | Output Current Meter DC | Output Current Meter AC | kV Meter Ranges |
|---|---|---|---|---|---|
| H103 | 2.5 | 3.0 | 0-5 mA | 0-5 mA | 0-3 kV |
| HD103 | 2.5 | 3.0 | 0-50/500/5000 μA | 0-5 mA | 0-0.6/1.2/3 kV |
| H106 | 5.0 | 6.0 | 0-5 mA | 0.5 mA | 0-6 kV |
| HD106 | 5.0 | 6.0 | 0-50/500/5000 μA | 0-5 mA | 0-1.2/3/6 kV |
| H115 | 12.0 | 15.0 | 0-5 mA | 0-5 mA | 0-15 kV |
| HD115 | 12.0 | 15.0 | 0-50/500/5000 μA | 0-5 mA | 0-3.75/7.5/15 kV |
| H125 | 10.0 | 25.0 | 0-5 mA | 0-5 mA | 0-25 kV |
| HD125 | 10.0 | 25.0 | 0-50/500/5000 μA | 0-5 mA | 0-5/10/25 kV |

## AC & DC Production Hipot Testers (A & B Series)

The A and B Series of Hipot Testers is designed for simple and reliable production line testing. Each model has continuously variable output voltage and an output connected kV meter providing optimum test accuracy. Non-destructive testing is ensured with a sensitive leakage and arc detection system.

### Features

- An AC power on switch, an internal fuse and pilot light
- A continuously adjustable output voltage control
- Corona network arc detector and indicator
- A shielded output lead with an alligator clip termination
- Adjustable overload system

| AC Models | Output Voltage | kV Meter |
|---|---|---|
| HDA3 | 3 kV AC | 0-3 |
| HDA5 | 5 kV AC | 0-5 |
| HDA10 | 10 kV AC | 0-10 |
| **DC Models** | **Output Voltage** | **kV Meter** |
| HDB4 | 4 kV DC | 0-4 |
| HDB6 | 6 kV DC | 0-6 |
| HDB12 | 12 kV DC | 0-12 |

### Specifications

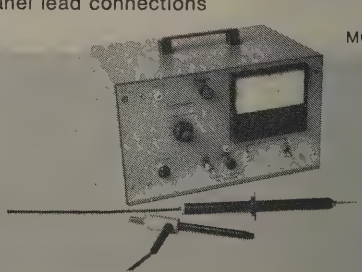
**Input:** 115 V AC, 60 Hz, 3 Amps max. **Size & Weight:** 7″Hx12″Wx 8″D; approx. 20 lbs. **Meter:** 3% full scale accuracy, 4″ meter.

## AT Series of UL Testers

Reliable and simple to operate, the AT Series is designed for continuous assembly line testing of electrical appliances and instruments to meet UL standards of dielectric withstand. Visible and audible indicators of component leakage or internal arcing provide safe, non-destructive testing. Direct and accurate output voltage readings will result, independent of the load.

### Features

- AC outputs: 1200 volts A1 Series, 0-3,000 volts HA3 Series
- Overload circuit with manual reset and overload pilot light
- Voltmeter connected at output for maximum accuracy (except the model A1-AT which has a 500 VA transformer)
- Visible and audible failure indicators
- Input switch, pilot light and high voltage fuse
- Front panel lead connections



MODEL HA3-AT

Prices and specifications subject to change without notice.

# Megohmmeters/ Insulation Testers

The HM Series consists of six high voltage megohmmeters for precision measurement of resistance in a variety of components and insulations.

The output voltage is double-regulated with a ferro-resonant line and solid state electronic regulators eliminating the need for meter averaging even in the larger capacitive loads.

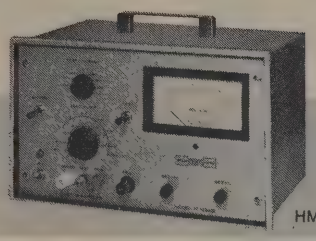
A complete short circuit protection system permits continuous shorting without injury to the operator or the component.

## Features

- A meter multiplier with multiple positions for range selection
- Ferro-resonant line and solid state electronically regulated test voltage
- Dual color meter scale
- Four terminal output network for grounded or ungrounded testing
- Self-contained precision calibrating resistors

**Specifications**

**Input:** ..... 115 volts, 60 Hz.
**Weight:** ..... 20 lbs. (approx.)
**Size:** ..... 7″Hx12″Wx8″D



HM3AS

| Model No. | Output Voltage | Megohm Ranges | Megohm Ranges |
|---|---|---|---|
| HM1 | 500 | 1 to 1,000 megohms | 2 |
| HM3A | 50 | 0.1 to 1,000,000 megohms | 6 |
| | 100 | 0.2 to 2,000,000 megohms | 6 |
| | 500 | 1 to 10,000,000 megohms | 6 |
| | 1000 | 2 to 20,000,000 megohms | 6 |
| HM3AS | | Same as HM3A, but with mandatory 2 hand operation | |
| HM6B | 50 | 0.1 to 1,000,000 megohms | 6 |
| | 250 | 0.5 to 5,000,000 megohms | 6 |
| | 500 | 1 to 10,000,000 megohms | 6 |
| HM6S | | Same as HM6B, but with mandatory 2 hand operation | |
| M6C | 250 | 0.1 to 1,000,000 megohms | 6 |

# AC/DC Kilovoltmeters

Our AC/DC kilovoltmeters offer laboratory precision combined with rugged design and packaging for field use. Separate dividers for AC and DC are enclosed in one oil filled phenolic cylinder for safe storage.

All models are triple range and have a shorting position for transport. Every unit is calibrated with our standard traceable to the National Bureau of Standards which has better than 0.1% accuracy on DC and better than 0.5% accuracy on AC. Surge devices prevent injury to the operator and the component even when short circuits occur at full voltage.

# Liquid Dielectric Testers

The portable OC Series of liquid dielectric testers is designed to test the breakdown voltage of insulating liquids in accordance with ASTM and various international specifications. The fully automatic models, OC-50A, OC-60A and OC-90A feature automatic rate of rise with manual dwell at any voltage. The fourth model, OC-51M has manually operated variable output with a range of 0-50 kV.

The memory meter, included on all the units, provides accuracy and repeatability of readings, allowing truly comparative readings of different dielectrics and periodic comparative readings of the same dielectric. A variety of test cells (oil cups) are available for use with the units.

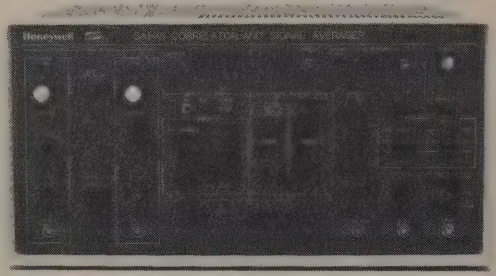
# Honeywell High-Performance Magnetic Tape Systems

| Model | No. of Record And Reproduce Channels | Reel Size | Tape Speeds | Direct Record/ Reproduce Bandwidth | FM Record/ Reproduce Bandwidth | Special Features |
|---|---|---|---|---|---|---|
| 101 | Up to 16 or 32, depending on model. | 10-1/2″ to 15″ NAB | 15/16 to 120 ips | 600 kHz, 2 MHz | IRIG 40% systems to 80 kHz at 120 ips. IRIG 30% Wideband Group II systems to 500 kHz at 120 ips. | Microcomputer control, automatic self-test, self-contained calibration gear, programmable shuttle; 3000 hr ferrite heads. |
| 5600 Series (Includes intermediateband models)  | Up to 16 or 32, depending on model. | 7″ plastic (1/4″) to 10-1/2″ NAB | 15/16 to 60 ips | 300 kHz 1 MHz | IRIG 40% systems to 40 kHz at 60 ips. IRIG 30% Wideband Group II systems to 250 kHz at 60 ips. | High-performance capstan servosystem and tricapstan drive; outstanding flutter performance, built-in monitor meters for input and output monitoring of any channel. |
| Ninety-Six | Up to 42, depending on model. | 7″ plastic (1/4″) to 16″ NAB | 15/16 to 240 ips | 600 kHz, 2 MHz | IRIG 40% systems to 80 kHz at 120 ips. IRIG 30% Wideband Group II systems to 500 kHz at 120 ips. | High-density digital electronics, selective track recording, 3000 hr ferrite wideband heads. |

All Honeywell recorders feature adjustment-free tape path designs and carry a full 12-month warranty.

## Now, A Powerful New Signal Analyzer For On-Line Processing



With the all-digital, high speed SAI-48, you can now compute:

- Auto correlation
- Signal enhancement
- Cross correlation
- Probability density
- Probability distribution

To further speed and simplify your data analysis, the SAI-48 offers full 400-point sampling capability, sampling rates to 20 MHz, 800 points of precomputation delay, digital exponential averaging and binary digital outputs. And all your computed values are shown on a large 6-digit display.

Call us for full details concerning the SAI-48 and our other correlators and Fourier transform analyzer that can provide complete two-channel frequency domain analysis.

**WE'LL SHOW YOU A BETTER WAY.**

# Now—Valid testing of up to 20,000 complex wired circuits a minute. Economically.

## That's a FACT.®

Our newest FACT (Flexible Automatic Circuit Tester) system, called FACT®-PC, is controlled by a programmable digital processor and specially designed modular software for performing all wiring-analysis functions.

Very high testing rates of complex wiring, computer backplanes, and multilayer PCs are achieved: 10K-20K continuity tests/minute and 4K-10K leakage (at up to 1500 VDC) tests/minute—more than double those previously possible.

FACT-PC complements existing FACT-II systems. Programming, output connectors and fixturing are common between the FACT-PC and FACT-II.

And these FACT interconnection devices help optimize system productivity:
FACT-AID (Automatic Interconnection Device) permits rapid electrical hookup of multilayer boards and backplanes under fully automatic control.

FACT-LIFT (Low Insertion Force Technique) achieves multipin electrical contact to hook up thousands of backplane contacts positively in seconds.
FACT-QUIC (Quick Universal Interface Connector)is for rapid interconnection to FACT switching modules.
FACT SPRING PROBE ADAPTERS are fixtures that feature Quick Interchangeable Test Heads with contact densities of up to 400 probes/sq. in.

The FACT systems and associated interconnection devices offer you the most efficient, economical solution to exacting, large-volume wiring analysis. Two brochures, "FACT-PC" and "The FACT System," explain in detail. Ask for them at Industrial Products Division, FACT Systems, Hughes Aircraft Company, PO Box 92904, Los Angeles, CA 90009; (213) 670-9040.

# Lab automation made simple

Now you can quickly and economically hook up most analytical instruments and test equipment to most computers. The IBM 7406 Device Coupler can be connected in hours. By taking advantage of high-level languages and interactive computing, the Device Coupler reduces clerical effort and improves the precision of data acquisition. It also permits the user to take greater advantage of the performance already built into existing equipment. At prices that start at only $3050, the Device Coupler can be configured with special combinations of analog and digital input and output modules to fit most application needs.

Find out how the Device Coupler can be put to work for you. Write or call Henderson Cole (Collect) at (914) 696-4575.

**IBM 7406**
**Device Coupler**
Permits the attachment of user analog or digital equipment to local or remote computer systems via dial-up or hard-wire lines and controls the two-way flow of data between user equipment and a computer or a terminal or both.

**Highlights**
- Ease of use
  - No new programming skills required
  - No hardware/software changes required with in-line configuration
  - Operable under existing interactive languages, e.g. APL, FORTRAN, PL/1, BASIC
- Modular and economical
- Easily adaptable to a variety of environments
- Access to interactive computing permits selection of appropriate
  - File management/data storage capabilities
  - High level language and graphics support
  - Computer power required for user's application.
- Off-line capability with IBM 7407 Tape Drive Unit (or equivalent)
  - Provides local data storage of up to 60,000 characters of information.
  - Permits recording, transmission and/or retransmission at up to 400 characters per second.
- Terminal/Communications Compatibility
  - IBM 2741, 3767, Communicating Magnetic Card Selectric Typewriter (or equivalent)
  - IBM 5100 (or equivalent)
  - Teletype 33/35 (or equivalent)
  - Tektronix 4013 (or equivalent)
  - Standard line speeds from 110 to 9600 bps

**Available Modules**
- Systems Communication Module (SCM)
- Digital Input Module (DIM)
- Digital Output Module (DOM)
- Analog Input Module (AIM)
- Analog Output Module (AOM)
- Data Logging Module (DLM)

**Application Examples**
- Liquid Chromatograph Automation
- X-Ray Spectroscopy
- General Experiment Automation
- Production Line Monitoring
- Process Unit Monitoring
- Scale Monitoring
- Numerical Machine Tool Control
- Electric Motor Testing
- Circuit Design and Testing

**Physical Characteristics**

| | |
|---|---|
| Height | 27.3 cm (10-3/4") |
| Width | 43.5 cm (17-1/8") |
| Depth | 54.6 cm (21-1/2") |
| Weight | 43.2 Kg (95 lbs) |
| Current | 4.0 amps |
| Voltage | 115 VAC |
| Frequency | 60 Hz |
| Phase | 1 |

**Environment**
- IBM Class "C" building environment (non airconditioned with normal winter heating and ventilation)
- Temperature range: 10-40°C (50-105°F)
- Relative Humidity: 8-80%
- Maximum Wet Bulb or Dew Point: 26°C (80°F)

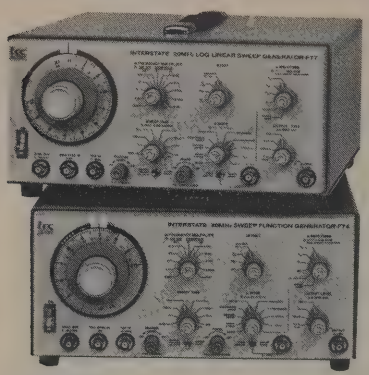
## Function Generators: sine, triangle, square wave, 0.00002 Hz to 20 MHz.



### Series 70
**Broad Range With Plenty of Power**

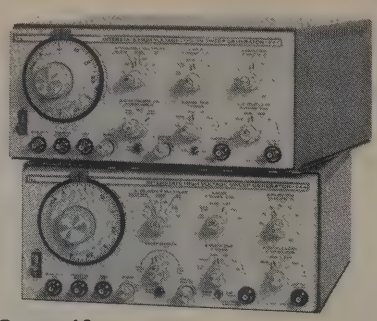
SERIES 70, a universal signal-source line, offers the ultimate blend of function, pulse, and sweep generator capabilities. Four SERIES 70 models to choose from, all producing sine, square, triangle and dc-level waveforms with 5/95% waveform variable symmetry control, fixed and variable offset, and calibrated coarse/fine frequency tuning. Model F72 combines the capabilities of "true pulse" and function generators into one versatile unit. Models F74 and F77 add sweep capabilities to the "true pulse" and function generator combination. Top-of-the-line F77 also offers selectable log/lin sweep, sweep sync, and analog power amplifier capabilities.

**F71**
- 0.00002 Hz to 20 MHz range
- 15 V p-p into 50 ohms
- constant duty cycle pulses
- 1000:1 VCF
- waveform inversion
- high/low output, 30-dB separation

**F72**
- adjustable rise/fall pulses to 15 ns
- 3 ns to 1000 ms adjustable pulse width
- trigger & gate with variable start-stop phase
- external synchronization
- plus all other F71 features

**F74**
- fixed rise/fall pulses — 15 ns
- 3 ns to 10 ms adjustable pulse width
- 60-db step attenuator with vernier
- continuous & triggered sweep, sweep-and-hold & burst modes
- sweep up/sweep down
- direct-reading sweep limit control
- sweep ramp/frequency analog outputs
- trigger & gate with variable start-stop phase
- external synchronization
- plus all other F71 features

**F77**
- selectable logarithmic/linear sweep characteristics
- sweep synchronization
- analog power amplifier
- plus all other F74 features



### Series 40
**High Performance in the Medium Price Range!**

This new high voltage (40 V p-p output) line offers five models, some including frequency marker and calibrator. These units also feature bipolar and unipolar positive and negative variable width pulses down to 120 nsec with rep rates to 4 MHz. F44 features true sweep generator characteristics such as 1000:1 linear sweep capabilities, sweep ramp output, continuous and triggered sweep and direct-reading sweep limit. F47 combines the features of the F44 with 10,000:1 logarithmic sweep and 11-point step frequency calibration between main dial settings. F46 gives the user AM/FM function generator capabilities with sinewave to 8 MHz, internal 400 Hz modulation and a 40-dB dynamic range.

**F41**
- continuously variable vernier
- 0.0004 Hz to 4 MHz range
- 20 V p-p into 50-ohms
- analog of frequency out
- 1000:1 VCF (FM)
- 11-point calibrator
- variable offset
- sine, square, triangle, dc waveforms & variable width pulse

**F43**
- external synchronization
- trigger & gate modes with variable start-stop phase
- variable symmetry
- plus all other F41 features

**F44**
- sweep ramp output
- frequency marker
- direct-reading sweep limit
- continuous & triggered sweep
- plus all other F41 features except calibrator

**F46**
- sinewave to 8 MHz
- internal 400 Hz modulation
- AM 40-dB dynamic range
- plus all other F41 features except calibrator

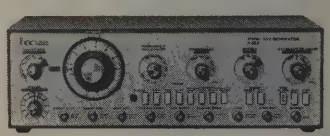
**F47**
- selection of linear or logarithmic sweep characteristics
- 11-point calibrator
- plus all other F44 features

### Series 30
**Interstate's Best Selling Economy Line!**

The most popular models in the SERIES 30 line are F31 and F34 — thousands of satisfied users agree that the price/performance value of this line is excellent. F31 provides clean sine, square, triangle, and adjustable dc. F34 adds trigger and gate, variable width pulse and sweep waveforms — continuous, triggered and burst — plus Interstate's exclusive direct-reading sweep limit control and calibrated coarse/fine frequency vernier.

**F31**
- 0.03 Hz to 3 MHz
- 10 V p-p into 50 ohms
- 2-step, 40-dB attenuator
- 1000:1 VCF
- ±5V offset into 50 ohms

**F34**
- continuous & triggered sweep & burst modes
- direct-reading sweep limit control
- analog of frequency out
- 5-step, 60-dB attenuator
- trigger & gate modes
- variable width pulse
- plus all other F31 features



**F55A**
**The Sophisticated Generator with Phase-Lock and Phase-Shift**

Phase-lock output is phase-coherent and adjustable in phase through 360° with respect to a reference signal. F55A's special phase-lock capability permits input signal to be frequency-multiplied or divided, as well as changed to any other form. Comprehensive pulse and waveform generation, multiple operating modes, and a host of superior performance features enable this precision instrument to fulfill critical instrumentation parameters for exacting laboratory situations.

- 0.00001 Hz to 11 MHz range
- 3 mV to 15 V p-p into 50 ohms
- sine, square, triangle, ramps
- fixed & variable offset
- 1000:1 VCF
- fixed & variable width pulses & ramps
- pulse width modulation
- trigger & gate modes
- continuous & triggered sweep, sweep-and-hold modes
- burst — single or multiple cycles
- direct-reading sweep limit control
- variable start-stop phase
- waveform inversion
- phase-lock

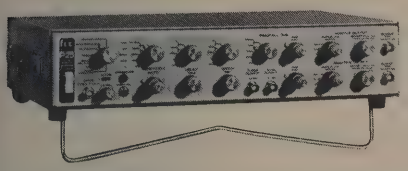
## Pulse Generators: constant duty cycle, variable rise/fall, pulse rates to 50 MHz, and more.



### Series 20
**Engineered to Perform All Your Pulse Requirements**

Constant duty cycle mode and pulse amplifier mode, in addition to standard pulses, make SERIES 20 pulse generators tremendously versatile instruments, outstanding for their price. Pulse width delay from 10 nsec to 1 second, full range offset, normal and double pulse, trigger and gate modes with slope and level adjustments are standard on all models. P22 and P24 offer selectable positive or negative output. P24 and P25 have variable rise/fall times from 5 nsec to 0.5 sec. P23 and P25 feature simultaneous positive and negative outputs.

### P22
- 1 Hz to 50 MHz range
- 10 V p-p output into 50 ohms
- single output, selectable positive or negative pulses
- fixed rise/fall times less than 3.5 ns

### P23
- dual outputs, simultaneous positive & negative pulses
- fixed rise/fall times less than 3.5 ns for each output
- plus all other P22 specifications & features

### P24
- single output, selectable positive or negative pulses
- adjustable rise/fall times from 5 ns to 0.5 sec
- independent rise & fall controls
- plus all other P22 specifications & features

### P25
- dual outputs, simultaneous positive & negative pulses
- adjustable rise/fall times from 5 ns to 0.5 sec for each output
- independent rise & fall controls
- plus all other P22 specifications & features

## Programmable Generator: plug-in features, 0.01 Hz to 14 MHz, IEEE 488 bus, and more.

### SPG-800
**Programmable Generator combines all these instruments in one:**

- **Synthesizer**
- **Pulse Generator**
- **Function Generator**
- **Voltage Source**

This exciting product from INTERSTATE gives Automatic Test Equipment system designers a truly universal signal source. SPG-800 not only has all the top performance specifications of each of these four plug-in programmable instruments individually, but several unique extra capabilities from the synergistic effect of their interaction.

### Interface Options
- IEEE 488, RS-232-C and 20 mA loop, BCD. (ASCII is standard)
- opto isolation available
- manual front panel with double entry keyboard and display
- data output bus available

### Programmable Function Generator
- sine, square, triangle, ramp, pulse and more
- continuous, trigger, gate, AM and FM modes and more
- 0.1 Hz to 14 MHz, 10 mV p-p into 50-ohm load

### Programmable Synthesizer
- frequency accuracy to 0.0001%
- tracking signal output (31-43 MHz)
- 1 MHz crystal reference output
- 1 MHz external precision reference input
- 0.1 Hz to 14 MHz, 10 mV p-p into 50-ohm load

### Programmable Pulse Generator
- true pulse generator with variable rise/fall to less than 20 ns
- width and delay from 40 ns
- single or double pulse modes
- unipolar or bipolar pulses
- 0.1 Hz to 14 MHz, 10 mV p-p into 50-ohm load

### Programmable Voltage Source
- three-digit resolution to ±9.99 V
- 0.1 Hz to 14 MHz, 10 mV p-p into 50-ohm load

### Counted Burst
- counts any waveform, up to 19,999 counts or double pulse to 39,998
- computer or manually initiated

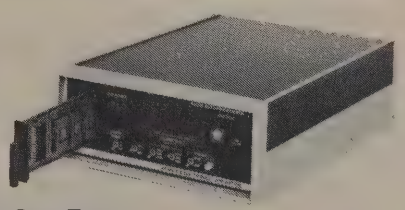
## Programmable Controller: 2048 bytes of plug-in memory, EPROM or PROM, 8-byte control outputs.

### A-1000
**For control of small systems in production, quality control, and the laboratory.**

Low-cost A-1000 programmable controller operates the SPG-800 programmable generator or other devices capable of accepting commands from either an ASCII bus or an auxiliary 8-byte (TTL level) latched output. A-1000 brings the power and convenience of computer-driven ATE to smaller, less-demanding jobs.

### Programming
Available with EPROM, fusible-link PROM, or sockets only. Front-panel, plug-in memory card contains 2048 bytes. Accommodates programs up to 99 steps each.

### Operation
Front-panel pushbutton or external control of each test sequence. Also, end-of-program sequence and stop. High-volume repetition. High and low sequence limits set on front-panel switches.



### Step Rate
Front-panel, variable, step-rate control and program-selectable delays of 25 msec. Front-panel controls for delays of 1-10 sec. Manual or remote 1-bit trigger signal.

Also providing systems, products, and services to the world of

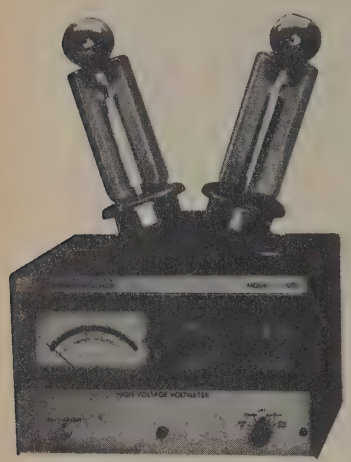
## SOLID STATE AC VOLTMETER



MODEL J-1005

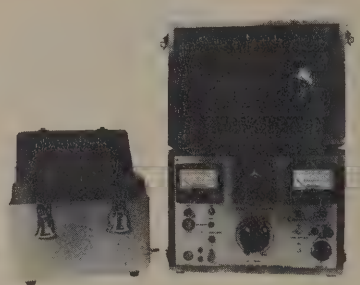
A compact, portable instrument for the accurate, direct reading of very high voltages at rf, audio and power frequencies . . . determination of the amplitude of pulses with oscilloscope connections for viewing wave shapes . . . removable high voltage input circuit for remote panel mounting of the meter . . . internal battery and ac line operation.

| Specifications | Model J-1005 |
|---|---|
| Voltage Ranges | Peak Kilovolts (single-ended) 0-2.5, 0-5, 0-10, 0-25, 0-50<br>Peak Kilovolts (double-ended) 0-2.5, 0-5, 0-10, 0-25, 0-50, 0-100 |
| Frequency Response | Flat from 10 Hz to 20 MHz at full rated voltage. |
| Accuracy | ±3% of full scale on all voltage ranges. |
| Oscilloscope Connection | 600 to 1 division ratio (approx.). |
| Meter Calibration | The meter is calibrated in peak kilovolts with linear voltage scales of 0-2.5, 0-5, 0-10, 0-25, 0-50. |
| Input Impedance | Greater than 2 x $10^{12}$ ohms and approx. 4 pf single-ended to ground, 2 pf double-ended. |
| Power Supply | 117/230 volts ±10%, 50/60 Hz, 5 watts, or rechargeable battery. |
| Dimensions | Height, 16″; width, 10¾″; depth, 8″. |
| Net Weight | 12 pounds (approx.). |

## PORTABLE AC HIGH VOLTAGE TESTER

MODEL JHP-70A

The smallest and lightest instrument available at its power level the JHP70A will generate and measure 70,000 volts peak for on-site testing of high voltage components such as capacitors, switches, transformers, bushings, vacuum tubes, etc.



**Maximum Output Voltage ..... 70 KV Peak**
**Maximum Continuous Current ..... 21 MA RMS**
**Short Circuit Current (Est.) ....100 MA RMS**
**Power Requirements .....105-125 Volts RMS**
**Frequency .....50-60 Hz**
**Current .....15 Amps**
**Surge Current .....10 Amps**
**Weight:**
**Control Cabinet .....28 lbs.**
**Transformer .....43 lbs.**

## HIGH VOLTAGE AC DIVIDER

MODEL 13200

These dividers can be used with an oscilloscope to measure and observe voltages up to 50 kv at frequencies up to 20 MHz. Their low circuit loading design and shielded construction make them particularly suitable for rf measurement applications including tank circuit and transmission line voltages, pulse parameters, modulation voltages, and transient wave characteristics.

| Specifications | Model 13200 |
|---|---|
| Voltage | 50 kv peak |
| Current | 12.5 amperes RMS maximum through the voltage divider. |
| Input Impedance | Above $10^{12}$ ohms, 4 pfd. |
| High Frequency Response | Flat to 20 MHz at 50 kv peak; maximum frequency 50 MHz at 20 kv peak. |
| Division Ratio | 325:1 to termination of 3 ft. of RG-58A/U cable. |
| Low Frequency Response When operated into shunt resistance of 1 megohm<br>10 megohms | 1000 Hz<br>100 Hz |
| Weight | 2 lbs. 4 oz. |

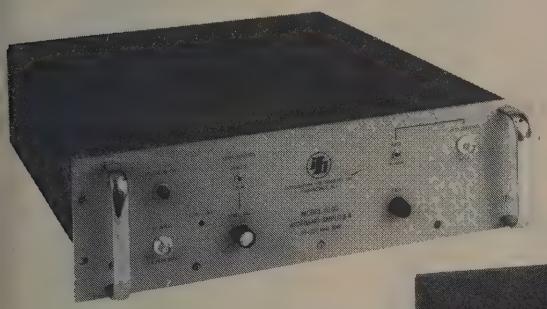
# BROADBAND POWER GENERATING AND MEASURING SYSTEMS

From milliwatts to kilowatts, Hertz to megahertz—IFI offers a complete line of high gain, high power, wideband amplifiers and associated measuring equipment. The IFI catalog lists more than 25 standard models. Frequency and outputs can be tailored to your specific requirements. A few products are shown below. Call for information about your requirements.

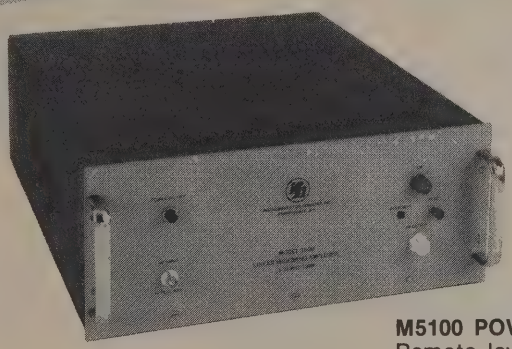
**FEATURES**

- ☐ **High quality, rugged commercial construction**
- ☐ **Thermionic and solid state units**
- ☐ **High power gain: drive with signal generator**
- ☐ **No tuning, no bandswitching**
- ☐ **Fully protected, metered**
- ☐ **System compatible, modular**
- ☐ **Drive mismatched loads**

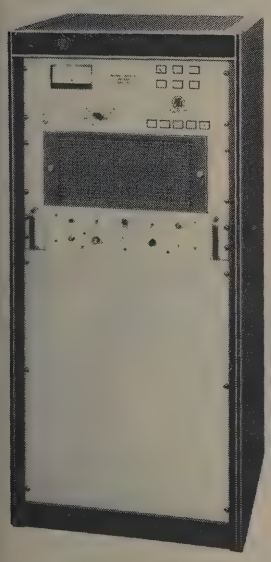


**M1600 POWER AMPLIFIER**
Solid state. 130 watts linear output (300 W saturated). Operates into any load impedance from open to short. 0.5 to 50 MHz, 55 dB gain. Other models 5 to 1000 watts.

**M2600 POWER AMPLIFIER**
Special control features for scientific and biological use. Supplies constant voltage or power to load regardless of impedance changes. Rated 130 watts, 0.5 to 35 MHz.



**M5100 POWER AMPLIFIER**
Remote leveling capability. Works into any load impedance. Rated 10 watts; 10 kHz to 250 MHz; 40 dB gain.



**M406 POWER AMPLIFIER**
High power (1 kW), high gain (60 dB), broad range (10 kHz to 220 MHz) make the M406 the most versatile off-the-shelf wideband amplifier available today.

**EFS-1 FIELD SENSOR**
Measures E-fields from 10 kHz to 300 MHz. No tuning or bandswitching...**NEW:** Model EFS-2 offers CW/pulse capability; EFS-3, CW/pulse/monopulse. Accessories for remote operation, including fiber optic data link.

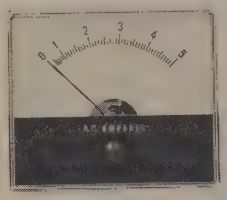
## Series MS Series

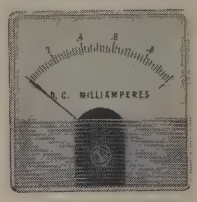


Three sizes available, 1½" (Model MS1), 2½" (Model MS2), 3½" (Model MS3) . . . painted cover section can be color styled . . . the modern meter for the modern look.

## VU Meters

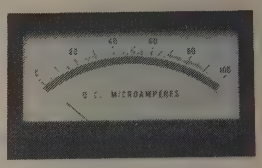
Used for monitoring volume levels in broadcast, recording and communication applications . . . meter is essentially a rectifier-type AC voltmeter of high sensitivity . . . built in some of the conventional meter case designs.

## Series 70 Meters



Available in 5 sizes, 1½" (Model 71), 2½" (Model 72), 3½" (Model 73), 4½" (Model 75) and 6" (Model 76). All meters front panel mounted . . . behind the panel mounting with black bezel on 2½, 3½ and 4½" models. Available with taut band, pivot and jewel and iron vane movements.

## Model 65 Meters

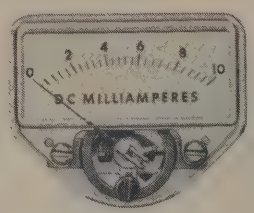


A rectangular styled meter with zero adjustment screw located on front face . . . dial is mounted flush with panel . . . Available with pivot and jewel and taut band.

## Series MM Meters

Medallion styled panel meters available in three sizes (1½, 2½ and 3½"). Painted portion of cover can be color styled. Available with taut band, pivot and jewel and iron vane movement.

## Series 80 Meters



Series 80 Taut Band meters affords functional design that provides maximum visibility in minimum space. Available in three sizes (1½, 2½ and 3½").

## Series HS Meters

These meters are noted for their resistance to shock and vibration . . . mechanisms are mounted on rubber at three points . . . special pivots, hair-springs and fastening techniques reduce effects of hard usage. 1½, 2½ and 3½" models.

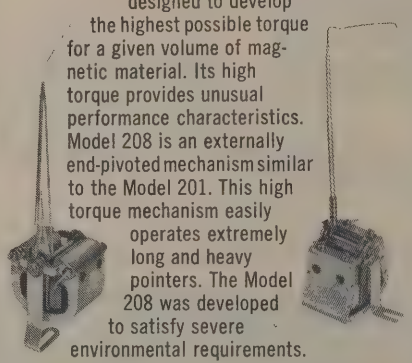
## Model 45 Meters

Modern industrial styling on a 4½" meter with bakelite cover and glass window. Available with taut band, pivot and jewel and iron vane movements.

# AVIONIC PRODUCTS

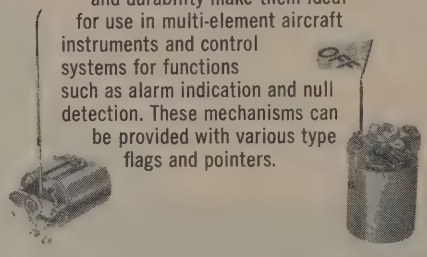
## Mechanisms 201/208

The Model 201 was designed to develop the highest possible torque for a given volume of magnetic material. Its high torque provides unusual performance characteristics. Model 208 is an externally end-pivoted mechanism similar to the Model 201. This high torque mechanism easily operates extremely long and heavy pointers. The Model 208 was developed to satisfy severe environmental requirements.



## Mechanisms 202/215

The Model 202 and the Model 215 are center pivoted coaxial flag mechanisms. Lightweight, compact size, and durability make them ideal for use in multi-element aircraft instruments and control systems for functions such as alarm indication and null detection. These mechanisms can be provided with various type flags and pointers.



## Mini Indicators

The Model 240 Mini Indicator features a compact moving-coil mechanism which is available in a range of easy to read pointer configurations. This versatile mechanism is also utilized in the Model 241 flag indicators. These compact units provide a confusion-proof display of on-off information such as alarm, position, or malfunction.

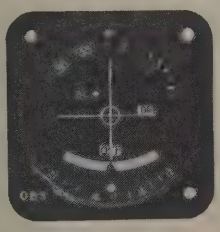
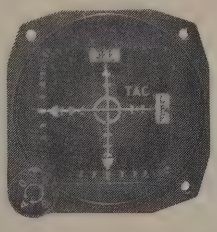
### 308, 309 Indicators



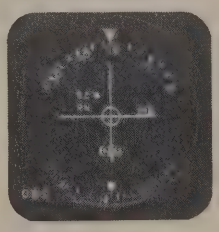
A course Indicator illustrates the degree of deviation from a selected flight path. The basic course indicator contains a Localizer Pointer, a To-From-Off flag and servo course selector. The 309 ILS Indicator is a modified 308 to contain a Glide Slope pointer and associated power failure flag which indicates aircraft deviation from the glide slope path.

### Hover Indicator



The Hover Indicator was designed to provide doppler or cable drift information to the helicopter pilot. This instrument is a flight director and is capable of being operated in four models: (1) Automatic Flight Control System (A.F.C.S.), (2) Ground Velocity Reference (G.V.R.), (3) Tactical Air Navigation Beacon Systems (TAC/TACAN), (4) Visual Omni Range (On-On/VOR).

### 328, 329 Indicators



These course Indicators are highly sophisticated versions of the 308 and 309 models utilizing resolvers, synchros and control transformers which yield greater accuracy required in the more advanced navigation systems such as Area Navigation (R/NAV).

# LOCOST 106

**• LEASING A LOCOST SAVES THE AVERAGE CALIBRATION LAB A MIN. OF $4000/MONTH.**

## FEATURES

- High-reliability multi-station capability without limitations of central-processor time sharing.
- Requires zero software design by the user.
- Multi-function/Multi-instrument/Multi-parameter automation of short run test routines.
- Completely modular, endlessly field-expandable and totally non-dedicated.
- Based on NBS-traceable, state-of-the-art, ratiometric measurement technology.
- Dated, unconditionally guaranteed fully functional turnkey on-site performance . . . on-line, in your facility, from 84-114 days ARO.
- Provides economical solutions to all requirements from 2½-digit production ATE to 7½-digit standards-laboratory automation.

## APPLICATIONS

- Completely automated production batch-testing of electrical and electronic components at accuracy levels from ±1% to ±0.00001%.
- Versatile short-run multi-point/multi-parameter testing of active and passive networks, circuits, subsystems, and systems.
- Automatically programmed data-logging of physical parameters into electrical qualities.
- Comprehensive life-test measurement and categorization of components, circuits and equipment by quality.
- Automated stimulus/response testing of circuit modules, subsystems and complete equipment.

## SUPPORT COMPONENTS

- Master Program Cassettes.
- Disc memories for mass program storage.
- Fundamental standards of EMF, resistance, ratio and AC/DC transfer.
- Data-link Modems.
- Programmable Resistance (Standard Model PRS-106).
- Power amplifiers providing up to 1200 V and 200 W AC output.
- Programmable resistive dividers providing up to 1 million precise ratios.
- Graphic Displays.
- Computer-compatible D/A & A/D converters.
- Function, Signal, Pulse, Word and Sweep Generators.

System can include pulse/function generators, frequency synthesizers, distortion analyzers, vector voltmeters, phasemeters. Peripherals available for complete oscilloscope testing.

## DESCRIPTION

From the leading manufacturer of precision standards and measuring instrumentation, Julie Research, a new computer controlled test system is available at a low cost to fit into the budgets of even small calibration and testing laboratories.

LOCOST* features a combination of computer, data terminal, high speed thermal printer, programming cassette memory and a programming calculator which can be operated by lab technicians with little or no computer and programming experience. It uses BASIC language, has an alphanumeric keyboard and an interactive 32-character display, as well as a built-in 15Kbyte main-line memory. Cassette memory is 32,000 words. Capability of the calculator is equivalent to a 10K or 12K minicomputer. A unique, labor saving feature of LOCOST* is its unique programmed software which makes it possible to generate, store, and carry-out test programs for new instruments efficiently. Simple questions concerning the specifications of the instrument under test are asked by the calculator and the operator answers these questions by typing specifications such as full-scale accuracy, etc. When completed, these specifications are then stored on cassette memory for future reference and use by the system's preprogrammed meter test routine. Programming costs are 80 to 90% lower than for conventional computer controlled systems.

A complete array of programmable DC and AC test instrumentation is available to satisfy even the most demanding testing and calibration applications. LOCOST* is a highly flexible user oriented system and is expandable in both hardware and software. Extended range instruments for both stimulus and measurement may be integrated into these systems at the time of purchase or at a later date as new requirements arise. Typical systems that are available include:

## POPULAR LOCOST 106 MODELS

LOCOST 106 MINI (ON SITE) SYSTEM ..... From **$18,250/year**
Gives the user all the capabilities necessary for full-range precision measurement and limited range precision DC stimulus: calibrates and prints out complete data for potentiometers, decade boxes, meter functions, dividers, bridges, dc power supplies, DC voltage and current calibrators, standard cells, standard resistors, meter shunts, load cells, strain gauges, temperature, resistors, networks, and others. Does double duty as an automated on-site test system. (1)

LOCOST 106 DC/LF SYSTEM ..... From **$40,000/year**
Adds full-range precision AC and DC stimulus to the MINI system: in addition to the capabilities listed above gives full range precision calibration of all meters (AC and DC, digital and panel), volt boxes, high current shunts, AC voltage and current calibrators, etc. (2)

LOCOST 106 OSCILLOSCOPE/PLUG-IN SYSTEM ..... From **$26,500/year**
A complete stand alone automated system to provide fully automated calibration of oscilloscopes and plug-ins. (2)

LOCOST 106 STANDARD SYSTEM ..... From **$57,350/year**
Combines the LOCOST 106 DC/LF AND OSCILLOSCOPE/PLUG-IN systems in a single system. (3)

LOCOST 106/2 DUAL STATION UNIVERSAL SYSTEM ..... From **$70,000/year**
A complete two station automated system, as in the STANDARD system, with the addition of a second, fully independent work station and added capability for calibration of pulse and function generators, oscillators and counters. (4)

(1) This system produces savings of over $20,000/yr in a plant with $75,000 total present Standard/Calibration/Repair payroll

(2) This system produces savings of $30,000 to $55,000/yr in a plant with $150,000 to $250,000 total present S/C/R payroll

(3) This system produces savings of $55,000/yr (one shift) to $110,000/yr (two shift) in a plant with $150,000 to $300,000 total present S/C/R payroll

(4) This system produces $120,000/yr savings (one shift) in a plant with $400,000 total present S/C/R payroll

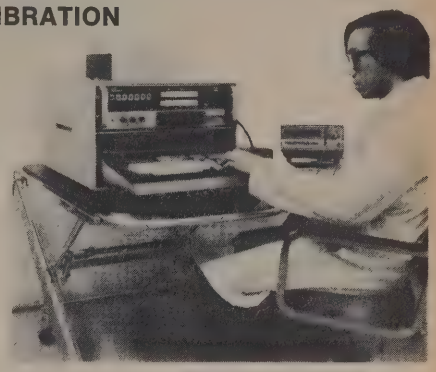
## LOCOST 106 MINI SYSTEM PRECISE, MOBILE ON-SITE CALIBRATION



**DESCRIPTION AND APPLICATIONS**

The Mini-System features high accuracy and resolution for a wide range of electrical and transducer test and measurement parameters. Utilizes the JRL Model DM-1060 1 PPM ACCURACY DIGITAL MULTIMETER LOCOST 106 ATE System interfaces and software and a modified HP computer calculated to provide a compact flexible data measuring, data processing, data formatting and recording system. Also functions as a computer (tape cassette) programmed tester, supplying voltage and current stimuli for calibrating measuring or recording devices.

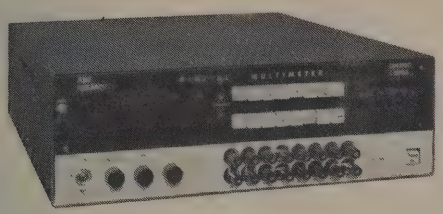
**System Features:**

- High Accuracy DM-1060 Measuring System
- Universal Data Logging, Processing and Formatting
- Programmed Testing and V/C Source
- Master Program Software (No Computer Expertise Required)
- Computer Coupling Directly to Many Peripheral Devices
- Simplified Editing and Debugging

Computers with JRL master program cassette controls measurement sequence selects modes of operation and ranges and then records, formats and processes data with results stored on tape cassettes or optionally displayed on peripheral devices.

**HIGH-RELIABILITY MULTIPLE-STATION SYSTEM 106N.** Up to 4 dedicated LOCOST 106 workstation complements may be interconnected so as to share a 2.4 megaword mass memory, and provide an order of magnitude higher reliability to the test line.

## PROGRAMMABLE AC/DC MULTIMETERS AND PRODUCTION CALIBRATORS DM-1000 SERIES DIGITAL MULTIMETERS TO 1 PPM ACCURACY/RESOLUTION/ STABILITY

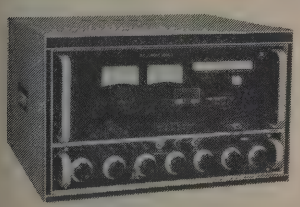


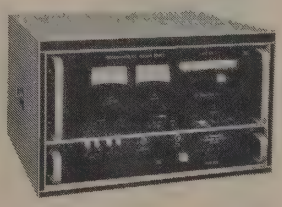
JULIE RESEARCH, for 15 years the pioneer in the manufacture of Precision Standards, now leads the way in providing Multimodel automatic precision calibrators. The new approach to production measurements with three sigma certainty reduces test equipment costs and testing time. The DM-1000 Multimeter doubles as a Ratiometer and Voltage Source in addition to measuring Voltage, Resistance and Current to 1 ppm. Just a few of this amazing instrument's uses are:

- **CALIBRATING DVM's AND DMM's** — 2½ digits to 5½ digits, with full confidence.
- **CALIBRATING A/D AND D/A CONVERTERS** — 8-bit to 20-bit binary resolution.
- **CALIBRATING ANALOG TRANSDUCERS** — to unprecedented orders of precision.
- **MEASURING ZENER DIODES AND STANDARD CELLS** — 1% to 0.0001%, automatically.
- **MEASURING RESISTORS AND NETWORKS** — both absolute resistance and ratios.
- **CALIBRATING POTENTIOMETERS AND ATTENUATORS** — both linear and nonlinear.
- **MEASURING POWER-SUPPLY CHARACTERISTICS** — absolute output, regulation, tracking, stability.
- **CALIBRATING AC SIGNALS AND GAINS** — over 30 Hz-5 kHz, with excellent linearity.
- **STANDARDIZING CURRENT SOURCES** — over wide ranges, to unprecedented accuracy.
- **MONITORING PROCESS VARIABLES** — electrical parameters, temperature, strain, pressure, etc.

These new calibrators are the ultimate in accurate DC measurements, offering numerous benefits which yield the most reliable and flexible operation ever. Some of the more obvious benefits are low parts count for reliability, ease of programmable application for quality measurements with isolated data output with BCD input, and output options.

## DC VOLTAGE AND CURRENT SOURCES, MANUAL AND PROGRAMMABLE



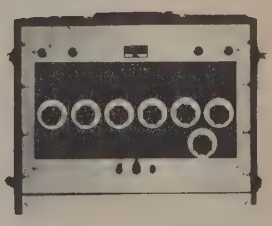


| Model | Outputs |
|---|---|
| *AVS-106 | 0 to ±12, 120, 1200V, 6 digits |
| DVS-106 | 0 to ±12, 120, 1200V at 35 ma, 7 digits |
| *ACS-106 | 0 to ±1.2, 12, 120 ma; 1.2, 12 Amps |
| DCS-105 | 0 to ±1.2, 12, 120 ma; 1.2, 12 Amps |
| DCS-106 | 0 to ±1.2, 12, 120 ma; 1.2, 120 Amps |
| *ACV-106 | 0 to ±1.2, 12 ma; 0-12V, 120 Volts |

| Accuracy | Stability | Linearity |
|---|---|---|
| To 2 ppm | To 5 ppm/30 days | To 1 ppm |

* Compliance Programmable

## VOLTAGE DIVIDERS



| Model | Accu. (ppm) | Lin. Resol. (ppm) | Stability (ppm/yr.) | Resistance (Kohms) | Max. Volts | Mode of Operation |
|---|---|---|---|---|---|---|
| VDR-106/7H | 1 (5 yr.) | 1 | 1 | 100 | 700 | Manual |
| VDR-106/7 | 1 (5 yr.) | .1 | .2 | 100 | 300 | Manual |
| VDR-307 | 1 (5 yr.) | .1 | 1 | 100 | 700 | Manual |
| VDR-307J | 1 | .1 | 1 | 100/110/120 | 700 | Manual |
| *RVD-106 | 1 | 1 | .5 | 100 | 200 | Prog./Manual |
| *RVD-126 | 1 | 1 | .5 | 100/110/120 | 200 | Prog./Manual |

* All RVD Programmable Dividers are standard with BCD input/output.

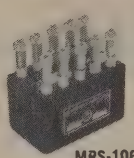
## HIGH VOLTAGE DIVIDERS/VOLT BOXES

The Julie High Voltage Dividers and Volt Boxes on the table below are used to "drop" high voltages to a level that traditional precision potentiometers and high impedance electronic voltmeters can safely measure (such as the Julie models PVP-1000S and PVP-1000C).

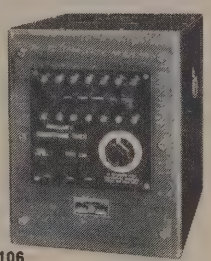
| Model | No. | Input Ranges Lowest | Input Ranges Highest | Input Imped. | Output Taps | Acc. (%) | 1 Year Stab. (%) |
|---|---|---|---|---|---|---|---|
| DV-1500 | 11 | 1 v | 1500 v | 1 Kohm/v | 1/1.5 v | .001 | .001 |
| DV-1000 | 7 | 1 v | 1000 v | 1 Kohm/v | 1/1.5 v | .001 | .001 |
| DV-1000B | 7 | 1 v | 1000 v | 1 Kohm/v | 1 v | .001 | .001 |
| HV-100/w | 1 | 100 Kv | 100 Kv | 1 Kohm/v | 1 v | .05 | .0015 |
| HV-100 | 1 | 100 Kv | 100 Kv | 4 Kohm/v | 1 v | .05 | .1 |
| KV-50/.01 | 1 | 50 Kv | 50 Kv | 1 Kohm/v | 1/10 v | .01 | .0015 |
| KV-25/.01 | 1 | 25 Kv | 25 Kv | 1 Kohm/v | 1/10 v | .01 | .0015 |
| KV-10/.01 | 1 | 10 Kv | 10 Kv | 1 Kohm/v | 1/10 v | .01 | .0015 |
| KV-10R | 1 | 10 Kv | 10 Kv | 1 Kohm/v | 1/10 v | .01 | .0015 |
| KV-VB/10 | 1 | 10 Kv | 10 Kv | 2 Kohm/v | 10 v | .05 | .005 |

## RESISTANCE REFERENCE

DMR



MRS-106



PRO-106

| Model | Absolute Resistance Values | Accuracy (ppm) | Room Temp. Eff. (ppm/°C) | Approximate Size (inches) |
|---|---|---|---|---|
| PRO-106 | 10 ohms to 1 Meg. | 8 | .1(0-28°C) | 10 x 14 x 15 |
| PRO-106L | .001 ohms to 10 ohms | 50-100 | .1(0-28°C) | 10 x 14 x 15 |
| MRS-106 | 100 ohms to 1 Meg. | 15 | 2.5/°C | 4 x 2 x 4 |
| MRS-105 | .1 ohms to 100 ohms | 30-100 | 2.5/°C | 4 x 2 x 4 |
| DMR Series | 10 ohms to 1 Meg. | 15 | 2.5/°C | 5 x 4 x 3 |
| BMR Series | 29,996,131,071 ohms | 15-50 | 5/°C | 5 x 4 x 3 |
| BDR Series | 100,000 ohms Max. | 15 | 5/°C | 5 x 4 x 3 |

## PRECISION RESISTANCE MEASURING SYSTEMS

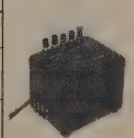
| ZTS-106 | 1.000, 1.018 + Delta,1.019 + Delta VDC 0 to 1000 μV (Delta); ±2 ppm Accur.; 1 μV Resol.; ±3 ppm/Mo. Stable |



## AC-DC THERMAL VOLTAGE TRANSFER STANDARDS

**TNB-102 Series**

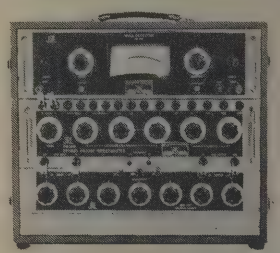
This set of two Thermoelement Modules (2.5 ma and 5 ma) and six Resistor Modules provide highest available transfer accuracy from 0.5 v to 1000 v up to 50 kHz.

Model TNB-102 Series Coaxial AC/DC Transfer Standards

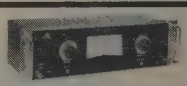
## POTENTIOMETERS

Through the use of POTENTIOMETER Plug-ins, the Multivider system is made into various precision voltage measuring systems. (Systems listed in the table below include null detector and voltage divider.)

| Range Volts | PVP-1000S Accuracy (w/self cal.) |
|---|---|
| 1000 | 8 ppm +1 ppm f.s. |
| 300 | 8 ppm +1 ppm f.s. |
| 100 | 8 ppm +1 ppm f.s. |
| 30 | 8 ppm +1 ppm f.s. |
| 12 | — |
| 10 | 5 ppm +1 ppm f.s. |
| 3 | 5 ppm +1 ppm f.s. |
| 1.2 | — |
| 1.1 | +1 μv (cell compar.) |
| 1.0 | 2 ppm +1 ppm f.s. |
| .12 | — |
| .012 | — |
| .0012 | — |



## NULL DETECTORS



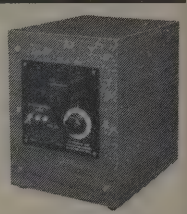
| Model | Ranges | Sensitivity | Dimensions |
|---|---|---|---|
| ND-106 | (9) 3 μv to 30 mv | .1 μv | 19 x 5¼ x 8 |

## VOLTAGE REFERENCES

**SATURATED STANDARD CELL OVENS**

The best voltage reference possible must meet two basic critical requirements —

1. Time performance; the three saturated cells used must have minimum output voltage change with time.
2. The enclosure must maintain its nominal temperature with time.

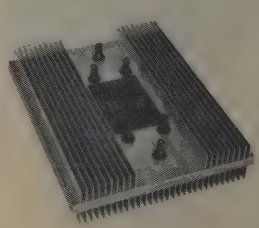


| Stability Specs | | Temperature | Time |
|---|---|---|---|
| SCO-106 | cells | .64 ppm/.01°C | 1 ppm/yr. max. |
| | oven | .01°C/day max. | .05°C/yr. max. |

## DIALABLE PRECISION DCV SOURCES

The GTX-300 Series is a high quality, compact, portable voltage source. Output settings on this 1 ppm resolution instrument range from 1 microvolt to 10 volts DC and can be made simply by dialing the desired value. Accuracies of from 0.001% to 0.005% can be ordered. Loads requiring up to 25 mA can be tolerated without accuracy deterioration. An output stability of ±3 ppm/24 hours is standard on all units.

## CURRENT SHUNTS



High quality shunts are high quality 4-terminal resistors especially designed to operate at relatively higher current levels without suffering appreciable resistance change. Most high ranges (50 A for example) are the finned heat-sink type. Most lower ranges are available in single and multiple-range (oil-filled) units. Accuracies up to .0025% are available although .05% or .01% are most typical. Yearly stabilities of .01% are typical and temperature coefficients are 5 ppm/°C or better. Ask for a data sheet.

| RCD-11 | 2/3 | 5 | | | .01 Hz to 10 kHz | 100 ppm | .02% | General Purpose Oscillator |

* Options are available to extend V+1 ranges of all power oscillators and amplifiers.

**DISTORTION ANALYZER**

| Model | Frequency Range | Distortion Resolution | Input Level | Features |
|---|---|---|---|---|
| ADS-104 | 10 Hz to 100 kHz | .001% | 1 to 300 VRMS | Fully Automatic, Auto-set-level, Auto-nulling, Auto-ranging, Digital Read-out. |

## PRECISION POLYPHASE OSCILLATORS/POWER OSCILLATORS

- High Power — to 50 VA per phase
- Low Distortion — to less than 0.02%
- Fixed or Variable Stable Frequency
- Adjustable Load Regulation
- Perfectly Suited for Gyro Testing

## POWER OSCILLATORS

- Accurate Digital Frequency Selection
- Stable Amplitude — less than 0.01% variation
- Stable Frequency — 10 ppm available
- Low Distortion — less than 0.05%
- Wide Frequency Range — up to 110 kHz
- Absolute Stability Regardless of Load
- Up to 50 VA Output

## POWER AMPLIFIERS

- Low Distortion — under 0.05%
- Stable Voltage Gain — to 1 ppm
- Wide Frequency Ranges — DC to 2 Mhz
- Adjustable Output Impedance
- Absolute Stability Regardless of Load
- Voltage or Current Regulation

## PRECISION SOURCES

- Stable Amplitude — less than 20 ppm variation
- Low Distortion — under 0.05%
- High Power Output — up to 200 VA
- Stable Frequency — less than 0.01% variation
- Wide Frequency Range — to 100 kHz at 1000 V
- Constant Voltage/Current—to 1500 V: to 40 Amps

## PRECISION OSCILLATORS

- Absolute Amplitude Accuracy — ±0.05%
- Amplitude Stability — ±0.01% month
- Output — from 11 Volts to 100 Milli-amperes
- Remote Sensing Available
- Quadrature Phase Accuracy — 0.05°
- Frequency Range — 10 Hz to 1 MHz
- Frequency Accuracy — to 0.1%

## ABSOLUTE CALIBRATORS FOR:

**Ammeters - Voltmeters - Wattmeters - Phasemeters - Digital Multimeters**

- Programmable Models
- Highest Accuracy Available
- 10 Hz to 1 MHz
- Compact and Lightweight
- Complete Systems Available

**ABSOLUTE CALIBRATORS**

| Model | Output Range | Accuracy DC | AC* | Frequency Range | Features |
|---|---|---|---|---|---|
| AC125/PA225 | 10 NV to 1211.11V | | 0.02% | 10 Hz to 1.1 MHz | Fixed Amplitude Quadrature Output |
| AC127 | 10 NV to 121.111V | | 0.02% | 10 Hz to 1.1 MHz | 120V to 1 MHz |
| AC128 | 10 NV to 121.111V | | 0.02% | 10 Hz to 1.1 MHz | Fully Programmable 120V to 1 MHz |
| AC129 | 10 NV to 121.111V | | 0.02% | 10 Hz to 1.1 MHz | Fully Programmable |
| AC150 | 0-600V | | 0.05% | 25 Hz to 10 kHz | Calibrates Volt, Amp and Watt Meters — Variable Phase |
| | 0-10 Amps | | 0.05% | | Absolute Power Factor |
| CS112 | 1 $\mu$a to 2.2 Amp | .005% | 0.02% | 10 Hz to 100 kHz | Bi-polar DC |

# ATTENUATORS

## IN-LINE ATTENUATORS

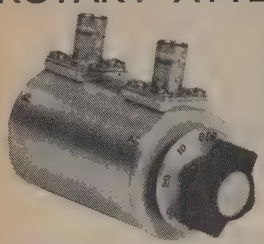
STANDARD 9 STEP: 9¾"Lx2$\frac{1}{32}$"Hx1¼"W
MINIATURE 9 STEP: 6"Lx1$\frac{3}{32}$"Hx⅞"W
CONNECTORS: BNC, N, SMA, F
TEFLON SWITCHES, GOLD CONTACTS
9 STEP AND 6 STEP MODELS

FREQUENCY DC: 1000MHz, 1 WATT
HIGH ACCURACY, LOW INSERTION LOSS
IMPEDANCE: 50, 75 AND 90 OHMS

TYPICAL SPECIFICATIONS, OTHER MODELS AVAILABLE

| Model | Size | Range dB | Steps dB | Z Ohms | Insertion Loss dB |
|---|---|---|---|---|---|
| 432<br>439 | STD<br>MIN | 0-101 | 1 | 50 | .7 1 GHz<br>.5 1 GHz |
| 1/432<br>1/439 | STD<br>MIN | 0-22.1 | 0.1 | 50 | .2 .5 GHz<br>.5 1 GHz |
| 460 | MIN | 0-132 | 1 | 50 | .7 1 GHz |
| 447 | MIN | 0-102 | 0.5 | 75 | .4 1 GHz |

## ROTARY ATTENUATORS



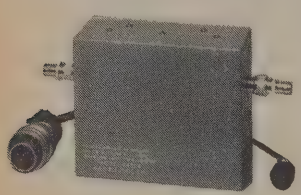
DIA.: 1½"
LENGTH: 1¾" AND 2¼"
WEIGHT: 8 OZ.

### HIGH ACCURACY, LONGLIFE, MINIATURE

FREQUENCY: 2 GHz
ATTENUATION RANGE: 0-70 dB 10 dB STEPS
0-10 dB 1 dB STEPS
0-1 dB .1 dB STEPS
IMPEDANCE: 50 AND 75 OHMS
POWER: 0-70 dB .5 WATTS, OTHERS 1 WATT

## PROGRAMMABLE STEP ATTENUATORS 0-1.3 GHz

**MODEL 4430 —**
**9 STEP 0-135 dB IN 1 dB STEPS**
**(Other Attenuation Ranges Available)**



SWITCHING SPEED:
20 ms — 117V POWERED
RF POWER: 1 WATT
INSERTION LOSS:
2 dB TO .5 GHz
.5 dB TO 1 GHz
DIMENSIONS:
5¼" x 2⅛" x 4¼"
WEIGHT: 3.5 LBS.

MODEL 4490 — LOGIC ADAPTER
PROVIDES TTD LOGIC LEVEL CONTROL FOR 4430

## SLIDING BLOCK ATTENUATORS

**MODEL 461B**

FREQUENCY RANGE: DC TO 4 GHz
ATTENUATION STEPS: 9 STEPS
(dB): 1, 2, 3, 6, 10, 20, 30, 30, 30
CONTROLS: SLIDE SWITCHES
DIMENSIONS: 8⅜" x 2⅜" x 1⅞", PLUS CONNECTORS
WEIGHT: 2.5 LBS.

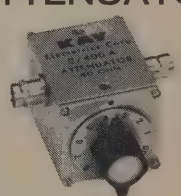
## 2000 AND 2100 ATTENUATORS

**PROGRAMMABLE CONTINUOUSLY VARIABLE ATTENUATOR**

SOLID STATE, FAST ACTING, 2-500 MHz
OVER 76 dB RANGE, INSERTION LOSS 6 dB MAX.
CONTROL VOLTAGE:
0-12V DC TO 30 KHz
SUPPLY VOLTAGE: 12V
USABLE AS AN RF SWITCH OR AM MODULATOR

MODEL 2000 — 75 OHMS
MODEL 2100 — 50 OHMS
DIMENSIONS: 4⅛" x 2⅛" x 1½"
WEIGHT: 1 LB.

## CONTINUOUSLY VARIABLE ATTENUATORS



ATTENUATION RANGE: 12 dB
CONTROL:
ROTARY CONTINUOUSLY VARIABLE
ACCURACY: 0.3 dB
FLATNESS: 0.2 dB
DIMENSIONS: 1½" x 2" x 2$\frac{5}{16}$"

| Model | Frequency Range | Insertion Loss | Maximum VSWR | Impedance |
|---|---|---|---|---|
| 0/400 | DC-500 MHz | 1 dB | 1.3:1 | 50 ohms |
| 0/410 | DC-400 MHz | 1 dB | 1.35:1 | 75 ohms |

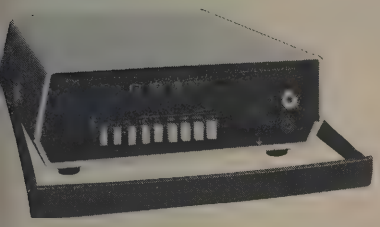
# KEITHLEY

# MULTIMETERS AND SYSTEMS

## Digital Multimeters



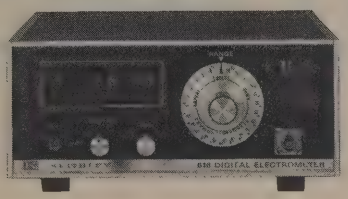
- ☐ **10 Models.**
- ☐ Choice of 3½, 4½, 5½ and 6½ digits.
- ☐ **Low cost.** Prices start at $199 for 4½ digits.
- ☐ Bench style with extra-large, easy-to-read displays.
- ☐ **Accuracy** to 10 ppm.
- ☐ Exceptional reliability.
- ☐ **IEEE 488** compatibility with optional interface.
- ☐ Analog and digital outputs.
- ☐ **Automatic,** manual and programmable ranging.
- ☐ Line operation standard, battery optional.
- ☐ **TRMS,** Hi-Lo Ohms and other features.

**For more right-now information, call our DMM hotline**

**(800) 321-0560.**

In Ohio call (216) 248-0400.

## Scientific Instruments



In addition to the standard DMM line, Keithley makes a broad line of highly sensitive measuring instruments.

If you measure dc

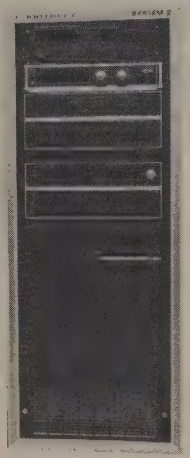
- ☐ **picoamperes**
- ☐ **nanovolts**
- ☐ **micro-ohms**
- ☐ **gigaohms**

we have the instruments you need.

## Scanners (Multiplexers)

- ☐ **Thermocouple,** low-current, low voltage, and general-purpose relay scanner cards.
- ☐ 100-channel and 10-channel mainframes.
- ☐ **Priced low** as $38 per channel—complete.
- ☐ Ideal for scanning, controlling, matrixing.
- ☐ **IEEE 488** compatibility with optional interface.

## Test Systems



Automated systems for high-sensitivity dc and low-frequency ac test and measurement.

**System 1** is a low-cost, versatile, programmable calculator-controlled measuring system for data acquisition and reduction, and control of experiment or process. Plug-to-plug component compatibility. IEEE-488 interface availability. Several peripherals available. Prices start at $8300 for complete systems.

**System 2** is a computer-based system designed for fast, accurate, economical automated testing. A typical turnkey implementation is System 2/LPT, a linear parametric test system for semiconductor testing at wafer, discrete or packaged levels. A complete range of measuring instruments, sources, and peripherals is available. Prices start under $40,000, including complete software package.

If you'd like detailed product data and ordering information, send for these brochures and our complete catalog:

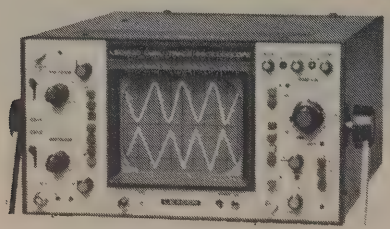
# LEADER
## Test Instruments

*More Than 50 Fine Quality Test Instruments for Industry, Education and Service*

# OSCILLOSCOPES

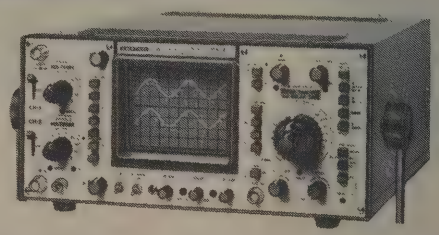
*A Broad Range of Applications . . . for Accuracy, Dependability and Cost Effective Economy*



MODEL LBO-520

### The 30MHz Dual Trace Oscilloscope With Delay

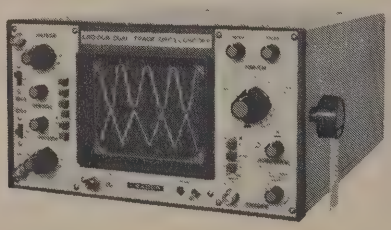
- 5mV sensitivity facilitates accurate signal viewing from video cameras and other low level sources.
- Built-in delay line makes it easy to view pulse leading edge.
- Single shot trigger (CH-1, CH-2) captures transient phenomena — no guesswork, no "double-takes".
- 5" P-D-A CRT assures brighter, sharper trace at all sweep speeds.
- 20nS/cm sweep capability plus 11.7nSec rise time lets you observe the fastest signals.



MODEL LBO-515

### 25MHz Dual Trace/Dual Time Base Oscilloscope, Variable Delay

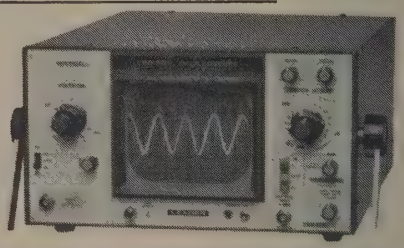
- Built-in delay circuitry, continuously variable, from 1μSec to 5Sec . . . plus 5mV/Div. Vertical Sensitivity with ±3% acc.
- Rectangular 8x10Div. CRT in a horizontal format, with internal graticule.
- Selectable synchronization — automatic, normal, single trace and reset modes with H-F rejection.
- 14nSec. rise time; plus X10 sweep magnification.
- CH-1 or 2 trigger; HF filter; and TV sync — all emphasize a broader range of capabilities, for the best in a cost payout ratio.



MODEL LBO-508

### The 20MHz Dual Trace Oscilloscope

- Add & subtract modes (with CH-2 invert) permits quick analysis of signals, amplitude, etc.
- Front panel X-Y operation makes it ideal for phase-shift, analysis, sweep alignment and vectorscope service.
- 17.5 nanosec rise time for easy viewing of high speed pulses and wave forms.
- Automatic trigger from either channel, including TV sync, extends convenience and versatility.



MODEL LBO-507

### The Multi-Purpose 20MHz Triggered Oscilloscope

- Automatic triggered circuitry guarantees maximum display stability, with minimum adjustments.
- Outstanding trigger sensitivity over entire operational range.
- 10mV vertical sensitivity and 17.4nSec rise time helps achieve lab grade performance.
- X5 magnification (±5%) delivers 100nS/cm maximum speed for easy, precise readings.

# MULTIMETERS

*Accuracy, Reliability & Portability for Use Everywhere*

MODEL LT-70B

### Extra Versatile V-O-M

- Protected against overload and polarity reversal.
- Reads as low as 0.25V and 50μA, full scale.
- Measures up to 2.5A, DC and AC.
- Measures up to 50 Megμ, 5 ranges.
- Measures 8 DC voltage ranges, 20,000Ω/VDC and 8,000Ω/VAC.
- Battery operated, two "AA" 1.5V cells.

MODEL LV-71

### Solid State, FET V-O-M

- VTVM accuracy with battery operated, portable convenience.
- Dual FET differential amplifier circuitry
- Diode overload meter protection.
- Instant-on operation, polarity reversal switch; battery checkout.
- 12 Voltage 4 Current and 4 Resistance ranges.
- 10MegΩ impedance.

# When Quality Counts . . .

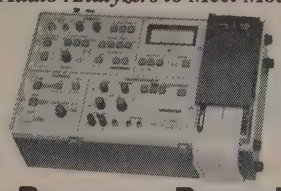
# SYSTEMS ANALYZERS

*Advanced Design Audio Analyzers to Meet Modern Demands*

MODEL LAS-5500

## 7-IN-1 Audio Analyzer

- ***Oscilloscope*** . . . 5MHz b/width; 10mV/Div. defl sensitivity.
- ***Oscillator*** . . . 10Hz — 1MHz, 5 ranges, less than 0.05% dist.
- ***Attenuator*** . . . 0 to 110dB range in 0.1dB steps.
- ***AC Meter*** . . . from 30$\mu$V to 100V, 12 steps; ±3% accuracy.
- ***Wow & Flutter*** . . . 3KHz & 3.15KHz; 15mV to 10Vrms input range calibrated for CCIR, DIN and JIS standards.
- ***Driftmeter*** . . . 3KHz, ±0.1% test frequency source, 0.3Vrms signal output; 3.15KHz, ±10% measurement range; ±5% drift measurement tests.
- ***Dummy Load*** . . . 8Ω resistance; 30W, 50W, 100W power.



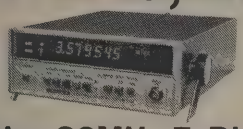
MODEL LFR-5600

## Frequency Response Recorder

- Standard signal freq's of 1KHz to 333Hz for automatic start, stop & response plotting.
- Selectable 25dB, 50dB or linear scales.
- Sweep oscillator output has 20dB and 40dB attenuation for high sensitivity testing.
- Use external signals to check response.
- Use meter as sweep frequency or voltage indicator for calibration.
- Use chart section as a direct current recorder (10mV/cm).
- Oscilloscope output for scope display.

# COUNTERS, BRIDGES, TESTERS

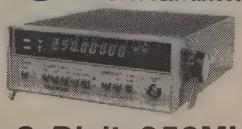
*State-of-the-Art Design to Meet Advanced Requirements*



MODEL LDC-822

## The Sensitive 80MHz 7-Digit Counter

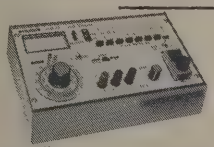
- 80MHz capability for a variety of uses — laboratory, production and service.
- Period Function determines precise pulse width, increases resolution.
- Bright 1/2" numbers asure easy readability.
- Pushbutton Gate Time 20mVRMS sensitivity — variable.
- 10MHz Time Base assures high 5ppm accuracy.
- High reliability LSI Circuitry.
- Overrange and Gate Time indicators.



MODEL LDC-823

## The Precise 8-Digit, 250MHz Counter

- 250MHz capability for variety of applications.
- 20mVRMS sensitivity variable with pushbutton gate time.
- Period Function increases resolution.
- 5ppm accuracy; 10MHz time base.
- 1MΩ or 50Ω impedance.
- Easy to read, bright 1/2" numbers.
- Overrange and gate time indicators.



MODEL LCR-740

## Transistorized LCR Bridge

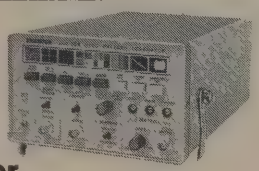
- Highly accurate 3 digit readout.
- Measure Inductance (L), Capacitance (C) and Resistance (R), within –0.5% accuracy.
- Range expandable — built-in 10% overrange.
- Loss Factor scale (D).
- Battery, or AC adapter operation.

MODEL LDM-851

## One-Button Ranging Digital Multimeter

- Bright 1/2" LED display for high visibility 3 1/2 digit readout.
- Single pushbutton range selection covers 16 ranges; makes "knob twisting" obsolete.
- Total, self-contained portability with 4 "C" cells, AC line flexibility — AC adapter included.
- Overload protection for reliable, long term performance.
- 0.5% accuracy for many applications, e.g., design, development, q.c. and service.

# COLOR BAR GENERATORS

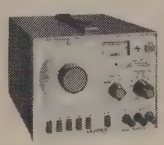


MODEL LCG-396

## The Video Problem Solver.

- Provides all signals to precisely time, test, evaluate all MATV, CATV, color and B&W video systems.
- Chroma & Luminance variable by 20%; set up by 10%.
- Full-field or IQW insertion; on-off for chroma and luminance.
- Better checking and adjusting of purity and white balance via red, blue, green, white rasters.
- Adjustable scanning control for interlaced or progressive scan — eliminates flicker.
- 75Ω Video (1 V fixed) and RF output for all TV and VTR units. Equalizing pulse phase locked to color subcarrier.

# GENERATORS



MODEL LAG-125

## Low Distortion Audio Generator

- Clean square waves test transient response.
- Low distortion sine wave output — less than .03%.
- Burst signals for loudspeaker tests.
- Pushbutton frequency ranges switching, 5 steps.
- 0 to 50dB calibrated attenuator.
- Frequency synchronization from external source.

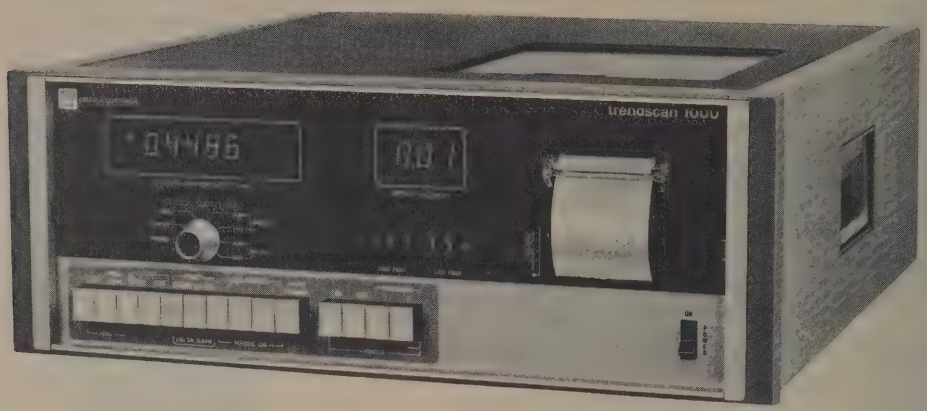
# Leeds & Northrup's Trendscan 1000 Data Acquisition System



## ...lets you speed read your data with logging, trending and alarming up to 1000 points

### Features

- **Scanning, alarming, logging up to 1000 points.**
- **3+ or 4+ digit measurements . . . Single or Multi-range.**
- **Linear and non-linear inputs . . . TC, RTD, V, mV, mA and contact closure.**
- **Easy programming . . . range selection, point skip, alarm commutation.**
- **Integral printer . . . ribbonless, non-impact, 21 alphanumeric columns.**
- **Unique Trend Mode . . . prints bar graphs (Trendbars) for trending or profiling.**
- **Full alphanumeric printing of legends, status and static data.**
- **Built-in clock.**
- **Six internal digit alarms . . . or 128 with external Trendscan Alarm Processor.**
- **Remote location of input switching assemblies . . . up to 3200 feet (1000 meters).**
- **Low thermal input switching relays . . . convenient isothermal input connectors.**
- **Self-test of each range . . . independent of inputs.**
- **Flexible input/output peripheral interface.**

The Trendscan 1000 Data Acquisition System provides a highly flexible means of scanning, alarming, trending and/or logging up to 1000 inputs—thermocouples, RTDs, transmitters, EMF signals, current signals and/or contact closures. Single ranges or multi-ranges (3) are available with 3+ or 4+ digit resolution. Multi-range units may include any combination of linear or non-linear signals including TC, RTD, mV, V, mA or contact closure.

A complete 20 point system can be provided in a single compact (7″ × 19″ × 22½″) chassis for bench use or rack mount. This includes two 10 point input switching relay cards with isothermal connectors (5 inputs per card for RTD)—basic point selection and scanning controls with point display—signal conditioning, A/D conversion, linearization and measurement display—an integral printer for data logging and a clock which provides system or real time with controls to initiate a periodic data log at intervals up to 8 hours.

**INPUT SWITCHING** When more than 20 inputs are needed, input switching relays and input connectors are supplied in Model 2701 Trendscan Input Frames which accommodate up to 10 input cards (100 inputs) per frame. Up to 10 frames can be supplied for 1000 inputs. These frames may be located up to 3200 feet (1000 meters) away from the Trendscan 1000 for convenient and economical installation near the input elements.

Point selection signals are supplied to each of the 2701 Input Frames through a 42 conductor matrix cable from the Trendscan 1000 where the point selection and scanning controls are located. A set of input signal leads for each range are connected between the 2701 Input Frame(s) and the 2700 Trendscan. No power connections are required for the Input Frames.

**ALARMS** Up to 6 bipolar digital alarms and a per point alarm programming feature are available. The Trendscan 1000 can be specified with 1, 2 or 3 internally mounted alarm modules, each with two independent alarms. A module has two sets of digital switches to set a 4 digit limit corresponding to the 4 most significant digits of the measurement. Each alarm limit has a separate sense switch for HI or LO limit, and a polarity select switch. One reset switch is provided on each module common to both alarms. Each alarm has an LED indicator and a SPDT output relay connected to screw terminals at the rear of the Trendscan.

When more than 6 alarms are required, the 2783 Trendscan Alarm Processor is available in place of the internal alarms for up to 128 different dual level alarms.

**PROGRAMMING** Following a very simple sequence, any one of up to 250 input points may be addressed and assigned to any one of three available ranges (except RTD ranges which are assigned in groups of 5 inputs). Any point may be skipped or assigned to any one, none or all of the 6 internal alarms. Points programmed for point skip do not cause a loss of time during the scan cycle.

Systems with more than 250 input points are programmed in a similar manner except that range, point skip and alarm assignments are made in groups of 5 points rather than on a per-point basis. All programming is stored in solid state memory (RAM) with a continuously charged battery back-up for 1000 hour program retention without line power.

LEEDS & NORTHRUP

North Wales, Pa. 19454
(215) 643-2000
Attn: MD 337-K

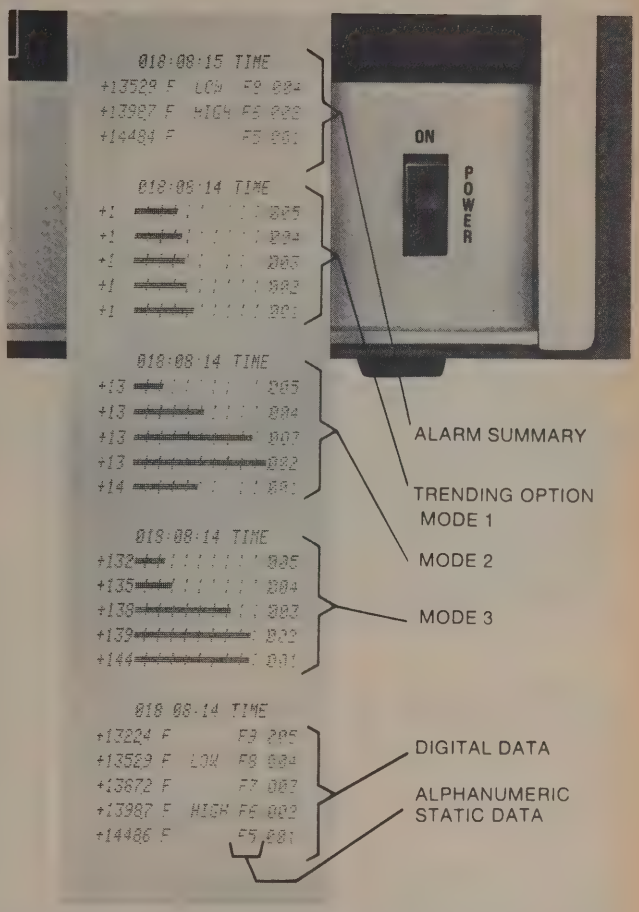
**PRINTOUT** Trendscan 1000 systems offer unique capabilities for data presentation. An integral ribbonless printer prints out point identification, optional 4 character static data, status reports on inputs (e.g. OPEN or OVLD) and alarms (e.g. HIGH or LOW), four or five digit presentation of measured variable with polarity and legend plus an independent line stating time of printout, all arranged in an orderly format. In addition, an exclusive Trend Mode feature is available which graphically presents the least significant digits in the measurement as a bar graph (Trendbar) preceded by a numeric printout of the most significant digit(s). Three modes of increasing resolution are available for the Trendbar graph in which 1, 2 or 3 of the most significant features are suppressed and printed out, and the next two digits are presented in the Trendbar format.

The three modes of digital suppression allow successively higher resolution with the Trendbar for critical analysis in analog form. Best resolution is achieved in Mode 3 which can be as high as 1 part in 40,000 on a 4+ digit instrument or 1 part in 4,000 on a 3+ digit instrument, depending on the total range selected.

Printout of any single point, group of points or all points, may be initiated either manually, in response to an alarm, or on a preset time interval in any one of the formats desired. In addition, detection of alarms can initiate a printout. A summary of printout of all points in alarm can be manually initiated.

**INPUT/OUTPUT INTERFACE OPTIONS** Where data records other than the integral printer are needed, interface options are available for: Paper tape punch, 7 Track Magnetic Tape, 9 Track Magnetic Tape, Teletype Writers, Line Printers, CRTs, Programmable Calculators, and RS-232-C/TTY interface for full bidirectional control.

Where the measurement data presented on the integral printer is the only record desired, a limit interface to other equipment can be provided. This option permits remote signals to control start of scan and scan-rate. Ouput from the Trendscan 1000 interface to external equipment is TTL compatible, serial by character, and includes measurement data with the following point status information: high or low alarm, open input or overload, last point indication, scan point and next scan point advance indication. Provision is also made for 4 digits of static data entry from external BCD switches.



# EXPANDED TRENDSCAN SYSTEMS

The Trendscan 1000 can be combined with a Trendscan Alarm Processor to create a Data Acquisition System with extensive and flexible alarm capability. The Trendscan Alarm Processor is conveniently packaged in a 7″ × 19″ rack chassis and can be mounted with the Trendscan 1000 and related Input Frames in a variety of cabinets to provide a compact totally integrated system with broad data measurement and surveillance capacity.

The Trendscan Alarm Processor provides 64 or 128 programmable single or dual level alarms. Any one or more of the inputs from the Trendscan 1000 can be assigned at random to any one of these alarms.

Responses to alarms can take the form of illuminated LED indicators on the front panel, relay contact closures (made through screw type terminals on the rear of the chassis), and a serial BCD output.

Input and alarm assignments are programmed through an array of programming switches on the front panel into a solid state memory in the Alarm Processor—a memory which has a 1000 hour program retention time in the event of power loss. A locking switch with a removable key prevents tampering after the alarms have been programmed.

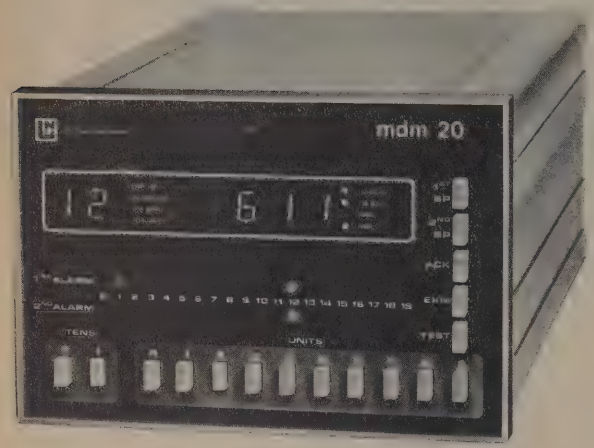
# Leeds & Northrup's MDM20 Multipoint Digital Monitor



## ...lets you scan up to 20 points for alarms at 15 points a second

- **15 points-per-second measurement, digital output and alarm scanning. Analog output available.**
- **Simultaneous alarm scanning of all 20 sensor inputs and display of measured value of one input in engineering units.**
- **Low power CMOS circuitry.**
- **Solid-state or reed-relay switching.**
- **TC, mV, Volt, mA, or RTD inputs.**
- **Noise frequency locked analog-to-digital conversion for high noise immunity.**
- **All digital reference junction compensation — optional field mountable remote RJ sensor.**
- **Field programmable point skip & alarm skip.**
- **CMOS microprocessor based supervision, scanning and linearization.**
- **Up to 40 field-programmable discrete alarm levels, two levels per point.**
- **Exclusive optional examination function — sequences display through input values or alarm set-points at slow speed (programmable) with simultaneous high-speed alarm scan.**

The MDM 20 multipoint digital monitor scans up to 20 points of measurement for alarm conditions at the rate of 15 points a second while simultaneously monitoring the value of the most critical point, or any other point in the system. Recall buttons on the face of the instrument allow the alarm set-point value to be called up for display in place of the measured value.

LED alarm displays include 2 common alarm indicators and up to 40 indicators of alarm status, plus LED indication of over-range, open circuit, set-point skip, point skip and range. Each point is individually assigned up to two alarm values. These alarm values as well as any desired point skips or alarm skips are programmable in the field. The MDM 20 is available in single-range and dual-range versions. The range assignment for each point on the dual-range models is also field programmable.

Front panel controls include point selection pushbuttons, a display "test" button and an "acknowledge" button for resetting the common alarm relay. An optional "examine" pushbutton permits scanning through all inputs on a sequential basis at any of three rates of speed. This allows observation or logging of either the value of each input or its alarm set-point. With this operation, as well as all others, the background alarm scan continues uninterrupted at the same rate of speed. If an alarm occurs, the point going into alarm is immediately accessed and displayed. The value at the time of alarm is locked in the display window interrupting any previous display mode. Pressing the "acknowledge" button clears the display and allows the previous display mode to resume.

The circuit design of the MDM 20 Monitor incorporates low power CMOS logic. The measurement technique uses a noise-frequency locked, dual-slope integrating analog-to-digital converter which provides high noise immunity. All supervision, scanning, reference junction compensation, and linearization functions are CMOS microprocessor based. Inputs to the instrument can be TC, mV, V, mA, or RTD signals, and switching can be either solid-state CMOS switches or reed relays.

### MDM 20 SPECIFICATIONS

**Display —**

Large seven-segment LED displays.
3+ digits of measured value or alarm set-point.
2 digits of point position.
Up to 40 LED indicators of alarm status.
2 common alarm LED indicators.
LED indication of over range, open circuit, set-point skip, point skip, and range.

**Alarms** — 1, 2, or 4 sets of bipolar 3+ digit setting switches or 40 diode-pin programmed set-points which can be programmed H, HH, L, or LL. Each point can be programmed for up to 2 alarms.

**Common Alarm Relays** — 2 common alarm relays, one manually reset and one automatically reset, both SPDT, max. ratings 10 VA, 220 V a-c (RMS), or 120 V d-c, 500 mA (resistive load).

**Ranges** — Single or dual.

**Number of Inputs** — 20

**Input Types** — Linear and non-linear including TC, RTD, V, mV, and mA.

**Input Fault Detection** — Each point checked prior to each measurement.

**Calibration Accuracy** — (25 ±1 C, 24 Hours) Typical overall ±0.05% of range ±1 digit.

**Temperature Coefficient** — (±0.005% of reading+0.002% of range) per degree C.

**Scan Rate** — 15 pps @ 60 Hz (12.5 pps @ 50 Hz).

**Common Mode Rejection** — 120 dB @ 50/60 Hz with 100-ohm line unbalance.

**Normal Mode Rejection** — 60 dB @ 50/60 Hz (±5% nominal).

**Ambient Temperature Range** — +5 to +45 C after 10 minute warmup.

**Humidity** — 5 to 90% RH, 45 C non-condensing.

**Input Power** — 40 Watts maximum.
100, 120, 220, 240 V a-c ±10%, 50 or 60 Hz.

**Dimensions** — DIN standard 144 mm. (5.67") high × 216 mm. (8.50") wide × 473 mm. (18.62") deep; weight approximately 8 kg. (17.6 lbs.)

# CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
# DER PRODUKTKATALOG FÜR ELEKTRONIKER
# ELECTRONIC ENGINEERS CATALOGUE

## The 1978 edition is out...and the response is in...
## IMMEDIATE AND OVERWHELMING

## ACCEPTANCE

The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to—and from—Western Europe.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 product headings & cross-references alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

## mi FM/AM SIGNAL GENERATORS

| DESCRIPTION | FREQUENCY | FEATURES |
|---|---|---|
| FM/AM SIGNAL GENERATOR<br>Model 2016 Series | 10kHz to 120MHz | Covers 10kHz to 120MHz in 12 fundamentally generated frequency bands for spurious free output. AM to 100%, FM to 75kHz deviation. Total level accuracy ±1dB, max. output 2V into 50Ω. Low leakage permits accurate sensitivity measurements down to 0.1μV. Special versions available with preset 150Hz pilot tones. |
| FM/AM SIGNAL GENERATOR<br>Model 2002B | 10kHz to 88MHz | 0.1μV to 1V ±dB, fully solid state, AM variable to 100%, FM deviation ±1kHz to ±50kHz max. dependent upon range. Incremental frequency controls with discrimination of 0.025% and direct readout in kHz. Xtal calibrator. External frequency shift permits phase mod. or phase locking. Digital Synchronizer available. |
| AM/FM SIGNAL GENERATOR<br>AND SWEEP GENERATOR<br>Model 2008 | 10kHz to 510MHz | This unique combination Generator/Sweeper provides both facilities without sacrifice to the precision quality of either function. Eleven bands with 1:1.5 cover span from VLF thru UHF. Output 0.1μV to 100mV into 50Ω. Stability 5 p.p.m. Comprehensive FM, AM and sweep facilities provided on all bands. Full modulation facilities may be retained in the sweep mode. |
| SYNTHESIZED AM/FM<br>SIGNAL GENERATOR<br>Model 2020 | 50kHz to 520MHz | **NEW: (Illustration on Cover)** Provides comprehensive CW, AM and FM facilities. All operating functions including carrier frequency, output level, modulation can be controlled from front panel or by remote programming. Exceptional sideband noise of −130dBC/Hz at 20kHz from carrier make unit ideal for automatic test systems for receivers. |
| FM/AM SIGNAL GENERATOR<br>(6625-00-913-7223)<br>Model 995B/Series | 200kHz to 220MHz | 0.1μV to 100mV. Calibrated ΔF. Step attenuator, Crystal standardized; extremely stable. Deviation ±600kHz on top bands. Has simultaneous FM & AM. Also available for narrow band working FM spurious less than 25Hz Model 995B/5. |
| FM/AM SIGNAL GENERATOR<br>Model 2015<br>Model 2015/1 | 10MHz to 520MHz | Covers 10MHz to 520MHz in 11 bands with discrimination permitting tuning to narrow band receivers. FM deviation 10kHz and 100kHz. AM to 80%. Precision ALC eliminates need for external set carrier control. Fundamental signal with low spurious content. Can operate from 24VDC. Portable. 5½" high 11" wide. Special narrow deviation. Model 2015/1 features deviation ranges 2.5, 5 and 25kHz peak deviation. |
| FM/AM SIGNAL GENERATOR<br>Model 2015/2 | 10MHz to 520MHz | Transistorized replacement for Model 1066B/6. Automatically leveled output 0.1μV to 100 mV; internal modulation at 1 kHz and 5 kHz, FM deviation to 400 kHz, AM to 80%; No non harmonic spurious; Stability .002% 5 min. |
| LOW NOISE VHF/UHF<br>FM SIGNAL GENERATORS<br>Models 2011-2012-2013 | 130MHz to 180MHz<br>400MHz to 520MHz<br>800MHz to 960MHz | Highly stable low noise units for testing narrow band mobile receivers. Velvet vernier tuning. Infinitesimal leakage. Noise less than −140dB/Hz, VHF/UHF; −125dB/Hz, 800 to 960MHz, 20kHz from carrier. Output level 0.01μV to 100mV into 50Ω FM deviation to ±30kHz $f_m$ 300Hz to 3kHz. |

## mi AM/FM MODULATION METERS

| | | |
|---|---|---|
| FM DEVIATION/<br>AM MODULATION METER<br>Model 2300A (USA)<br>(6625-00-480-8706) | 4MHz to 1000MHz<br>to 2500MHz using ext.<br>oscillator | Wide range, mod. freq. up to 200kHz; deviation ranges ±1.5, ±5, ±15, ±50, ±150, ±500kHz. Local oscillator can be xtal locked, external oscillator can be used. De-emphasis 50μsec. 75μsec. switch selected. FM accuracy ±3% for deviation up to ±500kHz $f_m$ 30Hz to 200kHz. AM modulation two ranges 30% and 100% modulation frequencies 30Hz to 50kHz (carrier 4 to 350MHz). |
| FM DEVIATION/<br>AM MODULATION METER<br>Model 2300B | 4MHz to 1200MHz | Measures FM deviation to 500kHz, AM depth to 95% at carriers up to 400MHz. Very low internal noise allows narrow deviation measurements. Filter for noise measurement. De-emphasis 50μS, 75μS and 750μS. Distortion and channel separation on FM stereo meets FCC testing requirements. |
| AM/FM MODULATION METER<br>Model 2304<br>(6625-01-033-5835) | 25MHz to 1000MHz | Completely automatic tuning and level setting. Measures FM on ranges 1.5 kHz to 150 kHz, AM 30% and 100% for modulating frequency 50 Hz to 9 kHz. Accuracy 3%. Optional internal rechargeable battery. |
| PROGRAMMABLE FM/AM<br>MODULATION METER<br>Model 2301A | 4MHz to 1000MHz | FM deviation in six ranges from ±1.5kHz to ±500kHz $f_m$ 30Hz to 200kHz demodulated output distortion 0.25%. AM 30% and 100%. Automatic internal carrier level setting. |

## mi MOBILE RADIO TEST GEAR

| DESCRIPTION | FREQUENCY | FEATURES |
|---|---|---|
| PORTABLE AUTOMATIC MODULATION METER Model 2304 | 25 MHz to 1000 MHz | Completely automatic tuning and level setting. Measures FM on ranges 1.5 kHz to 150 kHz, AM 30% and 100% for modulating frequency 50 Hz to 9 kHz. Accuracy 3%. Optional internal rechargeable battery. |
| MOBILE RADIO SIGNAL GENERATORS | All Mobile Bands | Special low noise and general purpose signal generator series for all bands. 10kHz thru 960 MHz. See Signal Generator Section. |
| AUTOMATIC DISTORTION METER Model 2337A | 20Hz to 20 kHz | Measures distortion down to 0.01% at signal level down to 100mV simultaneously with level with no tuning adjustments. Ideal for all audio testing including SINAD. |

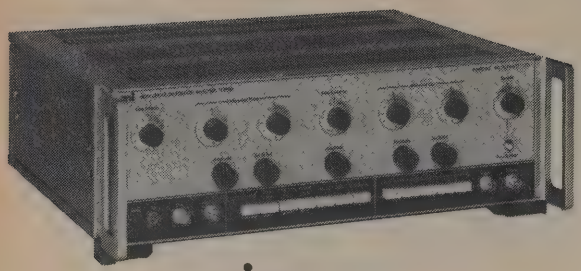
## mi DIGITAL COMMUNICATIONS — P.C.M. TEST GEAR

| | | |
|---|---|---|
| MULTIPLEX TEST SET Model 2807A | Voice Channel | Both sinewave and pseudo random noise stimuli available to measure channel gain, frequency response, idle channel noise, gain linearity, quantization distortion and interchannel crosstalk. National and International models available. |
| CABLE SIMULATOR Model 2825 | 1.5 to 2 M Bits/s | Provides close approximation to loss and phase characteristics of cable for performance testing digital regenerators. Comprises 16 switched passive networks to simulate various cable spans. |
| DIGITAL TRANSMISSION TEST SETS | 1.5 to 274 M Bits/s | Full range of test instruments to meet European CEPT 30 channel PCM Transmission systems. Includes Digital Error Detector, Pattern Generator and SLMS, P-R Generators and Error Rate Test Sets and Complete Regenerator Test Systems. |
| DATA LINE ANALYZER Model 2809 | 300Hz to 3400Hz | Used for testing data transmission lines and links; measures peak-to-average rating (PAR), frequency response and system noise level. Has correction for phase-intercept distortion. |

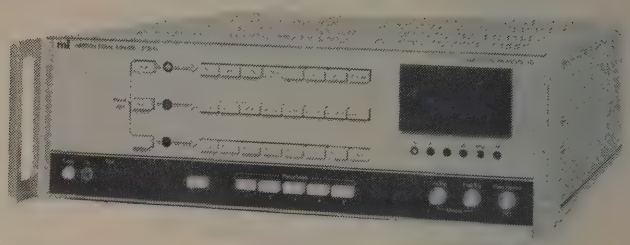
## mi INTERMODULATION AND BASEBAND TEST GEAR

| | | |
|---|---|---|
| NOISE LOADING TEST SET (6625-00-965-8625) (AN/GSM 161A) Model 2090A | 12 kHz to 12.388MHz (i.e. up to 2700 channels) | Solid state unit has built-in standardizing noise source in receiver for gain setting, out-of-band testing, etc. Includes noise generator, receiver and a choice of many different filters. NPR measurements can be made up to 75 dB. |
| NOISE LOADING TEST SET (6625-00-591-8383) Model 2090B | 12 kHz to 12.388MHz | Designed to meet latest CCIR and CCITT accuracy requirements (Recommendation 399-1 Oslo 1966). Includes ALC on generator; suitable for use with A or B series filters. |
| FILTER EXTENSION UNIT Model 2099AB | | This filter extension box can be added to any 2090A or 2090B system to provide accommodation for up to nine extra high, low or band stop filters and six extra band pass filters with oscillators. Minor modification required to existing generators and receivers to provide access. Simple field modification kits available. |
| AUTOMATIC WHITE NOISE TEST SET Model 2090C | 6 kHz to 12.360 MHz | The automatic alternative to Model 2090B. Provides digital readout in all commonly used measurement units. In programmable mode all control transfers to auxiliary computer or optional Remote Control unit TK2085. Ideal for design, manufacturing, commissioning and maintenance of FDM systems, particularly when rapid testing is critical. Suitable for A or B series filters. |
| HF SPECTRUM ANALYZER Model 2370 (50Ω) Model 2370/1 (75 Ω) | 30Hz to 110MHz | Comprehensive spectrum analyzer system with dispersion from 20Hz/div to 100MHz full width, resolution 0.1 dB, filter bandwidths from 5Hz to 50KHz, displayed dynamic range 100dB, 10 x 12 cm flicker-free digitally stored display, frequency measurement to counter accuracy. Built in tracking generator for Network Analysis. |
| TWELVE CHANNEL NOISE GENERATOR (6625-00-948-4724) Model 7816A | 300Hz to 3400Hz | Generates twelve non-coherent channels of Gaussian noise from twelve separate solid state sources. Output: each channel 1mW in 600Ω balanced, 300Hz to 3400Hz. Attenuation to —32 dBm in 2 dB steps. Spurious noise in OFF channel (all other channels ON) is less than 15 dBrnC. |
| TWO TONE TEST SET (6625-00-190-1311) Model 2005R | 20Hz to 20kHz | Generates low distortion two tone signal for the measurement of intermodulation caused by non-linearity of audio transmission systems. |
| TV AUTOMATIC MONITORING SYSTEM Models 2914A, 2915, 2917 | | See television section overleaf. |

# *NEW*



**mi 2910 series**
**Non Linear Distortion Analyzer with Sampler**



**mi 2914A**
**Automatic TV Quality Analyzer**

## mi TV TRANSMISSION TEST EQUIPMENT

| DESCRIPTION | FEATURES |
|---|---|
| TV AUTOMATIC QUALITY MONITORING SYSTEM Models 2914A, 2915, 2917 | Automatically analyzes and displays all essential parameters including: amplitudes of bar, sync, various T pulses, and noise; luminance linearity, chrominance gain, chrominance/luminance crosstalk, differential gain and phase, etc., all measured in the most suitable units of measure and presented digitally when under manual control (see illustration above). Data Selector Model 2917 enables both local and remote print out of results. Versions to meet International, F.C.C. and NTC recommendations, 525/625 lines. |
| TV SWEEPER Model 2361 | Main sweep unit has internal rep. rate 0.01Hz to 100Hz with linear, semi log, CW, single shot and manual modes. TV field lock, blanking and phase shift controls and alternate trace separation. Produces ultra flat, low distortion sweep. Plug-ins available: Video 25kHz to 30MHz. VHF 1 to 300MHz, UHF 220MHz to 1000MHz. |
| TV SWEEP ANALYZER Model 2900 | Comprehensive frequency sweep analyzer combines Model 2361 Sweeper and video unit, Blanking and Sync Mixer Model 2908 and Differntial Probes unit, Model 2907. Measures response of active or passive transmission networks. Differential measurements on composite signal to an accuracy of 0.01dB. Also measures termination impedance and return loss. |
| LUMINANCE/CHROMINANCE GAIN & DELAY TEST SET Model 2904/1 | Measures gain and delay inequality with gain discrimination 0.5dB, delay discrimination 2 nanoseconds, visible display of misalignment with waveform monitor. |
| NON-LINEAR DISTORTION ANALYZER with SAMPLER Model 2910 | Makes accurate, simultaneous measurements from Vertical Internal Test Signal or Full Field Signal of differential gain, differential phase and luminance non-linearity, even in the presence of noise. Gain and phase can be directly measured against a calibrated pulse which can be varied over the ranges of 0 to 11% in .1% steps and 0 to 11° in .1° steps respectively, with the luminance non-linearity being resolvable down to 0.1% using an external scope display. Available for 625 line systems. |
| TV TESTLINE GENERATOR AND INSERTER Model 2913 | Erases and inserts Vertical Interval Test Signals on selected lines, Generates full field test signals. Can be remote programmed. Ideal for use with TV Automatic Quality Monitoring System. SECAM and PAL versions available. |

## EDDYSTONE COMMUNICATIONS RECEIVERS

| | | |
|---|---|---|
| Model 958 | 10kHz to 30MHz | A unique series of communications receivers covering 10KHz thru 470MHz. All feature superb construction and top performance Low frequency models provide AM/CW/SSB, high frequency offer AM/FM. Xtal locking facility optional on all models to enhance stability. Optional Panoramic Display Units available. |
| Model 1830 | 120kHz to 30MHz | |
| Model 990R | 27MHz to 240MHz | |
| Model 1990R | 25MHz to 470MHz | |

## mi BRIDGES AND Q METERS

| | | |
|---|---|---|
| UNIVERSAL BRIDGE Model 1313A | 1kHz and 10kHz 20Hz to 20kHz External | 0.1μH to 110H, 0.1pF to 100μF, 0.003Ω to 110MΩ. Accuracy 0.1%. Built-in osc. and det. Direct reading; simplest possible operation Uses adapter TM6113 for biasing inductors to 200mA. |
| PORTABLE UNIVERSAL BRIDGE Model 2700 | 1kHz internal 20Hz to 20kHz External | 0.2μH to 110H, 0.5pF to 1100μF, 0.01Ω to 11MΩ. Accuracy 1%. Transistorized, simple. Measures incremental L, electrolytics & non-linear resistance using external bias supplies. |
| Q METER Model 1245A | 1kHz to 300MHz | Q ranges 5 to 1000, △Q 25-0-25. Accuracy 5% to 100MHz, 20% to 300MHz. Calibrated capacitor 7.5 to 500pF, △C ranges ±1 and ±5pF. Extremely stable and easy to operate. Uses separate oscillators. |

## mi MICROWAVE SIGNAL SOURCES

| | | |
|---|---|---|
| Model 6055 | 0.85 to 2.15GHz | A unique series of transistor and gunn diode microwave signal sources covering 400MHz to 18.0GHz. Digital display of frequency, accuracy typically ±1%. Variable output levels typically 10mW on gunn diode sources. Up to 150mW on transistor models, Gunn Diode Models are 6057, 6058 and 6059. Special frequency coverages on request. |
| Model 6056 | 2.0 to 4.0GHz | |
| Model 6057 | 4.5 to 8.5GHz | |
| Model 6058 | 8.0 to 12.5GHz | |
| Model 6059 | 12.0 to 18.0GHz | |
| Model 6070 | 0.4 to 1.2GHz | |

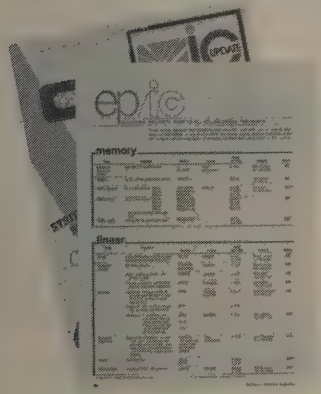
**SUBSCRIBE TO ELECTRONIC PRODUCTS MAGAZINE. IT'S YOUR *COMPLETE* GUIDE TO EVERYTHING THAT'S NEW IN THE FAST-CHANGING WORLD OF ELECTRONIC PRODUCTS AND SYSTEMS.**

**FEATURE STORIES** every month on electronic products, applications and availability.

**FORUMS**—Reports on meetings of manufacturers, users and distributors. Get the very latest news on a wide variety of products.

**NEW PRODUCT NEWS**—Hundreds of new products are introduced each month. You'll get the facts on not only what the new product is, but also where to get it, basic prices and current delivery.

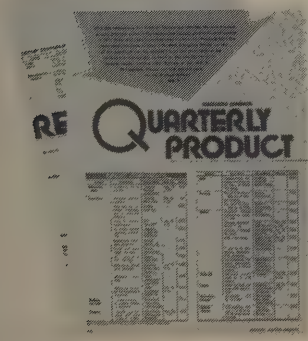
**EP/IC UPDATE**—Exclusive in ELECTRONIC PRODUCTS. A monthly report on *everything* that's new in the fast-moving world of integrated circuits.



**QUARTERLY PRODUCT REVIEW**—Another exclusive in ELECTRONIC PRODUCTS. A complete report of *every* new electronic product introduced in the previous quarter. This feature is in the January, April, July and October issues.

**QUARTERLY PRODUCT PLANNING DIRECTORY**—A compilation of the latest catalogs of a wide variety of electronic products and systems.

**OUTLOOK**—Important industry news affecting electronic products and systems.



**COMPONENT CAPERS**—A humorous look at the strange and wonderful world of electronics.

**MINI-GLOSSARIES,** Quizzes and more—Each and every month for over twenty years the readers of ELECTRONIC PRODUCTS learn something new about the products they work with and specify.

## #1 IN TAUT BAND PANEL METERS

See overleaf for ranges & prices

## TAUT BAND PANEL METERS

**2% F.S. accuracy in ranges for all applications**

## MOVING MAGNET PANEL METERS

**5% F.S. accuracy, high quality & style, low cost**

**Available in Taut Band & Moving Magnet Versions**

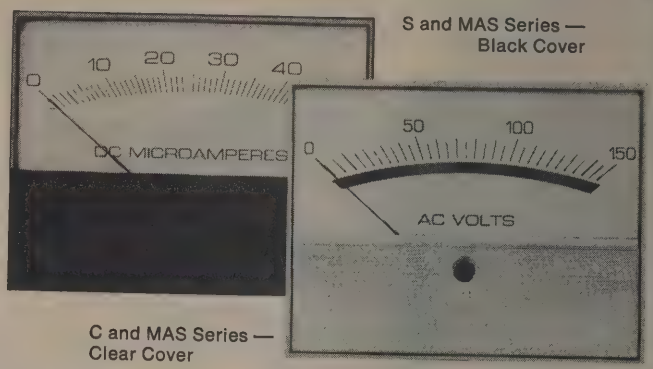
### SURFACE MOUNT

**S and MAS Series — Black Cover**

Handsome aspect ratio and clean-cut detailing add distinction to any panel. Optional colors available.

**C and MAS Series — Clear Cover**

Clear acrylic case front reduces contrast between the meter and adjacent panel for a pleasing overall effect.



S and MAS Series — Black Cover

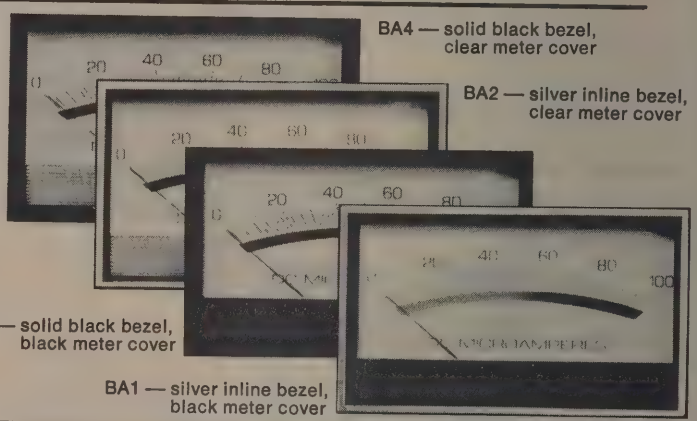
C and MAS Series — Clear Cover

**Available in Taut Band**

### BEZEL MOUNT

**BA Series**

Actually a package comprising a surface mount meter and a slender, graceful bezel in the combination shown. Mounting hardware and instructions are included. Bezels are available in optional colors; all meter options apply.



BA4 — solid black bezel, clear meter cover

BA2 — silver inline bezel, clear meter cover

BA3 — solid black bezel, black meter cover

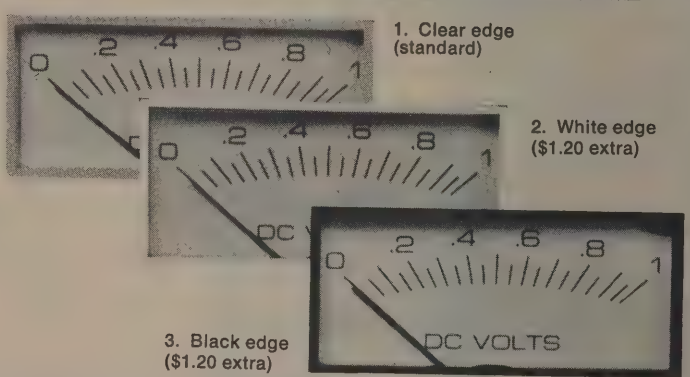
BA1 — silver inline bezel, black meter cover

**Available in Taut Band & Moving Magnet**

### WINDO-MOUNT™

**W Series**

A sophisticated and original design that has been widely imitated, these original Windo-mount meters are easily installed without special adapters, and do not sink the meter dial deep behind the panel. Uniquely attractive edge options are available, as shown at right.



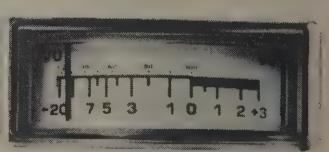
1. Clear edge (standard)

2. White edge ($1.20 extra)

3. Black edge ($1.20 extra)

**Available in Moving Magnet Version**

**SQUARE** An attractive and useful shape, in 1½″ (OMS) and 2½″ (MSQ) sizes, and all ranges including VU. Available for surface mount or Windo-mount (above), but not bezel mount.



**EDGE READING** meter comes in all ranges, including VU, 3 sizes (1¼″, 2″, 2½″), and installs without modification as either surface mount or flush mount.

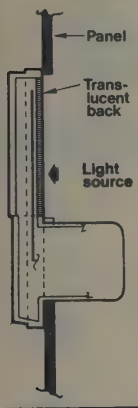
**24 OR LESS CATALOG METERS SHIPPED IN 1 WEEK OR YOU PAY ½ PRICE**
**FAST DELIVERY OF OPTIONS AND SPECIALS FROM FACTORY MODIFICATION CENTERS**

***TAUT BAND METER SIZES***-*1½" • 2½" • 3½" • 4½" • 5½" & 8"*

***MOVING MAGNET METER SIZES***-*1" • 1½" • 2" • 2½" • 3½"*
*& EDGE READING 1¼", 2", 2½"*

**See next page for ranges & prices**

**Available in taut band and moving magnet**



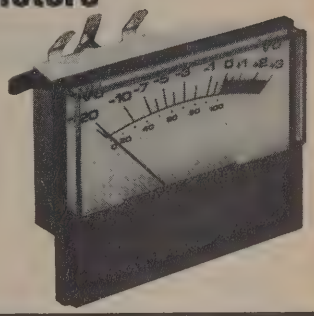
## L SERIES
### Trans-Lit™ Panel Meters

- Dial printed on translucent back for illumination through the meter dial — highest quality lighting of any meter.
- Optional smoke-grey covers enable "meter blackout" technology.
- Save money in installation and illumination accommodations.
- Available in Surface Mount, Bezel Mount, and Windo-Mount styles.

**Available in taut band**

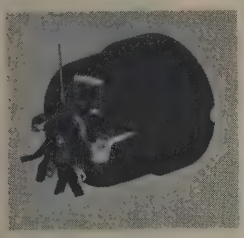
## LL SERIES
### Lite/Box Panel Meters

- Integral light box provides finest, glare-free illumination.
- Ready-to-use package — no installation problems. Lamp replacement is quick and easy.
- Optional smoke-grey covers enable "meter blackout" technology.
- Available in Surface Mount, Bezel Mount, and Windo-Mount styles.

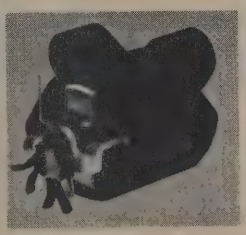


## HIGH TORQUE METER MOVEMENTS

***Unpointered • Pointered • Dial Mounted***



MP4



MP5

MP3

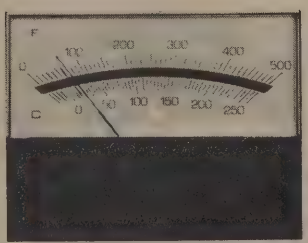
Modutec furnishes large numbers of uncased and dial mounted mechanisms to a variety of users. Units are available to fit standard cutouts and also are manufactured to meet individual requirements for performance, size, and shape.

The high torque and other desirable features of Modutec meter movements make them very useful in applications such as torque motors, recorder pen motors, flag indicators, etc.

High precision taut band movements, or ultra-economical moving magnet movements, will provide ideal answers to your needs, with benefits in cost, appearance, and space utilization.

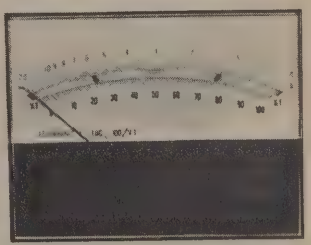
Phone or write for full information.

## PYROMETERS & THERMOCOUPLES



Utilizing precise and reliable Modutec taut band movements, in all panel meter styles, sizes 1½" through 5½", Modutec pyrometers have thermistor copper error compensation, and are supplied in 19 ranges from −150°F to +3000°F. Many useful options can be incorporated. Thermocouples are stocked in useful variety, in types E, J, K, R, and T. Wire, connectors, and hardware are also available.
For details request Catalog PYR-1105.

## CONTROL METERS



A new approach to actuating and monitoring IC control circuits. Modutec Control Meters have precise taut band movements with low and/or high set potentiometers incorporated into the meter, the setting being indicated by pointers visible through the mirror-scale slot. They are available in 3½", 4½", and 5½" sizes.
For information, including detailed typical applications, request Catalog CM-1012.

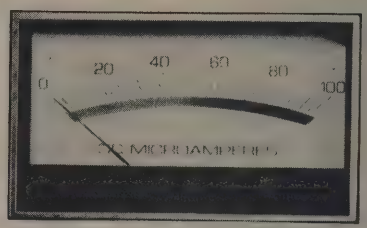
(see preceding spread for description)

## TAUT BAND PANEL METERS

**Modutec 100° Taut Band Panel Meters are Number 1 nationally in sales — for many good reasons! Meet or exceed the performance requirements of USA STD C-39.1. Full-scale accuracy 2% (AC 3%), tracking 1.5% (AC 2%), repeatability 0.5%. Trend-setting styling, high torque, high precision, low friction movements. Numerous options available for immediate incorporation in any catalog meter. Plus fast service!**



### Ranges, Sizes, Prices (Request Modutec Catalog 78-79 for detailed information)

Note: Prices are approximately median for range groups; catalog price for any specific range may differ slightly.

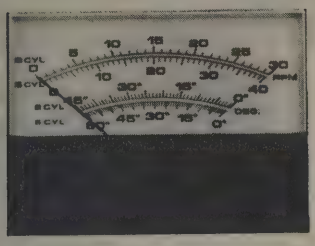
## MOVING MAGNET PANEL METERS & INDICATORS



**M-Series Panel Meters are for those users — high volume in particular — who do not require the rigorous performance characteristics of Modutec Taut Band Meters. Featuring sales-making appearance and advanced engineering, M-Series Meters are rugged and dependable, with 5% f.s. accuracy, improvable to 3%, as one of many catalog-listed options available in this unique line of low-cost meters.**

### M SERIES — Ranges, Sizes, Prices (Request Catalog 78-79 for detailed information)

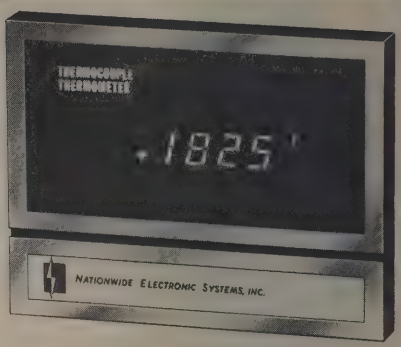
# SLIMLINES . . . the METERS that GROW

## the BROADEST and MOST POWERFUL line of digital meters . . . IN THE WORLD

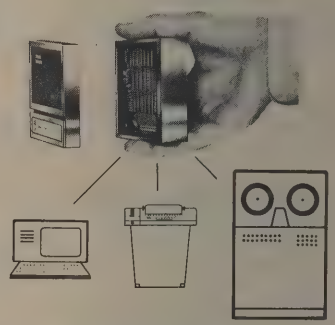
**METERS . . . what an inadequate word to describe these compact workhorses! Most meters on the market are designed to be looked at. Slimlines work for a living.**

**They combine high-performance measurement circuitry with all of the control inputs and data outputs needed for fast, efficient systems interface. And their quality is backed up by an unheard-of 5-year warranty!**



## SOLVE MEASUREMENT PROBLEMS!

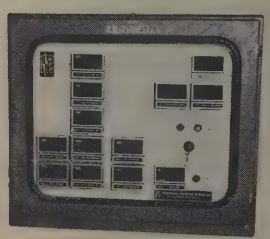
The widest selection of meters on the market, with a model to fit your need. **VOLTMETERS** from $76, **AMMETERS** from $185, **OHMMETERS** from $255, **WATTMETERS** from $416, **TRI-SCALE METERS** from $580, **CUSTOM METERS** with special scaling from $300, **TRANSDUCER READOUTS** from $88, **FREQUENCY METERS** and **TACHOMETERS** from $300, **CLOCKS** from $76, **CALENDARS** from $199, **STOPWATCHES** from $200, **RTD THERMOMETERS** from $380, **THERMISTOR THERMOMETERS** from $280, **THERMOCOUPLE THERMOMETERS** from $280, **COUNTERS** from $175, **TENSION & COMPRESSION METERS** from $560, **VACUUM & PRESSURE METERS** from $550, **REMOTE DISPLAYS** from $145, **POWER FACTOR METERS** from $415. NEW PRODUCTS: **PRODUCTION RATE METERS** from $240, **PRODUCTION YIELD** from $240, **WATT-HOUR METERS,** $600, **VARS METERS** from $500, **RELATIVE HUMIDITY METERS** from $455.



## TRANSMIT & RECORD DATA!

**A NES EXCLUSIVE!** Plug-on **ASCII BUSTLES** (from $180) give Slimlines incredible power: connect 100 Slimlines to a single pair of wires . . . meters transmit readings in serial ASCII to teletypewriters or printers for logging, CRT terminals for real-time dislay, computers or microprocessors for on-line processing. Address meters at random or program for automatic self-scan. Build a complete system one step at a time. **RECEIVING BUSTLES** . . . control equipment from a teletypewriter. **BCD BUS BUSTLES** from $160: up to 100 Slimlines on a parallel BCD data bus . . . use with printers, microprocessors, minicomputers, etc. **ISOLATOR/DRIVER INTERFACES** (from $150): isolating buffers and interface to high-level logic.

## AUTOMATE!

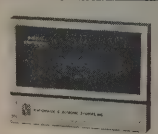


Monitor the reading of **any Slimline** and control, alarm, or automate! **COMPARATOR/CONTROLLERS** (from $196) do it automatically, providing outputs for solid-state relays, indicators, motor controls, solenoid actuators, etc. **PRELOADERS** from $124 and **SCANNERS** from $175, too.

## COMPLETE SYSTEMS!

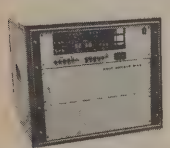
We will design and build instrumentation and control systems to solve specific problems . . . large or small, at reasonable cost. Call our applications engineering department.

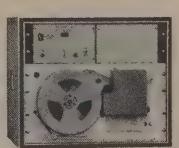
## READ-ONLY MODELS = LOW COST!

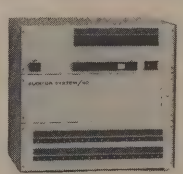


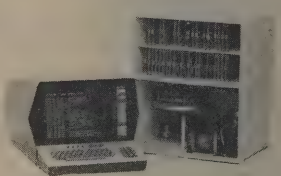
Same high quality, appearance, and **5-year warranty** as the other Slimlines . . . only the data outputs and control inputs have been left off to substantially lower the cost! **CLOCKS, VOLTMETERS, TRANSDUCER READOUTS, STOPWATCHES & COUNTERS** with more units due for release shortly!

## OTHER PRODUCTS FROM NES:









**MEASUREMENT**
**METERS, CIRCUIT CARDS,** and complete Systems for all types of Measurement Applications.

**PROCESS CONTROL**
**AUTOMATIC TESTING, PROCESS ALARMS, BATCHING, SORTING** . . . small & large Systems to fit any need.

**DATA ACQUISITION**
**DATA LOGGERS, RECORDERS,** and **CUSTOMIZED SYSTEMS,** for Transmitting, Printing, and storing Data.

**COMMUNICATIONS**
**TRAFFIC LOGGERS, CODE CONVERTERS, TRANSMITTER LOGGERS, BROADCAST AUTOMATION, TELETYPE SYSTEMS,** etc.

**NATIONWIDE ELECTRONIC SYSTEMS, Inc.**

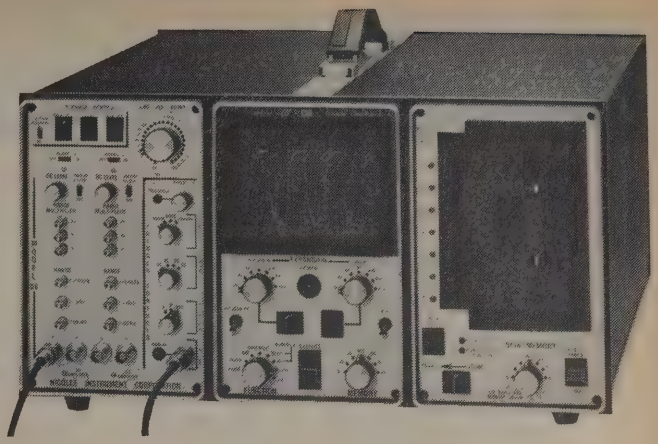
NICOLET INSTRUMENT CORPORATION
OSCILLOSCOPE DIVISION
5225 Verona Road, Madison, Wisconsin 53711
Telephone: 608/271-3333



# The Explorer Series of Digital Storage Oscilloscopes

For low frequency, high precision measurements, no other storage oscilloscope even approaches the performance, efficiency and ease of operation of the Nicolet EXPLORER Series. When you choose the Explorer II or Explorer III, you're selecting an oscilloscope that's backed by the unmatched experience of Nicolet in digital instrumentation. We introduced the first digital oscilloscope over six years ago. These new scopes are third generation digital scopes that you'll use for exactly the same applications as analog oscilloscopes. The difference is that they let you do so much more. Check our specs, then call us for a demonstration and you'll see what it means to go the digital way with Nicolet.

## Mainframe Specifications

**MEMORY** — 4096 12 bit or 8 bit words. All 4096 words can be used for one waveform, or two 2048 point waveforms can be stored, or four 1024 point waveforms.

**VARIABLE PERSISTENCE** — Each waveform is shown, as it occurs. The trace remains until the next signal is received, however long the interval.

**OUT OF SIGHT STORAGE** — One or more waveforms can be placed in memory out of sight for later recall.

**SUPERIMPOSITION OF WAVEFORMS** — Two or more stored waveforms can be viewed superimposed for comparison. A stored and live waveform may also be superimposed, or two live waveforms. Zoom-in scale magnification may be used to observe very small difference in all three cases. (Up to x64 magnification.)

**DISPLAY** — Either YT or XY display may be used.

**NUMERICS** — These show true time and voltage for any selected point, with respect to zero or with respect to any other selected point.

**PEN RECORDER OUTPUT** — Microprocessor controlled pen recorder drive voltages cause external XY recorders to plot waveform information.

**WAVEFORM SUBTRACTION** — Two stored waveforms may be subtracted, to produce the difference waveform.

**STATUS STORAGE** — The oscilloscope operating control settings are recorded with the waveform information to insure that waveforms recalled later will indicate true time and voltages independent of intervening control setting changes.

**POWER** — 85 watts, 115 v ± 10% or 230 v ± 10%, 48-60 Hz. Specify voltage when ordering.

**WEIGHT** — (Explorer II) 32 lbs.
(Explorer III) 42 lbs.

**SIZE** — (Explorer II) Bench top cabinet 18" long x 11½" wide x 8¾" high.
(Explorer III) Rack mount cabinet 18" long x 17" wide x 8¾" high (not including rack mount hardware).

## Explorer III Additional Spec's

(mainframe)

**DISK RECORDER** — Capacity 32 k 12 bit bytes. Manual or automatic recording sequence. Eight individually protectable tracks. Disks removable for filing.

**I/O BUSS** — IEEE 488, RS 232 or 12 line binary.

**INTERCHANGEABILITY** — Explorer II may be converted at the factory to an Explorer III.

## Plug-in Unit Descriptions

**MODEL 206-1 and 206-2** are one and two channel plug-ins which have 12 bit ADC's. These contain buffer memories which allow observation of pre-trigger signal information. Bandwidths are 1 mHz, with signal measurement rate of 2 mHz (for both signal channels in the case of Model 206-2).

**MODEL 204-1 and 204-2** are 10 mHz bandwidth plug-ins, one and two channel which have 8 bit ADCs. They include buffer memories for observing pre-trigger information. Sweep speed ranges from 50 ns per data point to 20 seconds per point. Amplifiers are single ended rather than differential.

**MODEL 201-2** is a low bandwidth, high sensitivity unit for measuring slowly changing variables. It has high input impedance, drift stabilized dc amplifiers with 5 μv maximum sensitivity (± 10 millivolts full scale, with 0.025% resolution and essentially no dc drift with time and temperature).

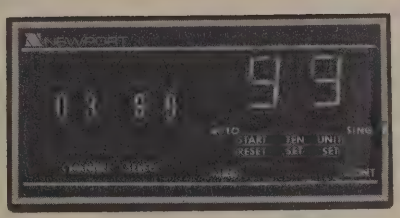
## SYSTEM COMPONENTS

**MODEL 810** • Digital printer • 9 columns, std.; expandable to 18 • Small size 4½" H. X 8½" W. • Programmable two-color printing • Reliable rotating drum printer • Fixed or floating decimal point • Uses standard adding machine paper • Last line visible without advancing paper • From $495

**SERIES 870** • Dual or single limit comparators • Capacity to ±39999 • Hi, Lo, Go lamps on dual comparator • DIN case, 96mm W. X 48mm H. X 130mm D. • Relay output • Compares parallel BCD or binary input data with numbers preset on front panel thumbwheel switches • From $115



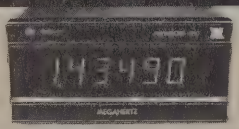
**LOW LEVEL SCANNERS**

**MODEL 850** • Controller for up to 100 channels • Thumbwheel selection of first and last point • Manual, single, and continuous scan modes • Adjustable scan rate up to 10 ch./sec. • 13mm (½ in.) LED ch. I.D. • DIN case (96 W. X 48 H. X 130 D.) mm • From $235

**MODEL 851** • 10 channel 2 pole Reed relay card • Low thermal EMF for TC signals • Low pass filter per channel • From $145

**MODEL 852** • Low pass filter per channel • 10 channel reed relay card for switching 3-wire RTD's • High level switching up to 200 volts • From $250

## TIME & EVENT METERS



**MODEL 6110, 6130** • Direct readout of RPM, frequency, time interval, period, period average, totalize and ratio • High noise immunity • Optically-coupled, isolated input with anti-contact bounce circuit • High input sensitivity • Buffered and gated BCD outputs • Beckman or 13mm (½ in.) LED display • From $250

**MODEL 6700S** • 12, 24 or 100 hour display • 100 day display optional • Selectable timing pulses • Front panel preset/reset • Power-line time base • Power failure indicator • Crystal time base, optional • Beckman display • From $275

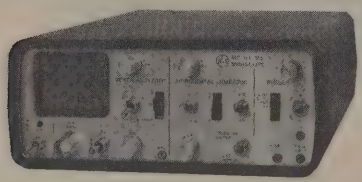
# SOMETHING FOR EVERYONE!!!

## The Modern, High Quality, Broad-based, Portable Test Equipment and Digital Panel Meter Line

For service dealers, MRO's field service, OEM's, educators, hobbyists and professionals.

For OEM's, MRO's and test equipment designers.

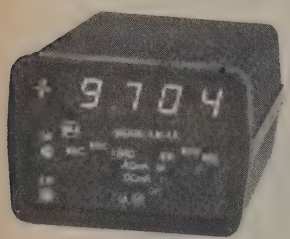
### OSCILLOSCOPES



The NLS MS-15 Miniscope is a battery or line operated 15-megahertz cathode-ray oscilloscope that weighs only three pounds and sells for $289.

### DIGITAL PANEL METERS

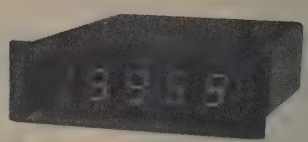
The world's smallest, lowest priced and lowest powered DPM's. NLS' panel meters offer top quality in a wide variety of AC and DC models in 3, 3½ and 4 digits. Prices range from $59 to $170.



### DIGITAL MULTIMETERS

NLS offers four digital multimeters in 3-, 3½- and 4-digit versions. Prices range from $125 for the LM-3A, a 3-digit meter, to $227 for the 4-digit LM-4A with ±0.03% accuracy. All are complete with NiCad batteries and charger unit.

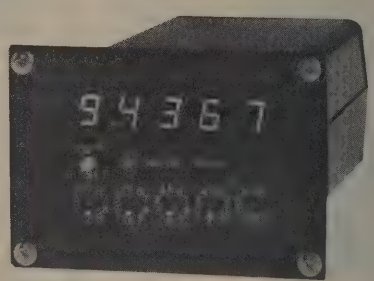
### DIGITAL COUNTERS



The PC-4 Event Counter is a low cost ($54.50), high speed alternative to electromechanical counters.

### DIGITAL FREQUENCY COUNTERS

The FM-7 is a 7-digit frequency counter with a full scale range of 60 megahertz; it sells for $195. Using the NLS SC-5 Prescaler, an additional $89, the range of the FM-7 is increased to 512 MHz.



The PR-5 is a preset counter of five digits which has a system interface capability—an outstanding value at $149.

NLS products are available for immediate delivery from leading local distributors.

# AC and Synchro Instrumentation

If you're into AC Instrumentation or ATE, then you've probably worked with our high-accuracy, high-reliability instrumentation . . . or wanted to! We are the innovators of equipment and modules based on an industry-first usage of LSI that resulted in performance parameters unmatched by competitive products.

All North Atlantic equipment reflects the highest state-of-the-art technology. Each product we produce goes through extensive testing including burn-in at a 100% level.

## Now! LSI in Synchro Converter modules!

Founded on our leadership in AC Instrumentation is our innovative line of data conversion modules. Making use of advanced LSI technology, all receive the same, intensive quality-control tests as our instruments including burn-in. If you're into data conversion, your logical next step should be to learn about our LSI-enhanced modules.

**S/D & D/S CONVERTER MODULES**
- LSI/85 Single Speed S/D
- LSI/36 2 Speed S/D
- 785 1.25VA D/S

**ANGLE POSITION INDICATORS**
- 8300 0.01 Resolution
- 8800 0.001 Resolution

**SYNCHRO SIMULATOR**
- 530 0.0001 Resolution
- 532 DPM Style
- 538 Digital Interface

**SYNCHRO BRIDGES**
- 540/10 0.0001° Resolution
- 540/11 Wideband

**PHASE ANGLE VOLTMETERS**
- 213C Manual, Low Cost
- 225 Digital 4 Freq.
- 321 Wideband

NORTH ATLANTIC

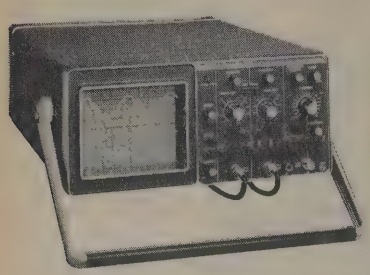
200 Terminal Drive, Plainview, New York 11803 • (516) 681-8600

# PHILIPS.. the USER-ORIENTED instrument company

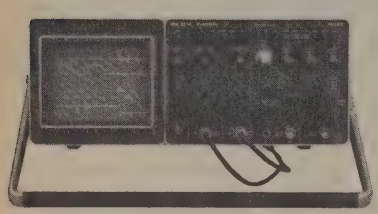


**PM 3211-New, compact Dual Trace 15 Mhz/2mV Oscilloscope**

- **Lightweight, compact**
- **Big 8 x 10 screen**
- **Double insulated power supply**
- **Comprehensive triggering and display facilities not available in competitively priced scopes**

The PM 3211 is designed for multiple applications ranging from general purpose use in laboratories to shop floor production and testing, as well as field service. Power supply is double insulated. No grounding is needed and measurements can be made without ground loops, thus eliminating hum and spurious signals which often influence results.

Triggering on the PM 3211 can be in "Auto" or level-set modes and multi-sourced, thus eliminating the need to change probes. Channel B can be used as an X input to facilitate X-Y displays with calibrated attenuation of both X and Y in inputs. Channel B can be inverted and with the ADD function can display A & B. Thus, maximum advantage can be taken of the high 2 mV sensitivity. The oscilloscope's 18-speed time base also has a vernier control for simplified phase and timing measurements.
PM 3211—$875.00 (including probes)

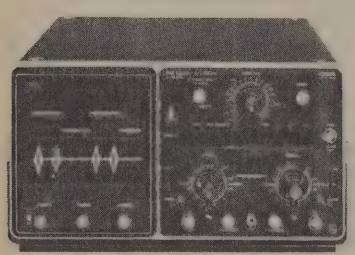


**PM 3214 25 MHz Dual Trace Osilloscope with Delayed Time Base**

- **Complete triggering on both time bases**
- **25 MHz at 2 mV**
- **Double insulation**
- **8 x 10 cm sharp 10 kV display**
- **Alternate time base display**
- **Battery option (internal)**

The PM 3214 with its complete triggering facilities and delayed time base is the ideal digital service oscilloscope. Alternate time base display allows full viewing of the main time base with intensified zone and complete delayed time base expansion simultaneously for both channels. "User-oriented" front panel design allows quick and efficient measurements to be made without error. Compeltely separate delayed time base controls allow use of full capability without confusion.
PM 3214—$1425.00 (including probes)

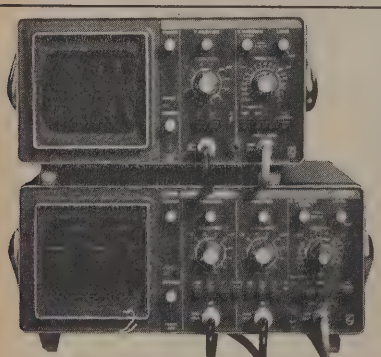
PM 3212-25 MHz Dual Trace Oscilloscope without Delayed Time Base—$1115.00 (including probes)



**PM 3232 and PM 3233 Dual Beam 10 MHz Oscilloscopes**

- **Dual beam operation — no alternate or chopped displays**
- **10 kV 8 x 10 cm display**
- **10 MHz at 2 mV**
- **Comprehensive triggering facilities**

The PM 3232 and PM 3233 dual beam oscilloscopes provide measuring capability with no phase errors as in time shared displays. Complete triggering capability including an auto mode where trigger is derived from peak to peak value of the signal, provides stable displays of all measurements. Front panel layout provides efficient operation, ideal for laboratory and school use.
PM 3232 dual beam 10 MHz oscilloscope - $1,160.00
PM 3233 dual beam 10 MHz oscilloscope with delay lines
with delay lines - $1,230.00



**PM 3225 and PM 3226 Single and Dual Trace Oscilloscopes**

- **15 MHz at 2 mV**
- **Lightweight, compact portable**
- **Complete triggering facilities**

The PM 3225 and PM 3226 15 MHz oscilloscopes are truly lightweight portables which are designed for use in servicing, production and education. Automatic triggering provides stable displays under almost any signal conditions. A minimum of controlled use, a maximum of functional capability that is efficient to use due to the functional front panel design. Sturdy, rugged construction leads to reliability under the most demanding conditions.
PM 3225 - 15 MHz single trace oscilloscope - $ 625.00
PM 3226 - dual trace 15 MHz oscilloscope - $ 820.00
PM 3226P - dual trace with A-B capability — $ 960.00

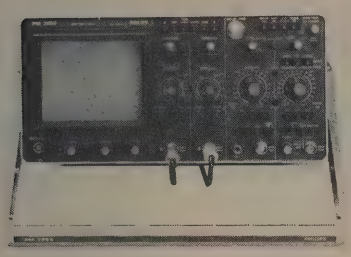
PHILIPS Test & Measuring Instruments

**PHILIPS**

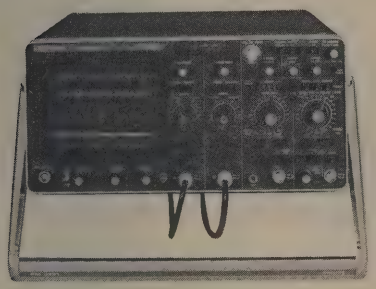
# PHILIPS.. the USER-ORIENTED instrument company



**PM 3262-100 MHz Dual Trace Universal Oscilloscope with Delayed Time Base**

- **Third channel for simultaneous viewing of trigger signal**
- **Alternate time base display**
- **100 MHz at 5 mV**
- **New CRT gives bright display, high writing speeds**
- **Composite trigger capability**
- **Compact, lightweight**

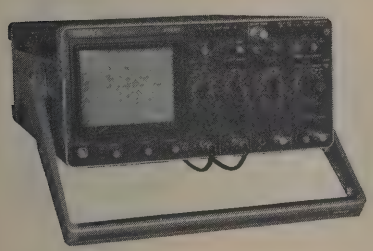
Alternate time base display allows simultaneous viewing of main time base display with intensified zone and full screen delayed time base. Eliminates constant switching to find out where delayed time base measurements are taken. Third channel allows simultaneous display of external trigger signal for timing comparison. Complete trigger facilities on both main and delayed time bases in addition to extended X-Y display capability. This lightweight portable oscilloscope is ideal for high frequency analog and digital measurements in the field and the laboratory.
PM 3262—$2,345.00 (including probes)



**PM 3261 120 MHz Portable Oscilloscope for Digital Testing**

- **Digital delay mode**
- **Special TTL trigger circuits**

5Mv sensitivity; complete triggering facilities for both time bases; X-Y operation via A or B channels. 20 kV CRT for bright displays. Delayed time base can be set to start at any preset Nth after main base starts. Trigger selection includes TTL threshold window to insure positive triggering on TTL transitions and not on spurious pulses or noise. The oscilliscope provides a TTL pulse output simultaneous with the delayed time base. This output can be used along with main time base trigger to measure time from start to end pulse. 120 MHz dual trace portable oscilloscope digital delay counter on delayed time base that can be preset from 1 to 9,999 to start the delayed time base.
PM 3261—$2,795.00 (including probes)



**PM 3265E 150 MHz Portable Oscilloscope**

- **Alternate time base display**
- **Cold switching controls**
- **2.3 nS risetime**

The PM 3265E is a dual trace 150 MHz portable oscilloscope with separate delayed time base control section. Alternate time base display capability allows viewing of time base with intensified zone and full screen delayed time base of both channels simultaneously. "User-oriented" front panel design, enabled by cold switching technique, provides a most efficient use of the instrument. Switching regulated supply provides power input capability from 100 - 250 V AC (40 440 Hz) or DC at total of 45 watts.
PM 3265E - $3,095.00 (including probes)

**PM 3265 150 MHz Multiplier Oscilloscope**

- **150 MHz dual trace**
- **100 MHz multiplier (A X B)**
- **Alternate time base display**

The PM 3265 is a 150 MHz dual trace oscilloscope with delayed time base and also features a 100 MHz multiplication capability, Real time power can be displayed for circuit and device analysis. A X B output provided for average instrument with cold switched controls and logical front panel layout. Alternate time base display allows main and delayed time base to be presented simultaneously for both channels. B Channel display is provided in addition to A X B display for reference.
PM 3265 - $3,850.00 (including probes)

For technical information, additional data or a complete test and measuring instruments catalog, utilize our toll-free Hotline 800 631-7172 (New Jersey residents call (201) 529-3800 collect) or contact:

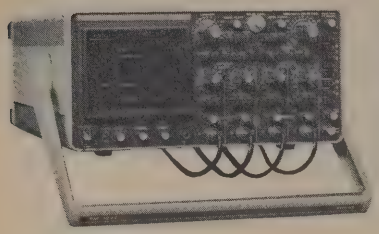
PHILIPS Test & Measuring Instruments

**PHILIPS**

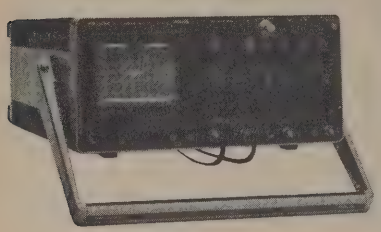
# PHILIPS.. the USER-ORIENTED instrument company



**PM 3244 4 Trace Portable Oscilloscope**

- **50 MHz, delayed time base**
- **Complete triggering facilities**
- **Up to 6 traces with A + B and C + D**

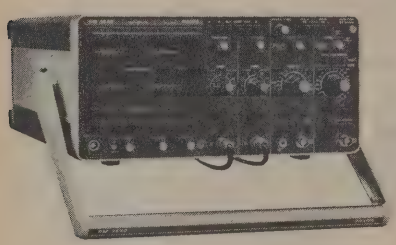
The PM 3244 is a 50 MHz 4 trace portable scope with delayed time base at 5 mV per cm. Displays any combination of channels A, B, C and D in chopped or alternate mode with A ± B and C ± D possibilities. X deflection possible using any selected channel or external input for X —Ya, Yb, Yc, Yd display. Complete triggering facilities including composite trigger, with AC or DC coupling. 8 x 10 cm 10 kV CRT. Cold switching allows all the controls necessary for a 4 trace scope in a portable instrument.
PM 3244 - $2,995.00 (including 4 probes)



**PM 3243 50 MHz Multiplier/Storage Oscilloscope**

- **A X B capability to 40 MHz**
- **Variable persistence and complete storage**
- **Delayed time base**

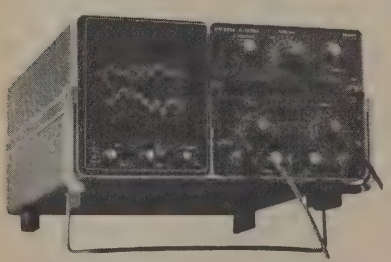
The PM 3243 50 MHz delayed time base oscilloscope has a 40 MHZ multiplication capability. Real time power can be displayed as well as stored in the variable persistence and full storage mode. A fully comprehensive storage scope with delayed time base and complete triggering facilities makes for a versatile laboratory and field instrument. A X B output provided for additional laboratory measurements. PM 3243 has all the features of the other Philips high frequency portables.
PM 3243 - $3,995.00 (including probes)



**PM 3240, PM 3240X 50 MHz Portable Oscilloscope and TV version**

- **Seperate delayed time base control section**
- **18.5 lbs./ 23 watts**
- **Complete triggering facilities**
- **TV line and frame sync**

PM 3240 is an ultra lightweight dual time base instrument with a bright 8 x 10 cm display. Ideal for service, production and laboratory use, the PM 3240 has all the features needed for analog and digital measurements. A bright CRT coupled with an efficient front panel design, incorporating comprehensive triggering and display controls make the PM 3240 an ideal field service portable. For television applications, the PM 3240 includes odd/even frame selection as well as line frame synchronization and line/sync and delayed time base.
PM 3240 - 50 MHz dual trace oscilloscope - $1,795.00 (including probes)
PM 3240X 50 MHz dual trace TV oscilloscope - $1,920.00 (including probes)



**PM 3234 10 MHz Dual Beam Storage Scope**

- **Dual beam operation**
- **Variable persistence and full storage**
- **Bright displays with 8.5 kV CRT**
- **Complete triggering including one shot**
- **10 MHz at 2 mV**

The PM 3234 is a dual beam operation storage and variable persistence oscilloscope. Dual beam display, combined with the storage facilities, insures true displays and recording including single shot phenomena. Use of variable persistence allows the storage of multiple traces for comparison. No chopping and no alternate display provides total signal storage of both channels even with fast one shot signals. AC, DC and Auto triggering are provided, with Auto position triggering derived from the incoming signal peak to peak value. 24V DC operation is possible as well as AC line voltages, Maximum writing speed is 1 div/mS.
PM 3234 - $2,710.00

For technical information, additional data or a complete test and measuring instruments catalog, utilize our toll-free Hotline 800 631-7172 (New Jersey residents call (201) 529-3800 collect) or contact:

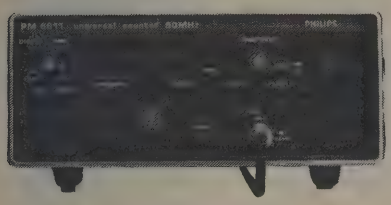
PHILIPS Test & Measuring Instruments

**PHILIPS**

# PHILIPS.. the USER-ORIENTED instrument company



**PM 6610 Universal counters**

- 5 models to choose from
- Measure frequency, period, ratio, totalize and time interval
- Comprehensive triggering
- Bright, 9-digit gas discharge display

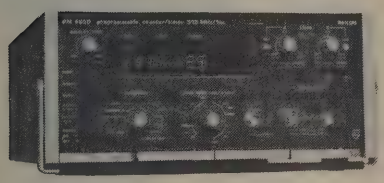
The PM 6610 series is a family of universal frequency counters and a counter/timer designed to fulfill a broad range of measurement applications. The PM 6613, PM 6614, PM 6615 and PM 6616 universal counters provide for frequency, ratio, period, period average and totalizing measurements with frequency of 250, 520, 1000 and 1300 MHz, respectively. The PM 6612, 80 MHz counter/timer also permits time interval measurements. Options available include internal rechargeable battery pack, BCD, D/A output and IEEE 488 Buss compatibility, rack mounting and either for five time base oscillators.

PM 6612—80 MHz—$740.00
PM 6613—250 MHz—$795.00
PM 6614—520 MHz—$875.00
PM 6615—1000 MHz—$1075.00
PM 6616—1300 MHz—$1395.00

**PM 6620 Series Universal Timer/Counters**

- Comprehensive Time and Frequency Measurements
- Two 80 MHz Channels with Complete Triggering Controls
- Models Available with Trigger Hold-Off, 520 or 1000 MHz Frequency Range

The PM 6620 series comprises three compact instruments offering time and frequency measurement capabilities. All models provide for measuring (single shot and averaging), time interval, period, frequency, ratio and pulse counting. Two identical 80 MHz input channels are equipped with comprehensive triggering controls and monitoring facilities. The PM 6622 also includes a trigger hold-off control which permits masking unwanted stop pulses such as those generated by contact bounce or ringing. The PM 6624 and PM 6625 extend the range of frequency measurements to 520 or 1,000 MHz respectively.
All of the options available for the PM 6610 series above are also compatible with the PM 6620 series.
PM 6622 - 80 MHz - $965.00
PM 6625 - 1000 MHz - $1495.00
PM 6624 - 520 MHz - $1365.00



**PM 6650 Programmable Timer/Counter**

- Complete Time and Frequency Measurement System
- 10 nS Single Shot T.I. Resolution
- Direct Counting to 520 MHz
- GPIB Option
- 1 and 12.6 GHz Sub-Units Available

The PM 6650 is a complete time and frequency measurement system for the lab or systems use. The instrument's basic architecture includes a 100 MHz clock; a 512 MHz RF channel with 62 dB dynamic range; two very fast (1 nS), equalized 160 MHz channels with comprehensive triggering facilities; and a nine-digit gas discharge display. This architecture provides for: frequency measurements to 512 Mhz with 1 Hz resolution in 1 sec.; single shot T.I. measurments with 10 nS resolution; average T.I. measurments with 1 pS resolution; and accurate monitoring of trigger levels for easy pulse parameter measurements. The PM 6650 is available with a plug-in IEEE Bus module which provides for complete control of all instrument functions including trigger level adjustments.
PM 6650B - $ 3,855.00

**PM 6661 80 MHz,**
**PM 6664 520 MHz**
**Automatic Frequency Counters**

- Fully Automatic Frequency Measurements
- Automatic PIN Diode Attenuator with 50:1 Range
- 8—digit LED display with leading zero blanking and grouped digits for easy reading.
- Compact, rugged steel housing.
- 98% AM Tolerance

These compact instruments have been designed to provide accurate, easy to read frequency measurements with an absolute minimum of operation attention. Fully automatic operation has been achieved by replacing the usual sensitivity control or attenuator switch by a high effective automatic Pin diode attenuator.
Both models provide 1 Hz resolution up to 80 MHz and the PM 6661 provides 10 Hz resolution between 10 and 520 MHz.
The PM 6661 time base ageing rate is 2 ppm/yr. and temperature stability is 15 ppm, 0-50°C. The PM 6664-01 ageing rate is 2 ppm/yr. and stability is 15 ppm, 0-50°C. The PM 6664-02 ageing rate is 0.1 ppm/mo. and stability is 1 ppm, 0-50°C.
PM 6661—80 MHz—$275.00
PM 6664-01—520 MHz—$545.00
PM 6664-02—520 MHz—$645.00

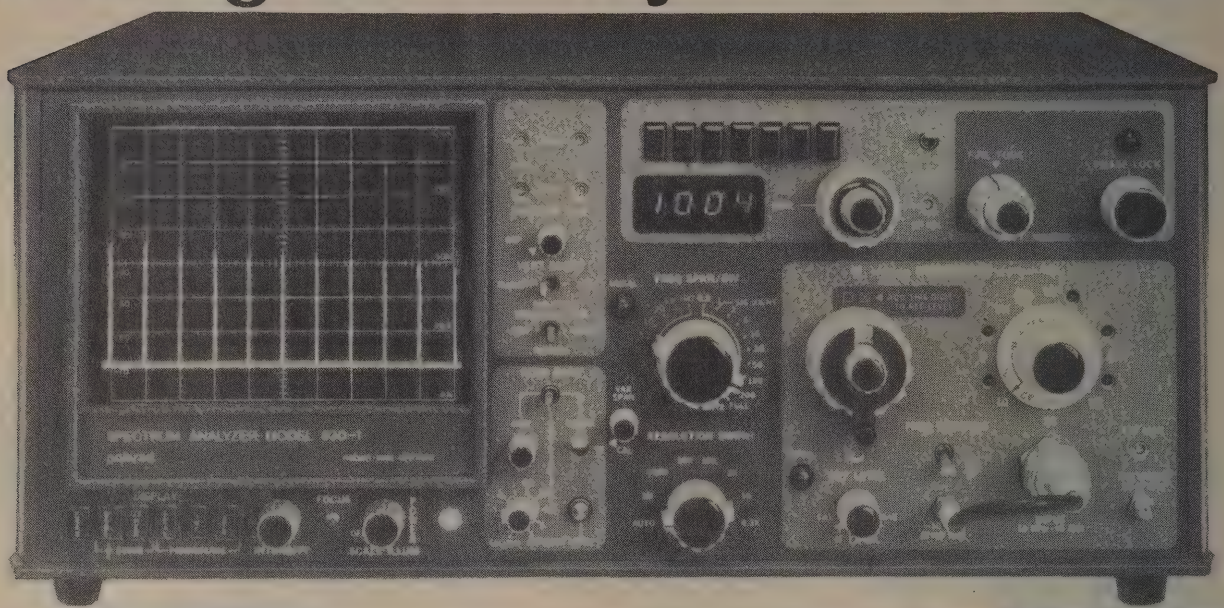
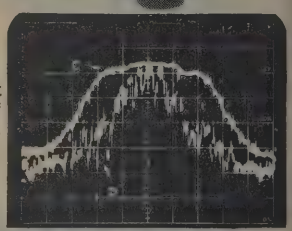
PHILIPS
Test & Measuring Instruments

**PHILIPS**

# 5 RF/Microwave Spectrum Analyzers with Digital Memory & I/O Interface



Model 630-1 includes digital memory.
Display: Frequency markers. Internal marker oscillator generates 100 MHz (±5 kHz) and harmonics.



SPLIT MEMORY: Comparison of envelope vs. instantaneous levels of FM broadcast. 20 kHz/Div. Span. 10 dB/Div. Scale

"C" is stored max. envelope vs. frequency.
"D" is flicker-free updated incoming signal

## The Digital Memory and Data Interface of the 600 Series make other analyzer displays obsolescent. Here's Why!

- **Flicker-free updated displays, even with slowest scans.**
- **Precise comparisons of stored vs. incoming signals.**
- **Single line envelopes of noisy and pulsed signals.**
- **Data Interface "Talker" and "Listener" functions. Adaptable to IEEE 488 BUS.**
- **Internal battery retains memory contents.**

### N-R 600 Series Summary

| MODEL | | U.S.A. Prices Without Memory | U.S.A. Prices Including Memory |
|---|---|---|---|
| **632** | 100 kHz to 2 GHz | $ 6,275 | $ 7,625 |
| **630** | 10 MHz to 40 GHz, 7 Bands | 8,550 | 9,900 |
| **640** | 630 plus Internal Preselector | 11,250 | 12,600 |
| **631** | 10 MHz to 40 GHz, 6 Bands | 7,900 | 9,250 |
| **641** | 631 Plus Internal Preselector | 10,600 | 11,950 |

*Get complete specifications. Call or write for immediate reply or check Reader Service Number.*

### Other Features of the 600 Series:

- LED frequency readout. Absolutely level calibration.
- Internal tracked preselector. (Models 640 and 641)
- Calibrated 0-2 GHz frequency spans. Also Full Span Mode.
- 300 Hz (phase-locked) to 1 MHz Resolution Bandwidths. Auto-tracked or manually selectable.
- −115 dBm sensitivity, Model 632. To −110 dBm for others. Sensitivity conservatively rated at 1 kHz bandwidth. Sensitivity = Average noise level +6 dB.
- 70 dB Log Scale (10 dB/Div.). Also 2 dB/Div. and Linear.
- Precise frequency markers, 100 MHz (±5 kHz) and harmonics.
- Level reference checks abs. level calibration.
- Parallax-free internal CRT graticule. Scale illumination. Standard mount for Scope cameras.
- Interface for Tracking Generator (Option 2).
- Compact, portable, all solid-state construction. Models 630, 631 and 632 are 7" high; approx. 40 lbs.
- Low cost.

## SIGNAL CONDITIONERS

**THE SG-11 IS A PLUG-IN MODULE** with power supply, balance calibration and monitoring circuits. The power supply circuit offers high temperature and time stability, providing line and load regulation of 0.01%; excitation voltage is adjustable from 0 to 16 volts at 0 to 150 mA. Featured is a self-restoring current limit circuit. All units may be wired for constant-current operation.

THE SG-11 has very high isolation to line—under 0.03 pF coupling capacitance from power line to DC output—SG-11 performance approximates battery operation.

All controls are 10 turn potentiometers of very high resolution. Calibration is bipolar single shunt.

Two types of enclosures are available: A 19" relay rack that permits the mounting of eight units side-by-side and a portable enclosure accepting a single plug-in unit. A plug-in power supply is also available.

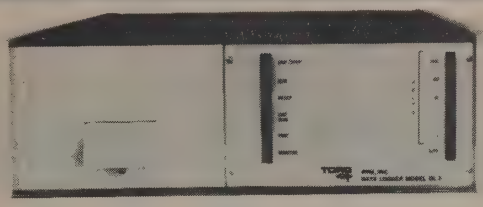
**MODEL SG-11 PLUG-IN UNIT (eight shown in rack)** . . . . . **$187.50**

**PORTABLE ENCLOSURE (MODEL SG-11-P as shown)** . . . . . **$ 39.50**

**RELAY-RACK MOUNTING ENCLOSURE (MODEL SG-11-R as shown) with solder terminals only** . . . . . **$129.00**

**RELAY-RACK MOUNTING ENCLOSURE (MODEL SG-11-RC as shown) with MS connectors (mating connectors included)** . . . . . **$395.00**

**THE MODEL SG-16 series** (not illustrated) provides lowest-cost strain-gage conditioning. A 20 channel system with common power supply occupies only 5¼ inches of vertical panel space at a total cost of $75 per channel. Amplifier options range from $10 per channel for 10ma galvo drive amplifiers to $100 per channel for low-drift differential amplifiers. Write for Bulletin SG-11.



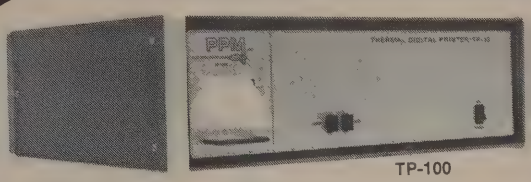
## DATA LOGGER

**THE MODEL DL-2 IS A COMPLETE DATA ACQUISITION SYSTEM** in a compact, portable package. It scans up to 100 differential signals, digitizes them and a thermal printer records their values. Options include floating decimals, internal digital clock, conditioning for thermocouple or strain-gage transducers and punched paper or magnetic tape recording.

Input signals include DC voltage, resistance and frequency. Write for Bulletin DL-2.

**Data Logger with 10 Channels** . . . . . **$2320.00**

**Data Logger with 100 Channels** . . . . . **$3220.00**



TP-100

## SILENT THERMAL PRINTER

**THE TP-100 IS A SILENT, ALPHA-NUMERIC THERMAL PRINTER.** It prints up to 20 columns at speeds to 5 lines/second from BCD or ASCII inputs.

This high-performance instrument is simple and compact, with only one moving part. Quiet and reliable operation, long life as well as low cost, result from the use of a simple mechanism whose only function is to advance paper.

A choice of input interface options is available, as well as an internal digital clock or voltmeter. The Model TP-100M is available for O.E.M. applications; it is a plug-in unit with all electronics, but less cabinet and power supply.

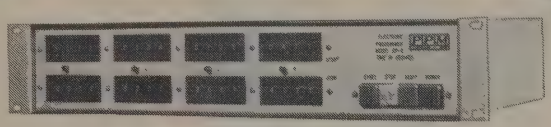
**Model TP-100, 12 columns, as shown. Unit price.** . . . . . **$595.00**
**Model TP-100M, 12 columns. 100 each.** . . . . . **200.00**

**Write for Bulletin TP-100, or call collect today.**

## THERMOCOUPLE MONITOR

**THE TM 100A SCANS UP TO 100 THERMOCOUPLES,** displaying temperature in digital form. A high-low limit circuit compares temperature with preset thumbwheel switches; a lamp matrix displays all out-of-limit channels. Interface provides for auxiliary printout or computer entry of data.

**Write for Bulletin TM-100**



## DIGITAL TIMERS-PROGRAMMERS

The EP series of solid-state digital electronic programmers provide relay or solid-state switch operation at digitally-preset start and stop times. Each channel operates independently of all others. Units available from 1 to 1000 channels, with timing from microseconds to hours.

**Write for Bulletin EP.**

## ANVIL L SYSTEM Electrical Isolation in a Precision Pulse Generator

**$3,080 - $11,600**

**(1-8 channels) Fiber Optic Coupled • 1 nS Risetime into 50 Ohms**

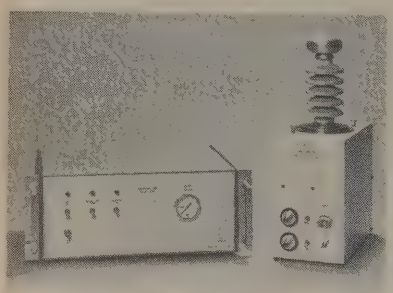
### Key Performance Specifications

**Remote Output Pulser (ANVIL-160)**

| | |
|---|---|
| **Peak volts** | +140 to +220 V., unit-to-unit variation |
| **Peak current** | 3.2 Amps |
| **Output impedance** | 50 ohms |
| **Risetime** | ≤2 nS |
| **Fall-time** | 55 nS |
| **Single shot jitter** | ± 0.25 nS |
| **External Dimensions** | 4" wide, 3" tall and 6" deep |

**Master Control Module**

| | |
|---|---|
| **Input Power** | 115 VAC, 60 Hz at 2 Amps |
| **Trigger Requirements** | 2-10 volts, >40 nS wide pulse, 50 ohms |
| **External dimensions/weight** | 17" wide, 7" tall and 13" deep, 20 lbs. |

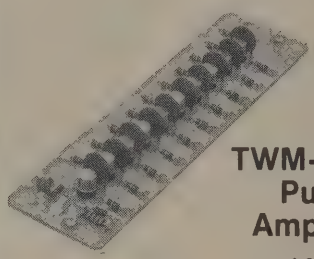


### The VPR 60-30 Fiber-Optic Coupled High Voltage Probe

**$7500.00**

### Specifications

**Frequency Response:** 50 Hz to 25 MHz
**Dynamic Range:** 40 dB
**Peak Input Voltage:** ± 50 kV
**Input Impedance:** capacitive, 5 pF
Probe is battery powered;
30 meter optical cable length;
remote (pneumatic) on/off and calibration functions.



### TWM-1000N Pulse Amplifier

**$235**

**Less than 1 nS Command Jitter**
**Compact • Versatile**

### Specifications

Input trigger 1-10 volts
Output pulse (standard is negative)

| | 50 Ohm Load | 1000 Ohm Load |
|---|---|---|
| **Peak voltage** | ~ 400 V | ~ 1000 V |
| **Risetime** | ~ 10 nS | ~ 5 nS |
| **Decay time** | ~ 60 nS | ~ 1 μS |

**Supply voltage** +125 VDC, 1.5 mA

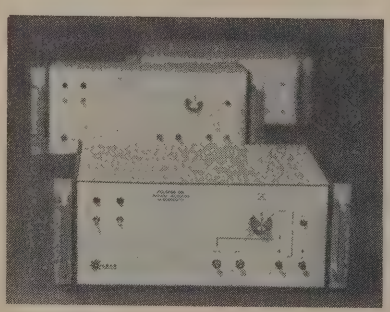
### SW-50K High Precision Switch

**±1 nS Jitter • Compact**

**$209 (Quantity Discounts Available)**

### Specifications

**Operating range:** 10 kV to 50 kV
**Jitter:** ± 1 nS (when used with PULSPAK 10A)
**Lifetime:** 10 k shots at 250 millicoulomb/shot and peak current of 50 kA
**Gas:** Synthetic air (Hydrocarbon free dry air)
**Trigger:** Pulse risetime<50 nS at 50% charge voltage
**Switch Inductance:** Depends on circuit application; typically in 100 to 200 nH range



Output pulse

### PULSPAK 10A Precision High Voltage Pulse Generator

**1 nS Command Jitter • Trigger Input: 2-10 volts**

**Pulse Output: 10 kV**

**$2,250**

### Key Performance Specifications

| | |
|---|---|
| **Peak volts** | +10 kV |
| **Peak Current** | 200 Amps |
| **Output Impedance** | 50 Ohms |
| **Risetime (10-90%)** | < 10 nS |
| **Fall-time** | 150 nS |
| **Throughput Delay** | 70 nS or less |
| **Internal Repetition Rates** | 1, 5, 10 Hz |

**External power requirements**
115/230 VAC, 50/60 Hz, .3/.15 amps
**External dimensions/weight**
17" wide, 7" tall and 13" deep, 24 lbs.

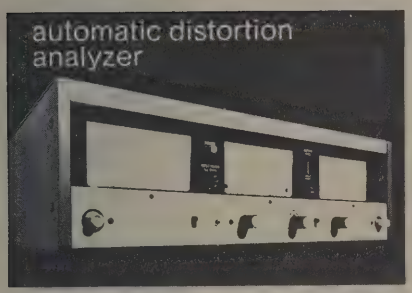
# RADIOMETER ELECTRONICS TEST INSTRUMENTS

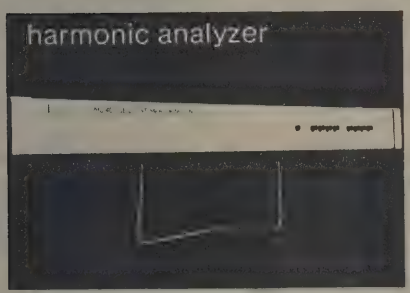
## Audio/Component/Communications



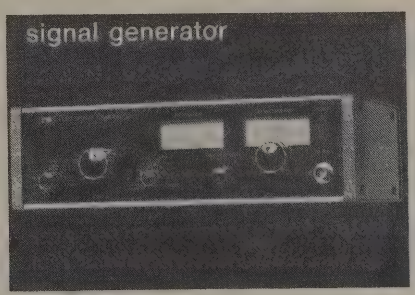
**Automatic Distortion Analyzer — BFK-10**
Swept measurements of total harmonic distortion.

**Stereo Modulator — SMG 40**
Advanced design signal source . . . superior flexibility.

**AM/FM Modulation Meters — AFM2, AFM3**
Wide band and narrow band models cover 5 to 1002 MHz.

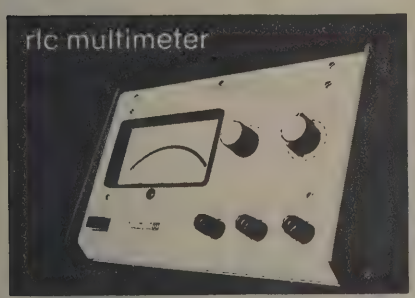


**Harmonic Analyzer — SMU 401**
Automatic sweep measurements of selected individual harmonics, second through fifth.



**Signal Generator — RE 101**
A compact signal generator covering the frequency ranges of 0.15 MHz.

**Picoammeter/Megohmeter — IM6**
Unusually versatile low current and high resistance measurements.



**R, L, C Multimeter — MM2**
Fast measurements at appropriate frequencies.

For over 40 years Radiometer has been manufacturing and marketing the most reliable, advanced state-of-the-art electronic test and measuring equipment . . . primarily for the audio, radio and component fields.

You will find eight of our best sellers on this page. There are many more. Please write for our complete catalog.

**Component Reliability Test Set — CLT 1**
Fast, constructive test method.

re Radiometer Electronics a/s

These precision analog filters enjoy a worldwide reputation for accuracy, stability, and wide-range flexibility. Highly price-competitive, they have become the first choice of the electronics industry for a broad spectrum of applications, including: anti-aliasing; band limiting in data-acquisition systems; signal-to-noise enhancement in low-level measurements and communications; signal reconstruction (smoothing) in A/D/A and digital-communications systems; and hundreds of test and development-laboratory uses.

### Models 432 and 442 Budget Variable Analog Filters

- Two Independent Channels usable in Series, in Parallel, or Separately
- 24dB Rolloff/Octave/Channel
- Cutoff Frequency Ranges: 1Hz-110KHz (Model 432), 10Hz-1.1MHz (Model 442)
- Cutoff Frequency Accuracy: ±5%
- Resolutions: 1Hz to 10KHz (2 digits)
- High Pass, Low Pass, Band Pass, and Band Reject Functions
- 0dB/20dB Gain
- Flat Amplitude (Butterworth) and Flat Delay (Linear Phase) Responses
- Impedances: 1 Megohm Input, 50 Ohms Output
- 80dB Dynamic Range

### Models 452 and 852 Dual Hi/Lo Variable Analog Filters

- Two Independent Channels usable in Series, in Parallel, or Separately
- Rolloff: 24dB/Octave (Model 452) or 48dB/Octave (Model 852)
- Cutoff Frequency Ranges: 0.1Hz to 111KHz; Option -01: 0.01Hz to 111KHz
- Cutoff Frequency Accuracy: ±2%
- Resolution: 0.01 to 100Hz (3 digits)
- High Pass, Low Pass, Band Pass, and Band Reject Functions
- Near-Ideal Flat Amplitude (Butterworth) and Flat Delay (Linear Phase) Responses
- 0dB/20dB Gain
- Impedances: Input 1 Megohm, Output 50 Ohms
- Dynamic Range: 90dB
- Negligible Noise and Drift.

### System 816 Computer-Compatible Multi-channel Filter System

- Up to 16 Independent Channels
- Local, Remote, and On-card Programming, High Pass, Low Pass, Band Pass, and Band Reject Functions
- Cutoff Frequency Range: 0.1Hz to 150KHz
- Cutoff Frequency Accuracy: ±2%
- Butterworth and Bessel Responses
- 60 Cutoff Frequencies per 4-decade plug-in card
- 48dB/Octave Rolloff (96dB/Octave with 2 channels cascaded)
- Impedances: 1 Megohm Input, 50 Ohms Output
- Programming Delay 3msec (plus filter settling time)
- Negligible Insertion Loss
- Dynamic Range: 80dB

SYNTHESIS • PROCESSING • ANALYSIS

Our Second Decade of Leadership

Rockland Systems Corporation, 230 W. Nyack Road, West Nyack, N.Y. 10994, (914) 623-6666, TWX 710-575-2631

These state-of-the-art designs all employ some form of *direct* synthesis . . . widely acknowledged to be the most advanced technique in frequency synthesis. By eliminating all of the limitations of the phase-locked-loop technique, Rockland synthesizer designs offer greatly superior performance at very reasonable prices. The newest Rockland synthesizer, the Model 5600, is remarkable in that it provides the superiority of direct synthesis at a price significantly *lower* than phase-locked designs in the same frequency range.

### NEW! Model 5600 Programmable Frequency Synthesizer

- Direct Digital Synthesis — No Heterodyning or Phase-Locking
- 0.1 to 160MHz — without Multipliers
- Constant 1Hz Resolution throughout range
- High-Speed Switching — 20μsec
- High Spectral Purity: —70dB Spurious, —35dB Harmonic
- Low Phase Noise: —70dB typical
- Remote-Digital and Front-Panel Programming
- Excellent Temperature Stability: $\pm 1 \times 10^{-8}/^{\circ}C$ (or $\pm 1 \times 10^{-6}/^{\circ}C$ optionally) from $0^{\circ}C$ to $50^{\circ}C$ . . . or use external reference.

### Models 5100 and 5110 Frequency Synthesizers

- Direct Digital Synthesis — No Heterodyning, no Phase-Locking
- DC — 2MHz Range. To 3MHz (Option 13)
- 0.001Hz Resolution over entire range
- High Spectral Purity: —70dB Spurious, —55dB Harmonic
- Low Phase Noise: —50dB
- High-Speed Switching: 1.5μsec Programming Delay, 625nsec Update
- No Switching Transients
- Excellent Temperature Stability: $\pm 1 \times 10^{-8}/^{\circ}C$ (or $\pm 1 \times 10^{-6}/^{\circ}C$ optionally) from $0^{\circ}C$ to $50^{\circ}C$ . . . or use external reference.
- Remote and Local Frequency and Amplitude Programming (Model 5110 remote only — for OEM Systems)

### System 51 Programmable Multichannel Frequency Synthesizer System

- Direct Digital Synthesis — No Heterodyning or Phase-Locking
- DC to 3MHz Range — Constant 1Hz Resolution throughout range
- Up to 48 Channels
- Very Fast Switching: 2μsec Programming Delay, 1μsec Update
- Sine and Squarewave Outputs
- No Switching Transients — Amplitude and Phase Continuity Maintained
- High Spectral Purity: —50dB Spurious, —40dB Harmonic
- Low Phase Noise: —50dB
- Excellent Temperature Stability: $\pm 1 \times 10^{-6}/^{\circ}C$, from $0^{\circ}C$ to $50^{\circ}C$
- Manual/Automatic Programming

Our Second Decade of Leadership

Rockland Systems Corporation, 230 W. Nyack Road, West Nyack, N.Y. 10994, (914) 623-6666, TWX 710-575-2631

The Rockland Model FFT 512/S provides state-of-the-art performance, unparalleled ease and simplicity of operation . . . *plus unprecedented functional versatility*, by accepting *dozens* of different combinations of built-in standard options.

Despite its exceptional functional capability, the FFT 512/S represents the *greatest performance/price value* in its class. Function for function, spec for spec, it is also the *most advanced* instrument in its class . . . the *logical choice* for the great majority of applications in the 0 to 100 KHz range.

# REAL-TIME SPECTRUM ANALYZERS

## DESIGN HIGHLIGHTS

**Select 400 to 51,200 Lines of Resolution.** With all digital range translator option, resolves 0.4 mHz on 0 to 20 Hz range, 2 Hz on 0 to 100 KHz range!

**Four in One Capability.** With standard options, a state-of-the-art narrowband spectrum analyzer, plus a 1/3-octave and octave analyzer and of an extremely flexible *tunable* RMS voltmeter/power meter.

**Highest Performance Standards.** Accuracy, linearity, dynamic range, sensitivity, and all-digital stability surpass all other instruments in its frequency range.

**Most Advanced Signal Processing.** Circuit architecture inherently superior to conventional analyzers.

**Full Computer/Calculator Programmability.** *Two* standard digital I/O interfaces for use with large scale scientific computers, and with minicomputer, microprocessor, and calculator-based systems.

**Display.** Built-in 8 x 10cm CRT with bright flicker-less display featuring *full* graticule.

**Data Displayed.** Input time function (continuous or captured), instantaneous power spectrum, averaged power spectrum, two averaged power spectra (dual display), difference spectrum, ratio spectrum, magnified analysis range – range translator zoom, (Option -20), 1/3-Octave spectrum, (Option -12), octave spectrum, (Option -12).

**ADVANCED READOUT SYSTEM** — Combines a multi-format cursor system with direct-reading multi-parameter alphanumeric displays – everything about a spectrum can be measured, displayed and recorded. Provides engineering unit readout by either entering sensitivity of the transducer – or by measuring a known reference and defining its amplitude or power in *engineering units*.

## STANDARD OPTIONS

**Option 12 – 1/3 Octave and Octave Bandwidths, plus Power Readout in Both Bands.** Presents spectra as generated by banks of precise, wide-dynamic-range digital filters covering six selectable ranges from 2.5 Hz to 100 KHz. Also provides power measurement and direct-reading display of power.

**Option 14 – Digital I/O Interface.** Provides direct access to the FFT 512/S memory and control circuitry for an external minicomputer, controller, or data terminal.

**Option 15 – IEEE-STD 488/1975 Instrumentation Interface.** Provides analyzer compatibility with any external controller designed around IEEE Std. 488.

**Option 17 – Narrow-Band Power Readout.** Measures power over the entire analysis range or any selected portion. Readout display in V RMS, $(V\ RMS)^2$ or dBV 0 dBV = 1 $(V\ RMS)^2$ or in equivalent engineering units.

**Option 18 – Ultra Low Frequency Analysis Ranges.** Provides analysis ranges of 2.5, and 10 Hz in place of the standard 20, 50, and 100 KHz. Compatible with all other listed options.

**Option 20 – All Digital Range Translator.** Select from 400 to 51,200 lines resolution across each of 12 analysis ranges on single *and* dual displays. **Analysis anywhere from 0 Hz to 100 KHz.**

## AC/DC Calibration Standard

| Model 829G | Measure & Deliver |
|---|---|
| Full-scale ranges | AC/DC Volts 0.01—1400 V<br>AC/DC Current 10 μA-14A<br>Ohms 0.1-10 meg. |
| Accuracies of reading | ±0.05% DC<br>±0.08% AC<br>±0.06% Ohms |
| AC Frequencies | 50, 60, 400, 1000 Hz |

**Model 5058A**

Model 5058A Wattmeter Calibration Module for use with two Model 829G's. For calibration of wattmeters ranging from 0.05 watt to 14,000 watts.

**Model 85**

Converts a precision input voltage to a proportional output current for meter testing, calibration and generation of a precise stable current. Ranges from 100 μA full scale to 10 amperes full scale.
DC accuracy is ±0.02% of range, ±0.01% of output.
AC accuracy is ±0.05% of range, ±0.05% of output.
Can be used with Model 82 Precision Standard and most voltage sources.

**Model 87**

Model 87 Voltage Amplifier/Calibration with 1 volt input, achieve 1000 volt output.

## Magnet Chargers and Treaters

**Model 747**

High energy magnet charger covers full range of charging applications, from the lowest to the highest coercive forces, in all configurations
Available in five separate energy-storage capacity levels from 2,000 to 10,000 watt-seconds.

**Model 1500**

Produces 225 watt-seconds for large Alnico meter magnets plus cobalt platinum and barium ferrite materials. Wire-wound fixtures plug into front panel through safety interlocks.

**Model 440**

Variable output voltage with energies up to 440 watt-seconds for saturating up to 4 lbs. of Alnico V using wire-wound fixture. Bench or rack mounting available. Accessory Booster available for doubling output.

**Model 2470-700R**

With variable voltage outputs and energies up to 880 watt-seconds. Will saturate Alnico V up to 5½ pounds, as well as many core-type indicating meters completely assembled and encased. Rack mounting only.

**Model 942A**

Saturate Alnico magnets to 34 lbs. and high coercive force barium ferrite compounds of any shape or number of poles. Outputs to 3,600 watt-seconds. Safety interlocked.

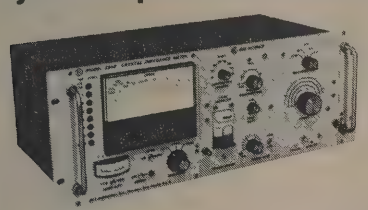
**Magnetreater® Model 990**

Completely solid-state demagnetizer for stabilization of permanent magnets. Power continuously variable from less than 1 VA to in excess of 80,000 VA. Resolution 0.1%. Can be programmed for automatic or semi-automatic operation.

**Magnetreater®/Charger Model 580**

Combination Magnet Charger and Magnetreater capable of charging and stabilizing permanent magnet materials and assemblies. Completely solid-state, providing high reliability. Energy storage for the charging mode is 105 watt-seconds. Magnetreater mode is 54 watt-seconds. Can be combined with RFL Gaussmeter for automatic or semi-automatic operation.

## Crystal Impedance Meters



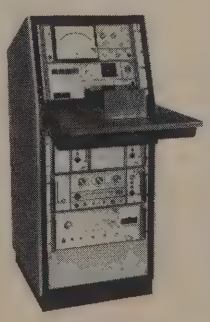
**New Model 5950A** completely solid-state CIM measures semi-automatically. Consists of a main-frame and two interchangeable RF modules covering a frequency range of 2.5kHz to 60MHz.

| Model | Module | Frequency Range | Impedance Range |
|---|---|---|---|
| 5950A | 254A | 2.5kHz - 4MHz | 10 ohms - 400 K ohms |
| 5950A | 460A | 4MHz - 60MHz | 2 - 75 ohms |
| 1207 | n/a | 55 - 200MHz | 10 - 125 ohms |

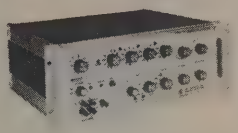
Model 5950A-254/460 replaces discontinued RFL Models 459B, 531 and 541C.

Reference standards for measuring resonance and anti-resonance of quartz crystals in determination of capacitance, inductance and performance index. Meet U.S. MIL-C-3098E/Amd. 1 and U.K. Defense DEF-5271 A.

## Automagnetic® Systems



A combination of RFL standard magnetizing, measuring and demagnetizing equipment permits interconnection for semi-automatic and completely automatic systems designed for individual requirements. Processing includes TWT, BAR and C shaped magnets, DC meters, Torque motors, accelerometers and other designs embodying permanent magnets.



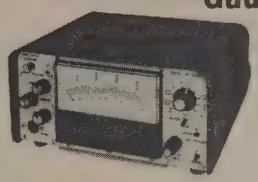
## Precision Standard

**for AC/DC Voltage and Current**

**Model 82**

Tests a wide range of analog and digital meters. AC and Bipolar DC voltage ranges of 100mV, 1V and 10V.
AC and Bipolar DC current ranges of 100uA, 1mA, 10mA and 100mA. Nominal accuracies of 0.01% DC and 0.05% AC. Percent error deviation dial. Frequency variable from 40Hz to 1kHz. Four fractional scale division ranges.

## Gaussmeters



**Model 750A**

**Model 750A,** sensitive wide-range device for analog measurement of 0.10 gauss to 50 kilogauss in 18 full-scale ranges. Measures permanent magnetic fields, DC and AC, to 400 Hz. Polarity sensitive, self-calibrating. Nominal accuracy ±1%.

**Model 750D**, sensitive high-range device for digital measurement of 10 gauss to 100 kilogauss in five full-scale ranges. Measures permanent magnetic fields, DC and AC, to 400 Hz. 3½-digit panel meter. Polarity sensitive. Self-calibrating. Nominal accuracy ±0.2%.

**Model 505**, a low cost unit ranging from 5 gauss to 50 kilogauss in 7 full-scale ranges. Measures permanent magnet, DC and AC fields to 20kHz. Built in probe calibration and zero center mode for determining polarity. Accuracy ±3%.

**Probes**—Are InAs elements for temperature stability. Choice of flat, axial or tangential in various sizes to fit most gaps. Flat ranges from .015" thick × .080" wide × .309" long.

**Reference Magnets**—Traceable to NBS with 50 gauss to 20K gauss fields and gaps from .040" to .343" are standards for probe calibration.

## Magnetometer

**Model 101**

Solid-state low level magnetic flux density measurements from 1 gamma to 100,000 gamma (1 oersted). Temperature compensation is provided to enable virtual drift-free operation.

## Fluxmeter

**Model 803**

Measures total flux and flux density - both AC and DC from 100 Maxwell-turns to 200 × $10^7$ Maxwell-turns. Solid-state with digital readout.
Four modes of operation, normal DC, peak DC no polarity, peak DC with polarity indication, AC average indication.

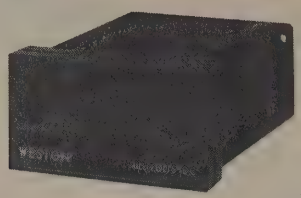
# Digital Panel Meters

## MODEL 1220 (BIPOLAR)



### Features

- All digital logic circuitry contained on a single MOS LSI plug-in chip — added reliability
- LED plug-in readout — added reliability
- Instant accuracy — requires no warm-up time
- Requires only 4 sq. in. space
- Complete instrument uses approximately ¾ watt power — conservatively rated to operate in 60°C ambient — added reliability
- Fixed or remote programmed decimal points
- Range change easily accomplished—simplifying stocking requirements
- Input vs readout "slope" changes easily accomplished
- Ruggedized — engineered to meet Military shock and vibration specs. — exceeds requirements of ACA C39.1 specifications for analog panel meters
- Model 1220 weighs less than 4 oz.

## MODEL 1230

Available in 2½ Digit as Model 1232

### Features

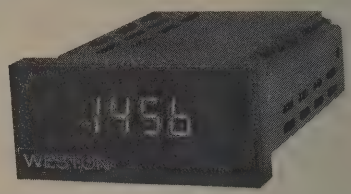
- Dual Slope Integration* A/D Converter
- Automatic bipolar operation
- Automatic zeroing
- Reliable TTL Logic and C-MOS analog gates
- 100% overrange (except 1 KV range)
- 2 nA maximum input bias current
- 7.5 conversions per second
- 0.55″ Sperry displays
- 80 dB CMRR
- 25 dB NMRR (10 dB on 1 volt range)
- Signal and control terminals:
  - Hold • Print Command • Outrange • Polarity

## MODEL 1234

### Features

- Dual Slope Integration* A/D Converter
- Automatic bipolar operation
- Reliable TTL Logic
- 3 nA maximum input bias current
- 7.5 conversions per second
- 0.55″ Sperry displays
- 80 dB CMRR
- 40 dB NMRR
- Signal and control terminals:
  - Hold • Print Command • Outrange • Polarity

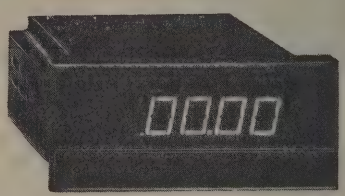
## 2460 SERIES



### Features

- LSI Solid-state reliability
- 0.6″ High Brightness LED Display
- Noise-immune Dual Slope Integration*
- Floating signal input section
- Choice of single-ended or differential inputs
- Isolated, interactive systems interface
- Latched, parallel BCD outputs
- Industry-standard 1.75″ by 4.0″ DPM case

## 2470 SERIES



### Features

- **"True bipolar" integration eliminates dead band**

No dead band around zero. High noise rejection. No skewing at zero. These hallmarks of "Tru bipolar" integration give precise reading near zero for both positive and negative signals.

- **3 Output voltages available** (±12V +5V)

Onboard voltage regulators provide 3 different output voltages to drive external circuits.

- **Automatic zero calibration**

Automatic zero and polarity eliminate zero calibration adjustments and allow direct readings of + and − input signals.

- **Temperature-controlled voltage reference for fast warm-up**

Temperature-controlled zener voltage references eliminate temperature shifts. No long waiting time for the unit to settle. The unit is "within spec" less than 10 minutes after turn-on.

- **High brightness 0.6″ LED display**

Crisp, clear, bright display with semicoductor reliability.

- **3.5W. power consumption**

Special low power circuit design coupled with large bright high efficiency LEDs provide cool running operation in industrial environments.

- **Dual Slope Integration rejects noise**

Universally accepted and patented Weston Dual Slope Integration (U.S. Patent 3,051,939) provides excellent noise rejection.

- **Worldwide Service**

Facilities assure strong, local support throughout the world to satisfy application and service needs.

### Options

- **Current loop ranges**

4 current loop ranges from 200μA to 200mA.

- **Isolated parallel BCD Output** (Model 2472)
- **Ratiometric operation** (standard)
- **Engineering units** (offset and full scale calibrated for pH, psi, C°, F°)

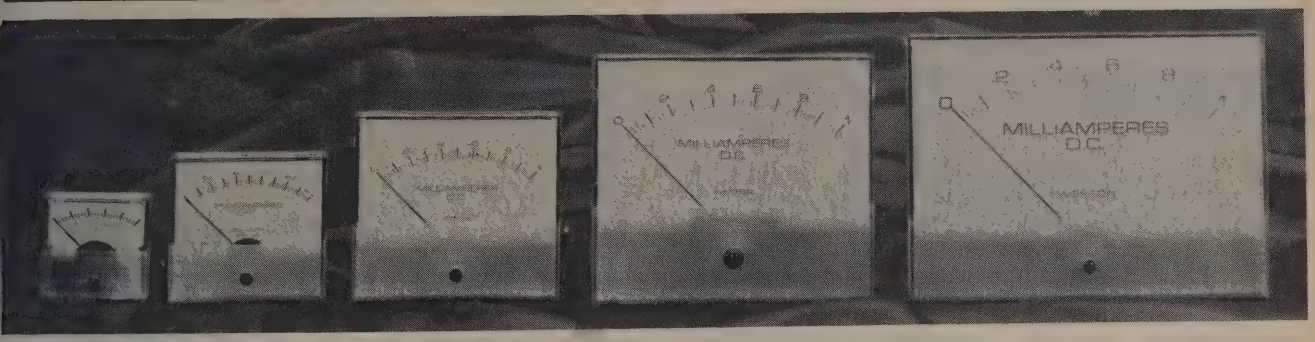
# MUSTANG
## Panel Meters



# MUSTANG

MUSTANG is a new line of precision panel meters by Weston, manufacturers of panel instruments since 1888. MUSTANG answers your need for true economy combined with style, ruggedness and reliability. You'll be glad to know abut the:

- Versatile appearance options—panel, bezel or window mounting
- Taut-band and pivot-and-jewel mechanisms
- Tough plastic pointer—ignores handling and electrical overloads
- White plastic scale, molded-in color which can't chip or yellow
- Ring-Lock mounting option—makes installation a real snap
- Backlighting feature—bright, uniform scale illumination when you need it.

The MUSTANG panel meter contains fewer parts than any other analog panel meter made today. That's why it offers unsurpassed reliability and economy. For top value in new applications or replacement. MUSTANG is your best choice.

The MUSTANG mechanism is a self-shielding CORMAG™ design, exhaustively tested in the lab and in the field to provide day-after-day accuracy and reliability. Welded electrical connections are used throughout. A unique caging design is used in taut band meters for added protection from environmental shock and vibration.

Small in overall size, The MUSTANG mechanism permits rear illumination without shadowing the lower part of the scale. Despite this small size, enough torque is available for crisp, low-overshoot response in VU applications.

# PERFORMANCE SPECIFICATIONS

## 2000 SERIES VU METERS

| Model | Catalog No. | Scale Type |
|---|---|---|
| 2022 | 3841001 * | Type 30 A scale |
| | 3841002 | Type 30 B scale |
| 2032 | 3841001 * | Type 30 A scale |
| | 3841002 | Type 30 B scale |

Weston VU Meters are available with Type A or Type B scales. The Type A scale stresses the level in VU units for monitoring wire lines. The Type B scale emphasizes percent use of transmitter output and is the standard for broadcast service. The VU meter is designed to read zero VU, or 100%, with 1.228 volts AC applied to the meter and a 3600 ohm series resistor. This represents 4dB above 1 MW in 600 ohms.

* *Stock item.*
† *When ordering meters, model number must precede catalog number.*
△ *When ordering meter with optional black painted front change second digit of catalog number "8" to "7."*

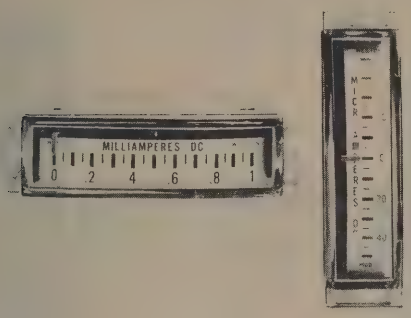
# Edgewise Panel Meters

## WESTON Model 111

- Completely flat—can be stacked side-by-side
- Flat self-shielded Cormag ® mechanism
- Saves panel space



MODEL 111

### SPECIFICATIONS

**Accuracy:** 2% of full scale value for DC (**Model 111**).
3% of full scale value for AC Rectifier Type (**Model 112**)

**Scale Length:** 1.24 inches

**Pointer:** Red Lance Type

**Movement:** Self shielded thin line CORMAG® mechanism. Shock mounted jewel arrangement.

**Ranges:** Voltage: 50 mv minimum
300 volts maximum
self-contained

Current: 50 ua minimum
2 amps maximum
self-contained

**Mounting:** Meter is designed to be mounted on a vertical panel with the scale being either horizontally (zero on left) or vertically (zero on bottom) oriented. Most ranges stocked for horizontally oriented scales. Meters can be supplied for a horizontal panel mounting on special order.

Mounting clips fasten to meter behind panel—no screws show on front of panel. For "stacking," thru-holes are provided so stack can be bolted together.

Zero corrector not used on ammeters, milliammeters above 10 Ma, rectifier meters and suppressed zero meters.

All resistances are approximate

### RANGES

| DC VOLTMETERS (Model 111) | RESISTANCE |

|---|---|
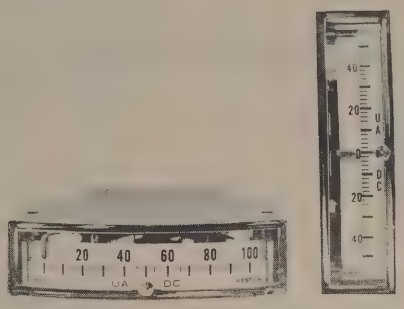
| 0-150 | 2000 Ω /v |
| 0-300 | 2000 Ω /v |

## WESTON Model 121

- Completely flat—can be stacked side-by-side
- Parallax eliminated—in-line pointer and scale
- Flat self-shielded Cormag ® mechanism
- Saves panel space
- Optional self-contained illumination feature
- Front mounted zero corrector



MODEL 121

### SPECIFICATIONS

**Accuracy:** 2% of full scale value for DC (**Model 121**).
3% of full scale value for AC Rectifier Type (**Model 122**)

**Scale Length:** 1.875 inches; Anti-parallax in-line scale

**Pointer:** Red Lance Type

**Movement:** New shelf shielded thin line CORMAG® mechanism. Shock mounted jewel arrangement.

**Ranges:** Voltage: 50 mv minimum
300 volts maximum
self-contained

Current: 50 ua minimum
2 amps maximum
self-contained

**Mounting:** Meter is designed to be mounted on a vertical panel with the scale being either horizontally (zero on left) or vertically (zero on bottom) oriented. Most ranges stocked for horizontally oriented scales. Meters can be supplied for a horizontal panel mounting on special order.

Mounting clips fasten to meter behind panel—no screws show on front of panel. (Bezel furnished for single meter mounting.) For "stacking" thru holes are provided so stack can be bolted together.

**Illumination:** Two G.E. 328 lamps are used. Recommended operating voltage—5 volts (less than 200 ma per bulb). Expected life greater than 5,000 hours.

**Dielectric:** 1500 volts RMS

# Edgewise Panel Meters

## WESTON Model 231

**Scale Length:** 2.75" Anti-parallax in-line scale
**Zero Corrector:** Front only
**Illumination:** Optional—2 #328 lamps, 5V @ 200mA each 5000 hr. life
**Mounting:** Vertical Panel Standard; Horizontal scale (zero left) standard or Vertical scale (zero bottom) standard. Screw-clamps are standard. For stacking, through holes are provided so stack can be bolted together.

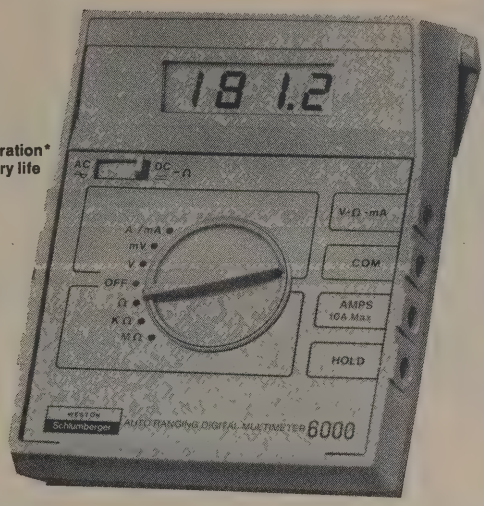
# AC/DC Multimeters

## Model 6000 *Autoranging* Digital Multimeter

### Features

- Autoranging
- Long life Liquid Crystal Display
- Portable
- LSI microcircuitry
- Patented Dual Slope Integration*
- More than 200 hours battery life



### Specifications

| | |
|---|---|
| **Polarity** | Automatic bipolar |
| **NMRR (DC only)** | 66 dB at 50 Hz (20 dB near zero) |
| **Display** | 1999 with polarity (0.5"/12.7 mm LCD) |
| **Display Hold** | SPST contact closure (HOLD to COM) retains reading |
| **Operating Power** | Two 9V "transistor" batteries (NEDA 1604, PP3 or RR3) |
| **Battery Life** | 200 operating hours (350 hours with alkaline batteries) |
| **Low Battery Warning** | Valid reading blinks during final 10 hours |
| **Outrange Indication** | Blinking "1888" display ("1" and "888" alternate) |
| **Operating Ambient** | 5°-50°C, 10-85% R.H. |
| **Storage Temperature** | −10 to +55°C |
| **A.C. Frequency Influence:** | |
| 0-2/20/200 V | Less than 0.25 dB to 16 kHz |
| 0-200 mV, 0-1000 V and current | Less than 0.5 dB to 1000 Hz |
| **Weight** | 22 oz (625 g) incl. batteries |
| **Size** | 7" x 5.75" x 2.25" (178 x 146 x 58 mm) overall |

### Accessories extend DMM 6000 applications

**Hold Probe/Cat. No. 9740-279407**
Permits finger-tip control of HOLD input of DMM 6000. Probe tip is signal input. 2-position slide switch allows normal or HOLD operating modes.

**Light Meter Attachment/Cat. No. 856-0280851**
This attachment used with the Model 6000 provides direct reading of light levels in foot-candles. The standard range is 0-125 fc (accuracy of ±7% of full scale).

**RF Voltage Probe/Cat. No. 9740-279627**
Passive diode probe for measurement of 1-30 volt, 10 kHz-50 MHz voltages (usable over 1-90 volt, 1 kHz-100 MHz range). Scaled for RMS of sinewave signal, 10 Megohm instrument input. Use with DC ranges of any DMM.

**VHF RF Probe/Cat. No. 9970-271961**
For use with 10 Megohm DMM's. Permits voltage measurements from 0.25 to 30 volts up to 520 MHz. Molded dual banana plug output, ground lead at probe. Complete with storage pouch and adapter for direct mating to BNC receptacle.

**High Voltage Probe/Cat. No. 9740-279395**
Provides 0-50,000 VDC measurements with 10 Megohm DMM or FET VOM. Includes replaceable 990 Megohm resistor for 100:1 division of input voltage; resistors are also available for use with 20,000 ohm/volt meters.

**A.C. Clamp-on Probe/Cat. No. 9740-275768**
Scales any of 3 switch-selectable A.C. current ranges (0-2/20/200A.) for readout on 0-200 mV range of DMM. Split-jaw construction for fast, easy measurements. Use on 50-400 Hz currents, conductor diameters to 1" (25mm). Accuracy 2% (200A), 3% (20A), and 4% (2A).

| Specifications[1] | D.C. Voltage | A.C. Voltage | D.C. Current | A.C. Current | Resistance |
|---|---|---|---|---|---|
| Accuracy | 0.35% Rdg ± 2d | 0.5% Rdg ± 5d[3] | 0.75% Rdg ± 3d | 1.5% Rdg ± 5d[3] | 0.5% Rdg ± 1d[3] |

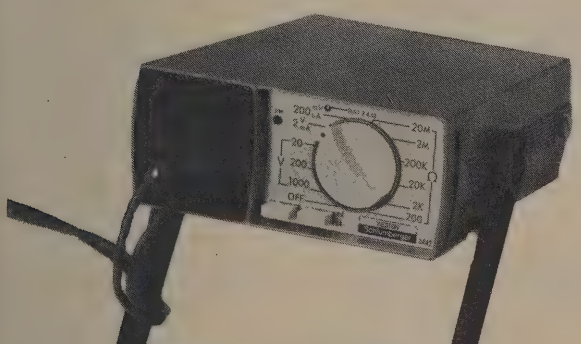
| Maximum Reading | 1000 V | 1000 V | 10 A | 10 A | 20 Megohm |
| Overload Rating | 1500 V peak | 1000 V (1500 V peak) | 1/4A/250 V fuse[4] | 1/4A/250 V fuse[4] | 250 V (350 V peak) |
| Temperature Coefficient[5] | 250 ppm/°C[6] | 600 ppm/°C | 300 ppm/°C | 750 ppm/°C | 600 ppm/°C[3] |

**Notes:** *(1) Specifications guaranteed for 90 days and when operated at 23°C ±5°C*
*(2) 40 to 400 Hz; ±2% Rdg ±5d for 0 to 1000 VAC range*
*(3) ±1% Rdg ±2d and 2000 ppm/°C for 200 ohm range (4) Except 0-2A/10A ranges: 0.01 ohm input, 15A maximum*
*(5) Offset Tempco 1d/5°C beyond the 23°C ±5°C range (6) Tempco for 1000 V range is 350 ppm/°C max.*

## MODEL 4442 DIGITAL MULTIMETER



### General Specifications

**DISPLAY**
1999, —1999 (non-blinking) 0.19" character size.
Leading zero blanking—Least significant digit never blanked.
Overrange indication—blinking 1 in thousands place with a polarity and decimal indication. Balance of digits blanked.
Moving decimal point.

**BATTERIES**
Four "C" size nickel cadmium supplied with meter

**CONVERSION RATE**
Approximately 4 per second

**POLARITY**
Automatic

**CMRR**
80 dB (Approaches ∞ on battery)

**NMRR**
38 dB

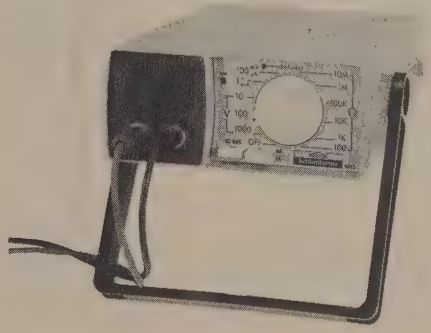
**INPUT POWER**
Battery operation
Line operation—115 V, 50-400 Hz (All Models)

**TEMPERATURE**
25°C ± 3°C with guaranteed accuracy (Operable from 0 C to 50 C – derate accuracy)

**SIZE**
2.25" H x 5.45" W x 7" D

**WEIGHT**
Less than 2½ pounds

## MODEL 4445 RMS DMM AC/DC MULTIMETER



### Features:

- True RMS AC measurements.
- 3½ Digit non-blinking LED readout.
- All solid state MOS LSI circuitry.
- Dual Slope conversion for accuracy and long term stability.
- Self-contained battery pack provides up to 10 hours of continuous use.
- 117 Volt battery charger supplied as standard equipment.
- Automatic blanking of digits not in use to conserve battery life.
- Fully-overload protected-fuses externally replaceable.
- Shock-proofed, high impact plastic case.
- Weighs less than 2½ pounds.

### GENERAL SPECIFICATIONS

**DISPLAY**
1999, —1999 (non-blinking) 0.19" character size
Leading zero blanking—Least significant digit never blanked
Outrange indication—blinking 1 in thousands place with a polarity and decimal indication. Balance of digits blanked
Moving decimal point

**BATTERIES**
Four "C" size nickel cadmium supplied with meter

**CONVERSION RATE**
Approximately 4 per second

**POLARITY**
Automatic

**CREST FACTOR**
4:1 at full scale (except where limited by maximum input), inversely proportional to input valve (IE, 8:1 at half scale, 40:1 at tenth scale, 2:1 at 100% overrange)

**OVERRANGE**
100% (Reads 1999) except on 1000 V range

**CMRR**
80 dB (Approaches ∞ on battery)

**NMRR**
38 dB

**INPUT POWER**
Battery operation
Line operation—115 V, 50-400 Hz

**TEMPERATURE**
25°C ± 3°C with guaranteed accuracy (Operable from 0°C to 50°C—derate accuracy)

**SIZE**
2.25" H x 5.45" W x 7" D

**WEIGHT**
Less than 2½ pounds

## WESTON® Model 633 A-C Clamp Ammeter and Volt Ammeter

**Accurate within 3%**
**Scale Length: 2.36"**
**Size: 13⅝" x 4⅜" x 2½"—346 x 111 x 64 mm**
**Weight: 3¾ lbs.**

### Outstanding Features:

- Non-Shatterable Glass
- Adjustable Pointer Stop (Model 633 VA-1 only)
- Safety Type Trigger
- Insulated For 750 Volt Service
- Can Be Hung On A Conductor, Leaving Operator's Hands Free
- Accepts Conductors Up to 2" In Diameter

### Ranges:

**Model 633 Type VA-1** Cat. No. 633-9901001 (Incl. Potential Leads) 1000/250/100/25/10 amperes a-c 700/350/175 volts a-c

**Model 633 Type A-1** Cat. No. 633-2901001 500/250/100/50/25/10 amperes a-c

**Model 633 Type A-2** Cat. No. 633-2901002 1000/500/250/100/25/10 amperes a-c

**Model 633 Type A-3** Cat. No. 633-2901003 2000/1000/500/250/100/50 amperes a-c

**Leather carrying case** for types VA2, A1, A2, A3 Model 9959 - P/N 90856

## WESTON Model 749 A-C Clamp Volt Ammeter

**Accurate with 3%**
**Scale Length: 2.36"**
**Size: 7½" x 3" x 1¼"—191 x 77 x 32 mm**
**Weight: 14 oz.**

### Outstanding Features:

- Pocket Size
- Precision Ground Faces Provide Positive Jaw Contact
- Shatterproof Wrap-around Plastic Window
- Uses Shock-mounted Core Magnet Mechanism
- Fully Insulated for 750 Volt Services

Plug-in adapter, Model 9886, designed for use with Model 749, facilitates current measurements of double conductor leads without breaking the circuit. Used on direct reading or as a 10-to-1 divider for low current measurements. Simplifies voltage testing during current checks.

**Model 749** (Ind. case, leads, battery, clips, probes) Cat. No. 749-2901001
300/150/60/30/15/6 amperes a-c
600/300/150 volts a-c

Model 9886 Plug-in adapter—P/N 159983

**All meters are stock items. Any other practical range can be supplied.**

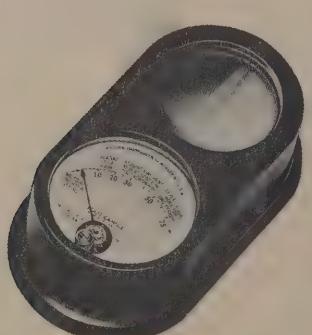
## WESTON®

### Model 615 Broad Range Light Meter

### Features

- Ranges 0-1.2/3/12/30/120/300/1200 Foot Candles
- Viscor and Cosine correction supplied
- More than one year of operation from one 9 volt transistor battery
- Portable—7"x3½"x2½" 2 lbs.
- Light level guidelines in cover

## WESTON® Model 703 Illumination Meters



**Model 703-0275190,** Illumination Meter 0-60 foot-candles (with Viscor and cosine correction filters)

**Model 703-996007,** Illumination Meter 0-100 foot-candles (with Viscor and cosine correction filters)

**Model 703-0275191,** Illumination Meter 0-200 foot-candles (with Viscor and cosine correction filters)

**Model 703-0275192,** Illumination Meter 0-600 foot-candles (with Viscor and cosine correction filters)

**Model 703-9960009,** Illumination Meter 0-30 foot-candles (with Viscor filter)

**Model 703-9960011,** Illumination Meter 0-75 foot-candles (with Viscor filter)

**Model 703-9960010,** Illumination Meter 0-75 foot-candles (with Glass Filter)

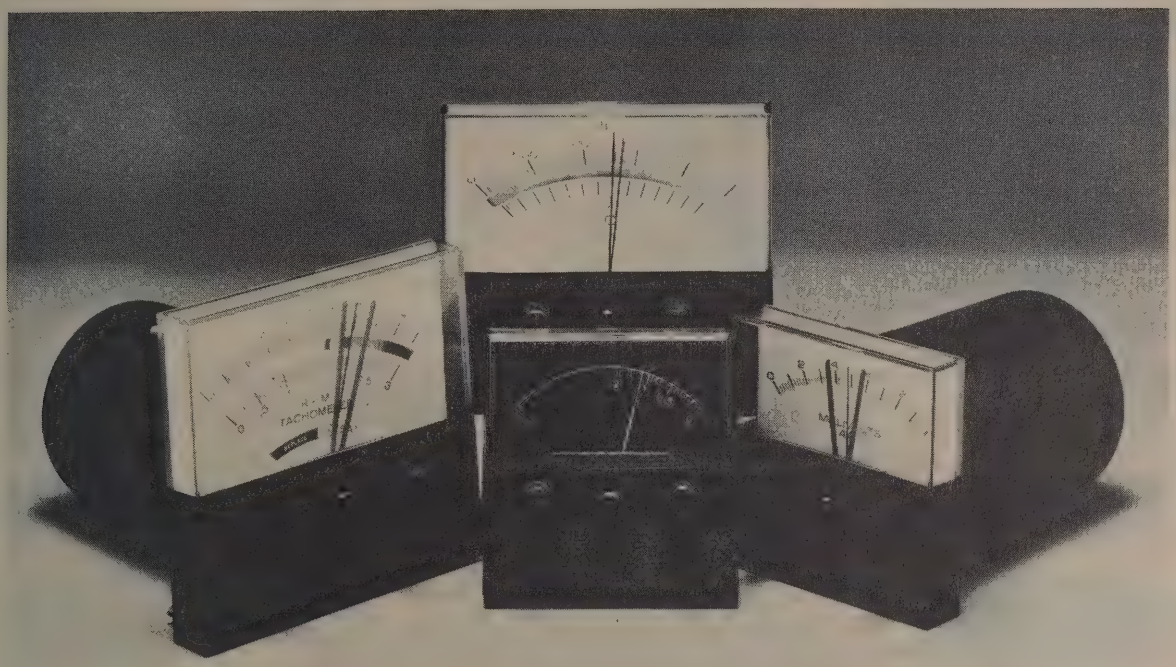
**Model 703-9960051,** Illumination Meter 0-150 foot-candles (with Quartz Filter) for Ultra violet use. Fluorescent characters and pointer on black background scale.

**Model 9959-0074472,** Leather Carrying Case

**Model 9924-0092108,** Multiplier Disc (X10) (Not usable with cosine corrected instruments.)

SANGAMO WESTON
Schlumberger

# WESTON® Meter-Relays, Meter-Switches & Meter-Controllers



Weston now offers the most comprehensive, versatile and economical family of meter-based controls available—any where! Add the clean, modern appearance and traditional Weston reliability to your applications in: Analytical Instrumentation, Furnace and Oven Shutdown, Go/No Go Testing, Machine Tool Control, Medical Monitoring Plating Control, Microprocessor Data Input, Motor Overload Alarms, Petrochemical Processing, Power Monitoring, Speed Control, Temperature Control, Vacuum Equipment. The New 7600/7700 Family brings 60 years of Weston meter-relay experience to you—with valuable features such as:

- **Wrap-around window for shadow-free, wide-angle viewing.**
- **Space-saving shallow barrel.**
- **3½" and 4½" sizes with standardized panel cutouts and terminals.**
- **All taut band suspensions for superior accuracy and ruggedness.**
- **Optical and solid-state types for any application.**
- **Plastic pointer resists electrical on mechanical overload.**

## Optical-7600 Series

- Front-replaceable lamp
- Meter-switch for compact, solid state control
- Optional input buffer for high impedance
- Infinite line noise rejection

## Solid-State-7700 Series

- High input impedance
- Immune to shock and vibration
- Meter-relay provides IK pot output for OEM controls
- Quick delivery on non-standard ranges

## Ranges

DC-10$\mu$A to 10A, self-contained: 10mV to 500V
AC-50$\mu$A to 10A, self-contained : 50mV to 500V
Temperature—300°F span

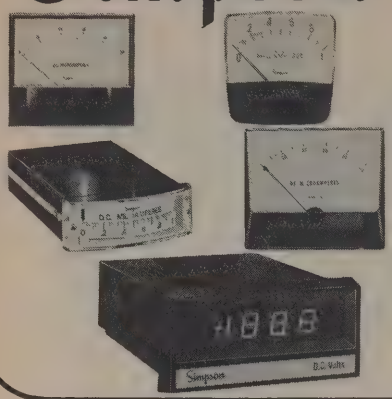
## Options

Relay indicator lamp ● relay latching ● reset push-button ● dial illumination DC operation ● red or white pointer ● non-standard ranges, impedances, response times.

Over 1,000,000 combinations of ranges, types and options are available—guaranteeing you the right answer to your application problems. Look to WESTON for Meter-Relays, Meter-Switches, & Meter-Controllers.

# Simpson® PANEL METERS

## If it's a meter — stock or special — analog, digital, Ana-Led® or meter relay, Simpson makes it



### STANDARD ANALOG PANEL METERS Industry's Widest Source

**Century Series,** modern styling in 1½, 2½, 3½ and 4½″ sizes, wide choice of ranges. **Wide-Vue®,** popular style, in 1½, 2½, 3½, 4½ and 8″ sizes, many stock ranges to select from. **Edgewise meters** save precious panel space, available in barrel and stackable models with vertical or horizontal scales, in all standard ranges plus specials. Other panel meter types also available include Bold-Vue®, Designer series, round and rectangular, metal cased. 250° long scale meters provide double the length of standard scales. The famous Simpson self-shielded meter movement provides calibration that is not affected by stray magnetic fields or magnetic mounting. A wide variety of stock DC, AC, RF, DB, wattmeters, percent load, elapsed time, frequency, and segmental ranges are available through worldwide electronics distributors.

### DIGITAL PANEL METERS

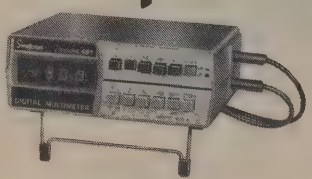
Highly reliable 3½ digit instruments utilize state-of-the-art LSI circuitry and provide 0.1% of reading accuracy. Designed to fit 1.682″ x 3.622″ cutouts. Adapters are available for other popular domestic and IEC/DIN cutout sizes. Automatic zero and polarity indication. Choice of 120/240 V AC, 50-400 Hz or 5 V DC operation. Input/output edge connector is included.

**Low Cost Series 2860 DPM** has 0.43″ LED readout.
Available in 9 stock DC ranges ..... **$74.10**

**Deluxe Series 2850 DPM.** Choice of 0.43″ LED or 0.55″ planar gas discharge display. BCD output for computer or recorder interfacing.
Available in 9 stock DC ranges plus specials including AC ranges ..... **$138.00**

# Simpson® DIGITAL MULTIMETERS

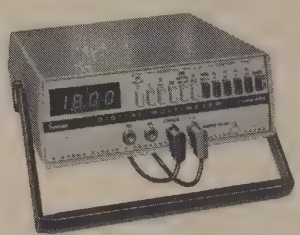
### NEW MODEL 461 — DIGITAL MULTIMETER



Compact 2″ x 5.6″ x 4.6″ instrument weighs only 1 lb. 3 oz. 3½ digit, 0.33″ LED readout. ±0.5% accuracy on all DC V ranges. High impact, shock-resistant case with tilt-view adjustable handle. 26 ranges, pushbutton selection: 5 AC and 5 DC current ranges to 2 amps, 6 resistance ranges to 20 M, 5 AC voltage ranges to 600 V, 5 DC voltage ranges to 1000 V. Conforms to ANSI C39.5 requirements. With nickel-cadmium batteries and recharger/adapter.

**Model 461,** for 120 V AC (50-400 Hz) line and battery operation.
Catalog No. 12136 ..... **$142.50**
**Model 461,** for 230 V AC (50-400 Hz) line and battery operation.
Catalog No. 12137 ..... **$142.50**
**40 KV High Voltage Probe,**
Catalog No. 00749 ..... **$39.35**
**Carrying Case,** Catalog No. 00747 ..... **$20.86**
**RF Probe,** Catalog No. 00748 ..... **$28.10**
**Model 153 AC Amp-Clamp Adapter,**
Catalog No. 12138 ..... **$31.60**

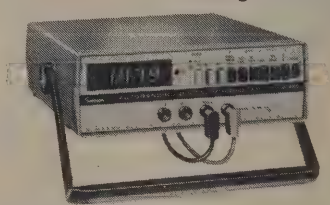
### MODEL 464 PRICE/PERFORMANCE BREAKTHROUGH



For field or factory, production line, lab or R & D testing and for general electronic/electrical servicing. 3½ digit, 0.43″ LED readout ±0.1% accuracy on DC ranges. High impact, shock-resistant case with tilt-view, adjustable handle. 28 ranges, pushbutton selection: 6 AC and 6 DC current ranges to 10 amps, 6 resistance ranges to 20 MΩ, 5 AC voltages to 600 V, 5 DC voltages to 1000 V. Conforms to ANSI C39.5 requirements.

**464A for AC line operation.**
**For 120 V.** Catalog No. 12583 ..... **$225.00**
**For 220 V.** Catalog No. 12597 ..... **$225.00**
**For 240 V.** Catalog No. 12595 ..... **$225.00**
**464D for AC line or rechargeable battery operation.** Batteries not incl.
**For 120 V.** Catalog No. 12584 ..... **$265.00**
**For 220 V.** Catalog No. 12598 ..... **$265.00**
**For 240 V.** Catalog No. 12596 ..... **$265.00**

### MODEL 465 AUTORANGING DMM



Automatically selects and displays the proper measuring range. Has bright 3½ digit 0.43″ LED readout. Custom MOS/LSI circuitry provides high 0.1% DC V accuracy. Measures DC voltage to 1000 volts, AC voltage to 600 volts, resistance to 20 megohms, plus low-power ohms ranges, AC/DC current to 10 amps. High-impact shock-resistant case with tilt-view adjustable handle.

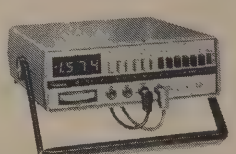
**465A for AC line operation.**
**For 120 V.** Catalog No. 12561 ..... **$315.00**
**For 220 V.** Catalog No. 12562 ..... **$315.00**
**For 240 V.** Catalog No. 12563 ..... **$315.00**
**465D for AC line or rechargeable battery operation.** Batteries not incl.
**For 120 V.** Catalog No. 12564 ..... **$355.00**
**For 220 V.** Catalog No. 12565 ..... **$355.00**
**For 240 V.** Catalog No. 12566 ..... **$355.00**

### MODEL 360-2 DIGITAL VOLT-OHM-MILLIAMMETER

Choice of nickel-cadmium rechargeable battery operation or AC line operation. Large bright 3½ digit 0.43″ LED readout, plus calibrated zero center analog meter for nulling, peaking, scanning trends. Exclusive MOS/LSI circuitry provides compactness with high reliability and low power dissipation. 29 ranges: 7 AC and 7 DC current ranges to 10 amps, 5 DC voltage ranges to 1000 V, 5 AC voltage ranges to 600 V, 6 resistance ranges including 2 low ohms ranges.

**360-2,** line and battery operation, 120 V AC (50-400 Hz), Catalog No. 12286 .... **$275.00**
**360-2,** line and battery operation, 220 V AC (50-400 Hz), Catalog No. 12287 .... **$275.00**
**Carrying Case,** Catalog No. 00816 .. **$28.10**

### 460-3 DIGITAL MULTIMETER



32 ranges with separate low-power ohms ranges for most measurement application. 3½ digit 0.54″ LED readout. Custom MOS/LSI circuitry gives 0.1% DC V accuracy. Calibrated auxiliary analog display. Measures AC/DC current to 10 amps, AC voltage to 600 V, DC voltage to 1000 V, resistance to 20 megohms. High impact case with tilt-view adjustable handle.

**460-3A. for AC line operation.**
**For 120 V.** Catalog No. 12541 ..... **$299.00**
**For 220 V.** Catalog No. 12546 ..... **$338.00**
**For 240 V.** Catalog No. 12542 ..... **$299.00**
**460-3D for AC line or rechargeable bat. operation.** Batteries not incl.
**For 120 V.** Catalog No. 12543 ..... **$338.00**
**For 220 V.** Catalog No. 12545 ..... **$299.00**
**For 240 V.** Catalog No. 12544 ..... **$338.00**

### ACCESSORIES FOR 464, 465, 460-3, 360-2

**40 KV High Voltage Probe,** Catalog No. 00432 ..... **$35.00**
**Carrying Case,** (not for 360-2), Catalog No. 01617 ..... **$28.10**
**RF Probe,** Catalog No. 00433 ..... **$28.10**
**Model 154, AC Amp-Clamp Adapter,** Catalog No. 12222 ..... **$31.60**

# Simpson® 260 FAMILY OF VOMS

## 260-6® VOLT-OHM-MILLIAMMETER

Fast, accurate measurements of 27 popular ranges. Direct-dial reading of Amp-Clamp ranges. Rugged taut band movement, varistor protected. External access battery and fuse compartment. Multi-purpose test leads with combination probe and alligator clips. Two batteries supplied — 9 V (NEDA 1604) and 1.5 V "D" size (NEDA 13F). Complete with batteries, test leads and manual, Catalog No. 12167 ..... **$83.50**

**260-6P.** Circuit overload protected. Reset pushbutton releases when overload exists. Will not reset until overload is eliminated. With batteries, test leads and manual, Catalog No. 12171 ..... **$124.95**

**260-6M,** with Mirror Scale, Catalog No. 12168 ..... **$86.60**

**260-6RT,** in Roll Top Case, Catalog No. 12169 ..... **$94.00**

**260-6MRT,** with Mirror Scale and in Roll Top Case, Catalog No. 12170 ..... **$97.15**

**260-6PM,** Protected with Mirror Scale, Catalog No. 12175 .... **$128.10**

**260-6PRT,** Protected in Roll Top Case, Catalog No. 12172 .... **$135.45**

**Low-Power Ohms Probe,** Catalog No. 00735 ..... **$34.80**

**Vinyl Ever-Redy Case,** Catalog No. 00805 ..... **$24.25**

## 260-6XL VOLT-OHM-MILLIAMMETER

For the special needs of solid-state electronics. 33 ranges with extra voltage, current, resistance and low-power ohms functions. Extra shock and drop resistant construction. High impact, custom-molded panel and case. Extra large viewing area with color-keyed scales. Plus, all the features of the 260 Series 6. Complete with batteries, test leads and manual, Catalog No. 12177 ..... **$97.50**

**260-6XLM,** with Mirror Scale, Catalog No. 12186 ..... **$101.00**

**260-6XLP** Circuit overload protected — same as 260-6XL. With batteries, test leads and manual, Catalog No. 12176 ..... **$134.50**

**260-6XLPM,** Protected with Mirror Scale, Catalog No. 12187 ..... **$137.50**

**40 KV Probe,** Catalog No. 00033 ..... **$27.45**

**Vinyl Ever-Redy Case,** Catalog No. 00805 ..... **$24.25**

# Simpson® MODEL 452

## DUAL TRACE TRIGGERED SWEEP SCOPE

For design, development and service of digital circuitry, communications, audio, TV. Uses reliable integrated circuitry and solid state components. Differential vertical amplifier stages provide DC to 15 MHz bandwidth with smooth rolloff to beyond 27 MHz. Triggering is internal and external with 3 TV sync positions (TVV, TVH, VITS). Trace automatically shifts from Chop to Alternate as you change sweep times. Also 24 nsec rise time, front panel X-Y displays CHA, CHB, A&B, A+B or A−B. 0.5 V P-P 1 KHz square wave calibrator. Voltage calibrated 11-step vertical and horizontal inputs, X5 magnification.

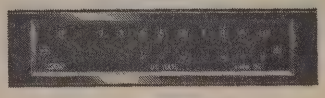
**Model 452,** for 120 V AC, Catalog No. 12513 ..... **$675.00**

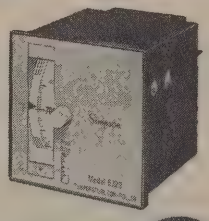
**Model 452,** for 220-240 V AC, Catalog No. 12514 ..... **$675.00**

**Low-Cap. 10-1 Probe,** Catalog No. 00791 ..... **$20.65**

# Simpson® ANA-LED

## MODEL 7527 SOLID-STATE PANEL METER/CONTROLLER

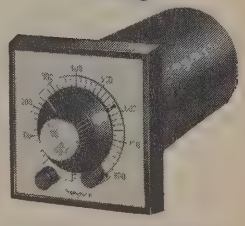




The best of analog and digital techniques for unique advantages. Choice of "bar" or dot display, through or front panel mounting. Instant response, no moving parts. Extreme resistance to shock and vibration. 5″ direct-reading horizontal linear LED scale. Vertical scale available. No pointers, no blinking digits. 15 msec max. response, no overshoot. Set-point modules for on/off limit control and output devices available.

Many variations available ..... **$99.50**

## CONTROLLERS • RECORDERS



**Model 5850 Solid State, Non-Indicating Controller** provides precision control of voltage, current or temperature. Single or double set-points. Rugged sealed, all metal housing. Solid state circuitry with 10-amp relay output. Wide selection of ranges.

**Single Set-Point Models** ..... **$102.75**

**Double Set-Point Models** ..... **$176.55**

**Model 3623XA Edgewise Controllers.** 3½″ size, single or double setpoint with removable knobs. Wide variety of ranges. **Model 3323XA Rugged Seal Controllers.** 3½, 4½ and 4 x 6″ sizes. Variety of ranges.

**Model 2750-Miniature Strip Chart Recorders.** Panel mount or portable. 3¾″ square. Versatile models for electrical value, event or temperature recording. Wide complete selection of ranges and accessories.

**Quantity OEM prices available on request.**

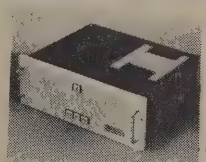
### Micro-Processor Control Panel

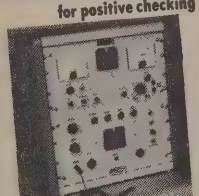


SERIES 720

Brain Package

HANDLES MULTIPLE TEST PANELS AND SINGLE OR DUAL TEST FIXTURES PLUS PERIPHERAL EQUIPMENT . . . SOLID STATE ...PLUG-IN P-C BOARD CONSTRUCTION... COMPATIBLE STANDARD LOGIC . . . FULLY PROGRAMMABLE.

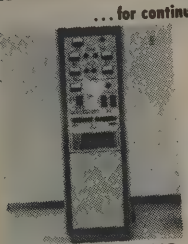
### Automatic Final Test Station
for positive checking . . . ground lead . . . dielectric . . . run test



SERIES 950

COMPLETE PACKAGE FINAL TEST STATION . . . STEP OR RAMP FUNCTION DIELECTRIC TEST . . . FULLY AUTOMATIC CYCLE INCLUDING TEST RUN . . . ACCESSORY RUN TEST INSTRUMENTATION AVAILABLE.

### Automatic Cable & Harness Tester
... for continuity . . . breakdowns . . . megohms



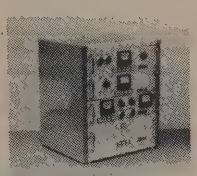
SERIES 727

Expandable to 9,999 Circuits

Micro-Processor Controlled

SELF PROGRAMMING WITH MAGNETIC TAPE CASSETTE STORAGE AND RECOVERY OF PROGRAMS . . . MODULAR CONSTRUCTION . . . TESTING RATES TO 3000 CIRCUITS PER MINUTE . . . GO/NO-GO OPERATION . . . DIGITAL READOUT.

### Automatic Coil & Winding Test Station
micro-processor controlled . . . coils . . . armatures . . . stators . . . fields

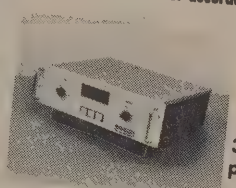


SERIES 720

Test Rates to 1000 Parts per Hour

READY-TO-GO PACKAGE HANDLES 90% OF COIL WINDING TEST APPLICATIONS . . . QUICK CHANGE TEST FIXTURES . . . FULLY AUTOMATIC GO/NO-GO CYCLE.

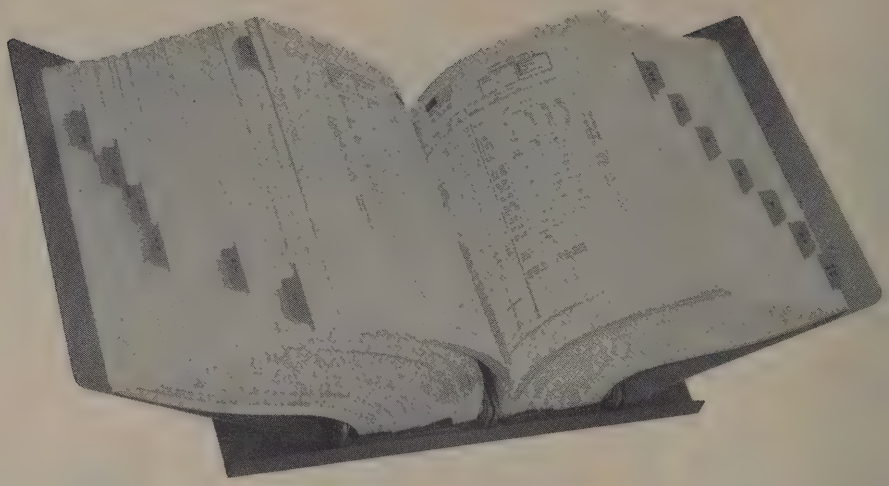
### High Speed Circuit Tester
... for accuracy and integrity



SERIES 703

3000 Tests per Minute

SELF PROGRAMMING FOR TESTING UP TO 500 POINTS . . . MICRO PROCESSOR CONTROLLED . . . GO/NO-GO OPERATION DIGITAL READOUT OF FAULT AND LOCATION.



# UNITED PRICING REPORTS

## the single source that speeds up invoicing, pricing, quoting, purchasing and estimating

Electronic component prices change so fast, you'd need a team of people just to keep up.

United Pricing Reports is the better way. When you subscribe to Pricing Reports you receive 1500 pricing sheets (3000 pages) of the latest prices, as of the date we ship them to you.

This gives you, in a single source, up-to-the minute selling prices on more than 500,000 electronic components.

United Pricing Reports gives you accurate resale prices at the exact moment you need them. Not hours or days later. So it helps you eliminate frantic phone calls, letter writing and catalog scanning to check on prices when you write an invoice or type a purchase order.

## Twice weekly price updates.

One week after you receive your Pricing Reports source book (1500 pricing sheets) you begin receiving twice weekly price updates. You simply take these new price pages and replace the now obsolete pages with them.

The whole process is simple. All information is organized alphabetically by manufacturer. And each manufacturer's price schedule is listed by part number in numerical/alphabetical sequence.

One more thing. When we promise twice weekly updates, we deliver. 52 weeks a year, consistently. Not monthly or every other month. We have a tradition of delivery on our promises, and we're certainly not going to stop now.

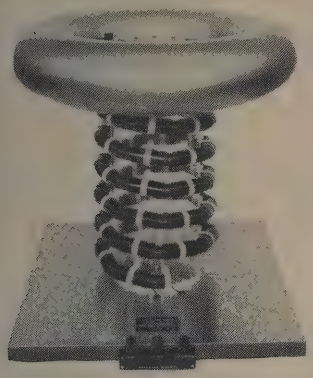
# HIGH VOLTAGE MEASUREMENT



PARK

## High Voltage Divider

Model PARK Voltage Divider is constructed to a design by J. H. Park. (Ref: "Journal of Research" of National Bureau of Standards, Engineering and Instrumentation Vol. 66C, No. 1, Jan.—Mar., 1962. Reprints available upon request.) It is similar to the NBS standard employed in their calibration of high voltage instruments. Each 100 kv divider consists of 100 individually shielded one-megohm resistors, matched to each other to achieve an approximate temperature coefficient of less than 1 ppm/°C, and connected in series to form a vertical helix between a ground plate and a high voltage electrode. Uniquely shielded, testing indicates that corona, heating and leakage errors are less than 10 ppm at less than 10 ppm at 50 kv and 50 ppm at 100 kv.

The divider's special "hat" is designed to give uniform gradients from the high voltage electrode to ground and allows stacking of additional 100 kv units for higher voltage measurements. Each unit is only 22¼" high! DC Ratio Accuracy: ±.05%, 100 kv to 1 v; ±.5%, 100 kv to 1 kv. AC Ratio Accuracy: ±.5%, 50 kv (max.) to 500 v. (60 cps only). Recommended readout instrument at 1 v output tap is a precision DC potentiometer, at 1 kv tap (.5 kv on AC) recommended instrument is a ±.5% accurate electrostatic voltmeter (**Sensitive Research** Model ESD described below).

DCHI

## Special High Voltage Dividers

Based on experience with the many Park Dividers already manufactured and their proved reliability, special designs have been constructed and proposed. These special dividers are essentially the same as the Park except for such criteria as sensitivity and size. Designs up to 600 KV DC at ±1% accuracy have been constructed and successfully used by our customers. Dividers for use up to 1,000,000 volts are under consideration. Although most designs considered so far have been for single ranges, there is no particular objection to building a divider with several ranges. Present certification by NBS is limited to 100 KV but higher ranges can be calibrated by "bootstrapping" methods.

## DC Kilovoltmeter (multirange)

Model DCHI is a multirange permanent magnet moving coil, DC kilovoltmeter. Available at 50,000 ohms/v, ±1% fs accuracy, ranges of 1.5/3/7.5/15 kv or 3/7.5/15/30 kv, and at 75,000 ohms/v, ±.5% fs accuracy, ranges of 2/5/10/20 kv. The indicator is a University Model ±.5% accurate microammeter with a 4" scale length. It is self-contained in a moulded bakelite case and internally bracketed to the instrument panel. Size: 13¾" x 7½" x 8" h.

ESH

## Electrostatic Voltmeter (high voltage)

Model ESH AC/DC electrostatic voltmeter is available as a single range instrument up to 100 kv fs (140 kv DC only), or with as many as 4 switch-controlled ranges from 5 to 50 kv fs. DC input resistances to 5 x $10^{13}$ ohms. Capacitance varies from approx. 30 mmfd on 5 kv range to 10 mmfd on 50-100 kv ranges. Reads true RMS. Accuracy is ±1% fs (±.5% up to 30 kv on special order). 6" scale length. Transit lock and brackets for panel mounting available. Maximum frequency usage is expressed as follows: f = 2 fCE, where f = max. allowable operating frequency, C = capacitance of instrument in farads, E = voltage in volts.

ESD

## Electrostatic Voltmeter (portable)

Model ESD portable AC/DC electrostatic voltmeter is available as a single or multirange instrument to measure from 120 to 6 kv fs. Insulation resistance is 1 x $10^{13}$ ohms. Capacitance varies from approx. 225 mmfd for a 120 v range to 20 mmfd for a 6 kv range. Multirange instruments are designed for AC/DC measurements on first range, AC only on higher ranges. ±.5% to 1% fs accuracy (±1.5% for ranges of 150 v and less). 5.2" scale length. Size: 7¾" x 7½" x 6⅛". Available as edgewise panel instrument with the same performance characteristics except insulation resistance approx. 1 x $10^{13}$ ohms.

## Electrostatic Voltmeter (small portable)

University Model is a smaller, more economical version of the portable Model ESD. Single and multirange instruments available from 300 v to 5 kv fs. ±1% fs accuracy. 4" scale length. Moulded bakelite case. Size 5¼" x 5" x 4⅜".

**ELECTRICAL INSTRUMENT SERVICE, INC.** 25 DOCK STREET, MT. VERNON, N.Y. 10550

# TRIPLETT® PANEL

## *Custom tooled . . . custom specifications or standard off-the-shelf . . . Triplett can supply your panel instruments or requirements.*

Even though Triplett offers a wide selection of different styles, sizes and types of standard panel instruments, a large proportion of our customers require custom designed instruments. Many have a specific requirement for custom packaging to enhance the appearance or function of their product.

Triplett's versatile GL-GL/B Series provides a flexibility that may enable you to save considerable tooling expense by utilizing a standard back with a custom designed front panel. This flexibility can save you up to 50% on tooling costs.

If your requirements do not demand special packaging, but do demand custom instrument movements, Triplett engineering can also design to your accuracy, tracking, resistance or damping requirements.

Panel Instrument parameters and standard case styles are shown below to assist you in determining your instrument requirements.

## METER SPECIFICATIONS

Instruments can be DC or AC, Taut-Band (Suspension) or Pivot and Jewel and designed to your accuracy, tracking, resistance, sensitivity or damping requirements. They can be zero left or right, up-scale zero, zero center (null meter) or with a suppressed zero.

**DC Instruments** are the d'Arsonval type with linear scales, extra light moving coil, rugged construction, Bar-Ring Magnet and one piece diecast frames.

**AC Instruments** are either the moving iron vane type with viscous damping and light moving parts or the rectifier type.

**Coil Support System**—Both the taut band and pivot and jewel systems are available. All pivot and jewel movements have selected spring back jewel bearings with highly polished and specially treated pivots.

**Resistance**—Instruments can normally be designed to meet your internal resistance requirements. For best results, current instruments should be low resistance and voltmeters should be high resistance.

**Accuracy**—Instruments can be designed to within ½% (standard ±2%) with mirror scales and knife-edge pointers.

## RANGES

**DC Ammeters**—From 5μA to 50A with internal construction and up to 5,000A using an external shunt.

**DC Voltmeters**—from 5mV to 1000V with internal construction and up to 5,000V using an external multiplier box.

**AC (Iron Vane Type) Ammeters**—from 5mA to 50A with internal construction and up to 1,000A using external current transformer.

**AC (Iron Vane Type) Voltmeters**—from 1.5V to 600V with internal construction and up to 1,000V using external multiplier box.

**AC (Rectifier Type) Ammeters**—from 0.5mA to 10mA.

**AC (Rectifier Type) Voltmeters**—from 1V to 1000V with internal construction and up to 5,000V using external multiplier box.

**RF Thermocouple Ammeters**—from 2mA to 10A.

Watt Meters, VU Meters, db Meters (power level indicators) and Pyrometers are also available in many sizes and styles.

## SCALES

**Dials** can be custom designed to conform with the overall appearance of the end product. Company logos, different ink colors and custom dials reading in such units as pH, roentgens, mm, Hg, rpm, %, heartrate and inches can be designed.

**Pointers** are also available in many styles.

**Mirror Scales** can be added for greater reading accuracy.

**Divisions**—For standard ranges, each division is in multiples or decimal multiples of 1, 2 or 5 of the units measured, determined by size, readability accuracy, etc.

If the standard case designs do not fulfill your design requirements contact the factory for custom machining or molding.

## INFORMATION FOR ORDERING

What custom panel instrument specifications do you need to make your product more reliable, more accurate, more rugged and—in the long run—less expensive? For quick, dependable delivery of small quantities of Triplett's "designed-for-you" panel instruments, contact your Triplett Sales/Service/Modification Center. For prototypes or production quantities, contact your Triplett representative. He'll put you in touch with our Instrument Designers/Engineers who'll help you analyze the problem and suggest the optimum cost/result solution.

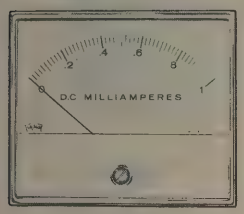
TRIPLETT CORPORATION, BLUFFTON, OHIO 45817

## STANDARD CASE STYLES

### G SERIES: Models 120-G, 220-G, 320-G, 420-G, 520-G.



**Sizes available:** 1½"; 2½", 3½", 4½", 5½".

**Case and Composition:** Thermoplastic front and back, four stud mounting.

**Options Available:** Half-Bezel for behind panel mounting, illumination kit, and shallow barrel.

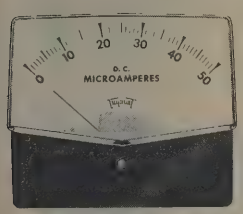
### GL SERIES: Models 320-GL, 420-GL, 520-GL, 820-GL.

**Sizes available:** 3½", 4½", 5½", 8".

**Case and composition:** Glass window, flat black thermosetting plastic case, two stud mounting except 820-GL with four stud mounting, contains contoured base with sealed meter movement permitting utilization of lower part of front for mounting controls, switches, etc.

**Options available:** Three and four stud mounting for 320-GL, four stud mounting for 420-GL 520-GL.

### M SERIES: Model 820-M.



**Sizes available:** 8½".

**Case and Composition:** Thermoplastic front and back.

**Options available:** A thermosetting plastic accessory case 3¾" d (with handle) is available allowing instrument to be utilized in special test equipment requirements. Contact factory for additional data.

### R SERIES: Models 320-R, 420-R.

**Sizes available:** 3½", 4½".

**Case and composition:** Thermoplastic front and thermosetting plastic back with flat scale arc.

### RUGGEDIZED SERIES: Models 127-HR, 221-HR, 321-HR.

Models 221-HR and 321-HR meet MIL-M-10304-D.

**Sizes available:** 1½", 2½", 3½".

**Case and composition:** Thermoplastic front and steel back.

### GL/B SERIES: Models 320-GL/B, 420-GL/B, 520-GL/B.

**Sizes available:** 3½", 4½", 5½".

**Case and composition:** Glass window, flat black thermosetting plastic case, integral bezel provides behind the panel mounting, minimum panel space requirement permits fuller utilization of panel area.

### EDGEWISE SERIES: Models .5-E, 120, 220-E, 320-E, 320-EG, 420-E.

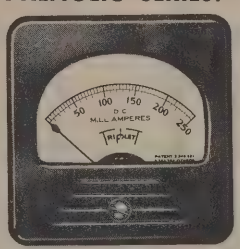
**Sizes available:** ½", 1½", 2½", 3½", 4½".

**Case and composition:** .5-E thermoplastic front, steel back; all others thermoplastic front (320-EG sealed glass window), thermo-setting plastic back. 320-EG constructed to withstand rough environmental and high vibration industrial applications.*

**Options available:** Bezels available for 320-E, 420-E. Models 320-E, 320-EG and 420-E can be mounted from front or rear of panel. Also available for vertical mounting.

*Includes steel mounting brackets.

### PHENOLIC SERIES:

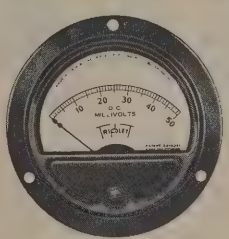


**Models: 227-T, 327-T.**

**Sizes available:** 2½", 3½".

**Case and composition:** Glass window, thermosetting plastic case, four stud mounting.

**Options available:** Illumination available for certain models—contact factory.

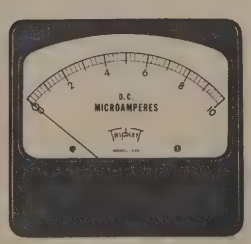


**Models: 221-T, 321-T.**

**Sizes available:** 2½", 3½".

**Case and composition:** Glass window, thermosetting plastic case, three stud mounting.

**Options available:** Illumination available for certain models—contact factory.



**Models: 420, 626, 726.**

**Sizes available:** 4½", 6½", 7½".

**Case and composition:** Glass window, thermosetting plastic case, four stud mounting.

**Options available:** Illumination available for certain models—contact factory.

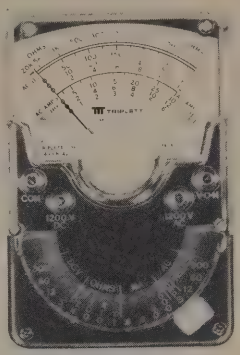
TRIPLETT

## MODEL 310 V-O-M TYPE 3

**1. Drop-resistant, hand-size V-O-M with high-impact thermoplastic case.**
**2. 20,000 Ohms per Volt DC and 5,000 Ohms per volt AC; diode overload protection with fused Rx1 Ohms range.**
**3. Single range switch; direct reading AC Amp range to facilitate clamp-on AC Ammeter usage.**

**RANGES**

**DC Volts:** 0-3-12-60-300-1,200 (20,000 Ohms per Volt).
**AC Volts:** 0-3-12-60-300-1,200 (5,000 Ohms per Volt).
**Ohms:** 0-20k-200k-2MΩ-20MΩ (200 Ohm center scale on low range).
**DC Microamperes:** 0-600 at 250 mV.
**DC Milliamperes:** 0-6-60-600 at 250 mV.
**Accuracy:** ±3% DC; ±4% AC; (full scale).
**Scale Length:** 2⅛".
**Meter:** Self-shielded; diode overload protected; spring backed jewels.
**Case:** Molded, black, high impact thermoplastic with slide latch cover for access to batteries and fuse, 2¾"w x 1 5/16"d x 4¼" h.
**Batteries:** NEDA 15V 220 (1), 1½V 910F (1): Complete with 42" leads, alligator clips, batteries and instruction manual. Shpg. Wt. 2 lbs.
**Model 310**
Cat. No. 3018 .....**$55.00**



**ACCESSORIES FOR 310's**

**Model 10 Clamp-on AC Ammeter**—For 310, 310-FET & 310T. Ranges, 0-6-12-30-60-120-300.
Cat. No. 60-211 .....**$26.30**
**Model 101 Line Separator**—Divides two conductor cords direct or increases Model 10 sensitivity 10x and 20x.
Cat. No. 60-218 .....**$11.60**
**Model 311 Lead**—42" long lead to separate Model 10 from 310 unit for easy reading in awkward spots.
Cat. No. 79-161 .....**$5.20**
**Model 369 Carrying Case**—For Model 310's.
Cat. No. 10-1258 .....**$6.70**
**Model 79-153 Needle Tip Replacement Lead**—For Model 310 series.
Cat. No. 79-153 .....**$5.20**

## MODEL 310-C V-O-M TYPE 3

**1. Hand-size V-O-M with diode overload-protected suspension movement.**

**2. 20,000 Ohms per volt DC and 15,000 Ohms per volt AC.**

**3. Single, enclosed range switch minimizes error; DC polarity-reversing switch.**

**RANGES**

**DC Volts:** 0-3-12-60-300-600 (20,000 Ohms per Volt).
**AC Volts:** 0-3-12-60-300-600 (15,000 Ohms per Volt).
**Ohms:** 0-20k-200k-2MΩ-20MΩ (200 Ohm center scale on low range).
**DC Microamperes:** 0-600 at 250 mV.
**DC Milliamperes:** 0-6-60-600 at 250 mV.
**Accuracy:** ±3% DC; ±4% AC; (full scale).
**Scale Length:** 2⅛".
**Meter:** Self-shielded, diode overload protected suspension movement; DC polarity-reversing switch; single, enclosed range switch.
**Case:** Molded black, 2¾"w X 1-5/16"d x 4¼"h.
**Batteries:** NEDA 15V 220 (1), 1½V 910F (1).
Complete with 42" leads, alligator clips, batteries and instruction manual. Shpg. Wt. 2 lbs.
**Model 310-C**
Cat. No. 3022 ..... **$70.00**

**ACCESSORIES FOR 310's**

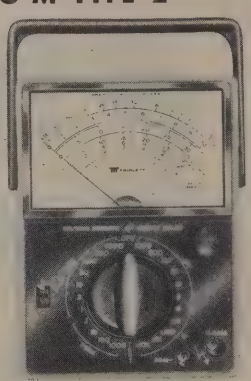
**Model 10-C Clamp-on AC Ammeter**—For 310-C. Ranges, 0-6-12-30-60-120-300.
Cat. No. 60-335 .....**$26.30**
**Model 101 Line Separator**—Divides two conductor cords direct or increases Model 10 sensitivity 10x and 20x.
Cat. No. 60-218 .....**$11.60**
**Model 311 Lead**—42" long lead to separate Model 10 from 310 unit for easy reading in awkward spots.
Cat. No. 79-161 .....**$5.20**
**Model 369 Carrying Case**—For Model 310's.
Cat. No. 10-1258 .....**$6.70**
**Model 79-153 Needle Tip Replacement Lead**—For Model 310 series.
Cat. No. 79-153 ..... **$5.20**

## MODEL 60 V-O-M TYPE 2

**1. X'TRA Rugged—Will withstand an accidental drop up to a five foot height.**
**2. Overload Protected—All ranges protected by diode and unusual three fuse arrangement, including ⅛ amp, 1 amp and 2 amp/1000V fuses.**
**3. Safety Designed For You—Designed to most rigid safety standards; completely insulated unit including newly designed safety leads.**

**RANGES**

**DC Volts:** 0-0.3-1-3-10-30-100-300-1000 (Approx. 20,000 Ohms per Volt).
**AC Volts:** 0-3-10-30-100-300-1000 (Approx. 5,000 Ohms per Volt).
**Ohms:** 0-1k-10k-100k-1MΩ-10-MΩ (12 Ohms center scale on low range).
**DC Microamperes:** 0-100 at approx. 320 mV.
**DC Milliammeters:** 0-10-100-1000 at approx. 320 mV.
**Decibels:** —20 to +52 ("0"-db at 1mW on 600 Ohm line).
**Accuracy:** ±2% DC; ±3% AC; (full scale).
**Scale Length:** 4½".
**X'TRA Rugged:** will withstand an accidental drop up to a five foot height with deviation from stated accuracy not exceeding ±4%.
**Overload Protected:** All ranges protected by diodes and unusual three fuse arrangement, including ⅛ amp, 1 amp and 2 amp/1000V fuses.
**Safety Designed** to most rigid safety standards to prevent explosive arcs in high energy circuits, up to the 2 amp/1000V (20kW) fuse capacity.
**Meter:** Diode overload protected ruggedized suspension meter movement module, DC polarity reversing switch.
**Confidence test:** Reassurance check of instrument meter.
**Case:** Molded, orange, high impact thermoplastic; easy external access sealed battery and fuse compartment; handle holds tester at 30° angle; 5¼"W X 7¼"H X 3¼"D.
**Batteries:** NEDA 9V 1604 (1), 1½V 13F (1).
Complete with 48" safety test leads, insulated alligator clips, batteries, spare 1/8A and 1A fuses and instruction manual. Shpg. [illegible] 4 lbs.
**Model 6[illegible]**
Cat. No. 3145 .....**$102.00**



## MODEL 60-NA V-O-M

**1. X'TRA Rugged—50 ranges with mirror scale and ±1½% DC accuracy—will withstand an accidental drop up to a five foot height.**
**2. Overload Protected—All ranges protected by diode and unusual three fuse arrangement, including ⅛ amp, 1 amp and 2 amp/1000V fuses.**
**3. Safety Designed For You—Designed to most rigid safety standards; completely insulated unit including newly designed safety leads.**

**RANGES**

**DC Volts:** 0-0.15-0.5-1.5-5-15-50-150-500 (20,000 Ohms/Volt).
**X2:** 0-0.3-1-3-10-30-100-300-1000 (10,000 Ohms/ Volt).
**AC Volts:** 0-3-15-50-150-500 (Approx. 10,000 Ohms/Volt).
**X2:** 0-6-30-100-300-1000 (Approx. 5,000 Ohms/Volt).
**Ohms:** 0-1k-10k-100k-1MΩ 100MΩ (6 Ohm center scale).
**DC Microamperes:** 0-50-500 at approx. 150mV.
**X2:** 0-100 at approx. 300mV.
**DC Milliammeters:** 0-5-50-500 at approx. 150mV.
**X2:** 0-1-10-100-1000 at approx. 300mV.
**Decibels:** —20 to +52 ("0" dB at 1mW on 600 Ohm line).
**Accuracy:** ± 1½% DC; ±3% AC; (full scale).
**Frequency Compensated.**
**Scale Length:** 4½".
**X'TRA Rugged.** See Model 60.
**Overload Protected.** See Model 60.

**Safety Designed** to most rigid safety standards to prevent explosive arcs in high energy circuits, up to the 2 amp/1000V (20kW) fuse capacity.
**Meter:** Diode overload protected ruggedized suspension meter movement, ½% resistors.
**Confidence Test:** See Model 60.
**Case:** Molded, gray, high impact thermoplastic; external access sealed battery and fuse compartment; handle holds tester at 30° angle; 5¼"W X 7½"H X 3¼"D.
**Batteries:** NEDA 30V 210 (1), 1½V 13F (1).
Complete with 48" safety test leads, insulated alligator clips, batteries, spare ⅛A and 1A fuses and instruction manual. Shpg. Wt. 4 lbs.
**Model 60-NA**
Cat. No. 3151 .....**$140.00**

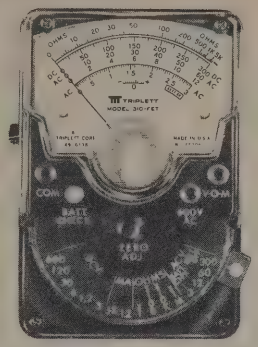
THE MARK OF QUALITY

## MODEL 310-FET—TYPE 1

**1. Hand-size FET V-O-M with 10 megohm DC input resistance and diode overload-protected suspension movement.**

**2. Low voltage range of 300 mV DC; X1 megohm range.**

**3. Single range switch; DC polarity-reversing switch.**



**RANGES**

**DC Volts:** 0-0.3-1.2-6-30-120-600. Input resistance 10 megohms.

**AC Volts:** 0-3-12-60-300-600 (5,000 Ohms per Volt).

**Ohms:** 0-5k-500k-50MΩ-5,000-MΩ (50 Ohm center scale on low range).

**DC Milliamperes:** 0-0.12-1.2 at 300 mV.

**Accuracy:** ±3% DC; ±4% AC; (full scale).

**Scale Length:** 2⅛".

**Meter:** Self-shielded, diode overload protected suspension movement; DC polarity-reversing switch.

**Case:** Molded, black, 2¾"w X 1-5/16"d X 4¼"h.

**Batteries:** NEDA 7V 1501M (1), 1½V 910A (1).
Complete with 42" leads, alligator clips, batteries and instruction manual. Shpg. Wt. 2 lbs.

**Model 310-FET**
Cat. No. 3027 ..... **$92.00**

**ACCESSORIES FOR 310's**

**Model 10 Clamp-on AC Ammeter**—For 310, 310-FET & 310-T. Ranges, 0-6-12-30-60-120-300.
Cat. No. 60-211 ..... **$26.30**

**Model 101 Line Separator**—Divides two conductor cords direct or increases Model 10 sensitivity 10x and 20x.
Cat. No. 60-218 ..... **$11.60**

**Model 311 Lead**—42" long lead to separate Model 10 from 310 unit for easy reading in awkward spots.
Cat. No. 79-161 ..... **$5.20**

**Model 369 Carrying Case**—For Model 310's.
Cat. No. 10-1258 ..... **$6.70**

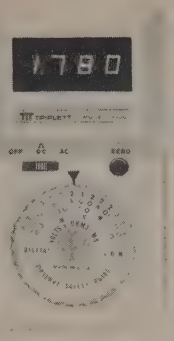
**Model 79-153 Needle Tip Replacement Lead**—For Model 310 series.
Cat. No. 79-153 ..... **$5.20**

## MODEL 3300 D-V-O-M

**1. HAND-SIZE, 3½ DIGIT—Easy operation, 22 ranges with Hi and Low Power Ohms. Auto-polarity.**

**2. OVERLOAD PROTECTION—Protected up to 600 volts on all ranges with special 2A/600V fuse arrangement.**

**3. BATTERY PAC™—Easily removed, snap-in Battery Pac™ provides convenient field exchange for fully charged Pac. Battery Pac™ rechargeable in tester or externally.**



**RANGES**

**DC Volts:** 0-.2-2-20-200-600, ±5% Rdg. ±1 Digit. Input resistance all ranges: 10 Meg. Full scale step response: 1 sec. typical.

**AC Volts:** 0-.2-2-20-200, 60Hz ±1% Rdg. ±2 Digits. 0-600, 60Hz ±1.5% Rdg. ±2 Digits. Input impedance all ranges. 10 Meg., Cap. 100 pF. Full scale step response: 3 sec. typical.

**Ohms**—Low Power Ranges: 0-200-20k-2M, ±.5% Rdg. ±1 Digit, FS voltage 200 mV. Full scale step response: 2 sec. typical all ranges.

**Ohms**—Hi Power Ranges: 0-2k-200k, ±.5% Rdg. ±1 Digit, FS voltage 2V. 0-20M, ±1% Rdg. ±1 Digit, FS voltage 2V. Full scale step response: 2 sec. typical all ranges except 20M range 8 sec. typical.

**DC Milliammeters:** 0-2-20-200, ±1.25% Rdg. ±1 Digit, .2 volt burden FS. Full scale step response: 1 sec. typical.

**AC Milliammeter:** 0-2-20-200, 50-kHz ±1.5% Rdg. ±2 Digits, .2 volt burden FS. Full scale step response: 3 sec. typical.
Overload Protection: 0-600 volts on all ranges.
Out of Range Indication: blinks.
.3" LED with Polarity Indication.
DC Polarity: automatic.
ZERO: Offset zero adjustment.
Fuses: 1A/250V; 2A/600V.
Probe: Red/Gray houses fuses.
Case: Molded, gray high impact thermoplastic with non-slip "finger-tread" surface finish; easy access Battery Pac™; dimensions approx. 3"W X 5⅜"L X 1⅜"D.
Batteries: NEDA 1½V 15NC (4), Ni. Cad. type AA.
Complete with one year warranty, 42" test leads, insulated alligator clips, rechargeable Ni. Cad. batteries, AC Adapter Charger and instruction manual. Shpg. Wt. Approx. 10 oz.

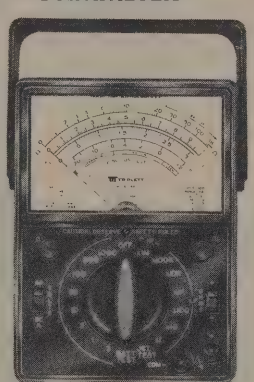
**Model 3300**
Cat. No. 3300 ..... **$175.00**

## MODEL 64 VOLT-OHMMETER

**1. X'TRA Rugged/Overload Protected (all ranges)/Safety Designed solid state Volt-Ohmmeter.**

**2. Low-Power Ohms—LPΩ™—6 ranges with 90mV power source for in-circuit measurements plus junction test circuit.**

**3. Exclusive Triplett Micro Power — TMP™ — permits continuous operation with carbon battery life in excess of a year.**



**RANGES**

**DC Volts:** 0-0.3-1-3-10-30-100-300-1000. Input res. 11.12 MΩ.

**AC Volts:** 0-0.3-1-3-10-30-100-300-1000. Input imp. 10 MΩ. Frequency range 20Hz to 20kHz, except 300 and 1000V.

**Ohms-Low Power:** 0-1k-10k-100k-1MΩ-10mΩ-100MΩ. (Max. voltage 90mV, max. power 0.08mW, 10 Ohm center scale).

**Ohms-Conventional:** 1000MΩ. (Max. voltage 0.9V, max. power 0.08μW, 10M ohm center scale).

**Junction Test:** checks diodes and transistor junctions (silicon-germanium-open or shorted); forward and reverse conduction. (Max. V. 0.9V, max. power 0.8mW).

**Decibels:** −40dB to +62dB.

**Accuracy:** ±3% F.S., all ranges.

**Scale Length:** 4½".

**X'TRA Rugged:** Will withstand an accidental drop up to a five foot height with deviation from stated accuracy not exceeding ±4%.

**Overload Protected:** All ranges protected by diodes and unusual two fuse arrangement, including 1 amp and 2 amp/1000V fuses.

**Safety Designed** to most rigid safety standards to prevent explosive arcs in high energy circuits, up to the 2 amp/1000V (20kW) fuse capacity.

**Meter:** Diode overload protected suspension movement module.

**Case:** Molded, green, high impact thermoplastic; external access sealed battery and fuse compartment; 5¼"W X 7½"H X 3¼"D.

**Batteries:** NEDA 9V 1604 (2), 1½V 13F (1).
Complete with 48" safety test leads, insulated alligator clips, batteries, spare 1A fuse and instruction manual. Shpg. Wt. 4 lbs.

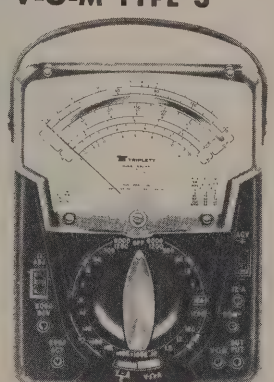
**Model 64**
Cat. No. 3152 ..... **$140.00**

## MODEL 630-NA V-O-M TYPE 3

**1. 70-range V-O-M with single range switch and DC polarity-reversing switch.**

**2. Accuracy 1½% DC and 3% AC; mirrored scale.**

**3. Diode overload-protected suspension movement; temperature compensation.**



**RANGES**

**DC Volts:** 0-0.6-3-12-60-300-1,200-6,000 (10,000 Ohms per Volt). 0-0.3-1.5-6-30-150-600-3,000 (20,000 Ohms per Volt). 0-0.120 at 60 microamperes. 0-0.240 at 120 microamperes.

**AC Volts:** 0-3-12-60-300-1,200-6,000 (5,000 Ohms per Volt). 0-1.5-6-30-150-600-3,000 (10,000 Ohms per Volt). Frequency range 35 Hz to 20 kHz.

**Ohms:** 0-1k-10k-100k-1MΩ-10MΩ-100MΩ (4.4 Ohm center scale on low range).

**DC Microamperes:** 0-60-600 at 120 mV; 0-120 at 240 mV.

**DC Milliamperes:** 0-6-60-600 at 120 mV; 0-1.2-12-120-1,200 at 240 mV.

**DC Amperes:** 0-6 at 120 mV; 0-12 at 240 mV.

**Decibels:** −26 +51 ("0" dB at 1 mW on 600 Ohm line).

**Output Volts (AC):** 0-3-12-60-300 (5,000 Ohms per Volt).

**Accuracy:** ±1½% DC; ±3% AC; (full scale).

**Scale Length:** 4½".

**Meter:** Diode overload protected suspension movement, DC polarity reversing switch, mirror scale, ½% resistors, switch for doubling range selection.

**Case:** Molded, black, 5½"w X 3-11/32"d X 7½"h.

**Batteries:** NEDA 30V 210 (1), 1½V 13F (1).
Complete with 48" leads, alligator clips, batteries and instruction manual. Shpg. Wt. 5 lbs.

**Model 630-NA**
Cat. No. 3042 ..... **$126.00**

**Model 630-NS:** Similar to Model 630-NA with 200,000 Ohms per Volt DC and 20,000 Ohms per Volt AC. Maximum AC/DC voltage range, 1200 Volts.
Cat. No. 3102 ..... **$156.00**

**Model 639-OS Leather Case:** Flaps open to permit use of tester in case. Accessory compartment, built in stand on back.
Cat. No. 10-1793 ..... **$23.30**

THE MARK OF QUALITY

# Sweep Generators, Spectrum Analyzers, Oscillators, Attenuators, Filters and R.F. Components

## INSTRUMENTS

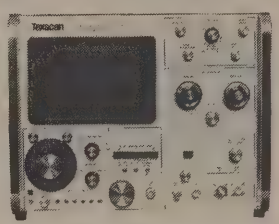
### VS SERIES - SWEEP/SIGNAL GENERATORS

The VS series sweep/signal generators are completely solid state, low distortion, wide sweep instruments containing sufficient features for wide application in the industry. These include variable sweep rate capability, excellent linearity, with attenuated outputs and have extensive marker capability.

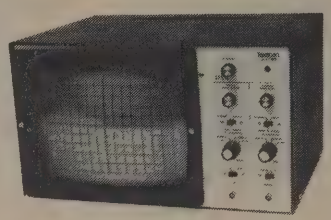
| Model | Frequency Range |
|---|---|
| VS-20 | 500 Hz to 25 MHz |
| VS-30A | 300 kHz to 100 MHz |
| VS-40A | 1 MHz to 300 MHz |
| VS-50A | 5 MHz to 500 MHz |
| VS-60B | 2 MHz to 1000 MHz |
| VS-80 | 1 MHz to 1200 MHz |
| VS-90B | 3 MHz to 2350 MHz |

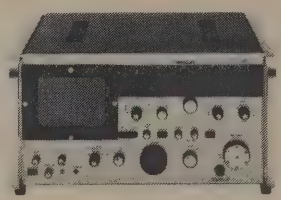
### DU SERIES OSCILLOSCOPES

Texscan oscilloscopes are sensitive, large screen, solid state, X-Y display units designed to satisfy the particular needs of a production or laboratory testing system using sweep generator techniques. These display units are complete with cathode ray tube, vertical and horizontal deflection amplifiers, video (Z axis) amplifier, and high and low voltage supplies.



The Model 9650 tracking sweep spectrum analyzer makes possible dynamic measurements of over 100 dB. This technique provides rapid observation of many band pass—band reject responses previously available only on a point-to point basis. This unique instrument combines the features of a sweep generator, spectrum analyzer, display section, reflection bridge and associated 1 dB step attenuators.



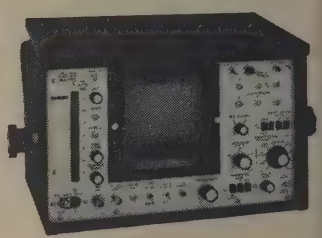


### SPECTRUM ANALYZER AL-60

1 MHz to 3 GHz, solid state, −110 to +30 dBm. Texscan's line of lab spectrum analyzers consists of the AL-60, 1 MHz to 3 GHz. Designed for maximum reliability and maintainability, accurate frequency and amplitude identification.

### PORTABLE SPECTRUM ANALYZERS

The AL-50 family of portable spectrum analyzers provides the user with a rugged instrument for making RF measurements both in the lab and in the field. There are three units in the series — the AL-50, single resolution 4-300 MHz, AL-51 selectable resolution and phase lock, 4-1000 MHz, and the AL-55, 4-350 MHz, with crystal markers and special hum modulation measurement circuitry. These units will operate from an internal 12V rechargeable battery, an AC power converter, or 12V vehicular systems. Weighing less than 25 lbs., they are provided with a protective cover and rugged field carrying case with handle.



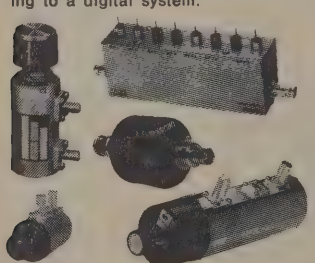
## ATTENUATORS

**New High Performance Attenuators**—New HFP Series are 10 watt CW fixed attenuators and FP are subminiature with an exacting range from DC—18 GHz. With a conservative 2 watt rating at room temperature these attenuators are ideal for environmental protection, ruggedness and low cost. The attenuators are also packaged in convenient laboratory protective cases.

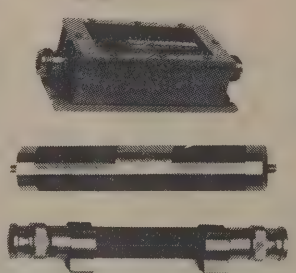
**Attenuators** — RA Series—Rotary —DC—4000 MHz, direct reading in dB, 8 attenuation ranges up to 120 dB, 50 to 75 ohm. Texscan offers a complete range of attenuators with steps of 0.1, 1.0 and 10.0 dB, covering attenuation ranges of 1.0, 10.0 and 120.0 dB. Wide selection of connector choices available.

**FP Series**—Fixed Coaxial—DC—18 GHz, 2 watt average power, values up to 50 dB.

**PA Series** — Digitally Programmable—DC—1250 MHz, 6 millisecond switching speed. Three different units cover 0—127 dB in 1.0 dB steps. Each pad represents a single binary digit for easy mating to a digital system.



## FILTERS



**Filters** — Tunable Bandpass — 48 MHz to 4 GHz, 3 dB BW, 1% to 10%, 3 and 5 sections. Any single model covers more than an octave.

**Bandpass/Lowpass**—10 MHz to 13 GHz. Five different types available, each with its own unique characteristics. Choice of connector style as well as special mechanical designs to fit your packaging requirements, 48 hour delivery.

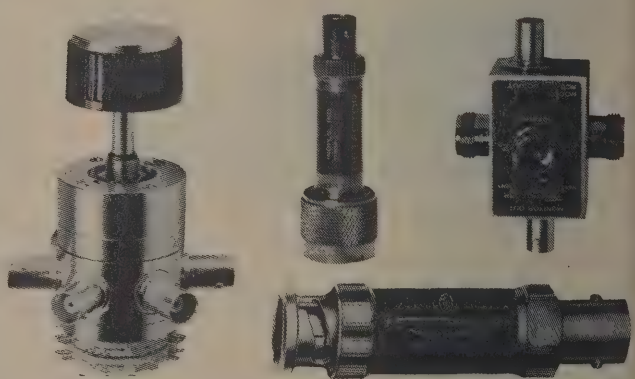
**Lumped Component**—5 MHz to 100 MHz, 3 to 8 sections. Miniature size provides freedom in circuit layout, reducing overall package volume. Available in bandpass and lowpass designs.

**Cavity Bandpass**—30 MHz to 3000 MHz, 2 to 6 sections, 0.2 to 3%, 3 db BW. Designed to provide low insertion loss at narrow bandwidths.

**Waveguide** — 4 GHz to 18 GHz Bandpass. Custom designs from 0.25 to 10% bandwidths.

## COMPONENTS

Texscan line of RF components consist of RF detectors, coaxial switches, reflection coefficient bridges, mis-matches, terminations and impedance matching pads.



**Solid State Oscillators**—Texscan's seven lines of solid state RF sources span between 2.5 MHz to 20 GHz and supply RF power up to one watt. Both electronically and mechanically tuned devices are available.

**BITE Oscillators**—Texscan's PMO series operate with TTL logic pulses at a .001 duty. They require a 20 mW input for a 200 mW peak RF output making them ideal for battery operation. The PMO series is also available with a direct pulse drive input.

• 2446 North Shadeland Avenue, Indianapolis, Indiana 46219, PH: 317-357-8781, TWX: 810-341-3184, Telex: 272110

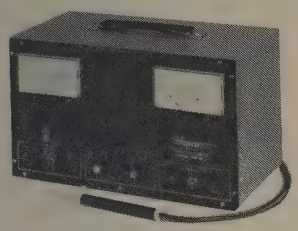
TOROTRON CORP. DEPT. EM, 255 WASHINGTON ST., MT. VERNON, NY 10553, (914) 664-2050

# AC/DC Hipot Insulation Tester

**Application:** • Production testing for insulation resistance, Dielectric withstand, etc. • High Voltage Capacitor • Motors • Wire & Cable • Dielectric Materials • Transformers & Coils • Bushing & Insulators • High Voltage Rectifiers • **UL Listed Electrical Hi Pot Tests.**

## RHP HiPot Series DC DIELECTRIC WITHSTANDING TESTER



**PERMITS MONITORING OF LEAKAGE CURRENT AS LOW AS 2 MICRO AMPS**

**The RHP Series Test Sets are reliable, sensitive power sources for laboratory or production testing. These sets having fully zero start interlock with HV on and off switches — compel operator to start test at zero volts. Sensitive multirange current meter circuit for accurate leakage measurement, built-in current-limiting adjustable from 5 Micro Amps to 4 Milli Amps. A timer is incorporated with a range of 2 to 120 seconds to limit the test duration to a preset time.**

**FEATURES:**

- **High Voltage Output Control:** Continuously variable from 0 to full voltage.
- **Voltage Monitoring:** 4½" Taut Band Mirror Scale Ruggedized Kilovoltmeter with an accuracy of 2% monitors actual output voltage.
- **Current Monitor:** Multirange Micro Amp meter from 0 to 5 MA in three ranges 0 to 50 Micro Amp, 0 to 500 Micro Amp, and 0 to 5 MA. With adjustable current set from 10% to 80% of full scale to shut off high voltage and activate visual and audible alarms when preset leakage current exceeds set limit, permitting GO/NO-GO testing.
- **Output Probe:** Special high voltage silicone cable is internally connected to a shorting relay that shorts the output when unit shuts off or not operating, permitting the safe removal of tested components, and discharges any residual charge.
- **Test Duration Timer:** A timer covering the range from 2 seconds to 120 seconds that permits limiting the time during which the component is tested. An override switch permits the bypassing of timer.

**SPECIFICATIONS:**

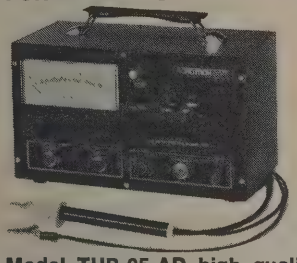
| | |
|---|---|
| **Input** | 115 VAC, 60 Hz, 3 Amp. |
| **Size and Weight** | 9½" H x 17" W x 11" D. Approx. 22 lbs. |
| **Timer Range** | 2-120 seconds. |

| DC Model | Output Voltage | Current Meter Range | Price 1-5 |
|---|---|---|---|
| RPH-02 | 2 KVDC | 50μA | $480 |
| RPH-04 | 4 KVDC | 500μA | 520 |
| RPH-07 | 7 KVDC | 500μA | 580 |
| RPH-12 | 12 KVDC | 5MA | 680 |

## THP-AD Hipot Series

### AC DIELECTRIC WITHSTANDING TESTER

**FOR MAKING U.L. LISTED ELECTRICAL HIPOT TESTS**



| AC Model | Output Voltage | Price 1-5 |
|---|---|---|
| THP-02-AD | 2 KVAC | $220 |
| THP-03-AD | 3 KVAC | 250 |
| THP-05-AD | 5 KVAC | 270 |
| THP-10-AD | 10 KVAC | 410 |
| **DC Model** | **Output Voltage** | **Price 1-5** |
| THP-03D-AD | 3 KVDC | $ 245 |
| THP-04D-AD | 4 KVDC | 275 |
| THP-07D-AD | 7 KVDC | 300 |
| THP-12D-AD | 12 KVDC | 420 |

**Model THP-05-AD high quality low cost AC high voltage insulation tester. Makes fast accurate dielectric withstanding tests of appliances, Motors, Coils, Transformers, Electronic components, Insulation Materials, etc.**

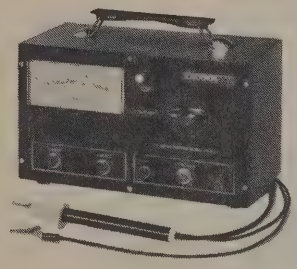
**FEATURES:**

- **High Voltage Output Control:** Continuously variable from 0 to 5 KVAC.
- **Leakage Detector:** Continuously adjustable from 1 MA to 4 MA permitting non-destructive testing of insulation.
- **Arcing Detector:** Visual Indicators illuminated in front panel when component Leakage or Arcing is detected.
- **Solid State Audible Alarm:** Adjustable from 1 MA to 4 MA breakdown current.
- **Latching Relay:** Shuts power off, when breakdown current exceeds limits, keeps Audible Alarm On, Until main Power 'ON' Switch is turned off, faulty component removed, and tester restarted.
- **Voltage Monitoring:** 4½" Taut Band Mirror Scale Ruggedized Kilovoltmeter with an Accuracy of 2% monitors actual output voltage.
- **Shielded Output Cable:** To high voltage probe.

**SPECIFICATIONS:**

| | |
|---|---|
| **Input** | 115 VAC, 60 Hz, 3 Amp Max. |
| **Size & Weight** | 7" H x 12" W x 6" D Approx. 18 Lbs. |
| **Meter** | 2% full scale accuracy 4½" ruggedized meter. |
| **Output Voltage** | 0 to Full Voltage, 60 Hz, Shielded Hi Voltage Probe. |
| **Short Circuit Current** | 18 MA. |

## THP Hipot Series



| AC Model | Output Voltage | Price 1-5 |
|---|---|---|
| THP-02 | 2 KVAC | $180 |
| THP-03 | 3 KVAC | 200 |
| THP-05 | 5 KVAC | 220 |
| **DC Model** | **Output Voltage** | **Price 1-5** |
| THP-03D | 3 KVDC | $200 |
| THP-04D | 4 KVDC | 230 |
| THP-07D | 7 KVDC | 250 |
| THP-12D | 12 KVDC | 365 |

**High Quality Low Cost AC Hi Voltage Insulation Tester Designed for use by unskilled personnel.**

**FEATURES:**

- **High Voltage Output Control:** Continuously Variable from 0 to 5 KVAC.
- **Leakage Detector:** Continuously adjustable from 1 MA to 4 MA permitting non-destructive testing of insulation.
- **Arcing Detector:** Visual Indicators illuminated in front panel when component Leakage or Arcing is detected.
- **Voltage Monitoring:** 4½" Taut Band Mirror Scale Ruggedized Kilovoltmeter with an Accuracy of 2% monitors actual output voltage.
- **Shielded Output Cable:** To high voltage probe.

**SPECIFICATIONS:**

| | |
|---|---|
| **Input** | 115 VAC, 60 Hz, 3 Amp Max. |
| **Size & Weight** | 7" H x 12" W x 6" D Approx. 18 Lbs. |
| **Meter** | 2% full scale accuracy 4½" ruggedized meter. |
| **Output Voltage** | 0 to Full Voltage, 60 Hz, Shielded Hi Voltage Probe. |
| **Short Circuit Current** | 18 MA. |

**NOTES:** • HiPot Testers available in many other voltage ratings and features. Consult factory for modifications. • All output voltage referenced to ground. Floating output available on request.

**ADDITIONAL FEATURES:** • Zero Start Interlock • Audible Failure Signal.

Specifications and price subejct to change without notice.

# SYSTEMS INSTRUMENTATION

DigiTec designs with quality and reliability in mind. Quality is assured by thorough testing during production and backed by a full year warranty.

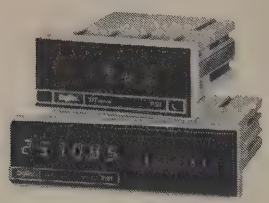
Easy maintainability is a by-product of our construction technique. This, coupled with our 30 worldwide and 18 domestic service centers give you the edge in minimum downtime.

In addition to panel meters and printers, we manufacture the finest multimeters, thermometers, counters and data acquisition systems.

For complete details of our product line, please contact us or our representative in your area.

*DigiTec: precision measurements to count on!*

## PANEL MOUNT INSTRUMENTATION



### Process Monitors

- Use with any current or voltage transducer/transmitter
- Direct readout in desired engineering units
- 3½ or 4½ digit display
- Field adjustable or fixed scaled and/or offset

### Panel Meters

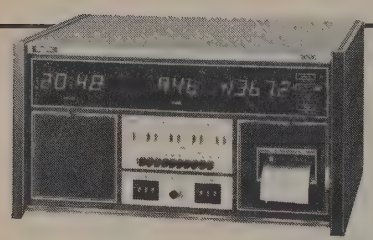
- AC Voltage & Current • AC true rms
- DC Voltage & Current • DC Autoranging

### Panel Thermometers

- Thermocouple, Thermistor, RTD Sensors
- Resolution & Repeatability to 0.01°
- Readout in °C or °F

### Factoring Counter/Timers

- Counters, Totalizers, Timers
- Thumbwheel or rear connector programmable
- Direct readout in Rate, Flow, Ratio, Total or Time
- Full 6 digit display



## DATALOGGERS

- Wide selection of ranges & functions (field interchangeable)
- Single or multiple parameters
- Unlimited alarm capability • Low cost
- Resolution to 1μV dc, 10μV ac or 0.01°
- Continuous visual display of time, channel and measured data
- Hard copy printout of all data
- Isolated BCD or RS-232-C output

## PRINTERS

- Numeric & Alpha-numeric • 10 to 26 Columns
- Integral clock & events counter
- System interface TTL & RTL
- Microprocessor controlled
- RS-232-C 20mA current loop & 8-bit parallel inputs
- Selectable baud rates

## LABORATORY INSTRUMENTATION

### DMM'S, COUNTER/TIMERS, THERMOMETERS

### Portable, Bench & Systems Digital Multimeters

- Six functions • 100 μV resolution
- 4½ digit display • 0.02% basic accuracy
- Autoranging-BCD output

### Counter/Timers

- 7 models, full scale readings from 150MHz to 1GHz
- Full 9 digit display TCXO

### Thermometers-Portable, Bench & Systems

- Thermocouple, Thermistor, RTD Sensors
- Resolution & Repeatability to 0.01°
- Readout in °C or °F or both

**DigiTec UNITED SYSTEMS CORPORATION**

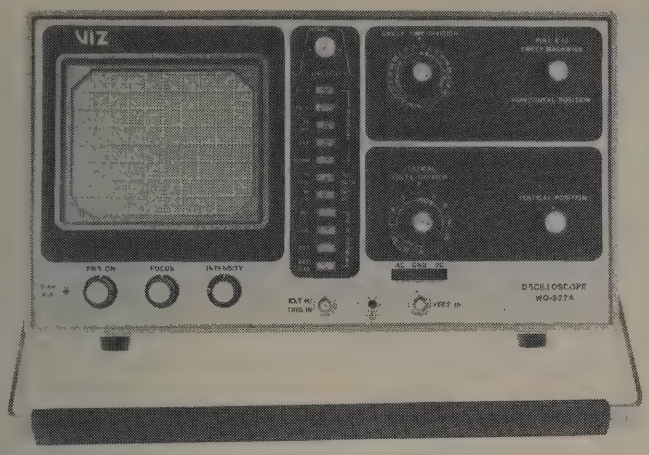
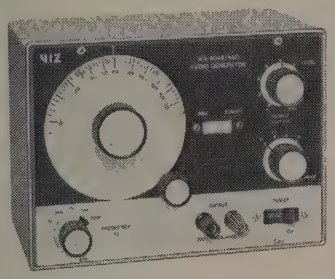
(513) 254-6251. TWX (810) 459-1728

## WO-527A 15 MHz. Trigger Sweep Scope — $525.00



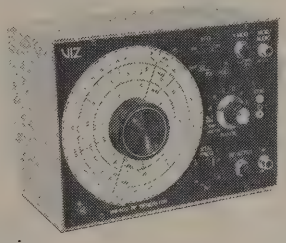
- Freq. resp. DC to 15 MHz (−3 dB) sensitivity 10 mV/cm. to 20V in 11 ranges. Rise time 24 n. sec. Horz. Osc. Freq. DC to 1MHz.
- Trigger mode normal or auto freq. resp. DC to 30 MHz.
- Calibrated time base 0.5$\mu$ sec. to 0.5 sec., 19 ranges.
- Preset TVV and TVH plus special TV line selector to display single line of TV video frame.
- Times 10 sweep Mag. advanced I.C. circuitry thru-out full shield CRT with P-31 Phos.
- Unique simplified trig. level adj. system with LED indicators show trig. polarity at a glance.

## WA-504B/44D Audio Sine/Sq.-Wave Generator — $129.00



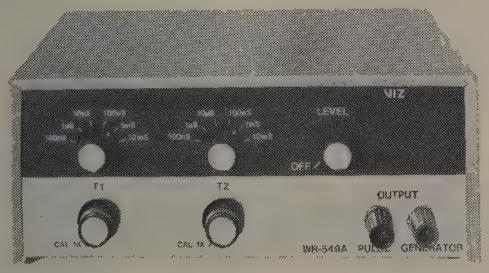
- Output 20 Hz to 200 kHz in 4 ranges, stability ± 0.5% and ± 5% dial cal.
- Voltage output 4 ranges 0.01 to 10V at 600Ω.
- Sine wave harmonic distortion 0.15% sq. wave rise and fall 150 ns., tilt 2%.
- All solid-state, throughout, 3 wire AC cord.

## WR-50C RF Signal Generator — $120.00



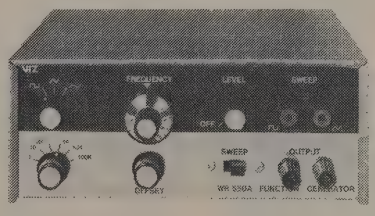
- Tunable on fundamental 6 ranges 85 kHz to 40 MHz ± 2% with sweep output at 455 kHz and 10.7 MHz plus External xtal.
- RF output 0.05V rms, 2 step 10 to 1 plus fine adj. attenuator.
- Internal Modulating freq. 600 Hz adj. to 80%.
- Audio output 6V rms across 15 kΩ load.
- FET amplifier for rugged stability, 3 wire AC cord.

## WR-549A Pulse Generator — $119.00



- Freq. range 5 Hz to 5 MHz ±5% output adj. 0-15V into 600Ω, 0-6V into 50Ω.
- Pulse width adj. 100 ns. to 0.1 sec. rise and fall time 20 ns.
- TTL and CMOS compatible, on and off time independently adj.
- Ideal for logic design or digital circuit troubleshooting
- 3 wire AC cord.

## WR-550A Function Generator — $139.00



- Sine, sawtooth and sq. wave output 1 Hz to 1MHz.
- Peak to peak output 0-20V at 600Ω plus 10V adj. offset.
- 10 to 1 freq. sweep with ext. sweep voltage of any wave form.
- Freq. stability 200 PPM/°C, accuracy to 100 kHz ± 5% of dial above 100 kHz ± 8%.
- TTL and CMOS compatible with sq. and sawtooth fix output 4 VDC.
- 3 wire AC cord.

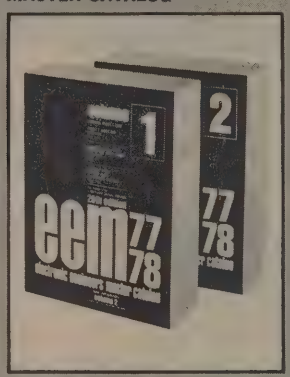
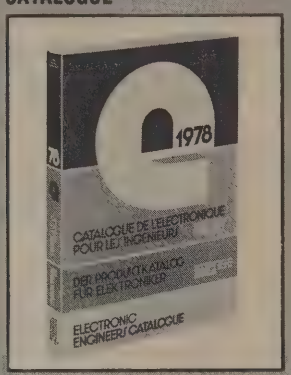
## 41 YEARS OF EXPERIENCE IN CATALOGING, 21 EDITIONS OF eem

### eem/ELECTRONIC ENGINEERS MASTER CATALOG —



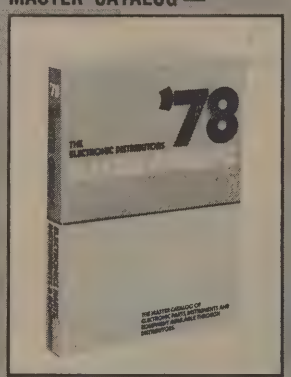
The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.

### ELECTRONIC ENGINEERS CATALOGUE



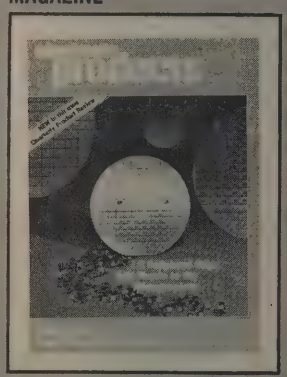
The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.

### ELECTRONIC DISTRIBUTORS MASTER CATALOG —



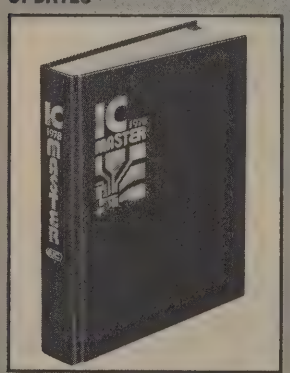
The only national catalog designed exclusively for distributors and their customers featuring electronic parts, instruments and equipment.

### ELECTRONIC PRODUCTS MAGAZINE —



The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

### IC MASTER AND THE UPDATES —



The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

### eem FILE SYSTEM —

The only filing system designed especially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

### UTP CUSTOM CATALOGS —

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

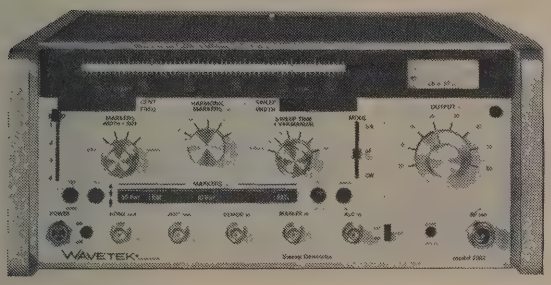
### UNITED COST AND PRICING SERVICES —

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

*United Technical Publications, Inc., Div. of Cox Broadcasting Corp. 645 Stewart Ave., Garden City, N.Y. 11530 / (516) 222-2500 TWX 510-222-1673*

WAVETEK®
INDIANA INCORPORATED

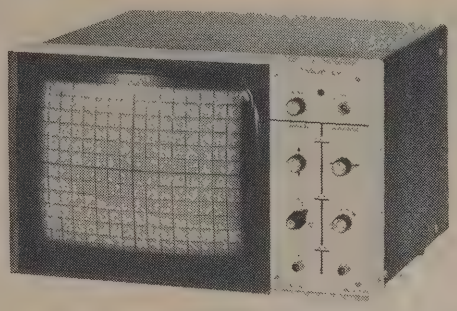
## MODEL 2002
## SWEEP SIGNAL GENERATOR



- **1 MHz to 2500 MHz in one unit.**
- **Band stacking option for sweeping full range.**
- **Calibrated RF output system.**
- **Manual, triggered, or recurring sweep mode.**
- **Excellent flatness and display linearity.**

**SPECIFICATIONS**
Frequency Range: 1 to 2500 MHz.
RF Output: Continuously adjustable from +13 dBm to –77 dBm.
Output Flatness: ±0.5 dB.
Display Linearity: 1%.
Spurious Signals: –30 dB.
Marker Accuracy: 0.005%.
**Price: $2,700.**

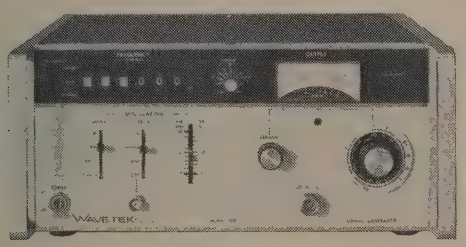
## MODEL 1901C
## DISPLAY OSCILLOSCOPE



- **Large 12-inch diagonal CRT.**
- **1 mV/ division sensitivity.**
- **Bright, well-focused trace.**
- **Ideal for production test applications.**

**SPECIFICATIONS**
CRT Display: 12-inch diagonal.
Deflection: Magnetic.
Acceleration Voltage: 9 kV nominal.
Phosphor:
P1 (medium persistence); P4 and P7 available as options.
Vertical Bandwidth: DC to 15 kHz.
Horizontal Linearity: 3%.
**Price: $545.**

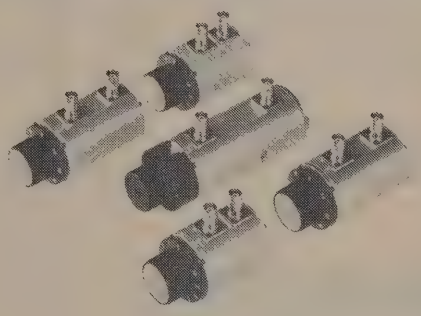
## MODEL 3001 SIGNAL GENERATOR



- **1 MHz to 520 MHz with 1 kHz resolution.**
- **Over-all frequency accuracy of 0.001%.**
- **Phase-lock stability.**
- **External and internal frequency standard options.**
- **Built-in frequency programmability.**
- **Calibrated output from +13 dBm to –137 dBm.**
- **Internal and external AM/FM capability.**

**SPECIFICATIONS**
Frequency Range: 1 MHz to 520 MHz.
Resolution: 1 kHz.
Accuracy: CW, FM, and AM modes: 0.001%.
Stability: CW, AM, and FM modes: 0.2 ppm/hour. (optional to 0.005 ppm/day.)
Power Level: +13 dBm to –137 dBm.
Residual FM: Typically 200 Hz.
AM/FM Modulation: Internal—400 Hz and 1 kHz.
Programmability: Frequency is digitally programmable (programmable output level available as an option).
**Price: $2,750.**

## SERIES 5000 ATTENUATORS



- **Broadband operation.**
- **Low VSWR.**
- **High repeatable accuracy.**
- **Ideal for systems manufacturers, plant and field use.**

**SPECIFICATIONS**
Frequency Range: DC to 2,000 MHz.
Impedance: 50 ohms (75-ohm units also available).
Attenuation:
Model 5001: 0–1 in 0.1 dB steps.
Model 5010: 0–10 in 1 dB steps.
Model 5070: 0–70 in 10 dB steps.
Model 5080: 0–80 in 1 dB steps.
**Prices: Models 5001, 5010, and 5070: $95.**
**Model 5080: $195.**

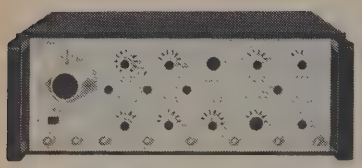
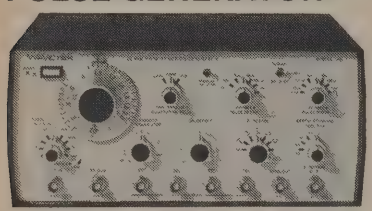
## 50 MHz PULSE/ FUNCTION GENERATOR



Model 166

**Pulse and Functions**
The Model 166 Pulse/Function Generator fills your requirement for a truly versatile laboratory instrument. It is a swept sine, square and triangle function generator for your analog applications, and a pulse generator with time, width, and transition control for your digital testing requirements.
**0.0001 Hz to 50 MHz Range**
The full frequency range of 0.0001 Hz to 50 MHz gives you the frequency and repetition rates in greater ranges than normally found in function or pulse generators alone. The sine, triangle, square, haverwave and ramp waveforms and the pulses can be output in a variety of modes.
**AM and FM**
To round out the versatility of the Model 166, the output pulse as well as the functions can be amplitude and frequency modulated with an ac signal or amplitude and frequency controlled with a remote dc signal. Amplitude modulation can be to 200% for a suppressed carrier operation.
**PRICE** (FOB San Diego) **$1695**

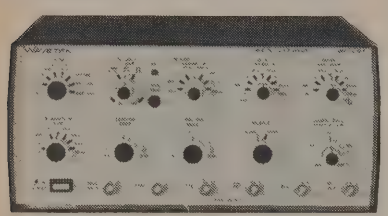
## 20 MHz FUNCTION/ PULSE GENERATOR



Model 145

The Model 145 offers both the versatility of a function generator and the precise requirements of a pulse generator—both at a cost much lower than that of separate instruments. It operates over a frequency range of 0.001 Hz to 20 MHz, providing sine, square and triangle functions, plus pulse and inverted pulse. With a simple turn of the mode switch, the instrument can be a precision waveform generator with versatile function generator features or a precision pulse generator with controllable period, delay and width. The output of the generator is variable to a full 30 volts peak to peak with simultaneous ECL, $\overline{\text{ECL}}$, TTL and $\overline{\text{TTL}}$ outputs, and an output sync signal. Features used in either mode include triggering and gating with manual pushbutton or external signals; external voltage control of frequency/period; signal baseline offset; 0 to 60 dB attenuation; and a 0 to +2V signal output proportional to the generator frequency/ period.
**PRICE** (FOB San Diego) **$995**

## PULSE GENERATOR



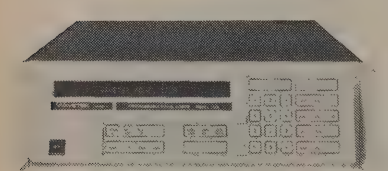
Model 801

The Model 801 is a 50 MHz pulse generator with full pulse shaping and triggering control. Its versatile output system lets you have a variable output and fixed ECL, $\overline{\text{ECL}}$ and TTL outputs simultaneously. You can complement the outputs, independently adjust both levels of the variable output from −20 to +20 volts (20V p-p max) and adjust the rise and fall from <5 ns to 250 ns. All pulses can be fully shaped with independent width, rate and delay controls.

Not only do you get full pulse capability, but also format versatility. Operating modes include continuous, triggered and gated for both single and double pulses. A burst mode gives you an exact number of pulses with each triggering. Another mode allows you to reconstruct or reshape pulses.

Triggering is by a front-panel switch or an external signal. A front-panel LED indicates trigger acceptance. You can trigger and gate on the rising or falling edge of the trigger signal and a particular trigger signal level.
**PRICE** (FOB San Diego) **$995**

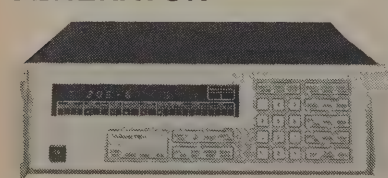
## PROGRAMMABLE SIGNAL SOURCE



Model 172A

The Model 172A provides top system performance in its standard configuration and offers a versatile package of options that allows it to perform multiple tasks in systems applications.
**Microprocessor Control**
The instrument features a microprocessor-controlled interface and preprocessor to simplify programming and application of the instrument. The microprocessor numeric capability relieves the system controller from formatting responsibility.
**Multiple Waveforms**
The 172A generates sine, square, triangle, ramp, pulse, haversine, and havertriangle waveforms. A no-waveform or dc mode can also be programmed which expands the versatility of the unit to a dc supply with a 50 ohm source impedance. All waveforms may be phase-locked to your external frequency for system frequency coherence.
**GPIB Compatibility and Programming Versatility**
The standard Model 172A accepts synchronous, bit parallel, byte serial ASCII programming. For greater versatility, an option is available which fully conforms to the requirements of IEEE 488-1975, the General Purpose Interface Bus (GPIB).
**Other Features**
As standard features, the Model 172A also offers sweep and FM capability, trigger and tone burst, and variable symmetry.
**PRICE** (FOB San Diego) **$4300**

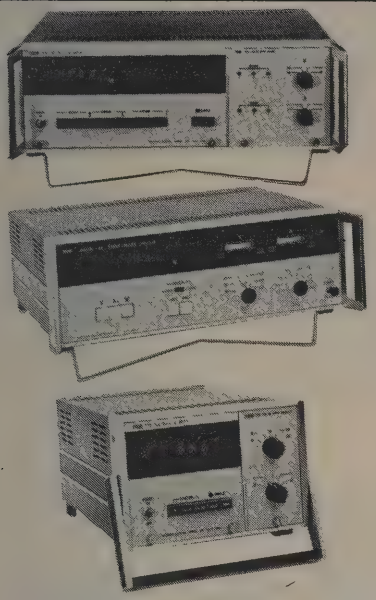
## ARBITRARY WAVEFORM GENERATOR



Model 175

**Generate Custom Waveforms**
Not only does this Arbitrary Waveform Generator give you sine, square, triangle and ramp waveforms, it lets you generate any waveform that can be expressed as a function of time. The working Random Access Memory (RAM) has 4 sets of 256 addresses and each address accepts an 8-bit word. This corresponds to a 1024 (time) by 255 (amplitude) matrix in which to draw waveforms. These storage addresses can be manually loaded by front panel controls or remotely loaded via the GPIB interface. The stored waveform, or any portion thereof, then can be generated at selectable clock rates and amplitudes.
**Fixed and Variable Waveform Storage**
In addition to four working RAMs, provisions are made for storage of up to four waveforms in Programmable Read Only Memory (PROM). Waveforms that are used repetitively may be stored in the PROMs, then called up without reloading. This permits storing your normal waveforms in the PROMs and saving the RAM for unusual requirements.
**PRICE** (FOB San Diego) **$3995**

# YEW Precision Electrical Measurement Instrumentation



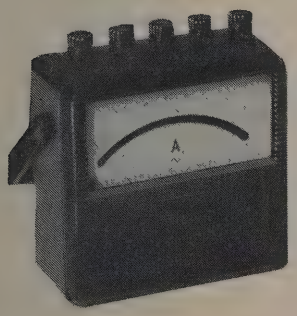
## PRECISION DIGITAL AC POWER INSTRUMENTATION

**YEW's offers a complete line of digital precision low frequency instrumentation for True RMS Volts/Amps and Watts to ±0.01% accuracy.**

| Model | Accuracy | Range * V | Range * A | Frequency Range | Approx. Price |
|---|---|---|---|---|---|
| APR-2 | ±0.01% | 120 | 5 | DC & 60 Hz | $18,000 |
| 2885-16 1φ, 2W | ±0.03% | 75/100/ 150/300 | 0.5/1/2 5/10/20 | 20 Hz - 10 kHz | $ 5,995 |
| 2503-01 1φ, 2W | ±0.1% | 3/10/30/100/ 300/600 | 0.1/0.3/1/ 3/6/10/30 | Watts 40 Hz to 1.2 kHz V & A 25 Hz to 2 kHz | $ 5,170 |
| 2503-03 3φ, 3W | ±0.1% | 3/10/30/100/ 300/600 | 0.1/0.5/1/ 3/6/10/30 | | $ 7,705 |
| 2504 1φ, 2W | ±0.25% | 30/60/100/ 150/300 | 0.5/1/2/ 5/10 | | $ 2,948 |
| 2505 3φ, 4W | ±0.25% | 100/150/ 300/600 | 2/5/10/20 | | $ 7,950 |
| 2509 1φ, 2W | ±0.5% | 70/250 | 1/2/5/10 | 40 Hz to 400 Hz | $ 1,250 |

* Watt Range — VA at unity power factor.
**NOTE:** Above instruments useable from 0.0 P.F. to 1.0 (unity) P.F.

## Taut-band Precision Portables



**YEW is the world's largest and most respected manufacturer of precision, tautband, 0.5% portable instruments.**

### FEATURES:

- **Full One Year Warranty**
- **Fast and Complete Service Facilities Manned by Factory Personnel**
- **Lowest Prices in the Field**
- **Guaranteed 0.5% Accuracy Traceable to N.B.S.**
- **Tautband Friction-Free Meter Movements**

## AMMETERS AND VOLTMETERS

Specifications: DC: Moving Coil, AC: Iron Vane, Accuracy: ±0.5%, Scale Length: 130 mm

| Model | Range |
|---|---|
| 2011-01 | DC 3/10/30/100uA |
| 2011-02 | DC 10/30/100/300uA |
| 2011-03 | DC 0.1/0.3/1/3mA |
| 2011-04 | DC 1/3/10/30mA |
| 2011-05 | DC 10/30/100/300mA |
| 2011-06 | DC 0.1/0.3/1/3A |
| 2011-07 | DC 1/3/10/30A |
| 2011-08 | DC 0.3/1/3/10V |
| 2011-09 | DC 3/10/30/100V |
| 2011-10 | DC 30/100/300/1000V |
| 2013-01 | AC 20/100mA |
| 2013-02 | AC 50/250mA |
| 2013-03 | AC 100/500mA |
| 2013-04 | AC 0.2/.1A |
| 2013-05 | AC 0.5/2.5A |
| 2013-06 | AC 1/5A |
| 2013-07 | AC 2/10A |
| 2013-08 | AC 5/25A |
| 2013-09 | AC 10/50A |
| 2013-10 | AC 20/50/100/200mA |
| 2013-11 | AC 0.1/0.2/0.5/1A |
| 2013-12 | AC 0.5/1/2/5A |
| 2013-13 | AC 2/5/10/20A |
| 2013-14 | AC 10/20/50/100A |
| 2013-15 | AC 15/30V |
| 2013-16 | AC 30/75V |
| 2013-17 | AC 75/150V |
| 2013-18 | AC 150/300V |
| 2013-19 | AC 300/750V |
| 2013-28 | AC 150/300/600V |
| 2013-99 | AC 150/300/750V |

**Price: $161.00 to $176.00**

## MULTI-RANGE AC AND DC METERS

Specifications — Same as 2011 and 2013

| Model | Range |
|---|---|
| 2012-00 | DC 17 Range, Voltage: up to 1000V. Current: up to 30A **Price: $332.00** |
| 2014-00 | AC 13 Range, Voltage: up to 750V, Current: up to 30A **Price: $309.00** |

## WATTMETER

Specifications — Electrodynamometer, Accuracy: ±0.5%, Scale Length: 130 mm, Frequency: DC, 25 Hz to 1 kHz

| Model | Range |
|---|---|
| 2041-01 | 0.2/1A 120/240V |
| 2041-02 | 1/5A 120/240V |
| 2041-03 | 5/25A 120/240V |
| 2041-11 | 0.2/1A 120/240V PF 0.2 |
| 2041-12 | 1/5A 120/240V PF 0.2 |
| 2041-13 | 5/25A 120/240V PF 0.2 |
| 2041-21 | 0.2/1A 30/60V PF 0.2 |
| 2041-22 | 1/5A 30/60V PF 0.2 |
| 2042-01 | 0.2/1A 120/240V (3 phases) |
| 2042-02 | 1/5A 120/240V (3 phases) |
| 2042-03 | 5/25A 120/240V (3 phases) |

**Price: $365.00 to $524.00**

## HIGH FREQUENCY METERS

Specifications — Thermocouple, Accuracy: ±0.5% (60 Hz) for Voltmeter, ±1.0% (60 Hz) for Ammeter, Frequency: up to 100 kHz for Voltmeter, Maximum: up to 5 MHz for Ammeter, Scale Length: 130 mm

| Model | Range |
|---|---|
| 2016-01 | 5/10/20/50mA |
| 2016-02 | 20/50/100/200mA |
| 2016-03 | 100/200/500/1000mA |
| 2016-04 | 15/30/75/150V |

**Price: $434.00**

*60 Years of Measuring and Recording Instrumentation*

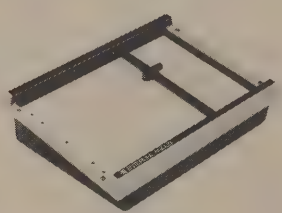
# Instruments for Data Acquisition, Analysis, Recording, and Controlling

High performance recorders—here now to help you track processes, power, experiments, tests, and pollution. The line includes servo, direct writing and event recorders; miniature recorders; two of the lowest-cost programmable data acquisition systems available; and high performance X-Y recorders. Gas analysis systems and components available for continuous stack, ambient air monitoring, and process control.

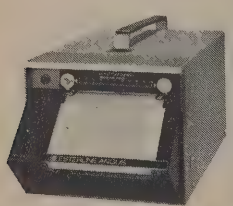
ESTERLINE ANGUS
AN ESTERLINE COMPANY

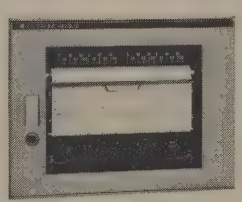
**Key-Programmable Data System (PD-2064):** Gathers analog and digital data in the field, lab, and plant on up to 248 channels, pushbutton-controlled through an 11-function keyboard and microprocessor setup. Functions in the self-contained system include signal conditioning, crystal controlled clocking, measurement as fast as 25 channels/second, optional high/low alarms, two outputs plus LED display, integration. Special ROM programs and Program Bank available. Remote programming too. **Write for Bulletin B110.** Base price $4350.

**Count/Time Data Systems (C/TDS):** Appears similar to the PD-2064, the C/TDS models DE2100 and DE2101 gather production, research, and traffic study data on up to 248 channels. On each channel they record number of switch operations or totalize On-time duration with printed tape and computer-compatible outputs listing performance by channel for the last minute, hour, 8 hours, or month. Key programming through microprocessor makes C/TDS extremely versatile. Optional alarms. Highly protected against the worst electrical environments. **Write for Bulletin B130.** Base price $3800.

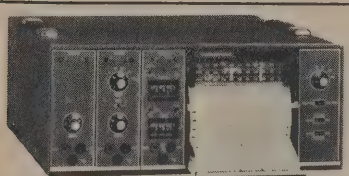


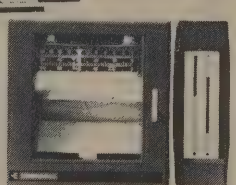
**X-Y recorders for every need:** Model 530 is for general lab use, with a sensitivity of 1 mV/in to 10 V/in. Model 540 is a two-pen crossover ideal for analytical readout, plotting dependent vs. independent voltages, or statistical plotting. Model 575 is stripped down for OEM applications, or order with add-on multirange module. Slew speed 45 ips both axes. Pen drop repeat rate of 45 cycles/sec. **Write for Bulletin E500.** Prices begin $1085.



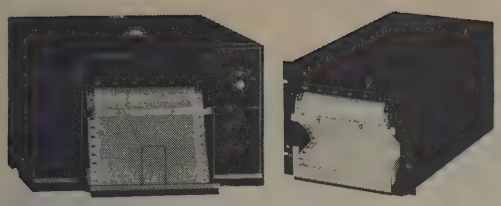


**Direct writing recorders:** Widest range of direct writing instruments—from 4½″ single channel curvilinear to four 2³⁄₁₆″ channel Rectigraph recorders. Electrodynamometer or permanent magnet moving coil types. To record (generally) mA, A, V, W, Vars, KVA, frequency, pressure, vacuum, speed, position. Electric or spring drives with hr., min., and sec. chart speeds. From $620. **Bulletin C200.**



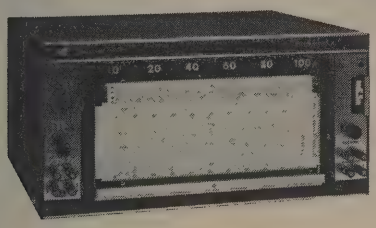


**Miniservo® III recorders for lab or industry:** 1, 2 or 3 pens per servo recorder with independent amplifier per channel. Lab model features flexible building block concept with a selection of five interchangeable plug-in amplifiers from 1MVDC, AZAS and four chart drives. Bench case, 10 cm chart width. Base price $895. **Bulletin F610.** Industrial Miniservo III has built-in transmitter loop power supply ideal for process industry. Seismic approved. 7″ x 7″ panel mounted. **Bulletin F620.** Base price $550.



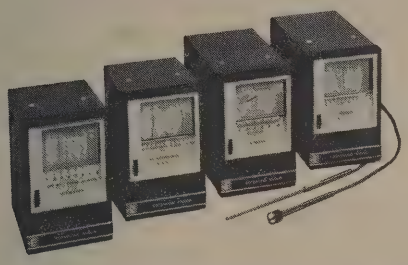
**Miniservo® recorders:** Basic OEM unit (right) starts at $335. **Bulletin F611.** Stock benchmount model (left) includes selectable chart speeds, multi-span—1MVDC to 100V with ± full scale zero adjust or Adjustable Zero, Adjustable Span (AZAS)—span from 1 MV to 100 VDC full scale, adjustable zero of ±100 VDC. Models: AC, battery-powered DC with AC rectifier/charger. Prices begin at $595. **Bulletins F612 through F615.**

---



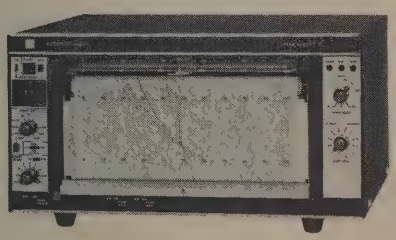
**Speed Servo® II recorders:** Single pen, two-pen crossover, two-pen side-by-side. 0.3 sec. response, 10″ recorder available fully equipped for versatile lab use or stripped for OEM use. All feature linear servo motor, wireless feedback potentiometer, and disposable writing system or inkless writing system. 2, 5, or 10 chart speed drives; accessible front controls 0.5 mV-100 VDC input spans; E, J, K, R, S and T thermocouple compatible. Alarms. Bench, rack mount or panel mount styles. Prices from $1150.

---



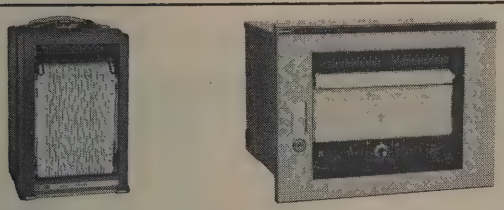
**Minigraph recorders:** Small low cost analog single channel, two-channel, time share and temperature inkless recorders available in 70 chart speeds. For lab, industry, education. Priced from $122. **Hook-on current transformer:** 50 or 60 Hz, indoor rated (to 750 V), 5-250 amp range dialset. $219. **Event Minigraphs:** for 4 or 8 channel on/off or yes/no applications. From $139. **Request Bulletins C230, C231, and D330.**

---



**Ink and inkless multipoint:** A 24- or 48-point 10″ rotary servo recorder with ink system with 1½ sec. print rate. Slide switch selects points to be deleted or printed. 1 mV minimum span. From $1850. Inkless multipoint recorder thermally brands analog data on up to 24 channels at 1 second print rate on 10″ heat-sensitive chart. Universal input panel accepts millivolt/volt or thermocouple inputs. Options include channel print/skip switches, dual range control, alarms, and time/I.D. recording. From $1725. **Ink Bulletin F600. Inkless Bulletin F720.**

---



**Event recorders:** 5, 10, 15, 20 or 40 channels ink or inkless for yes-no, on-off recording of events. 8″ x 8″ flush cases, front switch board or wall mounted cases, too. Electric or spring chart drives with hour, minute and second speeds. Hundreds of varieties possible in A, E, or S Series. Prices from $610.

---

**Gas analysis systems and opacity monitors:** Includes visible emission monitor for stacks to meet EPA and local codes. Automatic continuous process monitoring and control, and ambient air monitoring of parameters such as CO, $CO_2$, HC, $NO_x$ and many others. Closed loop components —controllers, transmitters, transducers—available. **Write for Bulletin G1300 and application questionnaire for gas analysis, and Bulletin G1305 for opacity monitor.**

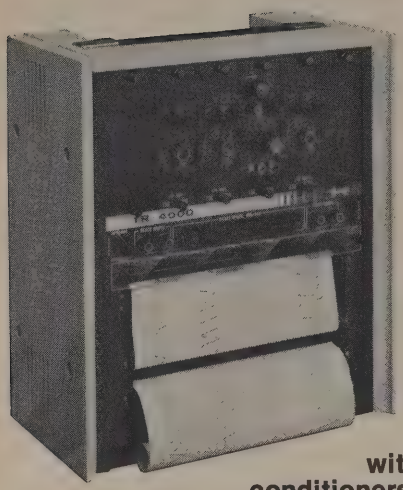
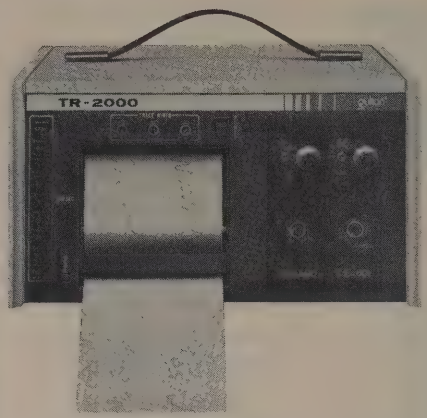
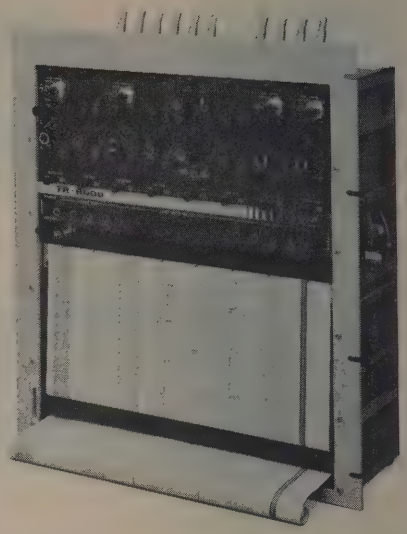
# oscillographic recorders







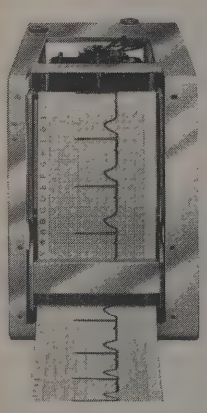
**2, 4, 6 and 8-channel recorders with interchangeable plug-in signal conditioners . . . the smallest, lightest, most versatile portable multichannel recorders available.**

**Compare these features with any other recorder's:**

**True portability:** for example, our 8-channel recorder weighs only 65 lbs. and measures 17½″ x 19″ x 6″. Our two channel is only 30 lbs.
**Frequency response:** 140 Hz (−3dB)
**Thirty interchangeable signal conditioners:** provide recording of volts, millivolts, microvolts (down to 15 uV/division), temperature (thermocouple and thermistor), ac and dc strain, frequency to dc, EKG, log to dc, watts and more (see below).
**Chart speeds:** 8-speed pushbutton chart drive (0.5 to 100 mm/sec.) is standard on all models.
**Writing:** Coaxial or nearly indestructible ceramic tip heated stylus on rectilinear chart paper produces high trace quality.
**Delivery:** two weeks delivery in many cases.
**Available on GSA.**

## PLUG-IN SIGNAL CONDITIONERS FOR GULTON PORTABLE MULTICHANNELS

- ☐ TSC-800 LOW GAIN—Low cost. Single span. 10 mV/div. sensitivity.
- ☐ TSC-801 MEDIUM GAIN—1 mV/div. sensitivity.
- ☐ TSC-810 LOW GAIN—10 mV/div. sensitivity.
- ☐ TSC-820 HIGH GAIN—10 uV/div. sensitivity. For use with strain gage transducers.
- ☐ TSC-510 AC STRAIN—5 uV RMS/div. For use with strain gages, LVDT's, and variable reluctance transducers. Toggle switch permits bypass of signal conditioning circuitry.
- ☐ TSC-500 J, T, K or E—Preamps with thermocouple compensation.
- ☐ TSC-811 CURRENT TO DC—Monitor currents from 1 to 20 mA. Four ranges.
- ☐ TSC-815 DIAL PULSING & TONE BURST MONITOR—For monitoring telephone communications.
- ☐ TSC-822 HIGH GAIN—Same as TSC-820, except without DC excitation.
- ☐ TSC-823 HIGH/LOW GAIN—Two ranges: 5 uV/div. to 500 uV/div. and 5 mV/div. to 500 mV/div. Zero suppression.
- ☐ TSC-830 FREQUENCY TO DC CONVERTER—Input frequency range 10 Hz to 20 KHz.
- ☐ TSC-831 FREQUENCY TO DC CONVERTER—Same as TSC-830, but with f.s. range suppression and 10X scale expansion.
- ☐ TSC-840 AC TO DC CONVERTER—50 Hz to 100 kHz range. Inputs to 250 VRMS.
- ☐ TSC-840A AC TO DC CONVERTER—50 Hz to 100 kHz range. Inputs to 1000 VRMS.
- ☐ TSC-841 AC TO DC CONVERTER—100A to 1000A. Use with clamp-on current transformer.
- ☐ TSC-843 COMMUNICATIONS PREAMP—Converts AC to log. Records DC signals up to 100 Hz.
- ☐ TSC-850 EKG SIGNAL CONDITIONER—For research and laboratory diagnostic use.
- ☐ TSC-870 MEDICAL THERMISTOR PROBE—Temperature range 50° to 113°F.
- ☐ TSC-871 INDUSTRIAL THERMISTOR PROBE—Temperature range 0° to 100°C.
- ☐ TSC-880 LOG TO DC—Range −80 dB to +40 dB over 50 Hz to 100 kHz.



## OEM Recorders

**Standard or custom recorders • complete systems designed for your application**

- ☐ 1, 2, 3, 3½, 4, 5, 6 and 8 channel recorders with two year warranty on recorder body.
- ☐ Select position feedback or velocity galvanometer models.
- ☐ Alphanumeric thermal printing available; either single line or up to 12 lines.
- ☐ Three types of styli available: 1) strut type, 2) coaxial with six month warranty or 3) long life ceramic tip with two year warranty.
- ☐ Frequency response up to 140 Hz.
- ☐ Low power consumption miniature dc models available with multi-speed option.
- ☐ UL listed units.
- ☐ Models designed to satisfy AHA requirements.
- ☐ 90 Days delivery on most recorders.
- ☐ Special requirements easily met.

Call or write for application questionnaire and catalog!

# Rustrak chart recorders

## Standard miniature recorders

Rustrak miniature chart recorders generally measure 5⅝″ h x 3⅝″ w x 4⅛″ d, and offer a wide range of sensitivities, writing and chart speeds. Accuracy is typically ±2% of full scale and response time is 0.8 to 1.0 seconds. The recorders operate in both chart rewind and tear-off modes. Chart width of single channel recorders is 2⁵⁄₁₆″, dual channels 1″ each. Multichannel recorders are available containing either two or three full width channels.

**Single Channel DC Recorders**
Ranges from 0-10 uA to 0-5 A; 0-10 mV to 0-500 V. Voltage and current ranges available. Chart speeds from 1/32″/hr. to 480″/hr. AC models also available.

**Dual Channel DC Recorders**
Two channels with dual galvanometer. Available in various combinations of current, voltage and temperature. AC models also available.

**Temperature Recorders**
Thermocouple, thermistor or RTD recorders available. Ranges from −100°F to +2400°F. Custom spans as narrow as 25°F. Also available in °C and in single, two or three channels.

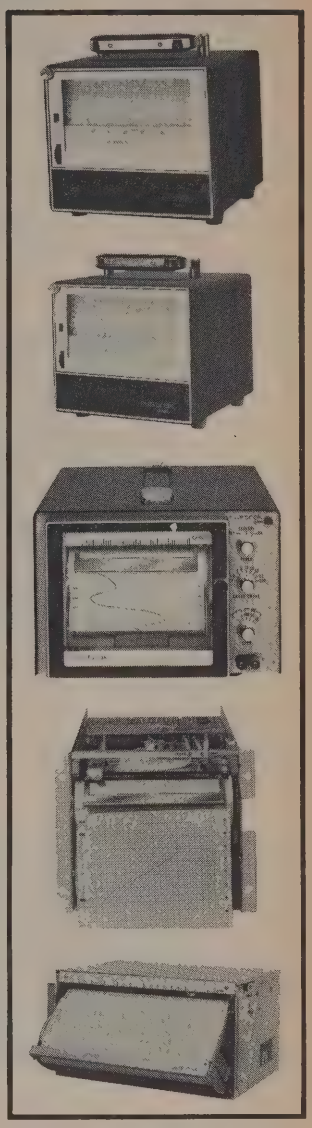
**Power Recorders**
Select full scale ranges from 500 watts to more than two megawatts. For single or three phase systems. Full month's recording on one roll of chart paper.

**Event Recorders**
4, 8, 16, 24 channels. Chart speeds to 50″/min. with definition of up to 16 events/sec.

**RH/Temperature Recorder**
Electronically monitors relative humidity from 10% to 90% and temperature from 60°F to 90°F on a single chart. Two months of operation on a single roll of chart paper.

**Continuous Writing Recorder**
100 mV direct writing recorder offers 1 MΩ input impedance and solid state amplifiers. Series of plug-ins available for current, voltage, temperature measurement.

## New wide chart recorders



**4″ Galvanometric Recorders — Series 7000**—Record volts, amps, temperature, many other variables. 4″ Calibrated chart width. One to four traces (time shared). Up to three events. Reliable inkless pressure writing, 1 sec. response. 30 day operation unattended. AC or DC operation. Dual width models available.

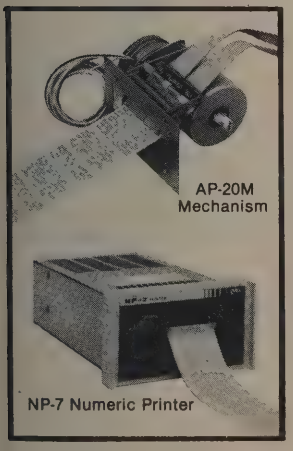
**4″ Continuous Writing Potentiometric Recorder With Plug-In Signal Conditioners — Series 6400**—Record current, voltage, temperature, up to three events. Inkless pressure writing. AC or DC operation. Dual width models available.

**4″ Continuous Writing Potentiometric Laboratory Recorder With Plug-In Range Cards — Series 500.**—Record current, voltage, temperature. Reroll, tearoff or Z-fold chart styles. Single or multiple spans. Single or multiple chart speeds. Event marker and low and high alarm contact options. Half second full scale response. Convenient disposable ink cartridge.

**4″ Continuous Writing Potentiometric OEM Recorder — Model 505**—Case depth only 7¼″. Fixed span. Record voltage, current, temperature. Reroll, tearoff or Z-fold chart styles. Half second full scale response. Disposable fiber-tip ink cartridge.

**10″ Continuous Writing Recorder With Plug-In Range Cards — Model 1025**—10″ Calibrated chart. Disposable fiber tip ink cartridge. OEM rack mount. Record voltage, current, temperature. Full scale response is 0.25 second. One or two event markers are optional. Accuracy is ±0.25%. Reroll or tearoff chart operation.

# Fixed head digital thermal printers and mechanisms



Gulton's fixed head approach to thermal printing takes advantage of the quietness and reliability of solid state switching. Compare: only one moving part — the paper drive; independence from ink supplies and ribbon mechanisms, high character quality versus any other printing technique such as moving head, print solenoids, wire matrix, decade or electrosensitive (RFI problems).

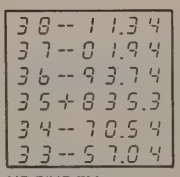
☐ AP-20 alphanumeric dot matrix printer accepts a character serial bit parallel interface in 64 character ASCII code. Provides 20 columns of 5x7 characters at up to 2.5 lines/sec (RS232C, 20 mA current loop and IEEE STD 488 bus interfaces optional.)

☐ NP-7 accepts parallel BCD inputs. Provides 7 columns of exceptional quality 7 segment numerals. Up to 4 lines/sec.

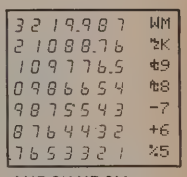
☐ ANP-9 accepts parallel BCD inputs. Similar to NP-7 but has 2 additional alphanumeric dot matrix I.D. columns. Up to 2.5 lines/sec.

☐ Mechanisms AP-20M, NP-7M and ANP-9M are available.

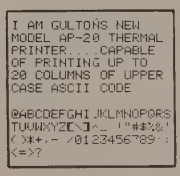
☐ NEW mechanism GAP-101M for simultaneous analog, alphanumeric (10 col. 7x9 or 16 col. 5x7) and grid printing.



NP-7/NP-7M printout



ANP-9/ANP-9M printout



AP-20/AP-20M printout

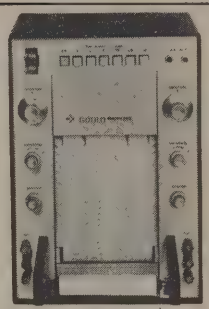
# Gould Brush Analog Recording Systems. The Most complete Line.

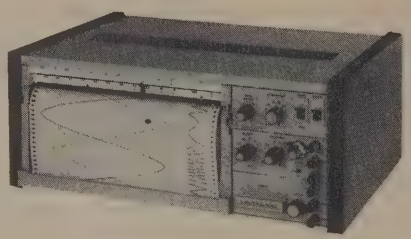
Gould Brush direct writing recorders produce written records of highest accuracy, trace clarity, crispness and uniformity.

Gould offers a complete selection of general purpose, high performance direct writing and strip chart recorders with many exclusive features.

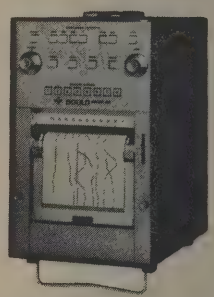
Most models are available in both portable and rack mounted versions. These quality recorders are ideally suited for industrial and scientific applications that require the highest precision, sensitivity and accuracy.



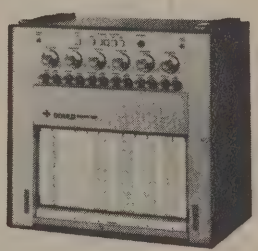
Gould Brush 222•2-CHANNEL. Portable battery operated version of Brush 220 recorder. Internal recharger. 30Hz frequency response. Sensitivity 1mV/div. to 500Vf.s.



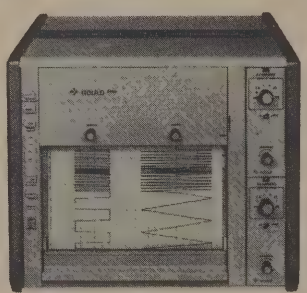
Gould Brush 110 STRIP CHART. Most versatile 10-inch recorder. One or two channels; integrator optional. Lifetime thermal pen guarantee. 0.25 sec. f.s. response.



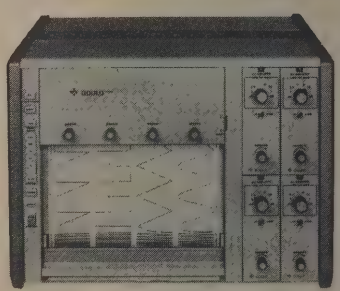
Gould Brush 816•8-CHANNEL HI-SPEED MULTIPOINT. Data is recorded at a rate 2 sec. / point to 16 points / sec.



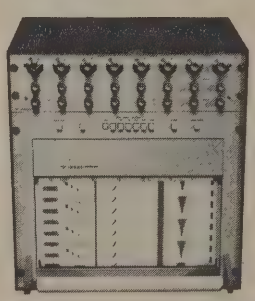
Gould Brush 260•6-CHANNEL. High precision and operator conveniences. Built-in preamps. 1mV/div. to 500Vf.s. sensitivity.



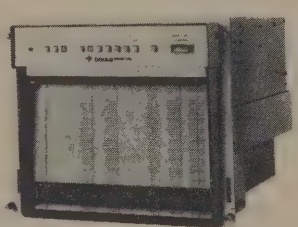
Gould Brush 2400 • 2-CHANNEL. Channels are a true 100mm wide. Plug-in preamps. 30Hz frequency response.



Gould Brush 2400 • 4-CHANNEL. 50mm channels, 50Hz frequency response, 99.65% linearity.



Gould Brush 481 • 8-CHANNEL. 1mV/div. to 500 V f.s. sensitity. Model 480 available without preamps.



Gould Brush 200 • 8-CHANNEL. The world's standard for high performance recorders. Tailored to your specific requirements.

GOULD

# Honeywell High-Performance Oscillographic Recorders

| Model | Type/Response | No. of Channels | Comments |
|---|---|---|---|
| 1858 Visicorder  | Direct writing fiber-optic CRT. DC to 5 kHz sine wave, DC to 15 kHz square wave, 0.1 to 120 inch/sec record speed. | Up to 18; expandable to 32 with auxiliary housing. | Complete, self-contained oscillographic data acquisition system supported by eight different plug-in signal conditioning modules. Eight-inch paper. |
| 1508B Visicorder  | Direct writing galvanometer. DC to 25 kHz. | Up to 24, plus 4 for event recording. | Combines high-linearity optical system with sensitive galvanometers to produce extremely accurate recordings. Eight-inch paper. |
| 1508C Visicorder | | Up to 12, plus 2 for event recording. | |
| 1912 Visicorder | | Up to 36, plus 6 for event recording. | Versatile recorder accommodating 12-inch wide paper. Paper speeds from .005 to 200 inch/ sec. |
| 1856A Visicorder  | Linescan fiber-optic CRT. DC to 8 MHz, Z axis, DC to 75 kHz, Y axis, Scan rates to18000/sec, X axis. | Separate inputs for X, Y, and Z axes, variable chart speeds. | Particularly suitable for facsimile, spectrum analyzer readout, IR mapping and echocardiography since records have high resolution and wide gray scale. Record width 70 mm to 6 inches. Accessories for film records. OEM versions available. |
| 1806A Visicorder | Direct writing fiber-optic CRT. DC to 1 MHz, Y axis, DC to 10 MHz, Z axis, DC to 1 MHz, X axis, greater than 1,000,000 inch/sec writing speed. | | Capable of recording high-frequency signals that would otherwise require magnetic tape or oscilloscope camera techniques. Record width 70 mm to 6 inches. Accessories for film records. |

# Honeywell High-Performance Signal Conditioning Modules

| Model | Description |
|---|---|
| Accudata 218 Gage Control/Bridge Amplifier  | Controls excitation, balance and calibration of strain-gage transducers and provides signal amplification for almost any strain-gage application. Has optional automatic bridge balance. Accessory plug-in circuit cards provide for bridge-completion resistors and a choice of local, or local and remote, bipolar, two-step shunt calibration. This module also features three independent outputs for galvanometers, tape recorders and other recording or indicating devices. |
| Accudata 117 Multichannel DC Amplifier/ Attenuator | Direct-coupled, single-ended floating wideband amplifier of moderate gain for systems that use amplifiers to drive oscillograph galvanometers or magnetic tape recorders. Available in 4-, 6-, or 7-channel versions. |
| Accudata 118 Gage Control/Amplifier | Controls excitation, balance and calibration of strain-gage transducers used to measure force, pressure, acceleration, displacements, etc. Constant current or constant voltage excitation. Amplifier optional. |
| Accudata 122 and 123 Differential Wide Gain Range Amplifiers | May be used as differential, single-ended inverting or single-ended noninverting amplifier. Especially suitable for amplifying low-level signals where relatively high common mode voltages are encountered. Input sensitivity is from ±2 mV to ±300V. |
| Accudata 124 High Voltage Amplifier/Attenuator | Wide input range, ±50 mV to ±1000V, common mode voltage max ±1200V, excellent common mode rejection, four channels per housing. Also has three independent outputs for galvanometers, tape recorders or other indicating devices. |

## ...provides one or two pen 10″ wide recording in only 3½″ of vertical panel space

- **Unique Maxi-View™ chart drive feature provides "instant replay" of previous records**
- **10″ wide recording in only 3½″ of vertical panel space**
- **Disposable markers standard . . . thermal marking system optional**
- **One or two full scale, cross-over pens . . . English or metric calibration**
- **Lever-operated manual chart advance**
- **Single, dual or adjustable-zero, adjustable spans**
- **Wide selection of ranges**
- **Mechanical pen lifters standard . . . electrical lifters optional**
- **Meets ANSI C39.4-1966 Performance Standard and ANSI C39.5 (Proposed Safety Standard)**
- **Bench, rack or panel mount**
- **Electronic Off-Scale limit protection**

## Specifications

Recorder meets or exceeds specifications listed in ANSI Standard Specifications for Automatic Null-Balancing Electrical Measuring Instruments C39.4-1966 and ANSI C39.5-1974.

**Measuring Circuit**—D-c potentiometer.

**Record**—One or two channels with independent disposable markers. Thermal marking system optionally available for single-channel recorder.

**Range Spans**—Emf spans provided by interchangeable plug-in modules.

**Fixed Spans**—1 mV to 100 V d-c.

**Adjustable Spans**—(1) Low-Level AZAR (Adjustable Zero, Adjustable Range) Circuit provides selection of 1, 2, 5, 10, 20, 50 mV and 0.1, 0.2, 0.5, 1, 2, 5, 10, 20, 50, and 100 V d-c. (2) High-Level AZAR Circuit provides selection of 0.1, 0.2, 0.5, 1, 2, 5, 10, 20, 50, and 100 V d-c. Both AZAR circuits contain a continuously adjustable uncalibrated vernier between fixed span steps to provide a 2.5:1 span turndown. All spans are provided with an uncalibrated ±100% zero adjustment.

**Accuracy**—±0.25% of span.

**Dead Band**—≤0.1% of span.

**Span Step-Response-Time**—0.5 second for full scale response.

**Source Impedance**—≤25,000 ohms.

**Off-Balance Input Impedance**—Spans up to 100 mV: from 3.5 megohms at 1 Hz to 0.2 megohm at 40 Hz and above; Span 0.1 to 5 V: 3.5 megohms; Spans over 5 V: 2.5 megohms.

**Balance Input Impedance**—Spans up to 5 V: 30 megohms; Spans over 5 V: 2.5 megohms.

**Common Mode Rejection**—Greater than 80 dB at full source impedance.

**Normal Mode Rejection**—Greater than 40 dB at line frequency.

**Power Requirements**—Operates on 120 volts, 60 Hz or on 120, 220, or 240 volts, 50 Hz as specified.

**Power Consumption**—One Channel: 20 volt-amperes
Two Channels: 35 volt-amperes

**Chart**—9⅞ inches (250 millimeters) in calibrated width and 30 yards (about 27 meters) long.

**Chart Speeds**—Single or switch selection of two speeds (1 to 720 in/hr or 3 to 1800 cm/hr). Mechanical ten-speed changer (0.5 to 3600 in/hr or 1 to 7200 cm/hr). Electronic ten-speed changer (1 to 360 in/hr or 6 to 720 cm/hr).

**Pen Lifters**—Mechanical type. Solenoid operated type optionally available.

**Event Marker**—Optionally available for X1 channel only; equipped with disposable marker or thermal marking system.

**Scale**—An optional scale with pointers can be supplied.

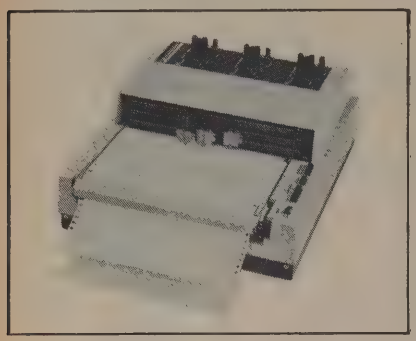
**Case**—Designed for panel, cabinet-type relay rack, telephone-type relay rack, or bench mounting. Chassis of panel, cabinet-type relay rack, or telephone-type relay rack recorder supported on drawer-type slides; bench-type recorder supported on four feet.

**Dimensions**—Panel, cabinet-type relay rack, or telephone-type relay rack recorders: 3½″ high by 19″ wide by 19½″ deep behind panel (89 mm × 483 mm × 495 mm). Bench type recorders: 4″ high by 19″ wide by 21¾″ deep (102 mm × 483 mm × 552 mm).

**Weight**—One-pen models, 27 lb (12.3 kg) and two-pen models, 37 lb (16.8 kg).

**SIMPLE RECORD REVIEW** Push a lever and unroll your chart for an "instant replay" review of previous record . . . then push and automatically rewind . . . all without stopping the regular chart drive. This unique feature gives you the chart visibility of "free fall" operation even when the chart is operated in the reroll mode.

# YEW Oscillographs & Recorders



## 3066 SERIES FLAT BED RECORDERS

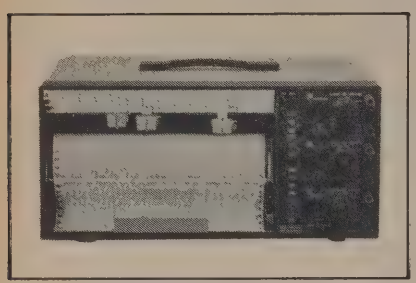
The 3066 Series of flat bed recorders are offered in one, two and three pen models covering a wide range of voltages — 19 ranges from 5μV/cm to 5V/cm in the high sensitivity model and 13 ranges from 0.5mV/cm to 5V/cm in the standard model. A long life conductive plastic potentiometer/DC servo system combined with a highly reliable pulse chart drive/tuning fork oscillator system results in unexcelled accuracy and dependability under the most adverse conditions.

Recorder flexibility is greatly enhanced through such options as remote control of chart drive, event markers, pen lift, chart reroll and take-up. Ease of operation results from the use of disportable felt tip pen assemblies.

**SPECIFICATIONS**
Channels: 1, 2 or 3
Accuracy: ±0.25% of span
Chart Width: 250mm
Ranges: 19 ranges, 5μV/cm to 5V/cm or 13 ranges, 5mV/cm to 5V/cm
Chart: Z-fold or roll chart
Chart Speeds: 2cm/hr to 60cm/min.
Pen Speed: 800mm/sec nominal
Common Mode Rej.: Greater than 140dB,AC or DC

**PRICE**

| Model | Channels | Sensitivity | Prices From |
|---|---|---|---|
| 3066-11 | 1 | Standard | $1175.00 |
| 3066-12 | 1 | High Sensitivity | 1368.00 |
| 3066-21 | 2 | Standard | 1675.00 |
| 3066-22 | 2 | High Sensitivity | 1995.00 |
| 3066-31 | 3 | Standard | 2358.00 |
| 3066-32 | 3 | High Sensitivity | 2924.00 |



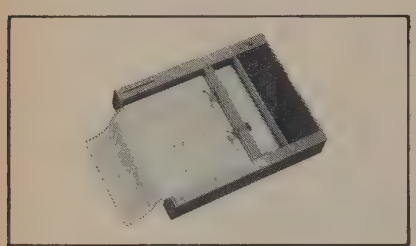
## 3056 SERIES LABORATORY RECORDERS

The 3066 Series of vertical pen laboratory recorders are self balancing potentiometric, 250mm full span units offered in 1, 2 and 3 pen models. Maximum sensitivity is 5μV/cm while overall accuracy for each channel is ±0.25% of effective recording span. A variety of remote control options provide maximum recorder flexibility while felt-tipped pens offer high definition and fast, easy replacement.

**SPECIFICATIONS**
Channels: 1, 2 or 3
Accuracy: ±0.25%
Chart Width: 250mm
Ranges: 19 ranges, 5μV/cm to 5V/cm or 13 ranges, 5mV/cm to 5V/cm
Chart: Z-fold
Chart Speeds: 2cm/hr to 60cm/min
Pen Speed: 800mm/sec nominal
Common Mode Rej.: Greater than 140dB, AC or DC

**PRICE**

| Model | Channels | Sensitivity | Prices From |
|---|---|---|---|
| 3056-11 | 1 | Standard | $1230.00 |
| 3056-12 | 1 | High | 1440.00 |
| 3056-21 | 2 | Standard | 1870.00 |
| 3056-22 | 2 | High | 2280.00 |
| 3056-31 | 3 | Standard | 2514.00 |
| 3056-32 | 3 | High | 3130.00 |



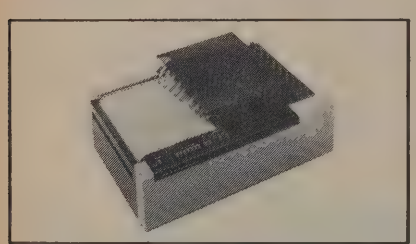
## 3036 SERIES X-Y RECORDER

The 3036 Series of X-Y recorder features 1 or 2 pen models with X-Y and X, $Y_1$ and $Y_2$ inputs on a full 250mm x 250mm chart. Overall accuracy is ±0.25% of effective recording span with a maximum pen speed of 50cm/sec on both X and Y channels. Disposable felt tip pens produce crisp and easily read traces.

**SPECIFICATIONS**
Channels: 1 or 2 Pen
Chart: 250mm x 250mm
Ranges: 19 ranges 5μV/cm to 5V/cm or 13 ranges, 5mV/cm to 5V/cm
Accuracy: ±0.25% of span
Writing: Disposable felt-tipped pens
Pen Speed: Approx. 0.7 seconds for 200mm

**PRICE**

| Model | Y Channels | Sensitivity | Prices From |
|---|---|---|---|
| 3036-11 | 1 | Standard | $2260.00 |
| 3036-12 | 1 | High | 2500.00 |
| 3036-21 | 2 | Standard | 3400.00 |
| 3036-22 | 2 | High | 3850.00 |

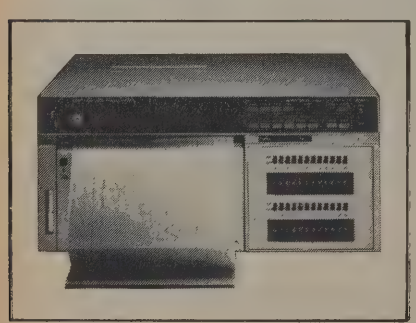


## 3061 SERIES 6 AND 9 PEN FULL SPAN RECORDERS

The 3061 Series of flat bed recorders simultaneously utilizes the full 240mm chart span for each of the 6 and 9 channels providing an exceptionally high degree of readability and flexibility for laboratory applications. Each channel utilizes an independent amplifier providing 13 voltage ranges from 0.5mV/cm to 5V/cm. Long life conductive plastic feedback potentiometers are used for long life and maximum reliability. A wide selection of options including remote control of chart speed, pen lift, chart reroll and event markers additionally increase overall flexibility.

**SPECIFICATIONS**
Channels: 6 or 9
Accuracy: ±0.25% of span
Chart Width: 250mm (240mm calibrated)
Ranges: 13 ranges from 0.5mV/cm to 5V/cm
Chart: Z-fold or roll chart
Chart Speed: 2cm/hr to 60cm/min

**PRICE**
6 pen models from $5192.00
9 pen models from 7169.00



## 2900 SERIES LIGHT BEAM OSCILLIGRAPH

The 2900 Series consists of 6, 9, 18 and 24 channel photographic recorders which use light sensitive paper for the recording medium. Since these units respond to very high frequencies, they are most suitable for recording waveforms which change at high speeds and contain high frequency components. The units also feature a high chart speed capability (to 4 meters per sec.) to enhance their high frequency capabilities. A long optical arm common to all models increases accuracy while providing minimum arc distortion.

**SPECIFICATIONS**
Model: 2901-00, 6 channels
Model: 2932-10, 9 channels
Model: 2932-20, 18 channels
Model: 2932-30, 24 channels
Frequency: DC to 3500Hz depending on galvo used
Sensitivity: Approx. 3.3μA/mm to 2.8μA/mm depending on galvo used
Recording Width: 5, 6, 7, or 8 inches
Light Source: High tension mercury arc lamp
Paper Speed: Up to 4 meters per second

**PRICE**
2901-00, $2485.00
2932-10, 3175.00
2932-20, 3745.00
2932-30, 4255.00
Galvanometers, From $99.00

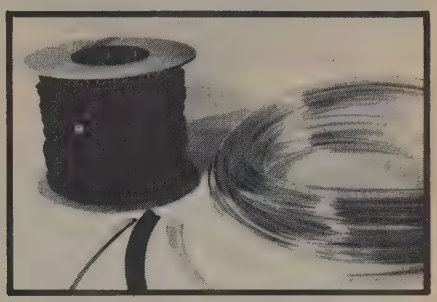
## Insulating Tubings and Sleevings — High Temperature Wire and Cable

FLEXITE

### ELECTRICAL GRADE PLASTIC TUBINGS



**FLEXITE Shrinkdown HT-105** is a flexible vinyl material made in expanded sizes to shrink 50% with 135°C heating; has outstanding electrical and mechanical properties. (UL FR-1)

**FLEXITE Shrinkdown PO-135** is a thermally-stable Class B (—55° to 130°C) crosslinked material that when heated shrinks 50% in diameter, forming a tough, smooth insulating covering with excellent chemical, electrical and oil resistant properties. (UL FR-1, CSA)

**FLEXITE Teflon* TFE and FEP** extruded tubings are fluorocarbon materials that combine long-term reliability with chemical inertness, flexibility, and superb electrical characteristics. Useful continuous operating temperatures range from —70°C to 200°C for FEP and 260°C for TFE.

**FLEXITE HT—105C** extruded Vinyl tubing is UL recognized for continuous use at 105°C. It is strong, very flexible tubing for many applications. (UL FR-1, CSA)

**FLEXITE SR-200** Silicone Rubber extruded tubing is made of an extremely elastic compound, and is excellent for high voltage applications at Class H temperatures to —70°C.

**FLEXITE E** extruded Vinyl tubing is an extremely flexible tubing designed primarily for low temperature applications (to —68°C) as in aeronautical instrumentation.

FLEXTECH

### FLUID AND MECHANICAL® GRADE PLASTIC TUBINGS

**FLEXTECH AR-400** tough, abrasion-resistant tubing is extruded from a Markel patented composition of reinforced Teflon and exhibits abrasion resistance many times greater than conventional Teflon tubings.

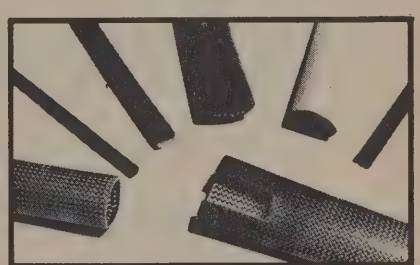
**FLEXTECH FN** Nylon and HP Nylon tubings are extruded from polyamides specially compounded to provide flexibility, heat stability and ultraviolet resistance and the conveyance of air gases and liquids under high pressures.

**FLEXTECH LP-80** Polyethylene is a specially compounded flexible tubing designed for the conveyance of air, gases and liquids under low pressure conditions.

**FLEXTECH U-585** Polyurethane is one of the most versatile of materials, combining long life with high working-pressure ratings, superb resistance to fuels and solvents, excellent flexibility, high resistance to abrasion, and low moisture absorption.

HYGRADE

### ELECTRICAL INSULATING SLEEVINGS



**HYGRADE Polytube 463** Class F Flexible Fiberglass Sleeving is an acrylic-coated material especially compatible with the wire enamels used in motors and transformers.

**HYGRADE Thermoflex 1200** Class C Flexible Fiberglass Sleeving is made of 100% tightly braided fiberglass. For use at continuous temperatures as high as 1200°F. (UL FR-1)

**HYGRADE Thermoflex 500** Class C Flexible Fiberglass Sleeving is made of tightly braided and pigmented fiberglass. For continuous operating temperatures to 500°F. (UL FR-1)

**HYGRADE SR-398** Silicone Rubber Coated Fiberglass Sleeving is a Class H material made of closely-woven glass braid, coated with highly abrasion-resistant silicone rubber. (UL FR-1)

**HYGRADE VF** Flexible Vinyl Fiberglass Sleeving is a tough, Class B insulation of plastic-covered fiberglass with excellent electrical resistance, flexibility, and heat stability. (UL-FR-1)

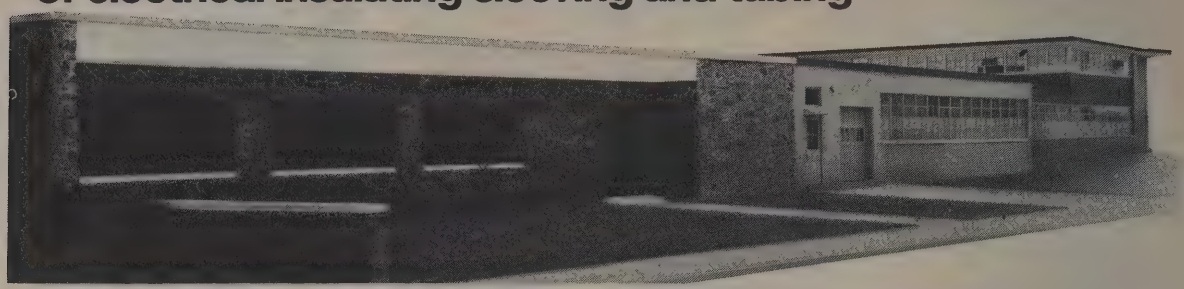
# reliable products delivered on time

# VARFLEX

## the complete line of electrical insulating sleeving and tubing



Whatever your problem, heat, cold, flexibility miniaturization, high insulating or dielectric strength—Varflex can supply the required reliability and delivery. Our rapidly expanding plant is fully equipped to supply sleeving for any combination of characteristics you may need. In addition to maintaining large stock for off-the-shelf delivery, Varflex has the productive capacity to provide prompt delivery (often 48 hours) on special orders. As insulation specialists, we are ready to work with you on unusual specifications or applications.

### Here is a brief description of Varflex products

**VARGLAS SILICONE RUBBER ES-4400 SLEEVING.** Passes U/L FR-1 flammability test. The ultimate in flexibility, yet dielectric protection to 8000 volts. Class H-A-1 certified to meet Government Specification MIL-I-3190/6 (formerly MIL-I-18057A) Class H-B-1 (4000 volts) available, also. Continuous exposure from —70° to 400°F. does not affect coating or Fiberglas braid. Class H-C-1 (2500 volts), Class H-C-2 (1500 volts) and Class H-C-3 also available.

**VARGLAS SILICONE RESIN SLEEVING.** Class H-A-1 is recommended for applications requiring extremes of heat endurance and high dielectric strength (7000 volts). Class H-B-1 is identical except for dielectric guarantee (4000 volts). Good abrasion resistance. Class H-A-1 meets the requirements of MIL-I-3190/5. Four other standard grades available where 7000 volt test not important.

**SILFLEX SLEEVING.** A light coating of Silicone resin on Fiberglas braid. Extremely flexible within a temperature range from minus 85°F. to 500°F.

**VARGLAS SILICONE LEAD WIRE.** Made from solid or stranded wire covered with one or more walls of Fiberglas braid and impregnated with Silicone. Built to your specifications.

**VARGLAS SILICONE TYING CORDS.** Continuous filament Fiberglas cords impregnated with Silicone resin, ¼" to ⅛" diameter. Specify Type 46 for dry cure, Type 48 for tacky cure.

**VARGLAS S1600 SLEEVING.** Newest development in Fiberglas yarn. Will retain "life" at temperatures up to 1600°F. (400 degrees higher than E glass).

**VARGLAS POLYURETHANE CLASS F SLEEVING.** Made with Polyurethane resins on Fiberglas braid. Offers better than Class B heat resistance (up to 155°C continuously). Available in F-A-1, F-B-1 and F-C-1 grades.

**VARGLAS ACRYLIC CLASS F SLEEVING.** Highly resistant to acids, organic solvents, oils and water and exhibits fair resistance to alkalies. It is compatible with polyester, acrylic, epoxy, phenolic and formvar wire enamels. Designed to perform for long periods in the 155°C range without loss of any electrical or physical properties. Available in five grades. Class F-A-1 (7000 volts) meets the requirements of MIL-I-3190/3.

**VARFIL SLEEVING.** Fiberglas braids impregnated with polyester resin. Four grades available in coils as well as 36" lengths in most sizes. In a class by itself because of its toughness, flexibility, high temperature resistance and ability to withstand bending and twisting without dielectric loss. Compatible with varnish. Over 1000 hours at 125°C., with intermittent operation at 150°C.

**VARFLO SLEEVING.** Class B insulation. Good flexibility, solvent, oil and moisture resistance. The A grade passes 90° Navy bend test after 2000 hours at 300°F. with 3500 volt end point. Varflo has good shelf life and will not lose dielectric strength when subjected to severe twisting. Classes B-A-1, B-B-1 and B-C-1 are available. Flame and fungus resistant if specified. B-A-1 approved under MIL-I-3190/2 (formerly MIL-I-21557B).

**VARGLAS VARNISHED SLEEVINGS.** Flexible continuous coatings of flame resistant oleoresinous varnish built up over fine Fiberglas braids in several carefully controlled operations. Operate at temperatures up to 130°C continuously. Available in five grades.

**VARGLAS LECTON SLEEVING.** Specifically designed for hermetic motors. Non-contamination of Freon and other refrigerants in Class B motors. B-A-1, B-B-1, and B-C-1 grades.

**VARGLAS NON-FRAY SLEEVINGS.** Type H: The normalizing treatment given the Fiberglas braid removes the organic impurities and tends to hold the individual filaments together. The lack of any bonding agent means it may be subjected to temperatures as high as 1200°F. Recommended for applications where dielectric requirements are not of prime importance. Resists fungus and is noncorrosive. Type HP: Similar to Type H, but dyed various colors for coding purposes. Ideal as secondary insulation where primary covering might disintegrate due to high temperature or continual flexing. Colors may fade at 300°F. Type HO: A very light treatment of resin added after the braid has been normalized — just enough to hold the sleeving round for accurate cutting. Will distend to cover soldered joints or terminals. Avaliable in eight colors. Colors fade at 300°F., but sleeving unaffected up to 1200°F. Best of the three from a non-fray standpoint.

**VARGLAS LITEWALL SLEEVINGS.** Wall thickness of Type A is .008" and of Type B, .006". These extremely flexible, finer braids are supplied untreated, heat treated and/or dyed. Produced in fractional sizes. Because of the construction, one size can be used to cover several different wire sizes. Specify Type HA or HB if heat treated braids preferred.

**SYNTHOLVAR EXTRUDED TUBING.** Made from vinyl polymers. High dielectric and tensile strength. Will not support combustion nor absorb moisture. Smooth surface, thin wall and flexibility all make for ease in assembling operations. Type SHH recognized by U/L for 105°C applications. Type LT will function at temperatures down to —50°C. Specify fungus resistant tubing where needed. Special formulations for high and low temperature environment. Made to meet applicable Government Specifications MIL-I-631 and MIL-I-7444.

**NYLON UNTREATED SLEEVING.** This product has outstanding abrasion resistance and is the ultimate in flexibility. It is intended for use over insulated wire and cable, not as primary insulation.

**U.L. Recognized Sleevings: File Numbers E-53690, E-63450.**

**FREE**

Write for our folder containing 25 test samples.

Varflex CORPORATION *Makers of Electrical Insulating Tubing and Sleeving*

Varflex products meet or exceed applicable government specifications including: **MIL-I-18057A, MIL-I-3190C, MIL-I-7444B, MIL-I-631D, MIL-I-21557** Many recognized by U/L, our No. E53690.

# ZEUS

# HIGH PERFORMANCE FLUOROPLASTIC EXTRUSIONS

## TUBING • BEADING • SHAPES • UNIQUE WIRE INSULATIONS

A high-quality line of fluoroplastic resins with unique properties that lend themselves to the most exotic applications in the aerospace, electronics, medical, automotive, nuclear, chemical, industrial, and electrical fields. Zeus Tubings and other products are manufactured from the following and other fluoroplastic resins:

**PTFE Teflon* • PTFE Fluon** • PTFE Hostaflon*** • FEP Teflon* • PFA Teflon* • ETFE Tefzel***

*Reg. TM duPont **Reg. TM I.C.I., U.S. ***Reg. TM Hoechst AG

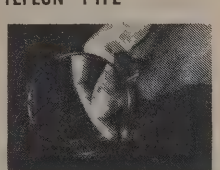
**TEFLON* PTFE TUBING** the ultimate in heat resistance, continuous use at 500°F, chemical stability, and dielectric properties. Commercial and Mil Spec. Inert to all solvents, acids, alkalies and salt. Unique concentricity and close tolerance assured. Three different wall thicknesses. Available in AWG and fractional inch sizes, and industrial grades. U.L. listed. File No. E-64007

**TEFLON* FEP TUBING** Chemically inert, excellent dielectric properties. Continuous use at 400°F. Non-aging, anti-stick. Great tensile strength. U.L. listed. File No. E-64007

**TEFLON* PFA TUBING** Tough, flexible. Continuous use near 500°F. Features clarity, chemical inertness and excellent flex-life. Ideal for chemical flow. Exceptional stress-crack resistance combined with exceptional dielectric properties. For extended service in environments demanding high levels of chemical, electrical, thermal and mechanical performance.

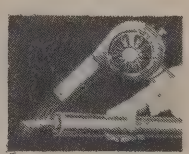
**TEFLON* ETFE TUBING** Mechanically superior, tough material of medium stiffness with excellent flex-life, impact resistance, cut-through resistance and low water absorption. Weather-resistant, and inert to most solvents and chemicals. Excellent resistance to high energy radiation. Low-loss dielectric. Continuous use at temperature ranges around 300°F.

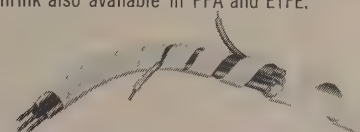
**SUB-LITE WALL TUBING OF TEFLON* PTFE**



Unprecedented miniaturization! Rivals nature's own capillaries. Walls as thin as 0.001" in I.D. dimensions of 0.022" and larger. Also available with an I.D. as small as 0.001" with wall thicknesses of 0.007" or greater. (NOTE: Average dimension of a human hair is 0.003".) Superior lubricity! Impervious to virtually all solvents and chemicals. Operating temperatures from −420°F to +500°F. Zero water absorption. I.D.'s and wall thicknesses absolutely uniform.

**TEFLON* PTFE HEAT-SHRINK TUBING 2 to 1 and 4 to 1** Radial shrink ratios of 2 to 1 (30% to 50% reduction) and 4 to 1 (approx. 75% reduction) available in a wide range of AWG, fractional inch and industrial sizes. Standard wall, thin wall and lightweight wall. Outstanding electrical and mechanical properties. Heat shrink also available in PFA and ETFE.

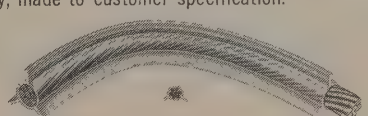




**SPIRAL-CUT CABLE WRAPS OF TEFLON* PTFE, FEP, PFA, & ETFE** Expandable, abrasion-resistant wraps for harnessing and insulating wires, cables, and bundles. Installed over wire bundles they provide openings allowing individual leads to be broken out at any point while also creating a rugged homogeneous harness assembly which can be channeled, bent or flexed.

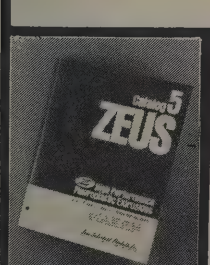
**ROUND BEADING OR MINIATURE ROD.** Available in TEFLON*, PTFE, FEP, PFA ,and ETFE in a range of diameters and tolerances to meet most requirements. PTFE beading is fully cured.

**SHAPES OF TEFLON* PTFE** Unlimited capability and variety, made to customer specification.



**SPLINES OF TEFLON* PTFE** for the coaxial cable manufacturer requiring the ultimate in PTFE/AIR primary dielectric over a primary conductor of coaxial cable or tube. Unsurpassed concentricity and tolerance.

ALSO SPECIALTY WIRES, CABLES, COAXIAL CORES AND ETCHING ON TEFLON* PTFE



**FREE**—24 page catalog with complete details and specs. Includes helpful data on heat-shrink tubing; a summary of properties of extruded fluoroplastic resins; mechanical, electrical, chemical and medical applications; and ordering information.

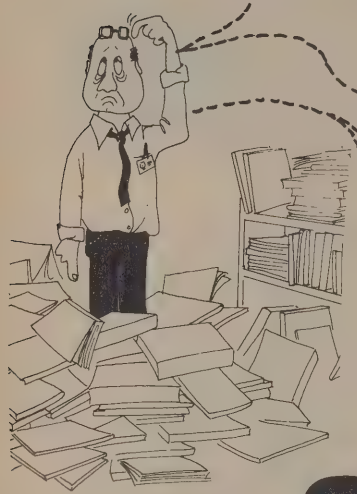
*What can I use to keep all the manufacturers' product data I receive in order?*

*What system makes filing or retrieving manufacturers' catalogs fast and easy?*



*Which file system have thousands of engineers purchased because they know it works?*

# eem FILE SYSTEM

## THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

**Here's how to order your eem FILE SYSTEM:**

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

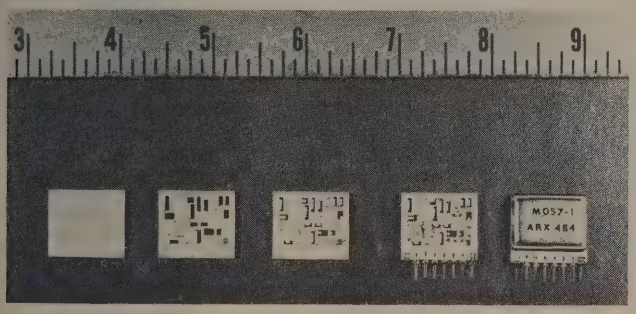
# Hybrid Microcircuits for Airborne and Ground Systems — Military and Industrial

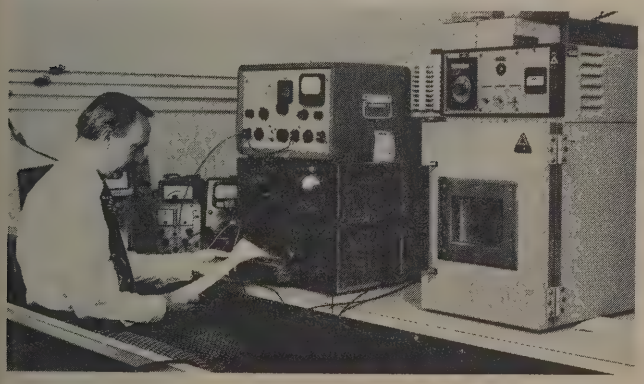
Aeroflex Laboratories Inc. has been a leading designer/producer of high technology products. More recently the company has been expanding its electronic component capability. With the acquisition of Integrated Microsystems Incorporated, Aeroflex added a modern Thick-Film Hybrid Facility on the West Coast. In turn it established a similar capability within the company's Eastern Headquarters' Plant.

Both facilities are now engaged in the design, development and high volume manufacture of custom hybrids for both military and industrial customers. The hybrids are qualified for use on B1, B52, B747, L1011, F15 and F16, plus numerous other ground and airborne systems and mobile communications equipment.



**THICK FILM HYBRIDS** — The Hybrid Integrated Circuit provides a link between traditional printed circuit discrete assemblies and the true monolithic integrated circuit. The hybrid technology provides the flexibility required to combine the advantages of the quick response, printed circuit fabrication technique with the small-size, low-cost and high reliability of the monolithic integrated circuit. To determine the advisability of converting a known discrete circuit to either a monolithic or a hybrid, careful consideration must be given to the technical limitations of the monolithic technology, manufacturing lead time and cost effectiveness.

IMI is fully equipped to provide the technical and manufacturing support required to satisfy your most demanding requirements. With an extensive staff of electronic circuit designers, IMI is fully prepared to translate a customer's black box parameters into a cost effective circuit consistent with small size and minimal weight. We excel in the original design of active filters, sample and hold networks, low noise pre-amps, voltage regulators, drivers and receivers, and interface circuits to meet MIL-STD-1553A.



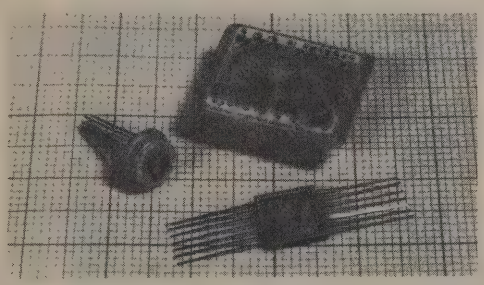
**PROCESS TECHNOLOGY** — Each requirement is carefully considered in arriving at an optimum process. Thick film desposition is extremely flexible and is generally employed. However, thin film discrete components may, on occasion, be utilized in conjunction with thick film resistors and conductors. Gold conductors or various silver alloys are employed depending upon requirements. A variety of resistor inks are utilized to cover the full range of resistor values. Both laser and air brasive trimming systems are utilized.

IMI uses two basic techniques for the attachment of discrete active chips and elements. The most flexible method is commonly referred to as chip and wire bonding. Semiconductor and capacitor chips are usually bonded to alumina substrates using a precision epoxy die bonder. This method puts minimum stress on components resulting in high yields. For applications requiring high power dissipation, this method is supplemented by eutectic die attach, brazing and soldering.

Wire bonding is performed by a semi-automatic tailless ultrasonic ball bonder. A hydrogen torch melts a small ball on the end of a fine gold wire. The ball is placed on a pad with the aid of a spot light locator and ultrasonically attached to a mounting pad. A second bond is made to a substrate pad and the wire is then cut by the capillary. The use of ultrasonic bonding puts minimum stress on the die resulting in maximum yields with no sacrifice in bond strength. Chip and wire bonding is very flexible because of the wide availability of semiconductors in die form.

The second technique used by IMI is referred to as flip-chip die attach. In this method, the die has solder-bumps deposited in place of mounting pads on the active side of the chip. The substrate is solder tinned by either dipping in a solder bath or by a solder paste screening process. The chip is placed face down on the substrate with the solder-bumps in contact with mounting pads. Capacitor chips as well as semiconductors are mounted during the same operation. When all the chips have been mounted on the substrate, the substrate is placed in a belt furnace and reflow soldered. All connections are made in one soldering operation. This technique requires substantially less labor than chip and wire bonding and results in connections that are an order of magnitude stronger than any wire bonding process. In addition yields are significantly higher. This cost effective approach is used mainly in industrial applications.

Packaging capability ranges from epoxy sealed ceramic packages and fluidized bed for industrial applications to welded, hermetically sealed, all metal cases including flat packs, dips, platforms and "TO" cans for military requirements.



**PRODUCT ASSURANCE** — IMI maintains a Product Assurance Department in accordance with the requirements of MIL-Q-9858A. Quality Assurance, Quality Control, Qualification Testing and Equipment Calibration are the responsibility of Product Assurance.

Incoming Inspection is performed on semiconductors in accordance with MIL-STD-883 Method 2010.1 Level B. Similar criteria are applied to hybrid inspection. Screening and qualification testing to MIL-STD-883B, Method 5008 and MIL-M-38510D are also available.

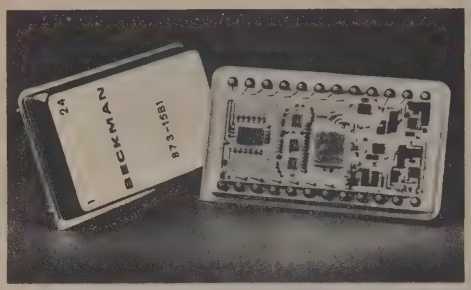
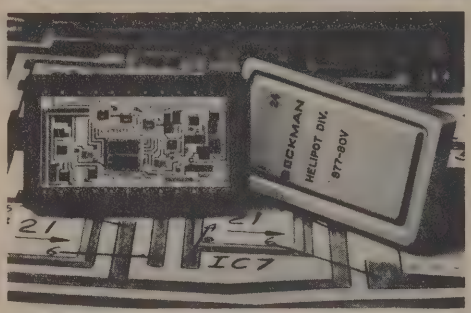
BECKMAN

# A/D and D/A Converters



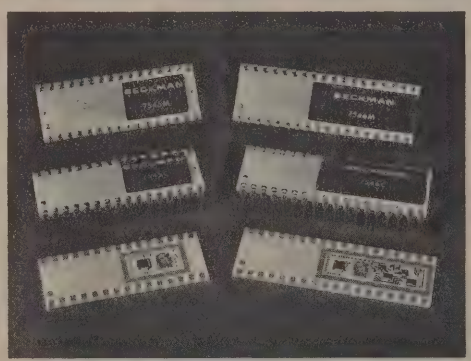
**12-Bit, TTL A/D Converters**
Beckman 12-bit, TTL successive approximation A/D converters are available in three performance and packaging options. Series 873-78 is a low-priced unit packaged in a glass, 24-pin DIP for operation over 0° to +70° C. Series 873-88 is a higher performance unit operating over −25°C to +85°C. Series 873-15 operates over full −55°C to +125°C temp. range and is screened to MIL-STD-883A. Both 873-88 and 873-15 are hermetically sealed in a 24-pin, metal DIP. All are available with full scale voltages of 10 volts unipolar and 5 & 10 volts bipolar. Features include:

- 12-bit resolution
- ±½ LSB in 12 (±½ LSB quantizing error)
- Internal reference



**12-Bit TTL D/A Converters**
Beckman offers a complete range of 12-bit, TTL D/A converters for commercial, industrial and military applications. The economy 877-80 is packaged in a glass, 24-pin DIP and operates over 0° to +70°C. Series 877-85 is a higher performance converter specified over −25°C to +85°C. Series 877-15 operates over full −55°C to +125°C temp. range and is screened to MIL-STD-883. Both 877-85 & 877-15 are hermetically sealed in a 24-pin, metal DIP. All are available in voltage and current output models. Features include:

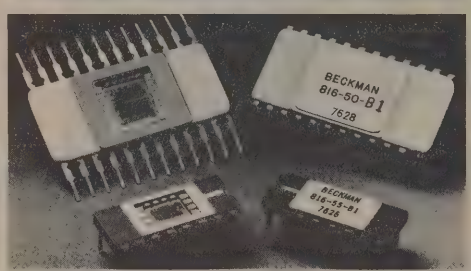
- 12-bit resolution
- ±½ LSB (877-80, 877-85) or ±1 LSB (877-15) in 12 linearity
- 300 nsec conversion settling time (current output models)
- Internal reference



**12-Bit Microprocessor Compatible CMOS D/A Converters**
Beckman Series 7545 and 7546 are 12-bit precision digital-to-analog converters designed specifically for 8-bit microprocessor compatibility. The input registers can accommodate 12-bit words in 4-bit and 8-bit bytes. Series 7546 is a complete internally referenced and output buffered 12-bit converter. Series 7545 is an externally referenced 4-quadrant multiplying converter. The input and control lines of both series can be driven by TTL or CMOS logic.

- ±½ LSB in 12 linearity over specified operating temperature
- Low power dissipation
- Low cost
- Commercial, industrial, military temperature range and performance options

For complete technical information on Beckman's full line of standard A/D and D/A converters contact your local Beckman sales representative.



**Thin Film Ladder Networks**
Series 816-50 and Series 816-55 Thin Film Ladder Networks are low-cost, 12-bit current summing (R-2R-4R-8R) and voltage summing (R-2R) building blocks for unique A/D and D/A converter applications. Both offer 0 to +70°C and −55°C to +125°C temperature range options. Series 816-50 and 816-55 feature:

- 12-bit resolution
- ±½LSB in 12-bit accuracy over full temp. range
- High stability — low noise characteristics

Beckman also stocks a complete line of standard, thick film ladders. Consult your local Beckman sales representative for complete technical information.

**Series 840 Precision Voltage Reference**
Series 840 Precision Voltage Reference provides the user with a self-contained, ready to use hybrid reference functionally laser trimmed to deliver +10Vdc output at ±0.1% max. absolute accuracy with low ±5 ppm/°C temperature coefficient. Series 840-T1 operates over the −55°C to +125°C temperature range; 840-T2 operates over the −25°C to +85°C range. Features include:

- ±0.1% max. output voltage accuracy (840-T1)
- ±5 ppm/°C output voltage TC
- Hermetically sealed, 8-pin to -5 package

For detailed product information, call, TWX, or write Beckman or your nearest Beckman/Helipot sales representative today.

BECKMAN®

# Amplifiers, Regulators and Custom Microcircuits

**Standard Electronic Module (SEM) Program**

Beckman is a fully qualified supplier of Navy Standard Electronic Module Program modules. Cost effective, low profile, hermetic, ceramic hybrid packaging allows high density and high performance electrical functions to be packaged in the standard 1-A SEM configuration. One hybrid on each side allows 40 pin-outs of high density packaging. Precision active filters, digital-to-analog and analog-to-digital converters and other complex functions can cost effectively utilize the functional trimming and density capabilities of hybrid technology. Thin or thick film can be combined with most semiconductor technologies to provide the optimum in integration. Functionally specified standard or specials are available. Consult the factory for complete details.

**Power Amplifiers**

Beckman Series 833-21 are general purpose operational amplifiers capable of providing output currents in excess of 1 ampere at ±12V. Available off-the-shelf in an 8-pin, TO-3 package, Series 833-21 features:

- Wide full power bandwidth (15kHz)
- Low quiescent power (100mW @ ±15V)
- High slew rate (3V/μs)

Beckman stocks a complete line of standard power amplifiers to meet industrial and military application requirements. Consult your local Beckman sales representative for complete technical information.

**DC Voltage Regulators**

Beckman hybrid circuit voltage regulators are available in high performance military or low-cost industrial models, and cover the entire voltage range of requirements for most semiconductor circuitry (from 3 to 120 volts) with either positive or negative outputs. Both preset output and adjustable output models are available with regulation to ±0.005% (line and load). All offer maximum flexibility of performance parameters so that modifications can be made to satisfy individual system requirements. Consult your local Beckman sales representative for complete technical information.

**Custom Hybrid Microcircuits**

Beckman custom microcircuit ability is based upon thick and thin film material technologies with an integrated circuit chip handling capability. With these combinations, Beckman can supply a wide variety of linear and digital circuits including: active filters for telephone tone filter products, DACs and ADCs from commercial to military standards, power linears from amplifiers to voltage regulators, passive substrate to multilayer digital hybrids, dual logarithmic amplifiers, hammer driver circuits, decoder driver circuits, signal conditioning circuits, oscillator circuits, and massive resistors for use as infrared heating sources.

For detailed product information, call, TWX, or write Beckman or your nearest Beckman/Helipot sales representative today.

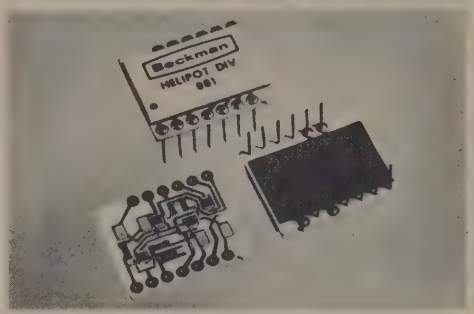
BECKMAN

# Telecommunication/Filter Products



**Model 881 Universal Active Filters**

Model 881 is a two-pole, audio-frequency filter that can be used as a basic building block to generate virtually any complex filter function. Model 881 features:

- Simultaneous high-pass, low-pass, and band-pass outputs
- Inverting, non-inverting or differential operation
- 10kHz maximum operating frequency
- 0.5 to 50 adjustable Q range

**Series 883 Telecommunication Products**

Beckman Series 883 are standard tone-decoding building blocks for high-performance central office, PBX, accounting system or industrial control telecommunication applications.

Series 883 are pretuned to meet Bell System performance requirements, and are available off-the-shelf as individual modules or in preassembled, standard rack-mountable PC cards.

**Model 883-1 Dial-Tone Filter**

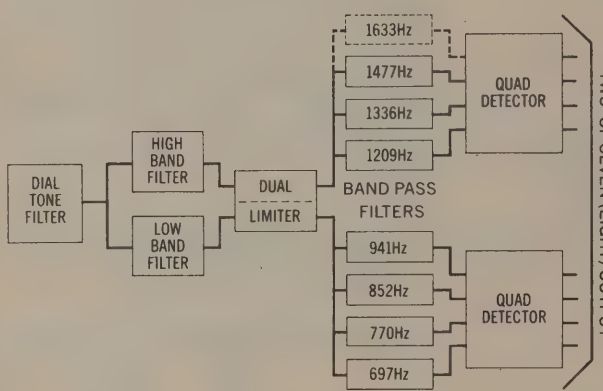
- Modified dual-notch active filter
- 50dB notch attenuation
- ±12V power supply operation

**Model 883-2 Low-Band Filter**

- Modified Cauer low-pass filter
- 941Hz upper cutoff frequency
- >20dB attenuation above 1190Hz

**Model 883-3 High-Band Filter**

- Modified Cauer high-pass filter
- 1209Hz lower cutoff frequency
- >dB attenuation below 995Hz

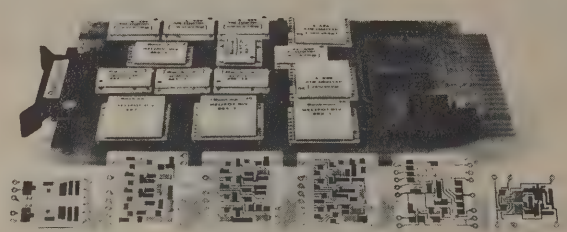


**Model 883-4 Dual Limiter**

- Two-section signal amplitude compression
- ±300mV input threshold
- 11V p-p square wave output

**Model 883-5 Quad Tone Detector**

- Four preset threshold detectors
- Preset time delay/invalid tone rejection
- TTL complementary output logic



**Models 883-6 to 883-16 Band-Pass Filters**

- Eight standard telephone frequency filters: 697, 770, 852, 941, 1209, 1336, 1477 and 1633Hz
- ±0.5% $f_0$ accuracy/high $f_0$ stability
- High input impedance/low output impedance

**Models 883-107 and 883-108 Tone Receiver Cards**

- Complete hybrid set and necessary system components
- Preassembled and test standard PC board
- Standard 22-pin, 0.156" (3,962mm) spacing, edge plug
- 4 X 3 tone matrix with 2 of 7 output (883-107)
- 4 X 4 tone matrix with 2 of 8 output (883-108)

For custom versions of these products or application assistance, call Microcircuit Application Engineering (714) 871-4848, Ext. 3235.

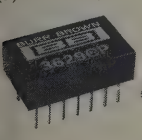
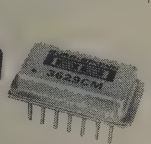
(1) ±15V at ±10mA isolated power available to power external circuitry. (2) Isolation voltage tested at both ±5000Vp pulse test and 2500V, rms, 60Hz; leakage current tested for 2μA max, at 240V, rms, 60Hz. (3) 3650 is a current input device; to reduce input errors, very low input impedance is desirable. (4) At 240V/60Hz. (5) Models 700 or 710 isolated DC/DC converters may be used to provide isolated power. (6) Protected up to ±6000V.





# ANALOG CIRCUIT FUNCTIONS

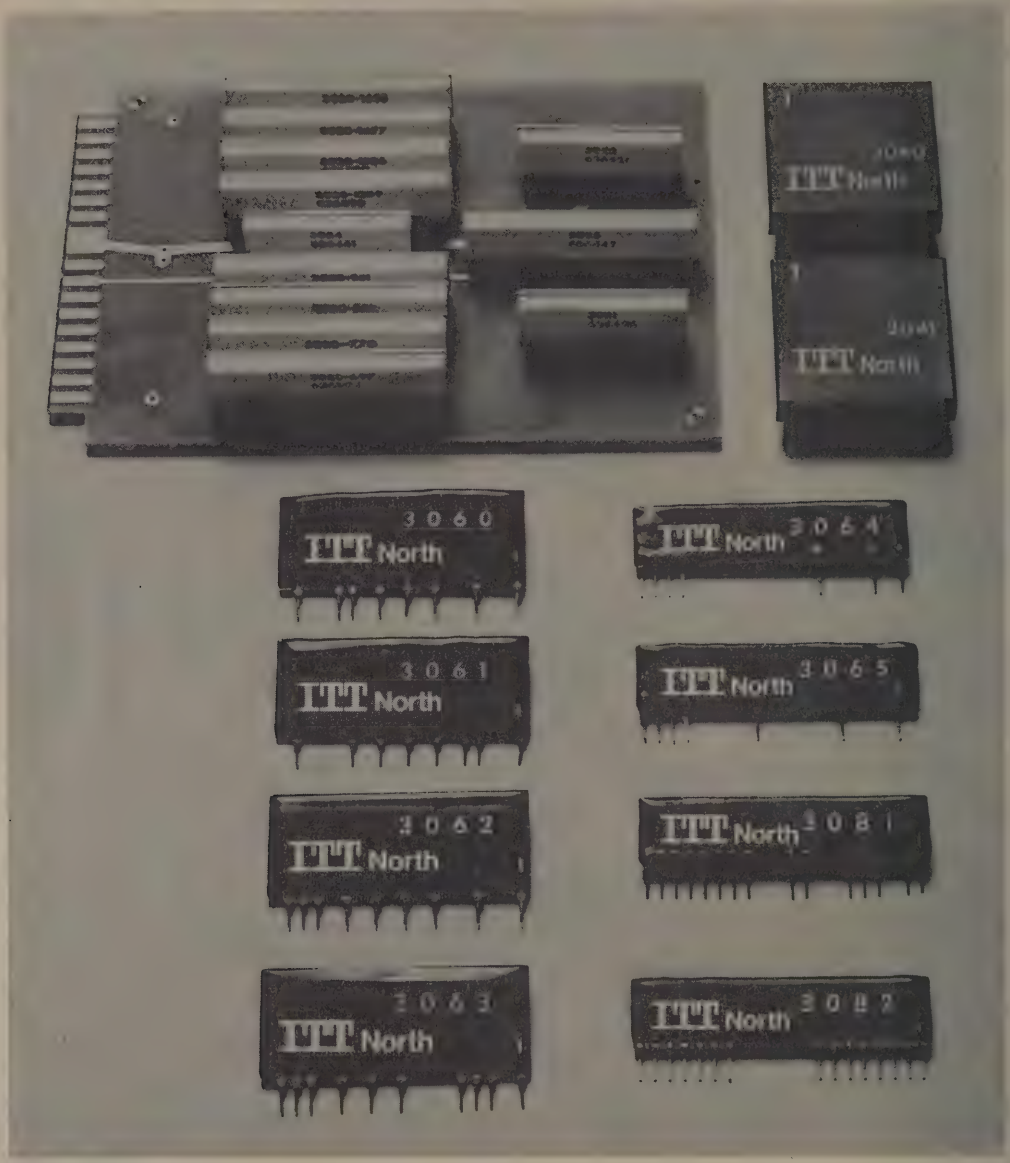
## MULTIPLIER/DIVIDERS

| Model | RANGE OF SPECIFICATIONS: Accuracy at 25°C, max No Trimming Required | RANGE OF SPECIFICATIONS: Specification Temp. Range (°C) | Package | Price (100's) |
|---|---|---|---|---|
| 4203 | 1 - 2% | -55 to +150 | TO-100 | $16.00 - $32.50 |
| 4204 | 0.25 - 0.50% | -55 to +125 | DIP | $38.00 - $65.00 |
| 4205 | 1 - 2% | -55 to +125 | TO-100 | $16.00 - $32.50 |
| 4206 | 0.25% - 0.50% | 0 to +70 | DIP | $24.00 |
| 4213 | 0.50 - 1% | -55 to +125 | TO-100 | $15.50 - $31.00 |
| 4214 | 0.50 - 1% | -55 to +125 | DIP | $14.00 - $30.00 |

## SPECIAL FUNCTIONS

| | Model | Comments | Package | Price (100') |
|---|---|---|---|---|
| Logarithmic Amplifier | 4127 | 0.50 - 1% accuracy; 2 current input signals or 2 voltage input signals | DIP | $36.00 - $33.00 |
| Divider | 4291 | ±0.25 to 1% untrimmed accuracy | DIP | $27.00 - $45.00 |
| Multifunction Converter (Multiply, divide, square root, etc.) | 4301 | Hermetically sealed metal package; compatible with 4302 | DIP | $51.00 |
| | 4302 | $E_o = V_Y (V_Z/V_X)^m$; plastic package. | DIP | $25.00 |
| Peak Detector | 4085 | Read-out of DC voltage equal to peak value of complex wave form | DIP | $36.00/$59.00 |
| RMS-to-DC Converter | 4340 | Laser-trimmed, no external trimming; metal package | DIP | $53.00 |
| | 4341 | Externally trimmed; low cost in plastic package | DIP | $16.50 |
| Oscillators | 4023/25 | Fixed-frequency (10Hz to 20kHz) | Module | $120.00 |
| | 4423 | Very-low cost, RC programmable, 0 to 20kHz | DIP | $9.85 |
| Comparators | 4115/04 | Provides window or dual limit for comparison | Module | $39.00 |
| | 4082/03 | Drives lamps, relays or logic loads | Module | $25.00 |
| Fixed-Frequency Active Filters | ATF76 Series | Pre-tuned, multiple pole bandpass, low-pass, and notch filters | DIP | $37.00 - $114.00 |
| Universal Active Filters | UAF41 UAF31 UAF21 UAF11 | Variable type, 4-resistor, programmable, 2-pole filters; Q and $f_c$ can be programmed; 3 outputs provide low-pass, high-pass and bandpass transfer functions; complex filter response by cascading. | DIP | $8.00 - $39.00 |

# Hybrid Microcircuits? Go North, young man.



ITT North Electric Company, Microsystems Division. That's the name to remember when it comes to specifying:

- PCM filters
- Tone receivers
  - DTMF
  - MFR1
  - No. 5
  - MFR2 (a bandsplit filter for 2-wire operations is available)
- DTMF group filters
- Subscriber line interface circuits
- Custom hybrid circuitry

We have the capability. The experience. The facilities.

We can satisfy your volume requirements for top quality thick-film hybrids.

ITT North specializes in telecommunications applications, but furnishes products to many segments of the electronics industry. Custom circuit inquiries are invited.

Write to us, or call. 700 Hillsboro Plaza, Deerfield Beach, Florida 33441. Phone: (305) 421-8450. TELEX & TWX 510-953-7523.

**ITT North**

Microsystems Division

# HERE ARE 9 COMPELLING REASONS FOR HAVING US PRODUCE A CUSTOM LSI CIRCUIT FOR YOU:

The first reason for using a custom chip at all is the money you'll save. Your production costs will be lower, since you'll only be wiring in one chip instead of many. And you'll save money on quality control, inventory, and in-plant handling.

The second reason is the improved reliability of your finished product.

The third is proprietary protection: a custom circuit is almost impossible to copy, as opposed to a number of standard IC's on a PC board.

And fourth, enhanced marketability: extra functions not included in your original chip concept can be loaded on the chip—usually at no extra cost—enabling the product to do things it could never do before.

The first reason to have your custom chip produced by LSI Computer Systems, Inc., specifically, is that it will receive full-time attention by experts, whatever the size of your order.

The second is that it will be produced on the finest, most advanced processing equipment, and with the MOS technique best suited to your requirements.

Third, each chip will receive 100% functional testing.

Fourth, the "prototypes" you receive for your verification are actually random samples from an actual production run, and not the products of a special engineering prototype line.

And fifth, LSI Computer Systems has been helping companies large and small, in all fields, realize the full benefits of MOS/LSI circuits for over eight years. All of its engineers have been involved with MOS since its infancy.

# AND HERE ARE 9 HOTSHOT STANDARD CIRCUITS FOR YOU TO USE RIGHT NOW:

## COUNTERS

**For DC to 5MHz counting applications.**

LS7030: DC to 5MHz eight decade MOS up counter with 8 decade latch and multiplexer.

Multiplexed BCD and 7 segment outputs. Single power supply +4.75 to +15 VDC (full frequency range over full voltage range). Compatible with CMOS logic. Counter output latches. Leading zero blanking. 40 pin DIP.

**For 5MHz to 500MHz counting applications.**

LS7031: DC to 5MHz six decade MOS up counter with 8 decade latch and multiplexer.

Multiplexed BCD outputs. Access to LSD latches allows attachment of prescalers for counting to 500 MHz. Leading zero blanking. Single power supply operation +4.75 to +15VDC (full frequency range over full voltage range). Compatible with CMOS logic. 40 pin DIP.

**For multi-comparison applications where parallel outputs are required.**

LS7040: Dual 3 decade up/down counter with parallel BCD outputs.

Selectable as 6 decade or dual 3 decade up/down counter. DC to 350KHz count frequency at +5 volts. Fully synchronous operation. Inputs CMOS, TTL, and DTL compatible at +5V operation. Reset. Count enable. Power-on-reset. 40 pin DIP.

## NUMERIC DISPLAY DRIVER

**For liquid crystal or gas discharge displays requiring up to 60V**

LS7100: BCD to 7 segment latch/decoder/driver.

Ion-implanted P Channel MOS circuit compatible with CMOS and TTL systems. Drive voltages up to 60V. 16 pin DIP.

## MULTIPLEXER/ALPHA-NUMERIC DISPLAY DRIVER

**For switching applications and alpha-numeric display applications requiring up to 60V.**

LS7110: Binary addressable latched 8-channel multiplexer/demultiplexer/driver.

Ion-implanted P Channel MOS circuit compatible with CMOS and TTL systems. Drive voltages up to 60V. 16 pin DIP.

## CLOCK CIRCUIT

**For direct drive of large liquid crystal and gas discharge display clocks from 50/60Hz.**

C1200: MOS digital clock circuit.

Directly drives liquid crystal and gas discharge displays (80V P-P across LCD), 50/60Hz AC input. 12 hour clock format (hours and minutes). Independent minute and hour set at 2Hz rate. Flashing 1 second indicator. 28 pin DIP.

## DIVIDERS

**For applications requiring 10 pulses per second from 50/60Hz input.**

RED 5/6: CMOS divider.

Input shaping network. Resettable. Division select input 50/60Hz. Clock enable input. 8 pin* mini-DIP.

**For applications requiring 1 pulse per second from 50/60Hz input.**

RED 50/60: CMOS divider.

Input shaping network. Resettable. Division select input 50/60Hz. Clock enable input. 8 pin* mini-DIP.

**For applications requiring 1 pulse per minute from 50/60Hz input.**

RED 3000/3600: CMOS divider.

Input shaping network. Resettable. Division select input 50/60Hz. Clock enable input. 8 pin* mini-DIP.

* Inputs so arranged that circuit cannot be damaged if plugged in backwards.

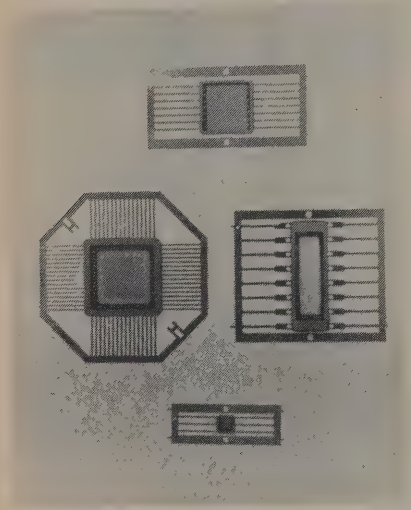
# HERMETIC MICROELECTRONIC FLAT-PAKS

## DESIGN FEATURES

- Designed to meet MIL-STD-883, MIL-STD-750, and MIL-STD-208 requirements.
- Seal Rings lapped flat for best sealing.
- Packages can be ordered with metal or ceramic bases and can be selectively plated.
- .030" lead centers available for greater packaging density.
- Most packages available in extra deep versions.



MINI-SYSTEMS' packages can be custom designed to fit your specific requirements

# HIGH POWER MICROWAVE SIGNAL GENERATION

## CW or PULSE 150-25,000 MHz

**Epsco** offers you off-the-shelf capability encompassing the vast majority of user requirements. Should you need a special design, however, our engineers can provide state-of-the-art expertise that can save you time and money. Call us. We'll be happy to discuss it.

### PEAK POWER CALIBRATION SYSTEM

**(Mil spec. AN/USM-397)**

A secondary standard for calibrating TACAN, DME, DABS, ATC, IFF and other accuracy-demanding systems in the 925 to 1225 MHz frequency range. Power accuracy of ±0.3 dB is directly traceable to the National Bureau of Standards. Peak power of 5kW. Direct readout of pulse power, pulse width, PRF, and operating frequency. Pulse duration from 0.35 to 5 microseconds. Automatic sequencing. Sync output. Accepts internal/external trigger.

### PULSE SIGNAL SOURCES

**Model PH40K**

*The highest pulse power available in a single generator.*

Covering the range from 150 to 6100 MHz, tuneable plug-in oscillator heads provide guaranteed minimum powers as high as 40kW. Magnetron plug-ins further extend the upper limit to 16,500 MHz. Pulses are continuously variable in width from 0.4 to 25$\mu$s and in repetition rate from 10 to 10,000 pps. Available also in pulse modulator configuration (MH250).

**Model PG5KB**

*Wide range, medium power unit.*

With guaranteed minimum powers as high as 5kW, the Model PG5KB covers 150 to 6100 MHz with plug-in heads. Magnetron plug-ins further extend the upper limit to 16,500 MHz. Pulses are continuously variable in width from 0.3 to 50$\mu$s and in repetition rate from 20 to 25,000 pps.

### CW SIGNAL SOURCE

**Model C203**

*The highest CW power available in a single instrument.*

Covering the range from 200 to 6100 MHz with plug-in heads, the Model C203 provides full power modulation at 0.5 duty cycle with internal 1000 Hz square wave generator or from an external pulse source. Power levels of oscillator heads are from 0.5W to 100W.

### CAVITY OSCILLATORS AND AMPLIFIERS

Standard oscillator models for CW or pulse applications in a variety of configurations cover selected frequency bands from 150 to 6100 MHz. Cavity amplifiers from 150 to 3000 MHz, CW and pulse, for applications in TACAN, DME, and similar requirements. These cavities cover the power output range from 0.5W to 40kW.

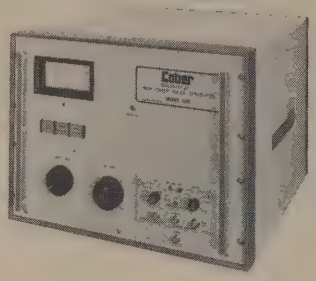
# HIGH POWER-AMPLIFIERS, PULSE GENERATORS, D.C. POWER SUPPLIES, MICROWAVE SYSTEMS

## HIGH POWER PULSE GENERATORS



**Model 606** generates 31KW pulses, 2500 volts at 12.5 amps. Pulse width is 50 nanoseconds to 10 milliseconds, rep rate 1 shot to 1MHz with rise time of 20 nanoseconds. Drives grids of tubes and guns, use it for gas discharge and plasma studies as well as component testing, laser applications and more.

Cober's pulse generators are versatile lab instruments and provide high power kilowatt pulses in nanoseconds. A broad line is available from stock with pulse widths out to D.C., both positive and negative polarities or alternating polarities and outputs floating to 50 KV. Plug-in accessories provide an extensive range of voltage and current combinations.

## LABORATORY MICROWAVE SIGNAL GENERATORS AND AMPLIFIERS

Model 2251 is broadband, TWTA providing 250 watts CW or 1KW pulsed from 1.0-1.5GHz. Pulse width is variable from 0.5-20 microseconds and is used for CW and pulse jamming studies on countermeasures programs.

Cober's high power R.F. signal generators and amplifiers provide microwave frequency energy for use in antenna-pattern studies, EMI susceptibility measurements, and in testing microwave components such as TR limiters, filters and circulators. In ground support equipment stations, Cober units are the basic source of high power microwave test frequencies.

Cober's sources use magnetrons or amplifiers such as klystrons and TWT's working in conjunction with suitable oscillators and drivers. The choice of the final tube is dependent on the required power output, frequency, bandwidth and, of course, the intended application. Units are available from L-Band to millimeter frequencies, for CW or pulse operation and at power levels from several hundred watts to the megawatt region.

## MICROWAVE COMMUNICATIONS TRANSMIT SUBSYSTEMS

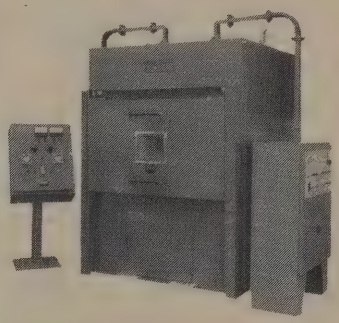
**Model 1400-KK12, 14-14.5GHz,** 1.25KW Klystron PA is uplink HPA for satellite communications. Handles data, voice and TV signals and can be supplied with preset channel tuning and for local or remote operation.

Cober HPA's and transmitters are the heart of satellite and troposcatter communications systems. All circuitry is fully solid state except for the final amplifier tube. Features include complete equipment and personnel safety, flexible controls and status indicators and a full complement of accessories for the greatest possible system versatility. Careful design assures low distortion, spurious and harmonic content.

Cober HPA's and transmitters are available at power levels of several hundred watts to many kilowatts at microwave frequencies. Cober has standard units for the "L," "S" and "C" band tropo frequencies and for the 5.9-6.4GHz, 7.9-8.4GHz and 14.0-14.5GHz satellite communications frequencies.

Frequency upconverters to translate a 70MHz modulated IF to the microwave carrier frequency are also available for integral mounting in HPA's. Model 1400-UP70 converts 70MHz to any selected carrier frequency in the 14.0-14.5GHz range.

## MICROWAVE HEATING SYSTEMS

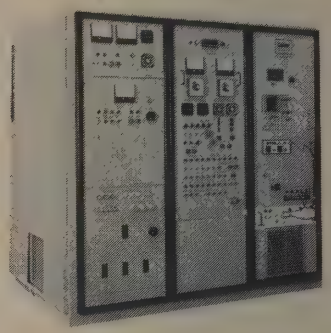


**Model BPH 18A, 6 to 18KW, 2450MHz** industrial microwave oven provides rapid and efficient processing. System includes auxiliary high temperature hot air heating. Cavity size is 4′ x 4′ x 3′ and has remote control, automatic processing cycling and forward and reflected power meters to monitor process and maximize efficiency."

For industrial applications. Full range of power packs from 1 to 50KW at both 2450MHz and 915MHz. Complete systems for laboratories, food, chemical, rubber, foundry and factory applications. Ovens, components, waveguide and instrumentation for users to assemble their own systems and complete applications assistance to adopt microwaves to new processes for efficient, energy conscious, smoke free, high quality electronic processing.

## PULSE MODULATORS AND D.C. POWER SUPPLY SYSTEMS

Cober's line of pulse modulators include units to drive high powered pulsed microwave tubes, high power lasers, plasma tubes, and ultra-violet sources. Power levels range from a few kilowatts to over 100 megawatts. In addition to standard modulators, we specialize in the generation of state of the art nanosecond rise times and high rep rates. Full MIL Spec solid state modulators are supplied for systems use, and soft tube and hard tube units are furnished for laboratories and particle accelerator facilities.



**Model 2048** is 35KV TWT Test Set. Includes highly regulated D.C. power supplies and Cober developed grid modulator. Unique feature is oscilloscope "floating" at 35KV with all controls at ground potential that allows precise display of TWT pulses.

Cober's unique pulse capability is combined with its power supply "know-how" to provide special pulsed systems for fusion research programs. This pulse and D.C. capability has made Cober the leading supplier of high power microwave tube test equipment.

Cober Laboratory and MIL Spec DC supplies operate over 5KW and at voltages between 5KV and 1000KV. Standard electro-mechanical or electronic regulator modules can be incorporated to furnish regulation and ripple to 0.001%. Our Systems Engineering Group designs full MIL Spec units and provides all integration and software to satisfy Government requirements.

The products shown on this page are representative of Cober's very broad line. They have in common a concept of standard packaged modules and designs which make it as easy and as economical for our customers to buy units to their own specifications as it is for them to buy our standard products. If your need is in the area of high power electronics won't you please call us.

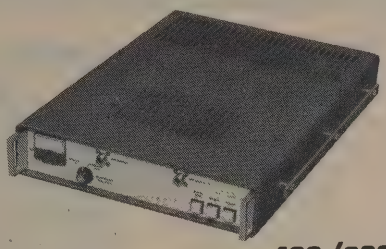
# MICROWAVE AMPLIFIERS AND GENERATORS

## TWT AMPLIFIERS

Four models cover your power requirements: 10, 20, 100 and 200 watts. All provide stable microwave power to meet testing, measurement, and calibration requirements.

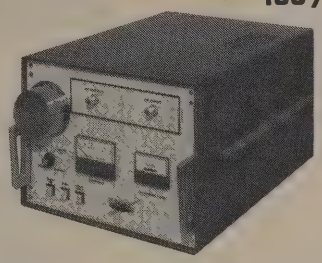
Modular construction and plug-in boards accommodate a wide variety of standard and special traveling wave tubes.

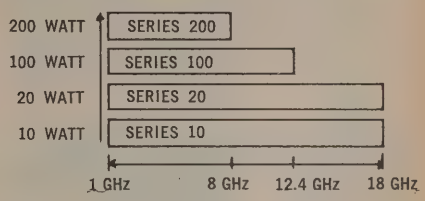
Solid state components and protective circuitry. Beam and helix current metering. Options include VSWR protection, harmonic filtering, and power monitoring.



**10/20 WATT SERIES**

**100/200 WATT SERIES**





## 65 WATT SIGNAL GENERATOR

10 to 2500 MHz with six plug-in heads. Highest stability and reliability for laboratory calibration, testing, and measurement.

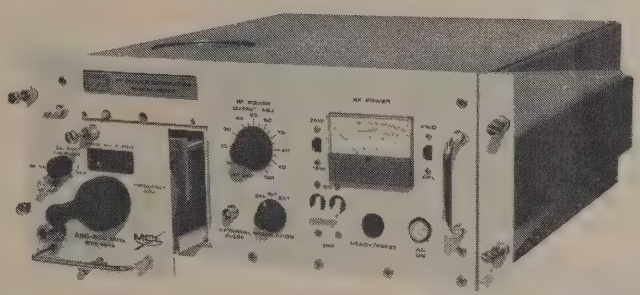
**Frequency Stability:** ±0.003%/10 minutes.

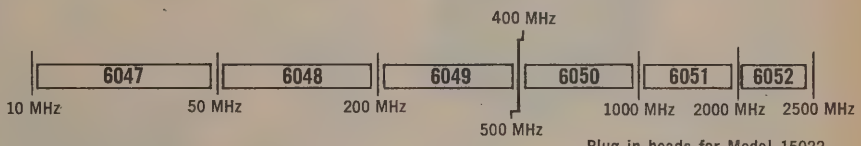
**Power Stability:** ±0.2 db/hour.

Internal and external modulation. Single control tuning to 1% of actual frequency. Front panel power indication.

All solid state components (except osc. tube), regulated power supplies, and conservative design provide laboratory quality in a compact unit.

**MODEL 15122 SIGNAL GENERATOR**



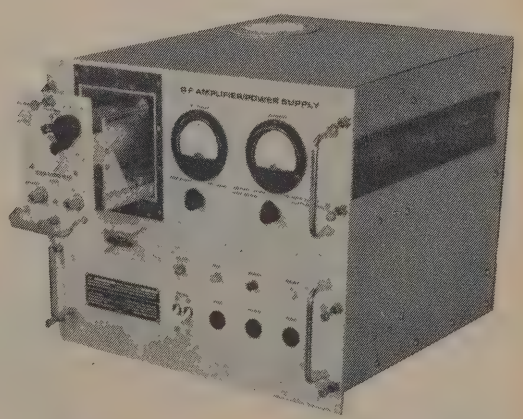


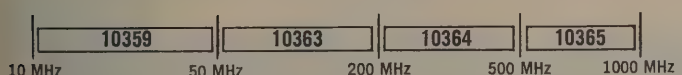
Plug in heads for Model 15022

## 200 WATT CW AMPLIFIER

10 to 1000 MHz with four plug-in heads. The amplifier can be used to drive higher power amplifiers or as a final amplifier driven by a lower power source.

**MODEL 10358**



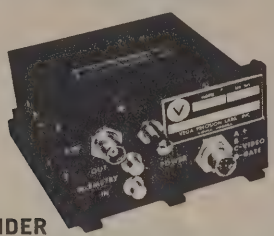


# VEGA PRECISION LABORATORIES, INC.

VEGA MAJOR PRODUCTS: Portable Radar Tracking Systems • Command and Data Systems • Target Control Systems • Radar Transponders • Radar Beacons • Transmitters • Receivers • Location and Navigation Systems • Radar Augmentation Devices • Special Test Equipment • R-NAV Devices • Antennas and Microwave Devices • Ranging Systems

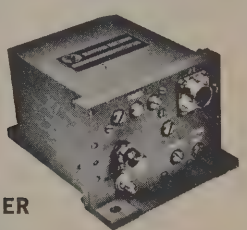
## X BAND RACON TRANSPONDER
**(MODEL 361X)**

This Vega RACON is a navigation aid suitable for positioning offshore drilling equipment, buoy moorings, and defining most sea and landmark locations. **Transmitter:** ±3 MHz, 300 watts minimum, 2 pulse reply. **Receiver:** −65 dbm sensitivity. **Environmental:** Watertight, temp. −40°C to +70°C. **Power:** 24 to 30 VDC (no internal ground). **Size:** Overall height 15 in. Diameter: 8½ in. **Weight:** Approximately 9 lbs.



## C-BAND RADAR TRANSPONDER
**MODEL 302C-2**

**Freq:** 5.4-5.9 GHz; **Receiver Type:** Superhet with sensitivity of −70 dbm; **Transmitter Type:** Magnetron with 400 w min. peak power output; **Input Power:** 22 to 32 VDC; **Size:** 43 cu. in.; **Weight:** 43 oz.; **Temp:** −35°C to +75°C; **Altitude:** 230,000 ft.; **Humidity:** 100%; **Shock:** 125 g in any direction, 3 shocks in opposite directions along each axis for 6 μsec. each; **Acceleration:** 125 g applied along any axis for 3 minutes; **RFI:** Per MIL-1-26600. **Vibration:** Sinusoidal, 5 to 25 Hz 0.4 in. DA and 15 g 15 to 2500 Hz.



## C-BAND RADAR TRANSPONDER
**MODEL 321C**

**Freq:** 5400-5900 MHz; **Receiver Type:** Superhet with sensitivity of −70 dbm, 100% firing; **Transmitter Type:** Triode Cavity with 300 w min. peak power output; **Input Power:** 24 to 32 VDC, 45 w; **Size:** 38 cu. in.; **Weight:** 44 oz.; **Temp:** −37°C to +75°C; **Altitude:** 230,000 ft.; **Acceleration:** 125 g; **Shock:** 125 g; **Vibration:** Sinusoidal, 5 to 25 Hz, 0.4 DA. 25 to 2500 Hz, 15 g **RFI:** Per MIL-1-26600.

## CAVITY BACKED HELIX ANTENNAS
**MODELS 815S, 820C and 830X — C, S, and X BAND**

An optical quartz-loaded, cavity backed helix radiator which produces a circularly polarized radiation pattern. The use of quartz material provides for high and low temperature stability with no degradation in electrical performance. Flush mounting is normally used on reentry vehicles with no performance deterioration as a result of reentry heat.

## X-BAND RADAR TRANSPONDER
**VEGA'S MODEL 229X**

Miniature all solid-state radar transponder is smaller than a king size pack of cigarettes; weighs only 10 oz. This X-Band (9.1-9.6 GHz) unit employs the latest state-of-the-art solid-state devices and construction techniques, and features high sensitivity (−40 dBm full-firing) with average power output of 4 watts peak. It operates with an input voltage from 24 to 32 VDC and draws only 60 milliamperes quiescent or 80 milliamperes at a PRF of 2500 PPS. Uses single or double pulse codes and operates with practically all X-Band airborne, ship and ground radars in use today without any change to the radar. A circularly polarized antenna is attached to the top of the unit. Optional battery pack available. Also available in C-Band (5.4-5.9 GHz).

## C, S AND X-BAND STUB ANTENNAS
**MODELS 832S, 845CX**

A vertically polarized omnidirectional antenna enclosed within a radome, it is compact and extremely lightweight while maintaining the electrical and environmental characteristics of this type antenna. Height of the radome is approximately ¾″; diameter is approximately 1″. The skin of the vehicle serves as the ground plane for the antenna due to the simplified mounting technique. Mounting is accomplished via a "D" hole (.505 dia. x .480 flat) through the vehicle skin. It is then secured to the vehicle with a locking nut.

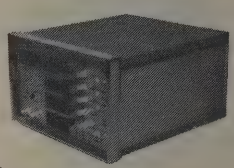
## RADAR SIMULATORS
**C-BAND**
**X-BAND**
**S-BAND**

The 616C, 617X, and 627S Series are designed to interrogate and measure parameters of radar transponders or beacons during final checkout on a launch pad or flight line. They are particularly useful when tracking radars are located at great distances from launch sites. Transmitters and receivers are calibrated and controllable from the front panel in tuned frequency, output power, code spacing and sensitivity. Built-in oscilloscopes are hooded for daylight viewing. A resonant stubhorn antenna is standard. The internal battery supply includes a self-contained charging circuit. Telescoping legs are optional.

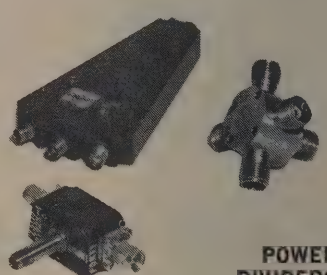
## HORN ANTENNA TYPES

The Model 844X-2 Flared Horn Antenna was developed for use in target drone applications. Radiation coverage is controlled to the desired beamwidths by the flared aperture. A colinear type feed is employed to couple energy from the TNC input connector into the waveguide. Construction utilizes standard aluminum waveguide parts dip-brazed together. The radome is epoxied in position over the aperture. Flared horn antennae of this type are available in other frequency bands utilizing the same design.

## DIGITAL CODE GENERATOR
**MODEL 766**



Generates extremely accurate pulse stream for pulse position code simulation. Pulse stream starts with a sync pulse followed by five data pulses. Each data pulse is independently adjustable for both delay from the sync pulse and for pulse width. Delay adjustable from 0.0 to 999.9 microseconds in 0.1 microsecond steps. Width is continuously adjustable from 0.1 to 1.0 microseconds. Operates from 115 VAC, 50 to 400 Hz. Outputs are TTL positive logic terminated in 50 ohms.



## POWER DIVIDERS

Vega produces an assortment of power dividers with two, three or four-way division in addition to a variable power divider. Choice of connectors (TNC or SMA) is offered in most models. All designs are well engineered and provide low VSWR, low insertion loss, and balanced power division with high power capabilities. Some designs are qualified for missile and satellite use. Frequency ranges extend through X-Band with stripline and coaxial devices.

Vega's antenna and microwave engineering staff specialize in the design and development of aircraft, space and missile components. Among our designs are units intended for RPV control. A single basic system can be used to control virtually any vehicle. Our laboratory utilizes the latest in equipment and suitable antenna test ranges are maintained. Some of the more popular available components are shown above.

# RF Filters, Converters, Switches, Amplifiers, Multipliers, Signal Sources, Multicouplers

*Applied Research*
IS THE SOURCE FOR

## FREQUENCY SOURCES

- VCO Oscillators
- Phase Lock Oscillators
- Frequency Multipliers
- Synthesizers
- Spectrum Generators

Applied Research has a complete line of frequency sources from HF to the microwave region up to and including 16 GHz. These sources incorporate one or more of the above drivers from either a free running stabilized source or crystal controlled reference, and can optionally incorporate modulation capabilities.

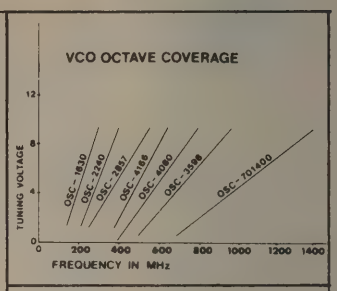
***Power Output Capabilities***

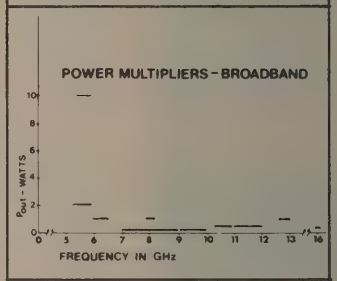
From mW to Watts. Where power amplifiers are not available from 2 to 16 GHz, we can supply 10 watts at 2 GHz to 1 watt at 12 GHz instantaneous broadband. A typical unit at 5.9 to 6.4 GHz will deliver 5 to 10 watts within ±1 dB over the bandpass.

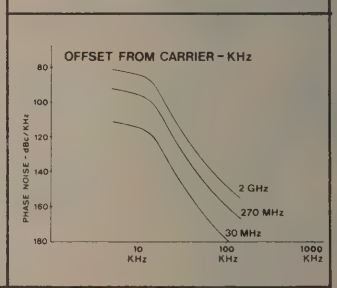
***Spurious Response***

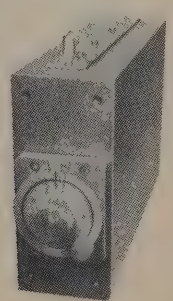
Through the use of bandpass and band reject filters, spurious responses can be held to any degree desired. Standard specifications are 60 dB below carrier level.

So if you have a frequency source requirement, call the source today. Applied Research.









### BAND REJECT FILTER (225 to 400 MHz)

Single knob control band reject filters reject unwanted signals, with extreme selectivity through L-band. Tune ranges of nearly an octave can be obtained. Units are tunable over the range 225 to 400 MHz. The bandwidth is >1 MHz at the 60 dB points. Total notch depth is 60 dB. Use of helical resonators provides for high rejection and low insertion loss in the passband of <1 dB. The phase linearity in the passband is achieved by utilizing quarterwave coaxial lines.

**PERFORMANCE SPECIFICATIONS**

Insertion Loss (out of notch region): 1 dB
Notch Range: 225 to 400 MHz
Typical Notch Specs: Frequency 225.2 MHz; 1 dB bandwidth 11.1 MHz; Depth 68 dB
Impedance (I & O): 50 ohms
VSWR (I & O) (out of notch region): < 1.3:1
Group Delay (out of notch region): < 20 ns

### CONVERTERS

State of the art converters available for military or commercial application throughout the frequency range. All units are constructed to meet mil applications.

**TELEMETRY CONVERTERS**

These units permit the ready adapting of existing UHF telemetry receiving equipment for use in the 1435 to 1540 and 2200 to 2300 MHz telemetry band with high conversion gain.

General characteristics:

| | |
|---|---|
| Long term stability: | better than ±.1 PPM over temperature range |
| Image rejection: | >than 50 dB |
| Noise figure: | better than 5 dB for 100 mc bandwidth (2.2 to 2.3 GHz) |

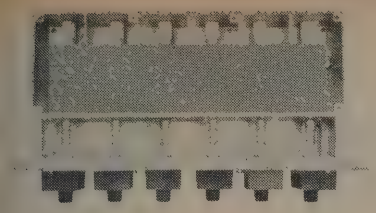
### FIXED PAD ATTENUATORS & TERMINATIONS (DC—2.5 GHz)

**FOR TYPES BNC, TNC C, N & OSM CONNECTORS**

Integrated line of fixed pad attenuators, terminations and impedance-matching transformers provides means for rapid and accurate division of voltages over the frequency range of DC—2.5 GHz, and for the matching of different impedances with minimum loss over a broad frequency band. The unit cost is within the practical price range of the large and small equipment user, as well as the research and experimental user.

General characteristics:

| | |
|---|---|
| Frequency Range: | DC—2.5 GHz |
| VSWR: | 1.25:1 |
| Attenuation Accuracy: | ±0.5 dB |
| Impedances (nominal): | 50, 75, 90 ohms |
| Attenuation values: | 1, 2, 3, 4, 6, 10, 12, 15, 20 dB (standard) |



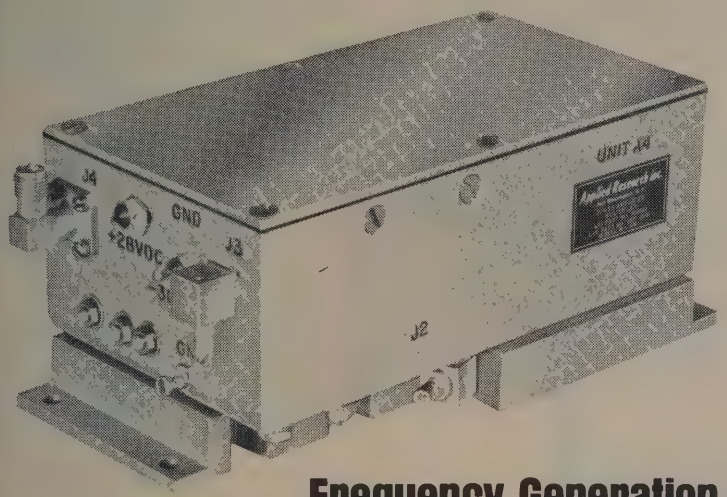
## BAND REJECT FILTER (240 to 365 MHz)

Band reject filters operating from the HF range to K-band exhibit a wide bandpass frequency range without reentrances. Resonant elements are independently tuned or ganged to a single knob control. Operation is over frequency ranges greater than one octave, providing high rejection at one frequency or rejection by greater than 15 to 20 dB to as many as six separate and independent frequencies within the band.

Two or more notches can be aligned to adjacent frequencies to vary the depth and/or bandwidth of the band rejection curve. With all rejection notches tuned to a single frequency, the resultant response is such that an undesired signal approximately one percent away from a desired signal is attenuated by more than 70 to 80 dB while the desired signal is passed with only a 1 dB insertion loss.

**PERFORMANCE SPECIFICATIONS**

Insertion Loss (out of notch region):
<1 dB 100 to 1000 MHz
Bandpass: DC to 1000 MHz
Notch Frequency: 240 to 365 MHz
Typical Rejection below Passband: 240 MHz/23 dB; 325 MHz/19 dB; 365 MHz/17 dB
Impedance (I & O): 5 ohms
VSWR (I & O): < 1.35:1



# Frequency Generation thru Multiplication & Phase-Lock techniques

**VHF to Ku-Band (10 MHz to 1.5 GHz)**

Applied Research offers many proven designs using both techniques. And we're capable of meeting your exact requirements, precisely.

Our Phase-lock loops, comprised of I.C. components, together with RF devices, yield outputs of up to 10 watts at microwave frequencies. And our multipliers are available as passive devices or in combination with amplifiers having multiplication factors of from 2 to 2000. In combination with varactor multiplier devices output in Ku-band can be obtained.

What's more, we can supply crystal oscillators or internal drivers to provide a self-contained source.

**SOME PERFORMANCE SPECIFICATIONS**

**Phase-Lock Signal Source**
Output: 494 MHz @ 10 watts
Stability: .005% from internal crystal oscillator

**Phase-Lock Synthesizer**
Input: 6 MHz & 200 MHz @ 10 dBm each
Output: 218, 224, 230, 236, 242, 248, 254, 260 MHz @ 10 dBm each
Spurious: 60 dBc min.

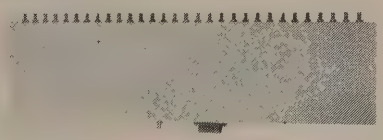
**Ku-Band Multiplier**
Input: 45.5 to 46.1 MHz @ 1 dBw; (other inputs available)
Output: 15.3 to 15.5 GHz @ 100 milliwatts
Spurious: 60 dBc min.

**C-Band Multiplier**
Input: 50.3 to 51.5 MHz @ 1 milliwatt; (other inputs available)
Output: 5030 to 5150 MHz @ 200 milliwatts
Spurious: 60 dBc min.

## TUNABLE BAND REJECT FILTERS (5-2000 MHz)

Tunable multicontrol band reject filters provide high rejection of more than one and up to eight unwanted signals, or, extreme rejection of one. Low insertion loss and sharp skirt selectivity in the band reject region. Eight knobs and counter readout allow continuous tuning.

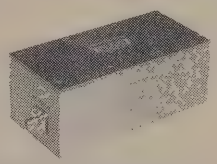
General Characteristics:
- Center Frequency: 5-2000 MHz
- Out-of-Band Insertion Loss: 0.5 dB
- Notch Bandwidth: narrow as ¼% fo
- Notch Depth: 20 dB/section
- VSWR (outside of notch region): 1.5:1
- Size: 24" x 2" x 8"
- Connectors: BNC



## SWITCHES (10-1000 MHz)

A series of computer compatible solid state switches using PIN diodes in a broadband stripline matching structure. Can be directly addressed without interfacing. Units available with equal path lengths to all outputs, providing good phase coherence with phase and amplitude tracking on all ports. Switch matrix configurations are also available.

General Characteristics:
- Frequency Band: 10-1000 MHz
- Switch Configuration: 1x2 to 1x30
- Isolation: 70 dB min. (higher available)
- Insertion Loss: 1.0 dB max.
- VSWR: 1.2:1
- Operation Time: 1.0 μsec.
- Primary Power: ±4.5V, 50ma per crosspoint
- Sizes: 2" to 16"L x 4"W x ½"H



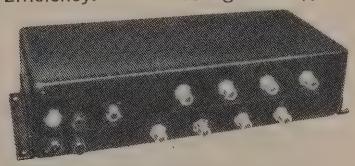
## BROADBAND MULTIPLIERS (5-18,000 MHz)

These units utilize solid state devices.

Using the frequency multiplier as the basic tool, lines of Signal Sources, Frequency Synthesizers and Multiplier Chains are now available.

General characteristics:

| | |
|---|---|
| Frequency Range: | 5-18,000 MHz |
| Bandwidths: | up to 27% |
| Power Output: | up to 5 watts |
| Efficiency: | as high as 50% |



## MULTICOUPLERS

Model HFM Series is designed to meet the needs of most systems.

General features:
- High isolation between outputs
- High dynamic range
- Low noise
- Modular construction
- Solid-state
- Octave bandwidth (if desired)

Model PM Series of passive multicouplers provides the ultimate performance in signal distribution.

ACCEPTANCE

The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to—and from—Western Europe.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 product headings & cross-references alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

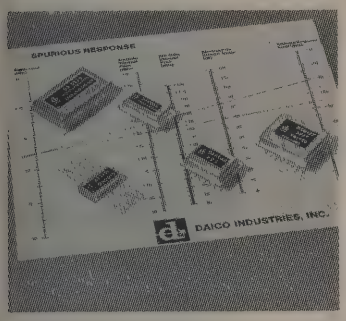
## IF / RF SWITCHES

### Programmable Attenuators and Phase Shifters

Send for our Switch and Microwave Component Catalog.



### THIN-FILM HYBRID INTEGRATED CIRCUITS

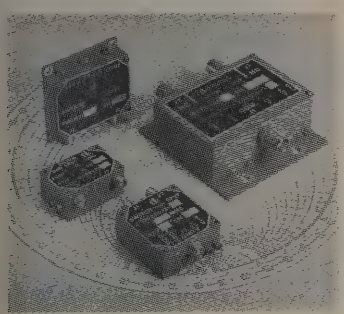
Thin film hybrid packaging techniques have allowed miniaturization of the Daico Industries product line. Switches include drivers compatible with TTL or CMOS logic. Step attenuators are packaged in multi-section units. These wideband devices are available in frequency ranges from 10-50 MHz, 50-500 MHz and 100-800 MHz. They are custom designed and built to your specifications. We can provide prototypes in any of our stock packages. Contact us with your particular requirements.

**SWITCHES**
- HIGH SPEED, LOW TRANSIENT
  $T_{ON}$ = 30 ns; Trans. = 20mV (Typ)
- LOW CURRENT 10-500 MHz; +20dBm; 1-10$\mu$s
- STD: 10-300 MHz; +10dBm; 1.0$\mu$s

**STEP ATTENUATORS**
- Ranges (dB): 0.25-0.50; 0.75-1.5; 1-32; 2-4; 3-6; 8-16; 10-12 & 12-24

**STEP-PHASE SHIFTERS**
- Dual $\pi$ Section Switches

**VC ANALOG ATTENUATORS (0-5V DC Control)**
- Ranges (dB): 15; 20 & 40 • VSWR: 1.15/1



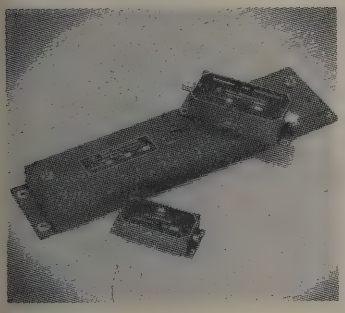
### SOLID-STATE MULTIPOLE SWITCHES

**High Speed, Low Transient Types.** Balanced design allows operation at speeds of 3-5ns RF transition, with transients as low as 15mV over the 1-300 MHz range. Applications include RF blanking, pulse modulation and high speed sampling. **Low Current Types** operate from less than 10mA DC. Internal CMOS circuitry compatible with open collector TTL or CMOS control. **Standard Types.** Operating directly from TTL, these units present a single Schottky low power load to the control line. They provide switching in the 20-700 MHz range, and utilize a single 5V/30mA supply per switch section.

**HIGH SPEED, LOW TRANSIENT TYPES**
- High Isolation: Greater than 60dB
- Insertion Loss: Under 1.0dB
- RF Transition Speed: 3-5ns
- Low Transients: 15mV
- Freq. Range: 1-300 MHz

**LOW CURRENT TYPES**
- Isolation: 85dB • Speed: 5.0$\mu$s
- Insertion Loss: 1.0dB
- Freq. Range: 20-700 MHz
- 3rd Order Intercept Point: +40dBm
- RF Power: +20dBm

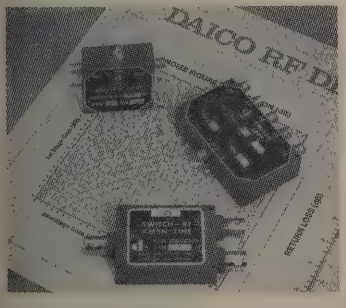
**STANDARD TYPES**
- Isolation: 85dB • Speed: 200ns
- Insertion Loss: 1.0dB
- 3rd Order Intercept Point: +35dBm
- RF Power: +15dBm



### PROGRAMMABLE ATTENUATORS AND PHASE SHIFTERS

Programmable Attenuators and Phase Shifters are comprised of a series of combining elements with either RF relays or solid-state switches to perform an additive function of attenuation or delay. The units either switch pads or closely controlled coaxial line lengths in and out of the series path. Simplicity of design allows the user to specify the desired attenuation sections or delay sections in a standard package alleviating the need for costly non-recurring engineering. Attenuators are available with constant phase-shift over the full attenuation range.

- FREQUENCY RANGES:
  20 to 800 MHz
- MAXIMUM ATTENUATION RANGES:
  127dB through 100 MHz;
  or 63dB through 500 MHz
- SWITCHING SPEEDS:
  High Speed—30 ns
  Standard—1.0$\mu$s
  Relay—2.0ms



### RF RELAYS (DC-500 MHz/50W CW)

Daico Industries RF relays employ hermetically sealed switching elements which provide extreme resistance to the severe environments encountered in military aircraft and communications systems, including 20 g's vibration to 3 KHz, 80 g's shock and altitude in excess of 100,000 ft. A continual test and evaluation program assures switch performance in excess of 20 million operations. These units are operable at extremely low current levels and may be ordered with 6-, 12-, 18- or 24-Volt coils (17mA at 28VDC).

- Available in SPST thru SP24T and TRANSFER Types
- Switching Speed: 5.0ms
- RF Power: 50W CW—500W Pk.
- SMA Connect. Std. (others optional)
- Std. Isolation: 70dB at 100 MHz
- High Isolation: 100dB at 250MHz

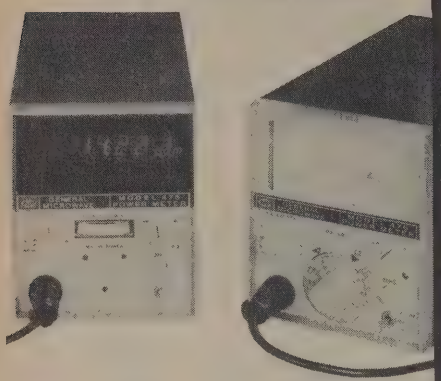
Note: Values are typical

Other products currently being supplied by Daico Industries include high power switches through 1 KW CW, and large IF M x N switch matrices employing both solid-state and RF relay switching elements. All Daico hybrid devices are constructed in accordance with MIL-M-38510 and MIL-STD-883. Full screening is available to Level B.

**DAICO INDUSTRIES, INC.** 2351 E. DEL AMO, COMPTON, CA 90224 • (213) 631-1143 • TWX: 910-346-6741

# Instrumentation from GENERAL MICROWAVE

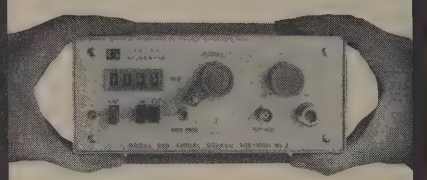
## Power Meters 0.01-40 GHz



**Model 475:** Digital Readout
- Direct reading from: −39.99 to +20.00 dBm in one range
- Accuracy as high as 0.05 dB
- Resolution: 0.01 dB
- Noise and Drift: less than 0.01 W p-p
- Automatic zero set
- Built-in self calibrator

**Model 476:** Analog Readout
- 30 nanowatts to 100 mW power range
- ±1% of full scale accuracy
- less than 1.5% noise and drift on lowest range
- Automatic zero set
- Built-in self calibrator

## Signal Sources

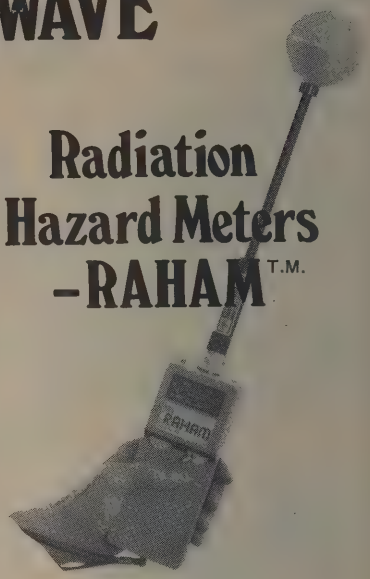


- **EASY TO USE** (Pushbutton Controls)
- **SMALL SIZE** (3⅞" high x 8" wide x 11½" deep)
- **LIGHTWEIGHT** (8 lbs.)
- **0.4 to 18 GHz**

Six solid state models in the Series 520 are smaller, lighter, consume less power and are generally more economical than their vacuum tube counterparts.

| Model No. | Frequency Range, GHz |
|---|---|
| 520 | 0.4 to 1.2 |
| 521 | 0.85 to 2.15 |
| 522 | 2.0 to 4.0 |
| 523 | 4.0 to 8.0 |
| 524 | 8.0 to 12.5 |
| 525 | 12.0 to 18.0 |

## Radiation Hazard Meters –RAHAM T.M.



General Microwave RAHAM Hazard Meters detect and measure potentially hazardous electromagnetic energy radiating or leaking from rf and microwave sources, e.g. microwave ovens, medical equipment, radar installations, microwave heaters and dryers, mobile communication systems, electronic warfare systems.

- Three 10 dB power ranges with full scale readings of 2, 20 & 200 mW/cm².
- Easy one hand operation
- 1000 hour battery life
- Low Cost

| Model | Polarization | Frequency Range, GHz |
|---|---|---|
| 1 | Bi-directional | 0.3-18 |
| 2 | Bi-directional | 0.01-3 |
| 3 | Isotropic | 0.3-18 |
| 12 | Bi-directional | 0.01-18 (2 probes) |

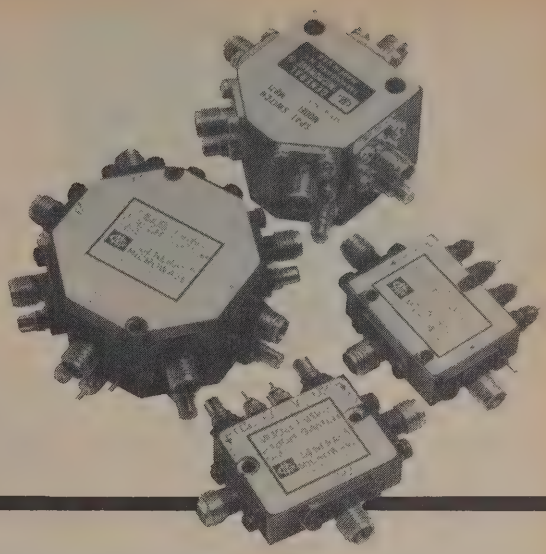
# GENERAL MICROWAVE

GENERAL MICROWAVE CORPORATION 155 Marine Street, Farmingdale, L.I., New York 11735, Tel: 516-694-3600

# PIN Diode Switches



General Microwave's complete line of high performance broadband switches, with and without integral drivers, are available in three basic series.

- **Ultra Broadband Series:** 0.2 to 18 GHz, SPST to SP5T
- **Multi Octave Band — Miniature Series:** 0.2 to 4 GHz (Series 92) 2-18 GHz (Series 91); SPST to SP7T
- **Octave Band — High Speed Series:** 10 nsec switching speed, 2-18 GHz; SP2T

Many models of each type are available to satisfy most requirements. Terminated switches, space qualified units and other special designs are also available.

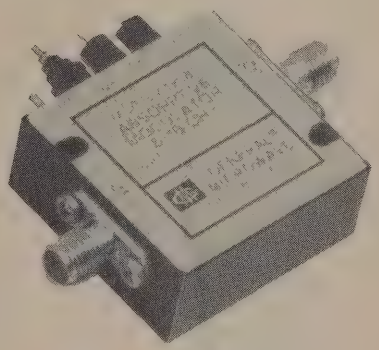
# PIN Diode Modulators/Attenuators

- Integral Drivers
- 0.5 to 18 GHz
- Low VSWR
- Exceptional Linearity
- 60 dB attenuation range
- Low Insertion Loss

The Series D195 family of fast, linear, absorptive modulators with integral drivers are current controlled PIN Diode attenators which provide high performance at low cost. Their characteristics make them ideally suited for a wide range of applications including level setting, amplitude modulation, pulse modulation, and high speed switching.

**0.5 to 18 GHz Frequency Range is provided by eight (8) Models:**

| | |
|---|---|
| D1950 | 0.5-1 GHz |
| D1951 | 1-2 GHz |
| D1952 | 2-4 GHz |
| D1953 | 3-6 GHz |
| D1954 | 4-8 GHz |
| D1955 | 5-10 GHz |
| D1956 | 6-12 GHz |
| D1958 | 8-18 GHz |



Most models are capable of extended bandwidth operation. Typically 3:1, with only moderate degradation in performance at the band edges.

# Digitally Programmable PIN Diode Attenuators

This latest development from General Microwave is Series 329 digitally programmable PIN Diode Attenuators.

- Frequency Range: 0.5-18 GHz
- Attenuation Range: Up to 120 dB
- Attenuation Interval: As low as 0.1 dB
- Accuracy: ± (0.35 + 0.01 dB/dB)
- Fast Switching Speed
- Low VSWR and Insertion Loss
- Exceptional Flatness
- Small Size, Low Power Consumption
- Binary or BCD Programming

**For complete information call or write.**

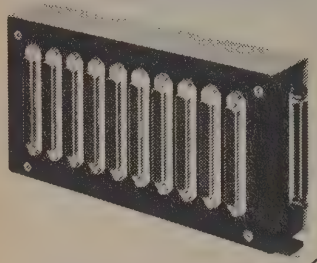
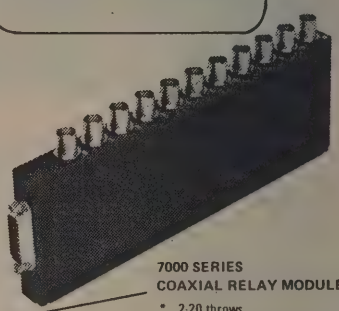
## COAXIAL SWITCHING SYSTEMS

### PROGRAMMABLE – COAXIAL RELAY MATRIX

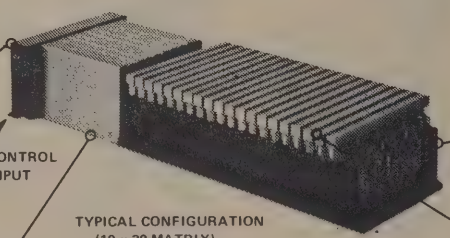


MODULAR ASSEMBLY



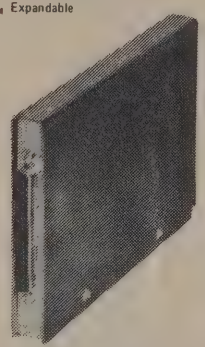
MODEL 6310 DECODE MODULE
- Computer controllable
- 16 bit parallel or ASCII input
- TTL/DTL compatible
- Decodes 200 switchpoints
- Expandable

CONTROL INPUT



TYPICAL CONFIGURATION (10 x 20 MATRIX)

7000 SERIES COAXIAL RELAY MODULE
- 2-20 throws
- 106 dB isolation @ 100 MHz
- 100 watt switching
- DC-300 MHz
- Switched shield
- Self terminating
- 50 or 75 ohm
- Machined housing
- 28 V control

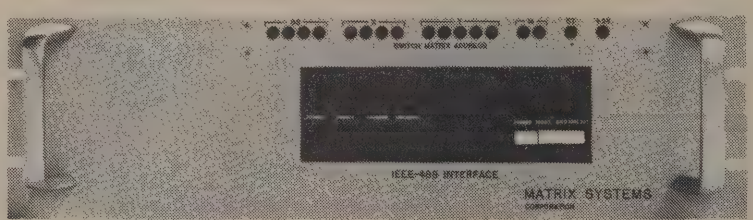


6100 SERIES LOGIC MODULE
- Controls 2-20 switchpoints
- TTL/DTL compatible
- X - Y addressable
- 28 VDC control output
- Latching
- J - K flipflops
- Hex gate drivers

PUSH-ON CROSS STRAP
9100 SERIES
9200 SERIES
9300 SERIES

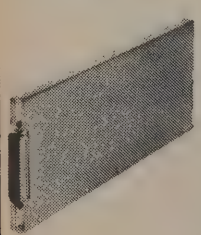
CROSS STRAPS INTERCONNECT COAXIAL RELAYS TO FORM CROSSBAR CONFIGURATION.

### IEEE-488 INTERFACE CHASSIS



**TEXT**
- Interfaces Matrix Switching Systems with IEEE-488 standard interface bus
- Decimal X-Y address format
- Binary address display
- Interfaces programmable calculators
- Operated from 115v AC 60 Hz
- Standard 5¼" × 19" × 18" deep chassis

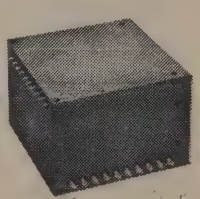
### TWO WIRE AUDIO RELAY MODULE



**FEATURES:**
- Programmable
- Two pole-twenty throw
- Contains four independent two pole, five throw relays
- Dry reed or mercury wetted contacts available
- Independent control
- Compatible with 6100 series latching and drive module
- May be connected in a 2 x 10 or 4 x 5 matrix configuration
- Reed switches easily accessible
- 28 V control

**MODEL 6157**

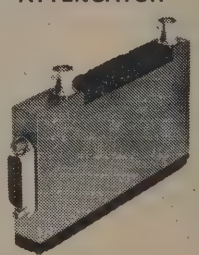
### 10 x 10 VIDEO RELAY MATRIX



**FEATURES:**
- Any of ten inputs may be connected to any of ten outputs
- Computer programmable
- Random addressable
- Low VSWR
- Signal circuits isolated from control circuitry
- Switchpoints individually field replaceable
- Stripline construction
- SMA connectors
- 28 V control

**MODEL 6160**

### PROGRAMMABLE COAXIAL ATTENUATOR



**FEATURES:**
- 0 - 63 dB Range
- One dB steps - .5 dB optional
- Pure six bit binary control
- Low VSWR
- Continuous shield continuity
- Signal circuits isolated from control circuitry
- Attenuator elements field replaceable
- Compatible with 6100 series latching logic
- 28 V control

**MODEL 6152**

Matrix Systems Corporation manufactures a variety of Switching Devices. Whether you are Switching VHF, Video, Pulse or Audio or your control requirements are programmable or manual. Give us a call. We specialize in specials. (213) 882-2008

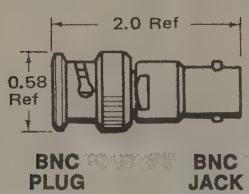
# midisco coaxial attenuators

MIDISCO offers the broadest line of coaxial attenuators, all of which can usually be found in stock. BNC, TNC, N, SMA types are available in 1 dB steps thru 20 dB. The SMA and N Series offer tight specifications from DC to 12.4 or 18.0 GHz and standard specs for DC to 2.5 GHz and 12.4 GHz. All handle 2 watts average input power at 25°C and derate linearly to zero at 150°C. (3 dB units are rated 75% higher; 6 dB units are 25% higher average power). Peak power is 200 watts. Distortion, tested thru L Band, is less than 0.5° relative to a unit with zero dB attenuation. Operating temperature is −55°C to +125°C; temperature stability: $10^{-4}$ dB/dB/°C. Calibration charts are available on some units at a nominal charge. All SMA attenuators are stainless steel, gold-plated and connectors are in accordance with MIL-C-39012.

**All attenuation values in 1 dB steps thru 20 dB are in stock.**

## type bnc/dc to 8.0 GHz — MDC1051



| PART NO. | ATTENUATION VALUE† |
|---|---|
| MDC1051-3 | 3 dB ±0.5 |
| MDC1051-6 | 6 dB ±0.5 |
| MDC1051-10 | 10 dB ±0.7 |
| MDC1051-14 | 14 dB ±0.8 |
| MDC1051-20 | 20 dB ±1.0 |

| | |
|---|---|
| Operating Temp. Range: | −55°C to +125°C |
| Total Input Power: | 2 watts average, 0.5kW peak |
| Impedance: | 50 ohms |
| Material: | Brass |
| Finish: | Bright alloy |
| Weight: | 1.4 ounces (40 grams) |
| VSWR: | 1.10 to 1 GHz, 1.25 to 4 GHz usable to 8 GHz |

†Other attenuation values are in stock or available.

**PRICE 1 TO 9 $29.00**

## type tnc/dc to 12.4 GHz — MDC1084/1088

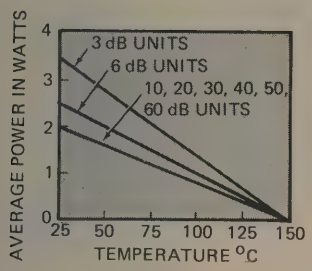
# midisco coaxial attenuators

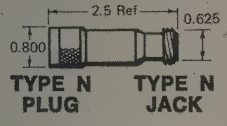
## type n



MIDISCO offers three series of Type N Coaxial Pads for in-line attenuation or isolation from 1 to 60 dB. The three series are all broadband, DC to 12.4 GHz or DC to 18.0 GHz or a slightly reduced spec version for DC to 12.4 GHz, and feature excellent phase response over the entire range. Peak power is 0.5 kW and average power is 2 watts at 25°C, derating linearly to 0 at 150°C; 75% higher for 3 dB units, 25% higher for 6 dB units. Distortion, tested through L-band, was less than 0.5° relative to a unit with zero dB attenuation. Operational temperature from −55°C to +125°C; temperature stability: $10^{-4}$ dB/dB/°C. Calibration chart is available. Material: Brass with bright alloy finish.

OTHER ATTENUATION VALUES ARE IN STOCK.

## type n/dc to 18.0 GHz — MDC1078A

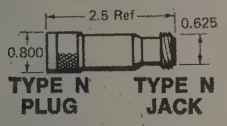


| PART NO. | ATTENUATION | VSWR |
|---|---|---|
| MDC1078A-3 | 3 ±0.3 dB | |
| MDC1078A-6 | 6 ±0.3 dB | |
| MDC1078A-10 | 10 ±0.5 dB | |
| MDC1078A-20 | 20 ±0.6 dB | DC-4 GHz: 1.20 |
| MDC1078A-30 | 30 ±0.9 dB | 4-12.4 GHz: 1.35 |
| MDC1078A-40 | 40 ±1.2 dB | 12.4-18 GHz: 1.50 |
| MDC1078A-50 | 50 ±1.5 dB | |
| MDC1078A-60 | 60 ±1.8 dB | |

**CLOSE ACCURACY**

**PRICE 1 TO 9**
**$69.00 (3, 6, 10, 20 dB)**
**$79.00 all other values**

## type n/dc to 12.4 GHz — MDC1078B

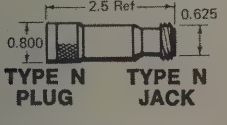


| PART NO. | ATTENUATION | VSWR |
|---|---|---|
| MDC1078B-3 | 3 ±0.3 dB | |
| MDC1078B-6 | 6 ±0.3 dB | |
| MDC1078B-10 | 10 ±0.5 dB | |
| MDC1078B-20 | 20 ±0.6 dB | DC-4 GHz: 1.20 |
| MDC1078B-30 | 30 ±0.9 dB | 4-12.4 GHz: 1.35 |
| MDC1078B-40 | 40 ±1.2 dB | |
| MDC1078B-50 | 50 ±1.5 dB | |
| MDC1078B-60 | 60 ±1.8 dB | |

**CLOSE ACCURACY**

**PRICE 1 TO 9**
**$59.00 (3, 6, 10, 20 dB)**
**$69.00 all other values**

## type n/dc to 12.4 GHz — MDC1078C



| PART NO. | ATTENUATION | VSWR |
|---|---|---|
| MDC1078C-3 | 3 ±0.5 dB | |
| MDC1078C-6 | 6 ±0.5 dB | |
| MDC1078C-10 | 10 ±0.7 dB | |
| MDC1078C-20 | 20 ±1.0 dB | DC-4GHz: 1.25 |
| MDC1078C-30 | 30 ±1.5 dB | 4-12.4 GHz: 1.40 |
| MDC1078C-40 | 40 ±2.0 dB | |
| MDC1078C-50 | 50 ±2.5 dB | |
| MDC1078C-60 | 60 ±3.0 dB | |

**STANDARD ACCURACY**

**PRICE 1 TO 9**
**$39.00 (3, 6, 10, 20 dB)**
**$49.00 all other values**

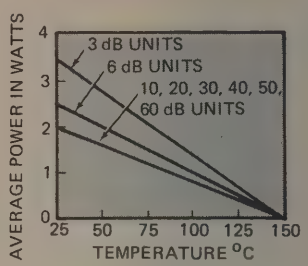
# midisco coaxial attenuators

## type sma attenuators

MIDISCO offers SMA Coaxial Pads for in-line attenuation or isolation in four series: Tight specifications from dc to 12.4 or 18.0 GHz and standard specifications for dc to 2.5 GHz and dc to 12.4 GHz. All handle 2W average input power at 25°C and de-rate linearly to zero at 150°C. (3 dB units are rated 75% higher; 6 db units are 25% higher average power.) Peak power is 200 watts. Distortion, tested through L-band, was less than 0.5 degrees relative to a unit with zero dB attenuation. Operating temperature is −55 to +125°C; temperature stability: $10^{-4}$ dB/dB/°C. Weight: ¼ ounce. Calibration chart is available. Material: All units - gold-plated stainless steel. OTHER ATTENUATION VALUES ARE IN STOCK.



## type sma/dc to 12.4 GHz — MDC1030

**STANDARD ACCURACY**
Operating Temp. Range: −55°C to +125°C
Total Input Power: 2 watts average, 0.5kW peak
Impedance: 50 ohms
**PRICE 1 TO 9**
**$39.00 (3, 6, 10, 20 dB)**
**$49.00 all other values**

| PART NO. | ATTENUATION | VSWR (ALL UNITS) |
|---|---|---|
| MDC1030-3 | 3 ±0.6 dB | DC-4 GHz: 1.20<br>4-8 GHz: 1.30<br>8-12.4 GHz: 1.40 |
| MDC1030-6 | 6 ±0.6 dB | |
| MDC1030-10 | 10 ±1.0 dB | |

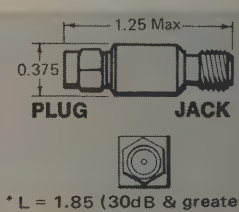
## type sma/dc to 12.4 GHz — MDC1055

**CLOSE ACCURACY**
Operating Temp. Range: −55°C to +125°C
Total Input Power: 2 watts average, 0.5kW peak
Impedance: 50 ohms
**PRICE 1 TO 9**
**$49.00 (3, 6, 10, 20 dB)**
**$59.00 all other values**

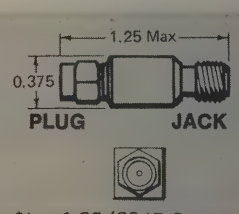
| PART NO. | ATTENUATION | VSWR (ALL UNITS) |
|---|---|---|
| MDC1055-3 | 3 ±0.3 dB | DC-4 GHz: 1.20<br>4-10 GHz: 1.30<br>10-12.4 GHz: 1.35 |
| MDC1055-6 | 6 ±0.3 dB | |
| MDC1055-10 | 10 ±0.5 dB | |
| MDC1055-20 | 20 ±0.75 dB | |
| MDC1055-30 | 30 ±1.00 dB | |



## type sma/dc to 18.0 GHz — MDC1065

**CLOSE ACCURACY**
Operating Temp. Range: −55°C to +125°C
Total Input Power: 2 watts average, 0.5kW peak
Impedance: 50 ohms
**PRICE 1 TO 9**
**$69.00 (3, 6, 10, 20 dB)**
**$79.00 all other values**

| PART NO. | ATTENUATION | VSWR (ALL UNITS) |
|---|---|---|
| MDC1065-3 | 3 ±0.3 dB | DC-4 GHz: 1.20<br>4-8 GHz: 1.30<br>8-12 GHz: 1.35<br>12.4-18 GHz: 1.50 |
| MDC1065-6 | 6 ±0.3 dB | |
| MDC1065-10 | 10 ±0.5 dB | |
| MDC1065-20 | 20 ±1.0 dB | |
| MDC1065-30 | 30 ±1.5 dB | |



## type sma/dc to 2.5 GHz — MDC1012

Operating Temp. Range: −55°C to +125°C
Total Input Power: 2 watts average, 0.5kW peak
Impedance: 50 ohms
**PRICE 1 TO 9**
**$19.95 (3, 6, 10, 20 dB)**
**$29.95 all other values**

| PART NO. | ATTENUATION | VSWR (ALL UNITS) |
|---|---|---|
| MDC1012-3 | 3 ±0.5 dB | DC-1.0 GHz: 1.20<br>1.0-2.5 GHz: 1.30 |
| MDC1012-6 | 6 ±0.6 dB | |
| MDC1012-10 | 10 ±0.6 dB | |
| MDC1012-20 | 20 ±1.0 dB | |
| MDC1012-30 | 30 ±1.5 dB | |

# midisco coaxial terminations

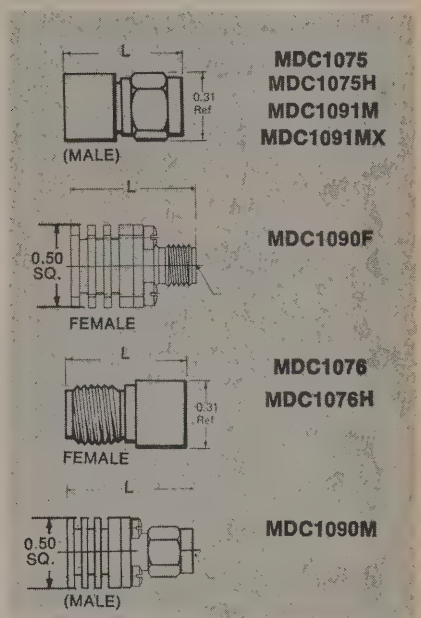
MIDISCO has accumulated the broadcast line of coaxial terminations in SMA, SNB, SNC, N, TNC and BNC. Most units are extremely broadband with low VSWR.
Mechanically, we do not know of the existence of any smaller SMA, M, TNC or BNC terminations with such good electrical characteristics. The Kwik-Slip (quick disconnect) termination provides solid fit with no threads on the coupling nut.
Bead chains are available where specified.
**All models are in stock.**

## type sma terminations (precision)
### 1/2, 2 and 5 watts

All are constructed from stainless steel material, have a temperature range of −50°C to +125°C and have an impedance of 50 ohms.

| Part No. | Finish | Average Power (Watts) | VSWR Max. DC-4 GHz[1] | 4-8 GHz | 8-12 GHz | 12-18 GHz | L | PRICE 1-9 |
|---|---|---|---|---|---|---|---|---|
| MDC1075 Precision | Passivated Coupling Nut, Gold Plated Body | ½ | 1.05 | 1.10 | 1.15 | 1.20 | .55 | $12.00* |
| MDC1075H Precision | Passivated Coupling Nut, Gold Plated Body | 2 | 1.05 | 1.10 | 1.15 | 1.25 | .69 | 25.00* |
| MDC1076 Precision | Passivated Coupling Nut, Gold Plated Body | ½ | 1.05 | 1.10 | 1.15 | 1.20 | .52 | 15.00 |
| MDC1076H Precision | Passivated Coupling Nut, Gold Plated Body | 2 | 1.05 | 1.10 | 1.15 | 1.25 | .63 | 25.00* |
| MDC1090F Precision | Passivated Coupling Nut, Black Anodized Aluminum Body | 5 | 1.05 | 1.30 | 1.50 | — | .755 | 35.00 |
| MDC1090M Precision | Passivated Coupling Nut, Black Anodized Aluminum Body | 5 | 1.05 | 1.30 | 1.50 | — | .895 | 35.00 |
| MDC1091M Ultra Miniature | Passivated | ½ | 1.05 | 1.10 | 1.15 | 1.20 | .32 | 18.00 |
| MDC1091MX Super Precision | Passivated | ½ | 1.03 | 1.04 | 1.08 | 1.12 | .32 | 35.00 |

*These items are also available with a 2.25 inch bead chain; add Suffix (-C).
Add $10 to prices shown. L=Length



## type sma/ kwik-slip termination

## MDC1075Q

The MIDISCO Kwik-Slip Termination is intended for lab or system use where it is too difficult or time consuming to use the standard (MDC1075) SMA termination. The Q Series snaps onto any SMA female connector and is rated to 18 GHz.

| | |
|---|---|
| Material: | Stainless steel, gold plated |
| Power: | 1 watt average |
| Impedance: | 50 ohms |
| Temp. Range: | −55°C to +125°C |
| VSWR: | 1.05 +0.010F (GHz) |
| Durability: | 500 cycles min. |
| Engagement Force: | 10 lbs. axial |
